I. REQUIRED TEXTBOOK

Walsh, A., & Hemmens, C. (2013). *Introduction to Criminology*. Sage. 3rd Edition

II. COURSE DESCRIPTION

This course introduces students to the study of crime, criminal behavior, and theories of crime. Also, students will gain a better understanding of a wide variation of criminal activity such as crimes against people, crimes against property, white collar crime, organized crime, and non-organized/street gangs. Further, students will be exposed to the scientific method and learn how to distinguish between primary and secondary sources of information. In the same vein, students will apply aspects of the scientific method to current events relative to criminology.

III. COURSE OBJECTIVES

At the end of this course, students will be able to:

1. Define terms related to the study of crime
2. Examine research and data collection methods used in criminology
3. Examine theories and principles of criminology
4. Distinguish between various types of crimes
5. Analyze the relationship between behavior and crime

IV. COURSE REQUIREMENTS

1) Five in Class Assignments/Discussions: 10 points each

Students will be asked to either participate in group or individual work. For any group work students will work in assigned groups of 3 to 5 individuals and complete a group assignment made up of questions and/or one discussion topic. Here you will be asked to divide the work for each assignment among yourselves and contribute substantially to the discussion. Instructions

will be discussed during class. Students will be warned two class meeting periods before any graded group work is assigned to ensure that everyone is present in class to receive credit. If you are not present you don't get any credit. Discussion topics will be provided. Further, these questions and discussions will aid you in studying for your exam.

2) Five Online Quizzes: 10 points each

Five online quizzes will be due throughout the semester and completed as individuals (No group work here). Quizzes will be timed and cannot be made up after the due date. Quizzes will not remain open during the entire semester but will only be available during specific dates (Normally about a week). The quizzes are a great tool to study for the exam, hence the quiz due dates are the class period before the tests dates.

3) Three Exams and One Final: 100 points each

Exams will be comprised of around 50 questions varying between multiple choice, true and false, matching, fill in the blank, and essay questions. Make-up exams will not be the same format as in class exams and will be comprised of short answer essay questions and fill in the blank questions with no word bank. This is not to punish anyone who needs a make-up exam the test are only formatted this way to reduce question/answer sharing. Further, make-up exams will only be given if I am contacted before the exam is missed or for legitimate reasons with associated documentation. Hence, if you know something is going to come up you have to let me know before you miss a test and have some documentation to prove it.

Further all review sessions will be held in class as a question answer forum between myself and the student and no review sheets will be provided.

There are no extra credit opportunities (unless announced for the entire class) in this course. Regardless of circumstances and or how many points are needed to go up a letter grade..

V. COURSE GRADING

Final course grades are calculated based on total points earned across all assignments outlined above:

A = 90-100%

B = 80-89.9%

C = 70-79.9%
