As a Sociologist, I have a passion for knowledge, skills, and abilities to empower the world around us. I am skilled in communication, organizing, office equipment, presentation, Microsoft programs, etc. I have not only worked as a lecturer, but behind the scenes in office settings to help and empower students on a one on one basis. I am a strong believer in using a variety of tools to teach students in and out of the class room. My passion is to impact the lives of students. I am skilled in the following, writing, researching, and analyzing. I graduated with my Masters in Sociology in August of 2012.
