The Master of Science in Accounting program is designed to provide students with the advanced study in accounting necessary to prepare for the CPA examination. This program equips students with the knowledge and skills needed in the profession of accounting.

Graduates of the MS in Accounting program are prepared for employment opportunities with industry, government, and public accounting firms.

All classes in the MS in Accounting program are taught only at the Huntsville campus.

STEM Requirements

Students seeking admission to the Master of Science in Accounting Program who do not have a baccalaureate degree in accounting from an Association to Advance Collegiate Schools of Business (AACSB International) accredited university will be required to take substantial stem courses before being allowed in the MS in Accounting program. Baccalaureate degrees from foreign universities not accredited by AACSB International are treated as non-business degrees. Additionally, graduate stem courses (5300s) do not apply to the 30-hour graduate credit hour requirement of the ACCT degree. Contact the graduate advisor for details.
