EMAIL ENCRYPTION

Select Language
Powered by Google Translate

Email is prone to disclosure of information. Email encryption protects the content of email messages from exposure to entities other than the intended recipients.

At SHSU, we use features provided in Office 365 to allow SHSU users to encrypt email on a case-by-case basis when sending to recipients *outside* of the organization.

Learn More about Email Encryption:

- Sending an Encrypted Email
- Receiving and Viewing Encrypted Email in Windows or OSx
- Viewing an Encrypted Email on Android devices
- Viewing an Encrypted Email on iOS devices
