SPAN 3374	Introduction to Literatures of Spanish America	
SPAN 3375	Genres in Spanish American Literature	
SPAN 3380	Spanish Culture & Civilization	
SPAN 3381	Spanish Literature for Children	

SPAN 3385	Spanish American Culture and Civilization	
SPAN 4364	Spanish American Prose	
SPAN 4365	Pablo Picasso & Spanish Art	
SPAN 4370	Seminar in Selected Topics Literacy, Language, and Civilization	
SPAN 4371	Spanish for Criminal Justice	
SPAN 4372	Spanish for Business	
SPAN 4373	Spanish for Mass Communication	
SPAN 4374	Spanish for Health Professions	
Total Hours		18

Minor in Middle Eastern Studies

The Middle Eastern Studies minor includes a track A (Arabic language) and a track B (non-language).

Code	Title	Hours
Minor in Middle Eastern Studies		
Track A		
Required Courses		
ARAB 1412	Elementary Arabic II	4
ARAB 2311	Intermediate Arabic I	3
ARAB 2312	Intermediate Arabic II	3
ARAB 3380	The Contemporary Arab World	3
Prescribed Electives		
Select two of the following:		6
HIST 3336	Middle East Since 1700	
HIST 3362	The Middle East, 500 - 1700	
POLS 3375	Politics of The Middle East	
SOCI 4339	Development & Sustainability	
WOLC 4363	Language Learning: Concepts & Methods	
Total Hours		19

Code	Title	Hours
Minor in Middle Eastern Studies		
Track B		
Required Courses		12
ARAB 3380	The Contemporary Arab World	
HIST 3336	Middle East Since 1700	
HIST 3362	The Middle East, 500 - 1700	
POLS 3375	Politics of The Middle East	
Prescribed Electives		
Select two of the following:		6
ARAB 4075	Individual Readings in Arabic	
HIST 3075	Independent Study	
POLS 4081	Problems in Political Science	
SOCI 4339	Development & Sustainability	
WOLC 4363	Language Learning: Concepts & Methods	
Total Hours		18

Students may take ARAB 4075, or HIST 3075 or POLS 4081 more than once for credit toward the minor if the topics are different. Topics in these courses must be on the Middle East. In addition, ARAB 1411, ARAB 1412, ARAB 2311, or ARAB 2312 may be substituted for any six hours in block 2 classes of Track B.

Minor in Spanish

A minor in Spanish requires a total of 23 hours of coursework. These include:

Code	Title	Hours
Minor in Spanish		
SPAN 1411	Elementary Spanish I	4
SPAN 1412	Elementary Spanish II	4
SPAN 2311	Intermediate Spanish I	3
SPAN 2312	Intermediate Spanish II ¹	3
Advanced SPAN courses (six hours of which must be taken in residence.) ²		9
Total Hours		23

¹ SPAN 2350 may count for SPAN 2312.

² WOLC 4363 may also be counted as an advanced course for the minor.

Foreign Language Requirement

The 12-14 semester hour requirement consists of four courses in one language: 1411 (or 1401), 1412 (or 1402), 2311, and 2312. These courses must be taken in sequence. No two courses in the series may be taken concurrently without the written approval of the Department Chair. The requirement reads "12-14 hours" to accommodate transfer students from institutions that award only 3 hours credit for each semester of the first year.

Credit-by-Examination/Placement Examination

The University offers a subject exam in order to determine the amount of credit to be given for courses which need not be taken because of adequate performance on the examination. Inquiries should be directed to the SHSU Testing Center (<https://www.shsu.edu/centers/testing-center/>).

Minor in Spanish Interpretation and Translation for Health Professions

Code	Title	Hours
Minor in Spanish Interpretation and Translation for Health Professions		
Required Courses		
SPAN 3330	Principles of Health Care Interpretation	3
SPAN 3340	Principles of Health Care Translation	3
SPAN 3361	Spanish Grammar & Composition	3
SPAN 4051	Applied Health Care Interpretation and Translation	3
SPAN 4374	Spanish for Health Professions	3
SPAN or LALS 3000 or 4000 level course		3
WOLC 3010	Applied Language Practicum	3
Total Hours		21

Notes:

Students must have permission from the Chair of the Department of World Languages and Cultures to enroll in minor courses.

Students must have ACTFL Oral Proficiency Interview-Computer rating of Advanced Low or equivalent to enroll in minor courses.

About the College

The College of Science and Engineering Technology at Sam Houston State University welcomes you! Why consider pursuing a degree from this College? Here are just a few reasons:

- You can choose from a wide variety of programs (22 undergraduate and 12 graduate degrees) in the fields of agriculture, biology, biomedical sciences, chemistry, computer science, data science, engineering technology, forensic chemistry, geography, geology, mathematics, physics, and statistics.
- Our programs will prepare you for careers in exciting and rapidly evolving fields that advance society.
- You will learn from professors who love to teach and draw from their personal and professional experience as practitioners in their areas of expertise.

We invite you to take a closer look at the programs that spark your interest. All will connect you with the innovative thinking, mentoring, leadership, and academic challenges that are hallmarks of an SHSU education.

Mission

The College of Science and Engineering Technology is committed to equipping students with the academic foundation necessary for them to be critical problem solvers in a rapidly changing world and to the generation of scientific knowledge through scholarly endeavors.

Vision

The College of Science and Engineering Technology aspires to be a gateway of opportunity and a catalyst for personal and professional development. Embracing high standards, ethical practices and personalized student-faculty interaction, the College dedicates itself to excellence in teaching, engagement in quality research, and active community service. The College of Science and Engineering Technology will pursue its vision by:

- preparing students for continued intellectual growth throughout productive and personally rewarding careers;
- fostering the development and dissemination of knowledge through scientific inquiry;
- promoting continual professional growth and scholarly activity;
- exemplifying high ethical standards and teaching the importance of ethics in professional practice;
- increasing scientific literacy in the populace, and instilling a high regard for nature and humankind;

- understanding and respecting diversity among people, cultures, and ideas; and
- assuming the responsibilities of academic community engagement and membership in a global society.

Highlights

- Faculty members in the College of Science and Engineering Technology have been recognized nationally and internationally for their expertise through national grants and awards, publications, and presentations.
- Undergraduate research is encouraged through partnerships with faculty members.
- Students in the College of Science and Engineering Technology have presented and published nationally and internationally.
- The Math Center at the Academic Success Center provides free tutoring in mathematics and statistics courses.
- The College of Science and Engineering Technology houses the Sam Houston State University Center of Excellence in Digital Forensics.
- Departments in the College of Science and Engineering Technology annually host state and regional conferences and symposiums.

Academic Programs

The College of Science and Engineering Technology provides a broad range of Undergraduate Programs, as well as Graduate Programs. The College of Science and Engineering Technology is comprised of eight academic units:

- Agricultural Sciences
- Biological Sciences
- Chemistry
- Computer Science
- Engineering Technology
- Environmental and Geosciences
- Mathematics and Statistics
- Physics and Astronomy

College of Science and Engineering Technology Undergraduate Degrees

Departments	Programs
Agricultural Business	B.S.
Agricultural Business: Ranch Management Concentration	B.S.
Agricultural Communications	B.S.
Agricultural Engineering Technology	B.S.
Animal Science	B.S.
Animal Science: Animal Care and Welfare Concentration	B.S.
Animal Science (Pre-Veterinary)	B.S.
Animal Science with Minor in Conservation Biology	B.S.
Animal Science with Minor in Wildlife Management	B.S.
Biology	B.A., B.S.
Biomedical Sciences	B.S.
Career and Technology Program	B.A.A.S.
Chemistry: Biochemistry and Medicine Concentration	B.S.
Chemistry: Forensic Science Concentration	B.S.
Chemistry (Professional Chemist)	B.S.
Chemistry (Other Technical Careers)	B.S.
Computing Science	B.S.
Computing Science: Information Assurance Concentration	B.S.
Computing Science: Information Science Concentration	B.S.
Construction Management	B.S.
Cybersecurity	B.S.
Data Science	B.S.
Electronics and Computer Engineering Technology	B.S.
Engineering Design Technology	B.S.
Engineering Technology	B.S.
Engineering Technology: Architectural Design Technology Concentration	B.S.

Engineering Technology: Biomedical Engineering Technology Concentration	B.S.
Engineering Technology: Electronics Concentration	B.S.
Engineering Technology: Environmental, Health, and Safety Management Concentration	B.S.
Engineering Technology: Manufacturing Engineering Technology Concentration	B.S.
Environmental Science: Pollution Abatement Concentration	B.S.
Environmental Science: Sustainability Concentration	B.S.
Environmental Science: Water Resources Concentration	B.S.
Forensic Chemistry	B.S.
Geography: Environmental Geography Concentration	B.A., B.S.
Geography: Geospatial Information Sciences Concentration	B.S.
Geography: Human Geography Concentration	B.A., B.S.
Geology	B.S.
Geology: Geoscience Concentration	B.S.
Interdisciplinary Agriculture	B.S.
Indisciplinary Agriculture, Agricultural Industries Concentration	B.S.
Mathematics	B.A., B.S.
Mathematics: 4+1 MS, Mathematics	B.S.
Mechanical Engineering Technology	B.S.
Physics	B.S.
Physics: Civil Engineering 2+2	B.S.
Physics: Electrical Engineering 2+2	B.S.
Physics: Mechanical Engineering 2+2	B.S.
Physics/Engineering (Dual Degree)	B.S.
Plant and Soil Sciences	B.S.
Software Engineering	B.S.

Environmental and Geosciences	Crime Analysis and Mapping
Environmental and Geosciences	Geospatial Applications

School of Agricultural Sciences

Chair: Dr. Mark J Anderson (mjanderson@shsu.edu) (936) 294-3367

Website: School of Agricultural Sciences (<https://www.shsu.edu/academics/agriculture/>)

The School of Agricultural Sciences consists of major programs of study in:

- Agricultural Sciences
 - Bachelor of Science degrees in:
 - Agricultural Business
 - Agricultural Communications
 - Agricultural Engineering Technology
 - Animal Science
 - Interdisciplinary Agriculture
 - Plant and Soil Sciences
 - The teaching option in Agricultural Education (AFNR) is available for all majors EXCEPT Agricultural Communications
 - Master of Agriculture in Sustainable Agriculture, Food and Environment
 - Master of Science in Agriculture
- Career and Technology Education - Bachelors of Applied Arts and Sciences Program [BAAS]

A number of specialized programs or majors, offer students the opportunity to tailor degree programs with career goals. Specific requirements for each degree are outlined under the respective program headings. For more information, please visit the School Agricultural Sciences (<https://www.shsu.edu/academics/agriculture/>), or contact Dr. Mark J Anderson (mjanderson@shsu.edu).

Highlights

The School of Agricultural Sciences has multiple educational centers and complexes

- The Fred L. Pirkle Engineering Technology Center has many specialized classrooms and laboratories that service the agriculture program: Agricultural Education, Agricultural Communications, Agribusiness Team Based Learning, Animal Science Physiology, Floral Design, and Wildlife Management.
- The Agriculture Center Complex has a greenhouse, covered arena, and meat science laboratory.
- The Plant Science Field Lab has two greenhouses and laboratory facilities for plant science and plant propagation.
- The William R. Harrell Agricultural Engineering Technology Center provides students with hands-on experience in wood and metal fabrication, electricity and electronics, hydraulics, structures, alternative energy resources, and soil and water conservation.
- The 1620+ acre Gibbs Ranch Education and Research Facility, located north of campus on Highway 75, serves as a living laboratory for all aspects of agricultural and natural resource education.
- The Gibbs Ranch Expansion will have two phases with Phase I will be completed in Fall 2023 and includes a new Plant & Soil Sciences head house, two modern greenhouses, a learning center, and a covered multi-purpose arena with an attached stall barn. Phase 2 includes a new equestrian center and meats/food technology laboratory.

Career Opportunities

Approximately twenty percent of the U.S. population is involved in occupations directly related to agriculture. Sectors such as production, banking, marketing, teaching, processing, and service in governmental agencies rely on the productivity of modern agriculture in meeting the daily needs of society.

Additional career information is given in the introduction to each of the degree programs in agriculture.

Suggested Minors

Numerous minors within and outside the School of Agricultural Sciences are available:

- Students seeking secondary teacher certification in agricultural science must select the Teacher Certification track. The most common major used for this purpose is Interdisciplinary Agriculture, but Teacher Certification may be used by Agricultural Business, Agricultural Engineering Technology, Animal Science, or Plant and Soil Science majors.
- Many Agricultural Business, Animal Science, Agricultural Engineering Technology, and Plant & Soil Sciences majors will select minors from program areas within the School of Agricultural Sciences (see Minor area), while others will select from the wide array of minors from various colleges.
- Agricultural Business majors have an additional option of selecting a concentration in Ranch Management in place of a minor.

- Animal Science majors frequently select a minor in Agricultural Business, Wildlife Management, Equine Science, Plant and Soil Science, or Agricultural Education Teacher Certification.
- Animal Science majors have an additional option of selecting a concentration in Pre-Veterinary or Animal Care and Welfare in place of a minor.
- Biology or Chemistry is frequently taken as a minor by Animal Science and Plant & Soil Sciences students considering graduate school.
- Agricultural Engineering Technology majors often select a minor in Agricultural Business, General Business Administration, Plant and Soil Science, Construction Management or Agricultural Education Teacher Certification.
- Agricultural Engineering Technology majors have an additional option of selecting a concentration in Power and Machinery Management.
- Agricultural Communications majors are not required to select a minor.
- Interdisciplinary Agriculture majors must select Teacher Certification or a minor from outside of the School of Agricultural Sciences.

Program-Specific Requirements

The **objectives** of the Agricultural Sciences Program are to:

- Provide high quality instruction in agricultural sciences, technology, and business;
- Promote research in agricultural sciences;
- Provide a program of continuing education for teachers of agricultural science and agricultural producers; and
- Provide educational and competitive activities for youth interested in the agricultural sciences.

For additional information regarding admission requirements, degree programs, description of courses, and financial assistance available, please refer to the appropriate sections of this catalog. Brochures and information concerning the department and scholarships may be obtained by calling (936) 294-1215 or writing:

Student Organizations

- Ag Ambassadors
- Agricultural Business Association
- Agricultural Communicators of Tomorrow
- Agricultural Engineering Technology Club
- Alpha Gamma Rho Fraternity
- Beef Cattle Show Team
- Block and Bridle
- CattleWomen
- Collegiate FFA
- Collegiate Farm Bureau
- Delta Tau Alpha - National Agricultural Honor Society
- Equestrian Team
- Horse Judging Team
- Horsemen's Association
- Livestock Judging Team
- Minorities in Agriculture, Natural Resources and Related Sciences [MANRRS]
- National Agri-Marketing Association
- National Collegiate Landscape Competition Team
- Plant and Soil Science Club
- Pre-Vet Society
- Ranch Horse Team
- Rodeo Club
- Sigma Alpha – Professional Agricultural Sorority
- Stock Horse Team
- Wildlife Society

Internships

An internship in agricultural sciences is intended to provide experience-based learning opportunities for students in their respective discipline of study. Students generally seek an internship experience at the end of their sophomore or junior year. Internships may be arranged through student contact with providers or through departmental faculty and staff announcements and postings. All internships must receive departmental approval through application prior to the initiation of the internship. Maximum credit for internship is six (6) credit hours.

Scholarships

The School of Agricultural Sciences is pleased to have available approximately 90 scholarships for students majoring in agricultural sciences.

Scholarships range in value from \$500 per year to \$16,000 over a 4-year period. Almost all of these scholarships are a one-time award and are awarded on an annual basis. A student may reapply in subsequent years if eligibility requirements are met. A few of our scholarships are renewed automatically for a period of 4 years if eligibility requirements are met.

The Scholarship4KATS (<https://www.shsu.edu/dept/financial-aid/aid/scholarships/>) application must be completed to apply for any scholarship awarded through the School of Agricultural Sciences. The program enables you to apply for all scholarships for which you are eligible, including those outside the School of Agricultural Sciences. The Priority Date for scholarships and university-wide scholarships is November 1; other scholarship deadlines vary.

(936) 294-1219

SHSU Rodeo Scholarships

The scholarships below are available through the Sam Houston Rodeo program. The application deadline is July 1. Rodeo scholarships are one-time awards and not automatically renewable. Many rodeo scholarships are skills and performance based.

Applications are available through the University's Scholarship4Kats (<http://www.shsu.edu/dept/financial-aid/scholarships/>) program.

- Byrd Family and Friends of Rodeo Scholarship
- Judge John McAdams Scholarship
- SHSU Rodeo Team Scholarship
- Joshua Farris Memorial Endowed Scholarship
- Sonny Sikes and the Sikes Family Endowed Rodeo Scholarship
- Russell and Glenda Gordy Endowed Rodeo Scholarship
- Tommy Castenson Memorial Scholarship
- Wes Neyland Memorial Endowed Rodeo Scholarship

Bachelor of Science, Major in Agricultural Business

Agribusiness is a program for students interested in management in agriculture. The agribusiness curriculum prepares students for employment in finance, ranch management, business management, state and federal agencies, risk management, sales and marketing, and many other fields related to business and economics. The program includes courses in farm and ranch management, marketing, natural resources, government policy, budgeting, finance, business organization and management, and other related courses.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-agricultural-business/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Code	Title	Hours
Bachelor of Science, Major in Agricultural Business		
Core Curriculum		
Component Area I (Communication)		6
Component Area II (Mathematics) ¹		3
Component Area III (Life and Physical Science)		8
Component Area IV (Language, Philosophy, and Culture)		3
Component Area V (Creative Arts)		3
Component Area VI (U.S. History)		6
Component Area VII (Political Science/Government)		6
Component Area VIII (Social and Behavioral Sciences) ²		3
Component Area IX (Component Area Option)		4
Degree Specific Requirements		
ACOM 3360 or ENGL 3330	Communication Skills for Agriculturists Introduction to Technical Writing	3
ECON 2301	Principles Of Macroeconomics ²	3
MATH 1324	Mathematics for Managerial Decision Making ¹	3
MATH 1342 or STAT 3379	Elementary Statistics Statistical Methods in Practice	3
Major: Foundation		
AGRI 1131	Introduction to Professional Leadership Skills	1
AGRI 1309 or MGIS 1305 or CSTE 1330	Computers in Agriculture Business Computer Applications Introduction to Computers	3
AGBU 2317	Principles of Agricultural Economics	3
AGBU 2385	Analysis of the Agricultural Sector	3
AGBU 2389 or ACCT 2302	Agribusiness Financial Analysis Principles of Managerial Accounting	3
AGBU 3361	Agribusiness Organization & Management	3
AGBU 3367	Agricultural Finance	3
AGBU 3385	Quantitative Methods for Agribusiness	3
AGBU 4340	Agribusiness Marketing	3
AGBU 4363	Agricultural Sales & Consulting	3
AGBU 4374	Agricultural Market Analysis & Prices	3
AGBU 4375	Advanced Agribusiness Management	3
AGBU 4386	Agriculture & Food Policy	3
ANSC 1319 & ANSC 1119	Animal Science and Animal Science Laboratory	4
PLSC 1307 & PLSC 1107	Plant Science and Plant Science Laboratory	4
Major: Prescribed Electives		
Select two courses from the following:		6
AGBU 4319	Agribusiness Ventures	
AGBU 4362	Natural Resource Economics	

AGRI 4364	International Agriculture
AGBU 4365	Legal Issues in Agribusiness
AGBU 4369	Special Topic
AGBU 4377	Economics of Land Use & Planning
AGBU 4378	Farm & Ranch Management

Major: Prescribed Advanced Electives

Advanced Electives from: ACOM, AGBU, AGED, AGET, AGRI, ANSC, EQSC, PLSC or WMGT 3

Minor: Required³

Minor 9

Minor (Advanced) 9

Total Hours 120

¹ MATH 1324 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and the degree specific requirements.

² Satisfies Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences).

³ The following minors cannot be paired with this degree program: Minor in Conservation Biology and Minor in Early Childhood Education.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Agricultural Business is designed to provide graduates with the following marketable skills:

- Communicate professionally both orally and in writing.
- Build teamwork and collaboration skills.
- Use analytical skills to make data-driven decisions.
- Perform feasibility and risk analyses and apply critical thinking to evaluate business opportunities.
- Execute market research and identify target markets.
- Analyze financial statements to evaluate the financial status of agribusinesses.
- Assess the impact of government policies on agribusinesses.

Bachelor of Science, Major in Agricultural Business with Ranch Management Concentration

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Agricultural Business with Teaching Certification is designed to provide graduates with the following marketable skills:

- Manage, organize, and conduct Supervised Agricultural Experience Programs and Leadership, Career, and Speaking Development Events.
- Develop annual and long range plans (program of activity, semester, and lesson plans, etc.).
- Use effective research-based techniques to develop a positive classroom environment.
- Create lessons and units of instruction to meet the Texas Essential Knowledge and Skills requirements for Agriculture, Food, and Natural Resources classes.

Bachelor of Science, Major in Agricultural Communications

This program is designed to meet the needs of students desiring a program of study in agricultural journalism, media (electronic, social, broadcast), public relations, advertising, or several other fields of study. While no minor is required, advanced elective courses permit the student to have a stronger concentration in a particular area of interest.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-agricultural-communications/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

⁹ Choose from ACOM, AGBU, AGED, AGRI, EQSC, PLSC, or WMGT to fulfill this requirement.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is **not required** for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

The following minors cannot be paired with this degree program: Minor in Conservation Biology, Minor in Early Childhood Education, and Minor in Wildlife Ecology.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Agricultural Communications is designed to provide graduates with the following marketable skills:

- Apply independent and team-working skills to accomplish objectives and meet deadlines in a variety of agricultural industry communication-related enterprises.
- Demonstrate a work ethic and soft skills that are desirable of an employee.
- Combine written and oral communication skills to effectively convey a message to the specified audience.
- Formulate agricultural literacy and advocacy approaches to properly inform and educate the general public about agriculture.

Bachelor of Science, Major in Agricultural Engineering Technology

The purpose of the Agricultural Engineering Technology curriculum is to provide an educational experience based on the fundamentals of engineering principles and practices. Theory-based lectures will be accompanied by experiential learning activities for persons who intend to pursue a career related to the technical operation and management of an agriculture enterprise. It is expected that graduates will choose a position of leadership and responsibility in a career area associated with service and sales, production, processing, product testing, alternative energies, or a government agency.

Agricultural Engineering Technology majors are required to complete the concentration in Power Machinery Management, a minor area of study or complete the Teacher Certification focus in Agricultural Education. Common minors are Agricultural Business, Plant and Soil Science, and Construction Management.

An internship in an agricultural engineering technology-related business or industry is strongly encouraged for each student. This will provide students 'real-life' learning experiences outside their regular classroom and laboratory opportunities. Students generally seek an internship experience at the end of their sophomore or junior year. Internships may be arranged through a student's contact with providers or through departmental announcements or postings. All internships must be approved by the student's departmental academic adviser prior to the initiation of the internship. Maximum credit for the internships is six (6) credit hours.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-agricultural-engineering-technology/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Major: Prescribed Electives

Select one from the following: 4

ANSC 1319 & ANSC 1119	Animal Science and Animal Science Laboratory	
PLSC 1307 & PLSC 1107	Plant Science and Plant Science Laboratory	

Advanced AGET Electives: including internship hours ³ 26-32

Minor Or Concentration: Required ^{4,5} **18-24**

Minor (18 SCH) ^{4,5}

Concentration: Power Machinery Management (24 SCH) ⁴

AGBU 3361	Agribusiness Organization & Management	
AGBU 3367	Agricultural Finance	
AGET 4385	Applied Electronics/Hydraulics	
AGET 4387	Agricultural Engines & Tractors	
AGET 4000 Approved Elective		
ETEC 3374	Time And Motion Study	

Concentration Electives

Select 6 advanced from the following: ACCT, AGBU, BUAD, FINC. or MKTG

Total Hours **120**

¹ MATH 1314 satisfies the Core Curriculum requirement for Component Area II [Mathematics] and the Degree Specific Requirement.

² Students seeking a Concentration in Power Machinery Management must select AGBU 2389.

³ Students pursuing a **minor**, take **30 semester credit hours** of approved, Agricultural Engineering Technology advanced electives, including internship hours. Students pursuing a **Concentration in Power Machinery Management**, take 24 semester credit hours approved, Agricultural Engineering Technology advanced electives, including internship hours.

⁴ Students have the option of either 1) pursuing a **minor** with **18 semester credit hours** of coursework or 2) pursuing a **Concentration in Power Machinery Management with 24 semester credit hours** of coursework.

⁵ The following minors **cannot be paired** with this degree program: Minor in Agriculture Engineering Technology, Minor in Conservation Biology, Minor in Early Childhood Education, and Minor in Wildlife Ecology.

⁶ PHYS 1401 satisfies the Core Curriculum requirement for Component Area III and the Degree Specific Requirement.

⁷ UNIV 1101 satisfies the Core Curriculum requirement for Component Area IX and the Degree Specific Requirement.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use elective and/or minor hours to satisfy the 42 advanced hour requirement.

- Use professional oral and written communication skills for the transfer of technologically-rich knowledge.

- Manage, organize, and conduct Supervised Agricultural Experience Programs, Leadership, Career and Speaking Development Events.
- Develop Annual and Long Range Plans (Program of Activity, Semester and Lesson Plans, etc.).
- Use effective research-based techniques to develop a positive classroom environment.
- Create lessons and units of instruction to meet the Texas Essential Knowledge and Skills requirements for Agriculture, Food and Natural Resources classes.

Bachelor of Science, Major in Animal Science

The major emphasis in Animal Science prepares students for careers in the livestock and equine production and support industries. Scientific principles, management, production technologies, and skills are covered in appropriate courses. The University maintains herds and flocks for teaching and research. Students may complete pre-veterinary medicine, equine science, wildlife management and conservation biology requirements under the Animal Science program. Graduates can expect to qualify for positions in sales and service, inspection, regulation, research/teaching, breed associations, extension, or management in an animal, equine and/or wildlife management industry.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-animal-science/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Animal Science is designed to provide graduates with the following marketable skills:

- Ability to make livestock management decisions based on scientific, economic, and other applicable information.
- Knowledge of each segment of the food animal and meat industry and make critical marketing decisions in each.
- Understand nutrition as it applies to animal performance and be able to develop balanced rations to meet physiological and production needs.
- Develop presentations and effectively communicate factual information, logically and concisely, both orally and in writing.
- Understand anatomy, physiology, and functions of the major organs and systems of livestock.

Bachelor of Science, Major in Animal Science: Animal Care and Welfare Concentration

--	---

Total Hours	120
--------------------	------------

¹ CHEM 1406, CHEM 1407, CHEM 1411, and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the Degree Specific requirement.

² ANSC 2360 satisfies the Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences) and the major.

³ COMS 1361 and COMS 2382 satisfy the Core Curriculum requirement for Component Area IX (Component Area Option) and the Degree Specific Requirement.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use major elective hours to satisfy the 42 advanced hour requirement.

First Year

Fall	Hours	Spring	Hours

16

Total Hours: 120

- ¹ ANSC 2360 satisfies the Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences) and the major.
- ² CHEM 1406, CHEM 1407, CHEM 1411, and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the Degree Specific requirement.
- ³ COMS 1361 and COMS 2382 satisfy the Core Curriculum requirement for Component Area IX (Component Area Option) and the Degree Specific Requirement.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use major elective hours to satisfy the 42 advanced hour requirement.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Animal Science: Animal Care and Welfare Concentration is designed to provide graduates with the following marketable skills:

- Define the laws, regulations, and responsibilities for a livestock/animal owner.
- Assess animal behavior as it relates to instinctive behavior vs behavior of distress.
- Assess and implement a plan to maintain the welfare of animals during times of disasters and emergencies.
- Demonstrate proper handling techniques for livestock/animal and the ability to access and maintain a safe environment of both animal and handler.
- Interpret the interaction of animals and humans and how it relates to society and individual well-being.

Bachelor of Science, Major in Animal Science with Teaching Certification

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.75 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must earn a "C" or better in all Education coursework.

Students must earn an overall GPA of 2.75 (overall or in the last 60 hours) to be eligible for teacher certification.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

The following minor cannot be paired with this degree program: Minor in Early Childhood Education.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Animal Science with Teaching Certification is designed to provide graduates with the following marketable skills:

• Ability to make livestock management decisions based on scientific, economic, and other applicable information.

• Knowledgeable of each segment of the food animal and meat industry and make critical marketing decisions in each.

• Understand nutrition as it applies to animal performance and be able to develop balanced rations to meet physiological and production needs.

• Develop presentations and effectively communicate factual information, logically and concisely, both orally and in writing.

• Understand anatomy, physiology, and functions of the major organs and systems of livestock.

• Manage, organize, and conduct Supervised Agricultural Experience Programs, Leadership, Career, and Speaking Development Events.

• Develop annual and long range plans (program of activity, semester, and lesson plans, etc.)

• Utilize effective research based techniques to develop a positive classroom environment.

- Create lessons and units of instruction to meet the Texas Essential Knowledge and Skills requirements for Agriculture, Food and Natural Resources classes.

Bachelor of Science, Major in Animal Science, Minor in Conservation Biology

The BS, Major in Animal Science with Conservation Biology minor is an excellent choice for those students wanting to enter agricultural and wildlife or natural resource management careers or for those interested in graduate school in wildlife sciences. Students selecting this degree should indicate Animal Science as their major and WECO as their minor.

Total Hours: 120

¹ Satisfies Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences) and the major.

² CHEM 1406, CHEM 1407, CHEM 1411, and CHEM 1412 satisfy the Core Curriculum requirements for Component Area III (Life and Physical Science) and the Degree Specific Requirement.

³ COMS 1361 and COMS 2382 satisfies three semester credit hours of the Core Curriculum requirement for Component Area IX (Component Area Option) and the Degree Specific Requirement.

⁴ 9 hours must be advanced.

⁵ Select five from the below Minor Elective course list with 6 hours advanced.

Code	Title	Hours
Minor Elective ⁵		
Select five of the following (6 hours must be advanced):		
WMGT 3350	Cervid Fawn Care	3
WMGT 3381	Game Animal Production	3
WMGT 3382	Habitat & Pond Management	3
WMGT 4096	Directed Study	1-6
WMGT 4301	Cervid Breeding and Production	3
WMGT 4302	Cervid Management	3
WMGT 4340	Exotic Animal Production	3
WMGT 4341	Upland Game Bird Management	3
WMGT 4369	Special Topic	3

Notes:

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use major elective hours to satisfy the 42 advanced hour requirement.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Animal Science, Minor in Wildlife Management is designed to provide graduates with the following marketable skills:

- Make livestock management decisions based on scientific, economic, and other applicable information.
- Knowledgeable of each segment of the food animal and meat industry and make critical marketing decisions in each.
- Understand nutrition as it applies to animal performance and be able to develop balanced rations to meet physiological and production needs.
- Develop presentations and effectively communicate factual information, logically and concisely, both orally and in writing.
- Understand anatomy, physiology, and functions of the major organs and systems of livestock.

Bachelor of Science, Major in Animal Science, Pre-Veterinary Medicine

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-animal-science/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

¹ CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the minor requirement.

² Satisfies Core Curricular requirement for Component Area II (Mathematics) and the Degree Specific Requirement.

³ Satisfies Core Curricular requirement for Component Area I (Communications).

⁴ Satisfies Core Curricular requirement for Component Area VI (U.S. History).

⁵ Select four hours from: ANSC, EQSC or WMGT.

⁶ ANSC 2360 satisfies the Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences).

⁷ COMS 1361 or COMS 2382 satisfy the Core Curriculum requirement for Component Area IX and degree specific requirement.

⁸ Satisfies Core Curriculum requirement for Component Area VII (Political Science/Government).

Notes

Students must earn a 3.0 minimum overall GPA in all coursework to remain in Pre-Veterinary concentration.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is not required for this degree, however, if a student chooses a minor, the following minors cannot be paired with this degree program: Minor in Early Childhood Education and Minor in Wildlife Ecology.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Animal Science, Pre-Veterinary Medicine is designed to provide graduates with the following marketable skills:

- Make livestock management decisions based on scientific, economic, and other applicable information.
- Knowledge of each segment of the food animal and meat industry and make critical marketing decisions in each.
- Understand nutrition as it applies to animal performance and be able to develop balanced rations to meet physiological and production needs.
- Develop presentations and effectively communicate factual information, logically and concisely, in both oral and written form.
- Understand anatomy, physiology, and functions of the major organs and systems of livestock.

Bachelor of Science, Major in Interdisciplinary Agriculture

This program is designed to meet the needs of students desiring a program of study in Agricultural Production Management, Agricultural Education, Extension Education, or any of several other fields of study. The program allows for the selection of a minor in special interest areas such as Chemistry, Biology, Business, Environmental Science, Secondary Education, or Computer Science. Specified course requirements for the major are structured to meet the specific needs of an individual student with the approval of the faculty advisor.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-interdisciplinary-agriculture/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Interdisciplinary Agriculture: Agricultural Industries Concentration is designed to provide graduates with the following marketable skills:

- Apply independent and team-working skills to accomplish objectives and meet deadlines in a variety of agricultural enterprises.
- Analyze situational aspects and engage in critical thinking skills to formulate and implement problem-solving techniques in agricultural enterprises.
- Demonstrate technical knowledge and skills necessary for entry level professionals Agricultural Business, Agricultural Communication, Agricultural Engineering Technology, Animal Science, and Plant and Soil Science.
- Collaborate with agricultural professionals to develop research based educational programs.
- Manage, organize, and conduct youth and adult educational programs.

Bachelor of Science, Major in Plant and Soil Sciences

The Plant and Soil Sciences curriculum provides an educational background to those interested in employment in fields related to production, marketing and/or management of horticultural or agronomic crops; landscape design, installation, and maintenance; and other related businesses. Employment opportunities include, but are not limited to, nursery management, greenhouse plant production, turf management, landscape design and maintenance, floral industry, field crop production or consulting, natural resource conservation programs, chemical and seed production and sales, agricultural extension, and research/teaching.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Plant and Soil Sciences is designed to provide graduates with the following marketable skills:

- Recognize soil characteristics for optimum plant growth.
- Evaluate plants of importance in our society and how those plants are utilized.
- Analyze major insect, disease and weed pests, and control strategies.
- Apply independent and team-working skills to accomplish objectives and meet organizational goals.
- Demonstrate a work ethic and soft skills that are desirable of an employee.
- Use professional oral and written communication skills for the transfer of technologically-rich knowledge.

Bachelor of Science, Major in Plant and Soil Sciences with Teaching Certification

Agriculture, Food, and Natural Resources (AFNR) Teacher Certification

The primary emphasis of the teaching certification program is the preparation of secondary teachers of Agricultural, Food, and Natural Resources (AFNR). Students gain a broad background in the agricultural sciences along with professional preparation courses in agricultural education and secondary pedagogy. This comprehensive and diverse background prepares students for a wide variety of professional agricultural careers.

The teaching certification option can be chosen with any of the agricultural emphasis majors as shown. Students seeking teaching certification may double major in Interdisciplinary Agriculture and Secondary Education or major in Agricultural Business, Agricultural Engineering Technology, Animal Science or Plant and Soil Sciences with Teacher Certification.

All students seeking teaching certification must be advised each semester to ensure proper sequencing of classes.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-plant-and-soil-sciences/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Plant and Soil Sciences with Teaching Certification is designed to provide graduates with the following marketable skills:

- Recognize soil characteristics for optimum plant growth.
- Evaluate plants of importance in our society and how those plants are utilized.
- Analyze major insect, disease, and weed pests and control strategies.
- Develop entry level technical knowledge and skills required of Agriculture, Food and Natural Resources teachers in Agricultural Communications, Agricultural Business, Agricultural Engineering Technology, Animal Science and Plant and Soil Science.
- Manage, organize, and conduct Supervised Agricultural Experience Programs, Leadership, Career and Speaking Development Events.
- Develop annual and long range plans (program of activity, semester, and lesson plans, etc.)
- Use effective research-based techniques to develop a positive classroom environment.
- Create lessons and units of instruction to meet the Texas Essential Knowledge and Skills requirements for Agriculture, Food, and Natural Resources classes.

Minor in Agricultural Business

Agricultural business knowledge is essential for operating any agricultural enterprise in today's economy. While many students may choose to major in another agricultural field, learning business skills through an agricultural business minor is an excellent complement to the technical expertise gained in an agricultural major. The Minor in Agricultural Business may be selected to accompany any approved major at Sam Houston State University except Interdisciplinary Agriculture.

Career and Technology Program: Bachelor of Applied Arts and Sciences

Coordinator: Dr. Douglas R. Ullrich (agr_dru@shsu.edu), (936) 294-1188

1. **Present evidence of the development of an area of technical specialty with an Associate of Applied Sciences [AAS] or an Associates of Occupational Studies [AOS], or an Associates of Applied Business [AAB], or an Associates of Specialized Technology [AST] degree from Texas community colleges, junior colleges and trade schools, and most out-of-state community colleges, junior colleges and trade schools are eligible. Approved transferrable AAS, AOS, AAB, and AST degrees programs must be accredited by the U.S. Department of Education Accrediting Commission of Career Schools and Colleges (ACCSC) and/or the Commission of the Council on Occupational Education (COE);**
 - a. Sixty-six semester hours (plus four semester hours of activity physical education) may be transferred from another educational institution.
 - i. A maximum of 30 hours of academic courses will transfer from a community or junior college; and,
 - ii. 36 hours of technical work-force class will transfer in-block.
 - b. The specialty title of the AAS, AOS, AAB or AST degree must be posted to the transcript for approval for entry into the BAAS program.
 - c. Students **MUST** be advised by the program coordinator to have transcripts reviewed and a declaration of major/minor submitted before full acceptance into the BAAS program is finalized.
 2. **Present evidence of completing a documented National Union apprenticeship and five years of documented work experience; - OR -**
 - a. The student will prepare a portfolio including;
 - i. National Union apprenticeship documentation; and,
 - ii. Proof of five years of documented work experience in the trades; and,
 - iii. Three letters of recommendation from former employers or supervisors verifying prior work experiences in the trades.
 3. **Present evidence of completion of 2000 or more hours of national, state or business/industry professional development and ten years of documented work experiences.**
 - a. The student will prepare a career portfolio including;
 - i. Proof of professional development from national, state or business/industry; and,
 - ii. Proof of ten years of documented work experience in the trades; and,
 - iii. Three letters of recommendation from former employers or supervisors verifying prior work experiences in the trades; and,
 - iv. Three letters of recommendation or confirmation that professional development experiences are factual and valid.
 4. **Complete a baccalaureate degree plan from residence and transfer credit which contains a minimum of 120 semester credit hours and includes the following:**
 - a. Minimum of thirty-six semester hours of advanced level credits (courses taken at the junior-senior [3000-4000] level at a senior institution).
 - b. A minor area of study in a field related to the student's technical specialty or meeting a career goal must be selected. Most any minor offered may be selected but if the selected minor does not require twenty-one advanced hours the student must take extra advanced electives to reach the required minimum of 36 advanced hours.
 - c. A nine hour internship is required if some type of field experience was not required within the technical program. If the minor department does not offer an internship, the Career and Technology Program will administer an internship or mentorship. This internship or mentorship will be part of the minimum of 36 advanced hour requirement.
 - d. A total of minimum of 36 advanced hours (3000-4000 level classes) must be taken. These hours may come in part from the minor and required internship or mentorship. Additional elective hours will be required to complete this requirement.
 - e. Complete 42 hours in general education [core], at least 12 hours of core must be taken at Sam Houston State University. Refer to section on core requirements (may include up to 30 hours of core academics from community college courses - see program coordinator for clarification).
- Bachelor of Applied Arts and Sciences (B.A.A.S.)
 - Bachelor of Applied Arts and Sciences: Criminal Justice Concentration
 - Bachelor of Applied Arts and Sciences: General Business Concentration

¹ A maximum of 66 semester credit hours are transferable. Additional General Education hours may be needed to meet 120 total SCH requirement. For more detailed information concerning General Education, Major, requirements, and transferrable courses, please, visit Career and Technology Program.

² The following minors cannot be paired with this degree program: Minor in Conservation Biology, Minor in Early Childhood Education and Minor in Wildlife Ecology.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

This degree program is administered by the Department of Agricultural Sciences in the College of Science and Engineering Technology.

Internships or Work-Based Mentorship

An internship or work-based mentorship in career and technology is intended to provide experience-based learning opportunities for students in their respective discipline of study. These internships are limited to students seeking a BAAS degree or for students with special approval. Students generally seek an internship or work-based mentorship experience at the end of their sophomore or junior year. The course identified for internship or work-based mentorship is CATM 4360 (or minor field internship) and may be arranged through student contact with providers or through departmental faculty, staff announcements, or career services postings. All internships or work-based mentorships must receive prior departmental approval. Maximum credit for internship or work-based mentorship is nine (9) credit hours, with no more than three (3) hours to be taken per semester.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BAAS is designed to provide graduates with the following marketable skills:

- Apply independent and team-working skills to accomplish objectives and meet deadlines in a variety of business settings.
- Demonstrate a work ethic and soft skills that are desirable of an employee.
- Analyze situational aspects and engage in critical thinking skills to formulate and implement problem-solving techniques in agricultural management.
- Organize human, physical, and financial resources.
- Effectively communicate factual information, logically and concisely, orally as well as in written professional formats.

Bachelor of Applied Arts and Sciences: Criminal Justice Concentration

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-applied-arts-and-sciences/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

CRIJ 2361 ²		3 General Education (As needed)	3
CRIJ 2362 ³		3	

CRIJ 2364 ³	3	
VCST 3350	3	
	15	18
Fourth Year		
Fall	Hours	Spring
Advanced CRIJ Electives		6 Advanced Electives from CRIJ or CATM
CRIJ 3378	3	
CRIJ 4385	3	
	12	9
Total Hours: 120		

¹ For more detailed information concerning General Education, Major, requirements, and transferrable courses, please, visit Career and Technology Program.

² CRIJ 2361 satisfies the Core Curriculum requirement for Component Area VIII (Social and Behavior Science).

³ The total hours reflect the inclusion of two lower-division courses – CRIJ 2362 and CRIJ 2364 – in the Criminal Justice Concentration. If the student does not have prior credit for CRIJ 2362 and CRIJ 2364, the total hours increase to 126.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

This degree program is administered by the Department of Agricultural Sciences in the College of Science and Engineering Technology.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BAAS: Criminal Justice Concentration is designed to provide graduates with the following marketable skills:

- Apply independent and team-working skills to accomplish objectives and meet deadlines in a variety of business settings.
- Demonstrate a work ethic and soft skills that are desirable of an employee.
- Analyze situational aspects and engage in critical thinking skills to formulate and implement problem-solving techniques in agricultural management.
- Organize human, physical, and financial resources.
- Effectively communicate factual information, logically and concisely, orally as well as in written professional formats.

Bachelor of Applied Arts and Sciences: General Business Concentration

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-applied-arts-and-sciences/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Bachelor of Applied Arts and Sciences: General Business Concentration

Code	Title	Hours
Requirements

MGMT 3370	Operations Management	3
MKTG 3310	Principles Of Marketing	3
Advanced General Business Electives (can include CATM 4360) ⁵		3
Total Hours		120

¹ A maximum of 66 semester credit hours are transferable. Additional General Education hours may be needed to meet 120 total SCH requirement. For more detailed information concerning General Education, Major, requirements, and transferrable courses, please, visit Career and Technology Program.

² Students transferring in or choosing BANA 2372 as a course option will need three additional hours of advanced credit.

³ ECON 2300, ECON 2301, or ECON 2302 satisfy the Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences).

⁴ MATH 1324 satisfies the Core Curriculum requirement for Component Area II (Mathematics).

⁵ Any course at the 3000 or 4000 level with a prefix from the College of Business Administration or CATM 4360.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

This degree program is administered by the Department of Agricultural Sciences in the College of Science and Engineering Technology.

Internships or Work-Based Mentorship

An internship or work-based mentorship in career and technology is intended to provide experience-based learning opportunities for students in their respective discipline of study. These internships are limited to students seeking a BAAS degree or for students with special approval. Students generally seek an internship or work-based mentorship experience at the end of their sophomore or junior year. The course identified for internship or work-based mentorship is CATM 4360 (or minor field internship) and may be arranged through student contact with providers or through departmental faculty, staff announcements, or career services postings. All internships or work-based mentorships must receive prior departmental approval. Maximum credit for internship or work-based mentorship is nine (9) credit hours, with no more than three (3) hours to be taken per semester.

First Year

Fall	Hours	Spring	Hours
Core Curriculum and/or Major (A.A.S. degree in-block transferred courses) ¹		15 Core Curriculum and/or Major (A.A.S. degree in-block transferred courses) ¹	15

		12	12

Total Hours: 120

¹ For more detailed information concerning General Education, Major, requirements, and transferable courses, please, visit Career and Technology Program.

² ECON 2300, ECON 2301, or ECON 2302 satisfy the Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences).

³ MATH 1324 satisfies the Core Curriculum requirement for Component Area II (Mathematics).

⁴ Students transferring in or choosing BANA 2372 as a course option will need three additional hours of advanced credit.

⁵ Any course at the 3000 or 4000 level with a prefix from the College of Business Administration or CATM 4360.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

This degree program is administered by the Department of Agricultural Sciences in the College of Science and Engineering Technology.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BAAS: General Business Concentration is designed to provide graduates with the following marketable skills:

- Financial literacy.
- Professional communication appropriate to a corporate environment.
- Quantitative/analytical skills as applied to the decision-making process of a firm.

Department of Biological Sciences

Chair: Aaron Lynne (aml027@shsu.edu) (936) 294-1544

Website: Department of Biological Sciences (<http://www.shsu.edu/academics/biological-sciences/>)

Mission

The Department of Biological Sciences is dedicated to the pursuit and dissemination of knowledge and scientific discovery in the life sciences through innovative teaching and research programs. The department strives to instill in its students the philosophy of lifelong scholarship, producing scientifically literate members of society who have the knowledge to contribute and compete in a rapidly changing world.

Academic Programs

Biology, the study of living things, is an exciting and dynamic field that offers many areas of focus. Students may choose to study how life functions at the molecular, cellular, organismal, or ecological levels. The biological sciences provide opportunities to study viruses, bacteria, fungi, plants, and animals and to investigate the biochemical, physiological, morphological, anatomical, behavioral, ecological, and evolutionary processes that make each organism unique.

Highlights

The Department of Biological Sciences is located in the Life Sciences Building, which houses the following teaching and research capabilities:

- microscopy (scanning electron microscopy, transmission electron microscopy, and confocal microscopy)
- molecular biology
- microbiology
- morphology

The department operates the Pineywoods Environmental Research Laboratory (PERL) , a 250-acre field station within 5 miles of campus that is dedicated to biological and environmental research and teaching. Additionally, the department is affiliated with the Sam Houston State University Natural History Collections.

Curriculum

Major in Biology

The Bachelor of Arts or Bachelor of Science in Biology are ideal degrees for students interested in gaining a broad background in the biological sciences, while allowing flexibility to focus on a specific biology sub-discipline. All students majoring in biology will develop competence in the fundamental principles of biology and will gain experience in botany, zoology, cellular biology, microbiology, genetics, ecology and evolution. Students take an active role in creating a degree plan that best meets their interests and their career goals by choosing one out of four concentrations. Most students pursue careers in terrestrial ecology, animal physiology, animal behavior, medical professions, biotechnology, or teacher education.

Required Courses for the Major

The biology major may choose from two degree programs, the Bachelor of Arts or Bachelor of Science. All majors must complete the following core courses:

Code	Title	Hours
Required Courses		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
BIOL 2110	Being a Professional Biologist	1
BIOL 2440	Introductory Cell Biology	4
BIOL 3450	Introductory Genetics	4
BIOL 4110	Undergraduate Seminar	1
or BIOL 4111	Undergraduate Seminar	
BIOL 4361	Evolutionary Biology	3
MATH 1420	Calculus I	4
MATH 1430	Calculus II	4
or MATH 3379	Statistical Methods in Practice	
or STAT 3379	Statistical Methods in Practice	
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4

CHEM 2123	Organic Chemistry I: Lab	1
CHEM 2323	Organic Chemistry I: Lecture	3
PHYS 1301	General Physics-Mechanics and Heat	3
PHYS 1101	General Physics Laboratory I	1
PHYS 1302	General Physics-Sound, Light, Electricity, and Magnetism	3
PHYS 1102	General Physics Laboratory II	1
Total Hours		49

Major in Biomedical Sciences

The Biomedical Sciences degree offered by the Department of Biological Sciences provides a robust, yet flexible curriculum with an emphasis on studying the biological basis of health and disease. All students majoring in Biomedical Sciences will develop competence in the fundamental principles of biology and will gain experience in basic biology, cellular biology, microbiology, genetics, chemistry, mathematics and evolution. The Biomedical Sciences degree is designed to thoroughly prepare students for entrance into medical, dental, pharmacy, physician assistant, and other professional schools, as well as graduate study in the biomedical sciences, and employment as a laboratory research assistant. No minor is required for the degree.

Required Courses for the Major

All Biomedical Sciences majors must complete the following core courses:

Code	Title	Hours
Course Requirements		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
BIOL 2440	Introductory Cell Biology	4
BIOL 3450	Introductory Genetics	4
BIOL 3470	General Microbiology	4
BIOL 4110	Undergraduate Seminar	1
or BIOL 4111	Undergraduate Seminar	
BIOL 4361	Evolutionary Biology	3
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4
CHEM 2323	Organic Chemistry I: Lecture	3
CHEM 2123	Organic Chemistry I: Lab	1
CHEM 2325	Organic Chemistry II: Lecture	3
CHEM 2125	Organic Chemistry II: Lab	1
CHEM 3438	Biochemistry I	4
MATH 1420	Calculus I	4
PHYS 1301	General Physics-Mechanics and Heat	3
PHYS 1101	General Physics Laboratory I	1
PHYS 1302	General Physics-Sound, Light, Electricity, and Magnetism	3
PHYS 1102	General Physics Laboratory II	1
Total Hours		56

- Bachelor of Arts, Major in Biology
- Bachelor of Science, Major in Biology
- Bachelor of Science, Major in Biomedical Sciences
- Minor in Biology
- Minor in Conservation Biology

Student Organizations

- Beta Beta Beta (TriBeta) (<https://shsu.collegiatelink.net/organization/TriBeta/>) is an undergraduate national Biological Honor society. The organization was founded in 1922 and the Delta Tau chapter at SHSU was chartered in 1965. TriBeta is dedicated to advancing the understanding and appreciation of the biological sciences and encouraging/supporting undergraduate student scientific research. TriBeta membership requires:

- a declared major in Biology or Biomedical Sciences; and
- a dedicated interest in the life sciences (associate member) or completion of at least one 3000- or 4000-level biology course with a BIO GPA of 3.0 and overall SHSU GPA of 2.75 (regular member).

Membership invitations are sent to eligible students each fall and spring semester. (jmh091@shsu.edu) Dr. Diane Neudorf (BIO_DLN@shsu.edu) serves as faculty advisor to TriBeta.

- Sam Houston Association of Medical Oriented Students (SHAMOS) (http://www.shsu.edu/~org_shamos/) membership is available to any student interested in pursuing a career in the medical or health professions. Activities include fundraisers, community service projects, blood drives with the Gulf Coast Regional Blood Center, and canned food drives. SHAMOS sponsors an outside speaker program to inform students of the opportunities and benefits of the various disciplines of the health professions (e.g., general and specialist dentistry, general and specialist medicine, occupational therapy, physician assistant, podiatry, forensic pathology, and EMS). Dr. Aaron Lynne (aaronlynne@shsu.edu) (bio_arg@shsu.edu) serves as faculty advisor to SHAMOS.

Internships and Undergraduate Research

The Department of Biological Sciences believes that "hands on" experiences, through either internships or faculty-directed undergraduate research projects, are an important complement to a student's formal coursework. Moreover, undergraduate research experience is critical for students applying to graduate programs or professional schools. We therefore strongly encourage Biology students to consider participating in an undergraduate research project. Students seeking information regarding internships and/or undergraduate research experiences should contact the Department Chair Dr. Aaron Lynne (aaronlynne@shsu.edu). Individual faculty members may be contacted for details regarding their research programs and independent research possibilities.

Academic Distinction

Graduation with "Academic Distinction in Biological Sciences" is available at SHSU. This honor is recognized at the commencement ceremony, posted to the diploma, and to the academic transcript. Requirements for earning Academic Distinction are:

- 1) Students must maintain a GPA in their major of 3.50 or above and overall GPA of 3.25 or above to be eligible for Academic Distinction.
- 2) Students must complete six hours in the Academic Distinction program by taking in sequence Senior Thesis I (BIOL 4398) and Senior Thesis II (BIOL 4399). These credits, by University rule, cannot count towards any requirement in the degree plan, i.e. they must be in addition to normal graduation requirements.
- 2) Before a student enrolls in BIOL 4398 and declares an intention to earn Academic Distinction, the student must obtain written permission from the Department Chair, the Director of the Honors College, and the Academic Dean (Dean of Science and Engineering Technology).

If you are interested in the Academic Distinction program, please contact the Department Chair.

Scholarships

Academic scholarships are available from both the Department of Biological Sciences and the University to support student studies.

The Department of Biological Sciences scholarships include:

- Biology & Environmental Science Academic Scholarship
- Emma Normand Academic Scholarship
- Everett Wilson Biology Endowment
- Harold F. Foerster Scholarship Endowment
- James D. Long Biology Endowment
- James Patrick Weber Environmental Science Award
- Patrick Neil O'Bryant Academic Scholarship
- Roy Turner Scholarship Endowment
- S.R. Warner Academic Scholarship
- William (Bill) R. Brinkley Scholarship Endowment
- Wilson-Warner Endowed Scholarship in the Biological Sciences
- Dr. James R. DeShaw Endowed Scholarship
- Christopher M. Wilson Memorial Endowed Scholarship
- Gregory E. and Mary Kay Crouch Endowed Scholarship
- G. Scott and Mary S. McCarley Endowed Scholarship

Information concerning Biology and University scholarships may be obtained by visiting Scholarship 4 Kats (<https://shsu.academicworks.com/>).

Minor: Not Required ^{5,6}		
Total Hours		120-139

¹ Satisfies 3 hours of the Core Curriculum requirement for Component Area II (Mathematics) as well as 1 hour of the Core Curriculum requirement for Component Area IX (Component Area Option).

² Satisfies the Core Curriculum requirement for Component Area III (Life and Physical Sciences)

³ WOLC 2311 or WOLC 2312 satisfies the Core Curriculum requirement for Component Area IV (Language, Philosophy, and Culture) and Component Area IX.

⁴ See, Concentration course listings below.

⁵ A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

⁶ All minors can be paired with this degree program.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

This total reflects MATH 1410 satisfying Component Area II and one hour of Component Area IX, and CHEM 1411 and CHEM 1412 satisfying Component Area III.

Total Hours:		51-54

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-degree-in-biology/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

First Year

Fall	Hours	Spring	Hours
BIOL 1406 or 1407		4 BIOL 1407 or 1406	4
CHEM 1411 ¹		4 CHEM 1412 ¹	4
ENGL 1301 ²		3 ENGL 1302 ²	3
MATH 1410 ³		4	
	15		11

Second Year

Fall	Hours	Spring	Hours
BIOL 2440		4 Component Area V	3
BIOL 3409		4 Component Area IX	3
BIOL 4374, MATH 3379, or STAT 3379		3 BIOL 2110	1
HIST 1301 ⁴		3 BIOL 3450	4
WOLC 1411 & WOLC 1412		8 HIST 1302 ⁴	3
		POLS 2305 ⁵	3
	22		17

Third Year

Fall	Hours	Spring	Hours
Concentration ⁶		4-12 Component Area VIII	3
BIOL 4361		3 BIOL 4110	1
POLS 2306 ⁵		3 Concentration ⁶	3-8
		WOLC 2311 & WOLC 2312 ⁷	6
	10-18		13-18

Fourth Year

Fall	Hours	Spring	Hours
BIOL 3470		4 Concentration ⁶	12-15
BIOL Prescribed Electives		3 BIOL Prescribed Electives	4
Concentration ⁶		9-12	
	16-19		16-19

Total Hours: 120-139¹ Satisfies the Core Curriculum requirement for Component Area III (Life and Physical Sciences).² Satisfies Core Curriculum requirement for Component Area I (Communications).³ Satisfies 3 hours of the Core Curriculum requirement for Component Area II (Mathematics) and 1 hour of the Core Curriculum requirement for Component Area IX (Component Area Option).⁴ Satisfies Core Curriculum requirement for Component Area VI (U.S. History).⁵ Satisfies Core Curriculum requirement for Component Area VII (Political Science/Government).⁶ See, Concentration course listings below.⁷ WOLC 2311 or WOLC 2312 satisfies the Core Curriculum requirement for Component Area IV (Language, Philosophy, and Culture) and Component Area IX.**Notes**

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

This total reflects MATH 1410 satisfying Component Area II and one hour of Component Area IX, and CHEM 1411 and CHEM 1412 satisfying Component Area III.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

All minors can be paired with this degree program.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BA in Biology is designed to provide graduates with the following marketable skills:

- Master the depth of knowledge required for a degree in biological sciences.
- Demonstrate critical thinking.
- Communicate effectively.
- Work collaboratively.

Bachelor of Science, Major in Biology

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-degree-in-biology/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Code	Title	Hours
Bachelor of Science, Major in Biology		
Core Curriculum		
Component Area I (Communications)		6
Component Area II (Mathematics) ¹		3
Component Area III (Life and Physical Science) (Courses for Science Majors) ²		8
Component Area IV (Language, Philosophy, and Culture)		3
Component Area V (Creative Arts)		3
Component Area VI (U.S. History)		6
Component Area VII (Political Science/Government)		6
Component Area VIII (Social and Behavioral Sciences)		3
Component Area IX (Component Area Option)		4
Degree Specific Requirements		

CHEM 1411	General Chemistry I ²	4
CHEM 1412	General Chemistry II ²	4
CHEM 2323 & CHEM 2123	Organic Chemistry I: Lecture and Organic Chemistry I: Lab	4
MATH 1420	Calculus I ¹	4
MATH 1430	Calculus II	3-4
or MATH 3379	Statistical Methods in Practice	
or STAT 3379	Statistical Methods in Practice	
PHYS 1301 & PHYS 1101	General Physics-Mechanics and Heat and General Physics Laboratory I	4
PHYS 1302 & PHYS 1102	General Physics-Sound, Light, Electricity, and Magnetism and General Physics Laboratory II	4
Major: Foundation		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
BIOL 2110	Being a Professional Biologist	1
BIOL 2440	Introductory Cell Biology	4
BIOL 3450	Introductory Genetics	4
BIOL 4110	Undergraduate Seminar	1
or BIOL 4111	Undergraduate Seminar	
BIOL 4361	Evolutionary Biology	3
Major: Prescribed Electives		
BIOL Advanced Electives (3000-4000 level courses)		6
Major: Concentration ³		36-47
Minor: Not Required ^{4,5}		
Total Hours		120-132

¹ MATH 1420 fulfills the Core Curriculum requirement for Component Area II (Mathematics) and satisfies the prerequisite requirement for MATH 1430. If MATH 1420 not taken, additional hours may be needed to fulfill degree program requirements.

² CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science).

³ See Concentration course listings below.

⁴ A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

⁵ All minors can be paired with this degree program.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

¹ MATH 1420 fulfills the Core Curriculum requirement for Component Area II (Mathematics) and satisfies the prerequisite requirement for MATH 1430. If MATH 1420 not taken, additional hours may be needed to fulfill degree program requirements.

² CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science).

³ Satisfies Core Curriculum requirement for Component Area I (Communications).

⁴ Satisfies Core Curriculum requirement for Component Area VI (U.S. History).

⁵ Satisfies Core Curriculum requirement for Component Area VII (Political Science/Government).

⁶ See Concentration course listings below.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

All minors can be paired with this degree program.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Biology is designed to provide graduates with the following marketable skills:

- Master the depth of knowledge required for a degree in the biological sciences.
- Demonstrate critical thinking.

- Communicate effectively.
- Work collaboratively.

Bachelor of Science, Major in Biomedical Sciences

Major in Biomedical Sciences

The Biomedical Sciences degree offered by the Department of Biological Sciences provides a robust, yet flexible curriculum with an emphasis on studying the biological basis of health and disease. It is designed to thoroughly prepare students for entrance into medical, dental, pharmacy, physician assistant, and other professional schools, as well as graduate study in the biomedical sciences and employment as a laboratory research assistant. No minor is required for this degree.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-biomedical-sciences/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Required Courses for the Major

The Biomedical Sciences Major must complete the following courses:

Code	Title	Hours
Bachelor of Science, Major in Biomedical Sciences		
Core Curriculum		
Component Area I (Communication)		6
Component Area II (Mathematics) ¹		3
Component Area III (Life and Physical Science) (Courses for Science Majors) ²		8
Component Area IV (Language, Philosophy, and Culture)		3
Component Area V (Creative Arts)		3
Component Area VI (U.S. History)		6
Component Area VII (Political Science/Government)		6
Component Area VIII (Social and Behavioral Sciences)		3
Component Area IX (Component Area Option)		4
Degree Specific Requirements		
CHEM 1411	General Chemistry I ²	4
CHEM 1412	General Chemistry II ²	4
CHEM 2123	Organic Chemistry I: Lab	1
CHEM 2125	Organic Chemistry II: Lab	1
CHEM 2323	Organic Chemistry I: Lecture	3
CHEM 2325	Organic Chemistry II: Lecture	3
CHEM 3438	Biochemistry I	4
MATH 1420	Calculus I ¹	4
Select one of the following:		3-4
MATH 1430	Calculus II	
MATH 3379	Statistical Methods in Practice	
STAT 3379	Statistical Methods in Practice	
PHYS 1101	General Physics Laboratory I	1

BIOL 4493	Endocrinology	
CHEM 2401	Quantitative Analysis	
CHEM 3339	Biochemistry II	
Students may only select two of the following:		
BIOL 2404	Human Anatomy & Physiology II ⁴	
BIOL 2441	Forensic Biology Concepts ⁴	
COMS 3391	Interpersonal Health Communication ⁴	
ENGL 3330	Introduction to Technical Writing ⁴	
HLTH 3360	Epidemiology ⁴	
PSYC 3333	Physiological Psychology ⁴	
PSYC 3374	Development Psychology ⁴	
Electives: Advanced General		
Advanced General Electives ³		13
Minor: Not Required ^{5,6}		
Total Hours		120-121

¹ Satisfies Core Curriculum requirement for Component Area II (Mathematics).

² Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science).

³ Students may need to use Biomedical Electives and/or General Electives to reach the 42-hour requirement for advanced credit.

⁴ No more than two of these courses may be applied toward the Biomedical Sciences degree. Students should consult with an academic advisor in the Biological Sciences early in their degree program regarding appropriate choices for their electives.

⁵ A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours will be needed above the degree program's stated total semester credit hours.

⁶ All minors can be paired with this degree program.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-biomedical-sciences/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

PSYC 3374	Development Psychology ¹	3

¹ No more than two courses may be applied toward the Biomedical Sciences degree. Students should consult with an academic advisor in the Biological Sciences early in their degree program regarding appropriate choices for their electives.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours will be needed above the degree program's stated total semester credit hours.

All minors can be paired with this degree program.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Biomedical Sciences is designed to provide graduates with the following marketable skills:

- Master the depth of knowledge required for a degree in biomedical sciences.
- Demonstrate critical thinking.
- Communicate effectively.
- Work collaboratively.

Minor in Biology

Students seeking a minor in biology are required to complete:

Code	Title	Hours
Minor in Biology		
Required Courses		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
BIOL 2440	Introductory Cell Biology	4
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4
Select three of the following:		11-12
BIOL 3409	General Ecology	
BIOL 3450	Introductory Genetics	
BIOL 3470	General Microbiology	
BIOL 4361	Evolutionary Biology	
Total Hours		31-32

Note: This minor is not available to students majoring in Biology, Biomedical Sciences, or Health Sciences.

Minor in Conservation Biology

This minor in Conservation Biology is most commonly paired with the Interdisciplinary Agriculture-Animal Science major, although not restricted to that major. A minor in Wildlife Ecology (WECO) is also available. Students in the Minor in Conservation Biology are required to take the following:

Code	Title	Hours
Minor in Conservation Biology		
Required Courses		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
BIOL 3409	General Ecology	4
BIOL 3364	Plant Taxonomy	3
BIOL 3461	Wildlife Biology	4
Select one of the following:		3-4
BIOL 4330	Aquatic Biology	
BIOL 4430	Vertebrate Natural History	
BIOL 4470	Animal Behavior	
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4
Total Hours		30-31

Notes

This minor is not available to students majoring in Biology.

Students who major in Biology can take the Wildlife Ecology minor from the Department of Agricultural Sciences.

Department of Chemistry

The Department of Chemistry is approved by the American Chemical Society.

Chair: Donovan C. Haines (haines@shsu.edu) (936) 294-1530

Website: Department of Chemistry (<http://www.shsu.edu/~chemistry/>)

Mission

The Department of Chemistry is committed to providing an educational environment conducive to scholarship, intellectual development, and the acquisition of a foundation of knowledge and techniques required of professional chemists. This goal requires the effective representation of the fundamental areas of chemistry, a dedicated and creative faculty, and support for the many functions of the department.

Academic Programs

For a listing of programs offered within the Department of Chemistry, please see the **Programs** tab on this page.

The Department of Chemistry is approved by the American Chemical Society. Chemistry majors may pursue the Bachelor of Science for Professional Chemists that leads to American Chemical Society certification and prepares students for graduate studies in traditional chemical fields. Students interested in professional schools, chemistry-associated industries, or secondary education may pursue this Bachelor of Science degree for other technical careers. The growing interest in Forensic Science has prompted the Department of Chemistry to offer a Bachelor of Science in Forensic Chemistry that is designed to prepare students for careers combining a knowledge of chemistry and the legal system. Students completing this degree can pursue opportunities in various forensic labs across the country, or can continue their education either in the graduate program in Forensic Science, or in graduate programs that are more traditional.

Highlights

- The Department of Chemistry has state of the art instrumentation for modern techniques including nuclear magnetic resonance spectrometry, x-ray diffraction, mass spectrometry, atomic absorption, fluorescence and UV-visible spectrophotometry, high performance liquid chromatography, gas chromatography, computational chemistry, and more.
- Chemistry majors work with highly quality faculty on innovative research in the chemistry research laboratories, gaining important hands-on experience solving problems, working on diverse teams, generating new knowledge in their field using the skills the students develop from their coursework, and communicating their research results. Many students present results of their research each year at meetings of professional societies like the American Chemical Society, Society of Toxicology, American Academy of Forensic Sciences, and Texas Academy of Science and some coauthor papers in professional journals.

Career Opportunities

Everything around you is composed of chemicals. We live in a world of chemicals and life would not be possible without them. An understanding of the fundamentals of chemistry is important for everyone in today's society. Professional chemists are working to enhance our quality of life by improvements in food, medicine, clothing, building supplies, products for recreation, and a whole range of consumer products.

Virtually every industry or business that makes or sells a product is involved in chemistry. It is no wonder that the various areas of chemical and biochemical technology offer the largest field of employment in the physical sciences. Chemists are employed in fields such as:

- Environmental Analysis
- Agriculture
- Biotechnology
- Pharmaceutical Research
- Waste Management
- Energy Production
- Forensic Science
- Petrochemical Industry

Chemistry graduates will find many applications for their training in the fields of education, business, industry, law, government, and medicine.

Suggested Minors

A variety of minors can complement a major in chemistry. Some of the more popular minors in recent years have been biology, criminal justice, general business, mathematics, and physics. Others have included history, political science, and psychology.

Curriculum

Chemistry students learn how to critically examine and analyze observations, to use chemical understanding to propose solutions to problems of a quantitative or qualitative nature that may arise in industry, in academia, or in various careers associated with chemistry. Students majoring in Chemistry have the opportunity for hands-on experience in working with atomic absorption, gas chromatography, high performance liquid chromatography, ultraviolet and visible spectroscopy, x-ray diffraction, 300 MHz nuclear magnetic resonance spectroscopy, mass spectrometry, ion chromatography, capillary electrophoresis, and other standard instrumentation in chemistry.

- Bachelor of Science, Major in Chemistry: Biochemistry and Medicine Concentration
- Bachelor of Science, Major in Chemistry: Forensic Science Concentration
- Bachelor of Science, Major in Chemistry for Other Technical Careers
- Bachelor of Science, Major in Chemistry for Professional Chemists

- Bachelor of Science, Major in Forensic Chemistry
- Minor in Advanced Chemistry
- Minor in Chemistry

Student Organizations

Chemistry Club - The Chemistry Club is an active organization which encourages student interactions in a social atmosphere and which supports student travel to professional meetings.

Scholarships

Scholarships are available from the Department in Chemistry and from the University to support students' studies. For further information, contact the Chair, Department of Chemistry, or visit Department of Chemistry (<http://www.shsu.edu/academics/chemistry/>). Information on University scholarships may be obtained at Office of Academic Scholarships (<http://www.shsu.edu/dept/financial-aid/scholarships/>) or telephone (936) 294-1774.

PHYS 1302 & PHYS 1102 or PHYS 1422	General Physics-Sound, Light, Electricity, and Magnetism and General Physics Laboratory II Introduction To Physics II	4
UNIV 1101	Bearkat U	1
Concentration: Prescribed Electives		12
Select 12 hours from the following:		
BIOL 2401 or BIOL 2403	Human Anatomy Human Anatomy & Physiology I	
BIOL 2402 or BIOL 2404	Human Physiology Human Anatomy & Physiology II	
BIOL 3450	Introductory Genetics	
CHEM 3367	Introduction to Inorganic Chemistry	

CHEM 4327	Polymer Chemistry	
CHEM 4380	Forensic Chemistry	
CHEM 4395	Undergraduate Research In Chemistry	
CHEM 4449	Physical Chemistry II	
MATH 1342	Elementary Statistics	
MATH 3379	Statistical Methods in Practice	
FORS 4317	Applied Statistics for Forensic Science	
Electives: Advanced General		
Advanced Electives ³		2
Minor ⁴		
Minor Required (at least 6 advanced hours) ⁵		7
Total Hours		120

¹ MATH 1420 requirement for Core Curriculum Component Area II (Mathematics) as well as one hour of Component Area IX (Component Area Option).

² CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirements for Component Area III (Life and Physical Science) and the Degree Specific requirement.

³ 2 hours, more if non-advanced prescribed electives are selected.

⁴ The following minors cannot be paired with this degree program: Minor in Chemistry.

⁵ A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000 and 4000-level courses. A minor in Biology, as a common example, requires 7 additional hours beyond BIOL 1406, BIOL 1407, CHEM 1411, CHEM 1412, and BIOL 3450 (which can be selected as prescribed elective).

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, and CHEM 4448, and in all required Physics and Mathematics courses.

A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in an approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000 and 4000-level courses.

First Year

		16	15

Total Hours: 120¹ Satisfies the requirement for Core Curriculum Component Area III: Life and Physical Science.² Satisfies the requirement for Core Curriculum Component Area I: Communications.³ Satisfies the requirement for Core Curriculum Component Area II: Mathematics as well as one hour of Component Area IX (Component Area Option).⁴ Satisfies the requirement for Core Curriculum Component Area VII: Political Science/Government.⁵ Satisfies the requirement for Core Curriculum Component Area VI: U.S. History.⁶ 2 hours, more if non-advanced prescribed electives are selected.⁷ A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000 and 4000-level courses. A minor in Biology, as a common example, requires 7 additional hours beyond BIOL 1406, BIOL 1407, CHEM 1411, CHEM 1412, and BIOL 3450 (which can be selected as a prescribed elective).

The following minors cannot be paired with this degree program: Minor in Chemistry.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, and CHEM 4448, and in all required Physics and Mathematics courses.

A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in an approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000 and 4000-level courses.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Chemistry: Biochemistry and Medicine Concentration is designed to provide graduates with the following marketable skills:

- Work safely with standard chemicals in a chemistry or biochemistry laboratory.
- Keep thorough and accurate records of chemistry and biochemistry experiments.
- Write final research reports and orally present results of experiments.
- Analyze and interpret experimental data, including spectrophotometric data and kinetic data.
- Manipulate enzyme function for use in chemistry, biochemistry, or medicine.

² CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the Major requirement.

³ Or general elective.

⁴ A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in an approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000- and 4000-level courses. A minor in MATH, as a common example, requires 10 additional hours beyond MATH 1420 and MATH 1430.

⁵ The following minor cannot be paired with this degree program: Minor in Chemistry.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2123, CHEM 2125, CHEM 2323, CHEM 2325, CHEM 2401, CHEM 4448, and in all required Physics and Mathematics courses.

A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in an approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000- and 4000-level courses.

A minor generally requires six semesters of coursework, a minimum of 18 credits (six advanced) in an approved field. Students should use elective and minor hours to satisfy the 42 advanced hour requirement. Advanced hours are 3000- and 4000-level courses.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state’s **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Chemistry for Professional Chemists is designed to provide graduates with the following marketable skills:

- Work safely with standard chemicals in a chemistry laboratory.
- Keep thorough and accurate records of chemistry experiments.
- Write final research reports and orally present results of experiments.
- Analyze and interpret experimental data, including spectrophotometric data.
- Understand the use of the major methods of purification of chemical compounds, including chromatographic techniques.

Bachelor of Science, Major in Forensic Chemistry

Students seeking background and training in the area of forensic science can obtain a Bachelor of Science degree in Forensic Chemistry with either a Criminal Justice minor or a Forensic Science minor. This degree option educates students for careers in forensic chemistry in both private and government arenas and also prepares students to enter graduate schools in forensic science.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-forensic-chemistry/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

¹ Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science) and the Major requirement.

² Satisfies Core Curriculum requirement for Component Area I (Communications).

³ Satisfies Core Curriculum requirement for Component Area II (Mathematics) and the Degree Specific requirement.

⁴ Satisfies Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences). Students who are Forensic Science minors may choose a different Area VIII course, for Criminal Justice minors this course counts both in the core and in the minor.

⁵ Satisfies Core Curriculum requirement for Component Area VII (Political Science/Government).

⁶ The following minor cannot be paired with this degree program: Minor in Chemistry.

- 7 Students who are interested in the graduate programs in Forensic Science at SHSU are encouraged to take BIOL 3470 and either BIOL 4480 or BIOL 4381 as advanced electives. Students seeking licensing as Forensic Analysts are encouraged to take FORS 4317 (or alternatively MATH 3379) to meet statistics requirements to take the licensing exam (the most up to date licensing requirement (<https://www.txcourts.gov/fsc/licensing/>)). Course selections in minor and electives must ensure at least 42 advanced hours for degree.
- 8 Satisfies the Core Curriculum requirement for Component Area VI (History).

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, CHEM 4448 and CHEM 4440, and in all required Physics and Mathematics courses.

This sequence has a built-in minor in Criminal Justice, with alternatives for Forensic Science minors listed. Students should use the elective hours to satisfy the 42-advanced hour requirement. Advanced hours are 3000 and 4000-level courses.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Forensic Chemistry is designed to provide graduates with the following marketable skills:

- Work safely with standard chemicals in a chemistry laboratory.
- Keep thorough and accurate records of chemistry experiments.
- Write final research reports and orally present results of experiments.
- Analyze and interpret experimental data, including spectrophotometric data.
- Understand the use of the major methods of purification of chemical compounds, including chromatographic techniques.

Minor in Advanced Chemistry

The Minor in Advanced Chemistry allows students in chemistry degree plans not certified by the American Chemical Society (ACS) to add the courses needed to obtain that organization's certification. The Minor in Advanced Chemistry includes four courses required for ACS Certification that are not already in the Forensic Chemistry major degree plan, plus six hours of advanced chemistry electives. The minor can be paired with other majors as long as at least six advanced hours in the minor are taken beyond the major's requirements.

Code	Title	Hours
Minor in Advanced Chemistry		
Required Courses		
CHEM 4260	Advanced Integrated Laboratory	2
CHEM 4327	Polymer Chemistry	3
CHEM 4395	Undergraduate Research In Chemistry	3
CHEM 4449	Physical Chemistry II	4
Prescribed Electives		
Advanced Chemistry Electives		6-8
Total Hours		18-20

Minor in Chemistry

A minor in Chemistry requires a minimum of six semesters of coursework and shall include:

Code	Title	Hours
Minor in Chemistry		
Required Courses		
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4

CHEM 2323 & CHEM 2123	Organic Chemistry I: Lecture and Organic Chemistry I: Lab	4
CHEM 2325 & CHEM 2125	Organic Chemistry II: Lecture and Organic Chemistry II: Lab	4
CHEM 2401	Quantitative Analysis	4
Advanced chemistry including one advanced laboratory course		6-7
Total Hours		26-27

Note: A grade of C or higher is required for CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, and CHEM 2125.

Department of Computer Science

The Bachelor of Science in Computing Science is accredited by the Computing Accreditation Commission of ABET (<http://www.abet.org>).

Sam Houston State University is designated as a National Center of Academic Excellence in Cyber Defense Education (CAE-CDE) (<http://www.nsa.gov/resources/students-educators/centers-academic-excellence/>) for the B.S. Degree in Computing Science, concentration in Information Assurance (IA), by the National Security Agency (NSA) and the Department of Homeland Security (DHS).

Chair: Dr. Bing Zhou (bxz003@shsu.edu) (936) 294-1590

Websites: Computer Science (<http://cs.shsu.edu/>) / (<http://cs.shsu.edu/>) Digital Forensics (<http://df.shsu.edu/>)

Mission

The Department of Computer Science is a community of faculty, staff, and students, centered in the computer science disciplines. The Department of Computer Science is dedicated to providing the highest quality education possible to its graduate and undergraduate students through excellence in teaching and excellence in research. The department is committed to furthering the pursuit of knowledge and meeting the needs of a diverse society.

The Department of Computer Science seeks to provide an environment that encourages innovative thinking, academic rigor, and the pursuit of scholarship in an atmosphere that promotes high ethical and moral values and mutual respect, embracing diversity, and working towards a goal of instilling a life-long love of learning.

Academic Programs

The Computing Science program offers major study plans for students wishing to pursue careers in industry or government (as programmers/analysts/software engineers, as network and database administrators, and as digital forensics and information security professionals), or to prepare for advanced studies at the graduate level. Minor study plans are offered which can be tailored to the needs of students majoring in almost any field.

The Bachelor of Science in Computing Science at Sam Houston State University has been accredited by the Computing Accreditation Commission of ABET, Inc., the recognized accreditor of college and university programs in applied science, computing, engineering, and technology. ABET accreditation demonstrates a program's commitment to providing its students with a quality education. Students can elect to concentrate in Computing Science, Information Systems, or Information Assurance.

The **Bachelor of Science in Software Engineering** is designed to provide the skills and competencies required by students wishing to prepare for careers in software development.

The **Bachelor of Science in Cybersecurity** prepares students for professional work in business and industry, as well as government and law enforcement, as a digital forensic analyst; including the collection, preservation, analysis, and reporting of digital evidence.

Highlights

Sam Houston State University provides a comprehensive computing environment for students. The Office of Information Technology Services operates a large number of computing laboratories containing desktop computers, and workstations. A variety of operating systems, network protocols, programming languages, and application packages are available. Students have full access to the Internet and E-mail facilities when on campus and through remote access facilities from off-campus. In addition to the institutional facilities, the Department of Computer Science operates a range of lab facilities to support its mission and programs, including network robotics and Unix/Linux labs, a data recovery lab and a network security lab. The department operates a 40-node symmetric multiprocessing system for use in parallel processing, digital forensics, cryptanalysis, and steganographic research. The department also has access to state-of-the-art virtualization facilities. As part of its operations, the department of Computer Science houses the Sam Houston State University Cyber Forensics Intelligence Center (CFIC), a center dedicated to the development of digital forensics training for law enforcement personnel and research opportunities into forensics and security issues.

Career Opportunities

Computing professionals support many scientific, governmental, and commercial enterprises through network and communication systems management, application (computer programs) development and maintenance, and hardware design. The management of computing resources within organizations is typically a mission-critical activity and computing professionals occupy key organizational roles as network and database administrators, software engineers, systems analysts, and programmers. Of key concern in today's modern environment is the protection, assurance, and recovery of computing resources, providing opportunities for those wanting to work in the information assurance and digital forensics fields.

Program Specific Requirements

The baccalaureate degree in Computing Science has the following program-specific requirements:

Mathematics

Code	Title	Hours
Course Requirements		
MATH 1420	Calculus I	4
MATH 1430	Calculus II	4
MATH 2395	Discrete Mathematics	3
Advanced MATH/STAT		3
STAT 3379	Statistical Methods in Practice	3
Total Hours		17

Science

Code	Title	Hours
Course Requirements		
Science		8

- Bachelor of Science, Major in Computing Science
- Bachelor of Science, Major in Computing Science: 4+1 MS Computing and Data Science
- Bachelor of Science, Major in Computing Science (Information Assurance, IA)
- Bachelor of Science, Major in Computing Science (Information Assurance, IA): 4+1 MS Computing and Data Science
- Bachelor of Science, Major in Computing Science (Information Systems, IS)
- Bachelor of Science, Major in Computing Science (Information Systems, IS): 4+1 MS Computing and Data Science
- Bachelor of Science, Major in Cybersecurity
- Bachelor of Science, Major in Software Engineering
- Minor in Computer Science: Computer Sciences, CS
- Minor in Computer Science: Information Systems, IS
- Minor in Computer Science: Information Assurance, IA

Student Organizations

The student chapter ACM@SHSU provides a learning environment through speakers and special projects that unite students, professors, and industry professionals. These relationships help promote the sharing of knowledge and skills related to computer science. The student chapter sponsors field trips, campus visits by guest speakers, and occasional student/faculty outings.

Internships

While the Computer Science department does not operate internships as a designated part of its degree programs, a number of students have been successful in obtaining internships with the FBI, Austin Department of Public Safety, and a number of commercial organizations.

Scholarships

The Department of Computer Science offers the following scholarships:

- **The Computer Science Scholarship:** awarded to full-time undergraduate students working toward a degree in Computer Science with an overall GPA above 3.0.
- **The Johnny Cook Kelly Memorial Scholarship:** awarded to full-time undergraduate computer science majors with a preference given to students from Walker County.

Each of these scholarships requires a minimum GPA of 3.0 and registration in courses leading to a degree in Computer Science. Other criteria are also pertinent to individual scholarships. More information can be obtained through the department.

Director/Chair: **Bing Zhou**

Min Kyung An, PHD (an@shsu.edu), Associate Professor of Computer Science, Department of Computer Science, PHD, Univ of Texas At Dallas; MS, Univ of Texas-Arlington; BS, Jeju National University

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics), one semester credit hour of the Core Curriculum requirement for Component Area IX (Component Area Option), and the Degree Specific requirement.

² Students who are not eligible for enrollment in MATH 1420 will have additional mathematics requirements.

³ A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credit hours may be needed above the degree program's stated total semester credit hours.

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The minimum number of credit hours required for a baccalaureate degree is 120. The minimum number of advanced credit hours for a baccalaureate degree is 42. Students may take free elective courses beyond the hours identified in the recommended 4-year plan to meet the overall credit hour and advanced credit hour requirements.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-computing-science/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

¹ Satisfies Core Curriculum requirement for Component Area I (Communications).

² Satisfies the Core Curriculum requirement for Component Area II (Mathematics), one semester credit hour of the Core Curriculum requirement for Component Area IX (Component Area Option), and the Degree Specific requirement. Students who are not eligible for enrollment in MATH 1420 will have additional mathematics requirements.

³ Satisfies Core Curriculum requirement for Component Area VI (U.S. History).

⁴ Satisfies Core Curriculum requirement for Component Area VII (Political Science/Government).

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

The minimum number of credit hours required for a baccalaureate degree is 120. The minimum number of advanced credit hours for a baccalaureate degree is 42. Students may take free elective courses beyond the hours identified in the recommended 4-year plan to meet the overall credit hour and advanced credit hour requirements.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Computing Science (Computing Science, CS) is designed to provide graduates with the following marketable skills:

- Software design.
- Database management.
- Complex problem-solving.
- Application of theoretical principles to the development of technological problems.
- Technical communication.

Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Computing Science (Information Assurance, IA): 4+1 MS in Computing and Data Science is designed to provide graduates with the following marketable skills:

- Solving complex technology-related problems.
- Applying theoretical principles to the software engineering process.
- Technical communication.
- System and network defense.
- Identify and solve complex computing problems in information technology, business, medicine, and other essential industries.
- World-class soft skills in complex problem-solving, communication, and creative thinking.
- Strong technical skills and interpersonal skills to work as a group.
- Superior technical writing skills to document and publish their findings.

Total Hours		120

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics), one semester credit hour of Component Area IX (Component Area Option), and the Degree Specific requirements.

² Students who are not eligible for enrollment in MATH 1420 will have additional mathematics requirements.

³ A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credit hours may be needed above the degree program's stated total semester credit hours.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The minimum number of credit hours required for a baccalaureate degree is 120. The minimum number of advanced credit hours for a baccalaureate degree is 42. Students may take free elective courses beyond the hours identified in the recommended 4-year plan to meet the overall credit hour and advanced credit hour requirements.

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics), one semester credit hour of the Core Curriculum requirement for Component Area IX (Component Area Option), and the Degree Specific requirement.

² Students who are not eligible for enrollment in MATH 1420 will have additional mathematics requirements.

³ Students planning to pursue the 4+1 CDS option must complete the Graduate Application process and be accepted to the MS in CDS program. In order to apply to the 4+1 CDS program students must complete all undergraduate degree plan requirements (minimum of 120 semester credit hours) and all admission requirements. Once a student is accepted to the graduate CDS program, students are eligible to begin the CDS program upon completion of all admission requirements. The graduate program will begin in the Summer I semester term each year and will run as a cohort model. Students may apply to the program while coursework is in-progress but may not begin the graduate CDS program until the 120 semester credit hours are completed.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students who are preparing to apply to graduate CDS programs should earn a "C" or better in their coursework. All CS majors and/or minors must earn a "C" or better for all COSC/DFSC courses and all CDS prospective students must earn a "C" or better in all pre-requisite courses.

The minimum number of credit hours required for a baccalaureate degree is 120. The minimum number of advanced credit hours for a baccalaureate degree is 42. Students may take free elective courses beyond the hours identified in the recommended 4-year plan to meet the overall credit hour and advanced credit hour requirements.

Minor in Computer Science: Computer Sciences (CS)

A Computer Science Minor consists of 22 or more hours of Computer Science coursework of which at least 9 hours must be advanced. Students are recommended to take COSC 4349 as an advanced course. Modifications may be made to meet individual student needs as approved by the Computer Science Department Chair. Individualized minor plans are available for students seeking a Computer Science minor for Certification.

Minor in Computer Science: Information Assurance (IA)

A Computer Science Minor consists of 22 or more hours of Computer Science coursework of which at least 9 hours must be advanced. Students are recommended to take COSC 4349 as an advanced course. Modifications may be made to meet individual student needs as approved by the Computer Science Department Chair. Individualized minor plans are available for students seeking a Computer Science minor for Certification.

Department of Engineering Technology

Department Chair: Dr. Faruk Yildiz (fxy001@shsu.edu)

Contact Information: (936) 294-1216 and (936) 294-1191

Website: Department of Engineering Technology (<http://www.shsu.edu/academics/engineering-technology/>)

Mission

The mission of the Engineering Technology Department is to provide an educational program designed to provide academic and practical experiences in the areas of engineering design and development, electronics and computer engineering technology, construction management, mechanical engineering technology, leadership, management, and safety to meet industry challenges and needs.

Highlights

The Department of Engineering Technology has a study abroad program in South Korea and Costa Rica in which students can study Construction and Technology/Engineering Management and can experience the culture and approach to engineering technology education overseas.

The Department of Engineering Technology offers courses in multiple specialized state of the art laboratory and research facilities.

- The Fred L. Pirkle Engineering Technology Center (PIRK) provides space for several specialized classrooms and laboratories.
 - The computer-aided design and drafting (CAD) laboratories provide students with experiences in construction, architectural, and engineering design software tools, design and drafting tools, and rapid prototyping equipment.
 - Electricity, electronics, automation and control, instrumentation, and robotic courses are offered in the Electronics and Robotics laboratories
 - Energy systems courses and workshops are offered in the Energy Systems and Sustainability laboratories as well as the Energy Terrace
 - The Innovation Laboratory provides the infrastructure and cutting edge equipment/tools necessary for capstone research projects
 - Rapid Prototyping lab
 - Wind Tunnel lab
- The Westmoreland Engineering Technology Laboratory (WETL)
 - Drafting and design, surveying, electrical and renewable energy technologies
 - Metal, wood, and concrete construction for residential and commercial structures
 - Manual and computer numerical control (CNC) machining and material testing
 - Plastics injection molding lab
- The Farrington Building (FARR)
 - Engineering mechanics (statics and strength of materials)
 - Engineering materials
- Engineering Technology Annex C
 - Mechanical Engineering Technology Lab
 - Manufacturing Engineering Technology Lab
 - Fluid Powers Lab
 - Heating, Ventilation, and Air Conditioning (HVAC)
- Engineering Technology Annex A

- Construction Materials Lab
- Safety Research & Technology Lab
- Virtual Reality Engineering Lab
- Engineering Technology Annex B
- Concrete and Masonry Lab

Career Opportunities

- Architectural Design
- Automation and Control
- Computer Hardware and Software
- Construction Management
- Electrical and Mechanical Systems
- Engineering Design
- Industrial Design and Development
- Industrial Education and Training
- Industrial Robotics
- Instrumentation and Data Acquisition Systems
- Manufacturing
- Mechanical Engineering Technology
- Environmental Health and Safety
- Power and Energy Systems
- Product Design
- Sales and Marketing of Industrial Products

Engineering Technology students learn to draw upon the principles of management, leadership, physical and applied sciences, technology of industry, and basic engineering for the solution of problems involving industrial products, services, materials and processes, and the supervision and management of facilities and personnel.

Suggested Minors

Engineering Technology students may choose minors from program areas within the department (see Minor area), or students may opt for a minor outside the department. Advisors may suggest options that compliment an Engineering Technology degree, but the choice is up to the student.

Program Specific Requirements

For additional information regarding admission requirements, degree programs, description of courses, and available financial assistance, please refer to the appropriate sections of this catalog. Brochures and information concerning the department and scholarships may be obtained by calling (936) 294-1216 and (936) 294-1191 or writing:

Sam Houston State University

Department of Engineering Technology, PO Box: 2088
Huntsville, Texas 77341-2088

- Bachelor of Science, Major in Construction Management
- Bachelor of Science, Major in Electronics and Computer Engineering Technology
- Bachelor of Science, Major in Engineering Design Technology
- Bachelor of Science, Major in Engineering Technology
- Bachelor of Science, Major in Engineering Technology: Architectural Design Concentration
- Bachelor of Science, Major in Engineering Technology: Biomedical Engineering Technology Concentration
- Bachelor of Science, Major in Engineering Technology: Electronics Concentration
- Bachelor of Science, Major in Engineering Technology: Environmental, Health, and Safety Management Concentration
- Bachelor of Science, Major in Engineering Technology: Manufacturing Engineering Technology Concentration
- Bachelor of Science, Major in Mechanical Engineering Technology
- Minor in Architectural Design Technology
- Minor in Construction Management

- Minor in Electronics
- Minor in Engineering Design Technology
- Minor in Industrial Safety Management
- Minor in Manufacturing Engineering Technology
- Minor in Trades and Industry Certification

Student Organizations

- Katatronics Robotics (KatatroniX)
- Sam Houston Construction Association (SHCA)
- Renewable and Clean Energy Association (RCEA)
- Society for Women in Excellence in Engineering and Technology (SWEET)
- Engineering Technology Ambassadors
- Virtual Reality (VR)

Internships

The internship program is intended to provide experience-based learning opportunities for students in their respective discipline of study. Students generally seek internship experience at the end of their junior or senior year. Internships may be arranged through student contact with providers or through departmental faculty and staff announcements and postings. All internships must receive departmental approval through application prior to the initiation of the internship. Maximum credit for an internship is six (6) credit hours, and it may be used towards graduation.

Scholarships

The department is pleased to have several scholarships in value up to \$5,000 per academic year available for students majoring in engineering technology-related degrees. These scholarships are a one-time award and are awarded on an annual basis. A student may reapply in subsequent years if eligibility requirements are met.

The Scholarships 4 Kats (<http://www.shsu.edu/dept/financial-aid/scholarships/>) program must be used to apply for departmental scholarships. The program enables you to apply for all scholarships for which you are eligible, including those outside the Department of Engineering Technology. The deadline for departmental scholarships and university-wide scholarships are announced through Scholarships 4 Kats; (<http://www.shsu.edu/dept/financial-aid/scholarships/>) non-departmental scholarship deadlines vary.

¹ MATH 1314 or MATH 1316 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and the Degree Specific requirement.

² A minor is **not required** for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours will be needed above the degree program's stated total semester credit hours.

³ All minors can be paired with this degree program.

⁴ B.S. Construction Management major students are not required to take ETEC 4099 Engineering Innovation (1 credit Hour) as a pre-requisite for this class.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use elective and/or minor hours to satisfy the 42 advanced hour requirement.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-construction-management/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

All minors can be paired with this degree program.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Construction Management is designed to provide graduates with the following marketable skills:

- Complete a project on time, within budget, and of required quality.
- Interpret construction documents for materials and quantities.
- Demonstrate leadership, teamwork, and effective communication skills.
- Recognize professional, ethical, and social responsibilities, and diversity.
- Administer safety awareness and regulatory compliance.
- Acquire knowledge through applied industry experiences, services, and life-long learning.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Engineering Design Technology is designed to provide graduates with the following marketable skills:

- Conduct engineering design using Computer Aided Design (CAD) tools.
- Fabricate prototypes via various manufacturing processes and equipment.
- Communicate effectively in both written and verbal forms.
- Work collaboratively in a team environment.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Engineering Technology - Concentration in Architectural Design Technology (ADT) is designed to provide graduates with the following marketable skills:

- Integrated Design Proficiency: Skill in creating detailed architectural plans, utilizing 3D modeling tools (e.g., AutoCAD, SketchUp, Revit) and coordinating seamless integration of structural, electrical, and mechanical designs.
- Code Compliance and Regulations: Ability to navigate and apply building codes and regulations effectively, ensuring designs meet local and national standards.
- Project Management and Communication: Competence in project management, including estimating and scheduling, coupled with strong communication skills to convey design concepts convincingly to stakeholders.
- Sustainable Design and Energy Modeling: Knowledge of sustainable design principles and practices coupled with the ability to use energy modeling tools for assessing environmental impacts in architectural projects.
- Problem-Solving and Adaptability: Capacity to identify and solve complex design challenges coupled with a commitment to continuous learning and adaptability to evolving industry trends and technologies.

	15		12

Total Hours: 121

¹ MATH 1316 or MATH 1314 or MATH 1420 or MATH 1324 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and the Degree Specific requirement. MATH 1420 will also satisfy one semester credit hour of Core Curriculum Component Area IX (Component Area Option).

² All minors can be paired with this degree program.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use elective and/or minor hours to satisfy the 42 advanced hour requirement.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Engineering Technology - Concentration in Electronics is designed to provide graduates with the following marketable skills:

- Select and effectively apply modern electric, electronics, controls, and computer devices and systems.
- Test and troubleshoot for effective and efficient operations of analog, digital, microcontroller and communication circuits and systems.
- Embed state-of-the-art automation, robotics, instrumentation, and data acquisition hardware and software tools into industrial environments.
- Prepare technical reports, product manuals, and testing instructions; and communicate effectively.
- Learn about and practice safety and supervisory skills related to electronics.

Bachelor of Science, Major in Engineering Technology - Concentration in Environmental, Health, and Safety Management

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-engineering-technology/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Total Hours: 121

¹ ENGL 1301 and ENGL 1302 satisfy the Core Curriculum requirement for Component Area I (Communication).

² If taking MATH 1314, MATH 1316, or MATH 1324 to satisfy the Component Area II requirement, then take 4 hours in Component Area IX. If taking MATH 1420, then take 3 hours in Component Area IX. Total hours must sum to 120.

³ MATH 1316 or MATH 1314 or MATH 1420 or MATH 1324 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and the Degree Specific requirement.

⁴ HIST 1301 and HIST 1302 satisfy the Core Curriculum requirement for Component Area VI (U.S. History).

⁵ POLS 2305 and POLS 2306 satisfy the Core Curriculum requirement for Component Area VII (Political Science/Government).

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use elective and/or minor hours to satisfy the 42 advanced hour requirement.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Engineering Technology - Concentration in Safety Management is designed to provide graduates with the following marketable skills:

- Apply concepts of safety and risk management to prioritize resources, reduce costs and minimize occupational hazards.
- Anticipate, recognize, evaluate, and control hazardous conditions that affect workers, properties and/or work environments.
- Demonstrate safety leadership skills, teamwork, and effective communication skills.
- Identify and apply applicable safety standards, regulations, and codes in industrial settings.
- Apply engineering technology and strategies to resolve issues of ethics and social responsibility.
- Integrate professional, ethical, and social responsibilities as a professional in the field.
- Obtain continuous learning skills through applied industry experiences, safety case studies, and past incident records

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The BS in Engineering Technology - Manufacturing Engineering Technology Concentration is designed to provide graduates with the following marketable skills:

- Knowledge and hands-on experience in various manufacturing processes such as machining, plastic processing, and 3D printing.
- Skills in product design and development and the product life cycle.
- Skills in the plant layout for high efficiency production.
- Skills in material testing and properties measurement following industrial standards.
- Automation and control of manufacturing equipment.
- Demonstrate leadership, teamwork, and effective communication skills.

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours will be needed above the degree program's stated total semester credit hours.

All minors can be paired with this degree program.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Mechanical Engineering Technology is designed to provide graduates with the following marketable skills:

- Advanced mechanical discipline knowledge.
- Application of design and analysis concepts to mechanical engineering and technology.
- Familiarity with manufacturing processes and equipment.
- Knowledge of industry standards, quality assurance, and ethics.
- Critical thinking skills.
- Ability to logically solve practical problems.

Minor in Architectural Design Technology

The Minor in Architectural Design Technology requires a total of 21 hours of coursework, which includes the following:

Code	Title	Hours
Minor in Architectural Design Technology		
ETDD 1361	Engineering Graphics	3
ETCM 2363	Architectural Design	3
ETCM 3372	Construction Drafting	3
ETCM 4371	Building Information Modeling	3
INDS 3377	Interior Codes & Standards	3
Approved Advanced ETCM or INDS Electives		6
Total Hours		21

Minor in Construction Management

The Minor in Construction Management consists of the following courses:

Code	Title	Hours
Minor in Construction Management		
ETCM 1363	Wood Frame Construction	3
ETCM 2363	Architectural Design	3
or ETCM 3372	Construction Drafting	
ETCM 3368	Concrete/Masonry Construction	3
ETCM 4330	Construction Equipment & Procedures	3
ETCM 4368	Building Materials	3
ETCM 4370	Construction Plans & Documents	3
ETCM 4371	Building Information Modeling	3
Total Hours		21

Minor in Electronics

A Minor in Electronics consists of the following courses:

Code	Title	Hours
Minor in Electronics		
ETEE 1340	Introduction to Circuits	3
ETEE 2320	Circuits and Systems	3
ETEE 3313	Industrial Robotics	3
or ETEE 4355	Electronic & Digital Communication	
ETEE 3345	Digital Electronics	3
ETEE 3350	Analog Electronics	3
ETEE 3376	Microcontroller Applications	3
ETEE 4351	Automation and Programmable Logic Controllers (PLCs)	3
ETEE 4352	Instrumentation & Interfacing	3
Total Hours		24

Minor in Engineering Design Technology

A Minor in Engineering Design Technology consists of the following courses:

Code	Title	Hours
Minor in Engineering Design Technology		
Required Courses		
ETDD 1361	Engineering Graphics	3
ETDD 3310	Product Design & Development	3
ETDD 3366	Intro to Virtual and Augmented Reality	3
ETEC 3367	Engineering Materials Techniques	3
ETDD 3379	Industrial Design & Drafting	3
ETDD 4339	Advanced Computer-Aided Drafting and Modeling	3
or ETDD 4388	3-Dimensional Parametric Design	
ETDD 4380	Material Hand & Plant Layout	3
Total Hours		21

Minor in Industrial Safety Management

A Minor in Industrial Safety Management consists of the following courses:

Code	Title	Hours
Minor in Industrial Safety Management		
Required Course		
ETSM 2310	Introduction to Occupational Safety	3
Prescribed Electives		
Environmental, Health, and Safety Management/Industrial Safety Management (ETSM) advanced electives		18
Total Hours		21

Minor in Manufacturing Engineering Technology

The Minor in Manufacturing Engineering Technology provides Engineering Technology students with the opportunity to develop knowledge and skills related to high-demand jobs in the manufacturing industry.

Code	Title	Hours
Minor in Manufacturing Engineering Technology		
Required Courses		
ETDD 1361	Engineering Graphics	3
ETDD 1366	Machining Technology I	3
ETDD 2366	Machining Technology II	3
ETEC 2382	Manufacturing Processes	3
ETEC 3344	Computer Integrated Manufacturing	3
ETEC 3382	Manufacturing Processes II	3
ETEC 4315	Quality Assurance and Control	3
ETDD 4388	3-Dimensional Parametric Design	3
or ETDD 4339	Advanced Computer-Aided Drafting and Modeling	
Total Hours		24

Minor in Trades and Industry Certification

The 21-hour minor in Trades and Industry Certification may be selected to accompany any approved major at Sam Houston State University.

Code	Title	Hours
Minor in Trades and Industry Certification		
INED 4310	Occupational Human Relations in Career Technical Education	3
INED 4363	Preparation of Instructional Materials	3
INED 4364	Teaching in Schools & Industry	3
INED 4379	Occupational Analysis and Curriculum Development	3
INED 4391	Lab Management, Organization, and Control	3
Internship (Pre Service Student Teaching)		6
ETEC 4391	Work Base Mentorship	
Total Hours		21

Department of Environmental and Geosciences

Chair: Joseph Hill (jch031@shsu.edu) (936) 294-1452

Website: Department of Environmental and Geosciences (<https://www.shsu.edu/academics/geography-geology/>)

The Department of Environmental and Geosciences is an excellent blend of three disciplines that have a common thread: Environmental Science, Geography, and Geology. All three degrees are concerned with the physical environment, with resources – including energy resources – and with ways that humans interact with and modify the natural environment. Students may major or minor in all three areas.

Mission

The primary mission of the Department of Environmental and Geosciences is to provide students a comprehensive understanding of the range and depth of these scientific disciplines which encompass, respectively, human and environmental interactions, the human and physical domains of geography, and the physical and historical domains of geology. This understanding is intended to enable our students to achieve their full potential as skilled professionals and well-qualified technical employees in a diverse range of companies and governmental organizations and to become effective teachers and community leaders. Our programs enable students to become informed users of a range of technologies and prudent stewards of our natural resources. This understanding of the world will promote successful careers, active life-long learning, and an ability and desire to provide a positive contribution to society.

Geography Program

Coordinator: John Strait (jstrait@shsu.edu) (936) 294-4077

Website: Department of Environmental and Geosciences (<https://www.shsu.edu/academics/geography-geology/>)

Geography is an interdisciplinary field of study that provides students the skills and technical knowhow needed to address issues, challenges and opportunities associated with how humans interact with their local and global environments. As an academic subject, it focuses on both the physical and cultural environments and incorporates the use and application of a host of geospatial technologies as a means to study and analyze these subject matter, such as geographic information systems (GIS), remote sensing, digital image processing, and global positioning systems. Geographers can study an exceptionally eclectic range of phenomena, including demographics, landforms, soil fertility, plant and animal wildlife, weather and climate, religion, language, ethnicity, urban planning, and international affairs, just to name a few. Geographers are behind the maps you use every day, as well as the policies that shape our cities, and the analysis that sustains and protects our environment. Geographers help shape the future design of cities and infrastructure. Geographers assess the impacts of rising sea levels, volcanic eruptions, floods, heat waves, and tropical storms, while others study impacts of wildfires or manage wetlands. Geographers investigate the environmental and economic impacts of tourism, and gage the cultural impacts of globalization. Geographers use cutting edge satellite data to explore alternative energy sources and assess natural resource utilization and population growth. Geographers also work directly with local people on socioeconomic issues such as health, migration, and housing affordability. Moreover, geographers play a vital role in teaching this eclectic subject matter in school districts across the nation and around the world. If you want to learn about and change our world, there is no better discipline for people who thrive on complex challenges and want to make a real impact on lives and our environment. In the age of global markets, global culture, global transportation systems, and global telecommunications, we are increasingly faced with the reality that our welfare is highly interdependent with the rest of the world. A geographic education represents an excellent way to understand how to deal with environmental, social and economic issues associated with this reality. For an individual curious about the world, and his or her place in it, few disciplines satisfy that curiosity as much as geography.

Academic Programs

The Geography program incorporates a two-track curriculum and is designed to fit the particular academic interests of our students and better prepare them for life beyond SHSU, particularly in terms of graduate study or employment opportunities. Students majoring in geography focus their studies within one of two concentrations; 1) Environment, Culture and Development, or 2) GIS (Geographic Information Science). Both concentrations are somewhat flexible and enable students to tailor their degree plans toward a mix of coursework most appropriate to their career goals. The Environment, Culture and Development Concentration truly integrates the strengths of environmental and human geography, with the application of geospatial techniques. For example, students choosing this concentration matriculate through a degree that integrates scientific study of the environment with the perspectives of such topics as hydrology, conservation, culture, economic change, development, population, and public health, while gaining experience using geospatial techniques. Students choosing this concentration can pursue either Bachelors of Arts (BA) or Bachelors of Science (BS) degrees. The GIS Concentration, available as a BS degree, is designed for students desiring more advanced and intensive training with a broad range geospatial tools and technologies, such as Advanced GIS, Remote Sensing, and Digital Image Processing.

Highlights

Located on the third floor of the Lee Drain Building, the department maintains both a Geographic Information System (GIS) lab and a combination computer cartography and remote sensing lab. These labs contain state-of-the-art computers, software and scanners. We also have 2 vans available for fieldtrips, a coring device capable of taking up to 6m core samples, high-quality GPS receivers, a large-scale flume to demonstrate sedimentation processes, a Ground Penetrating Radar System, and a weather station. In order to enhance learning, all of our rooms are outfitted with video-projection systems, and our lecture rooms have sound systems and dedicated computers with Internet access that are used by the instructors for teaching purposes. Many of our students obtain internships with Houston-area firms and organizations, and work with faculty members on a range of research

projects. Beyond traditional in-class courses, the geography program does offer a number of on-line courses. The program also regularly offers a number of field courses that offer students opportunities to directly experience the geographical processes and concepts learned in the classroom. Some of these field courses involve travel and/or international experiences and have included trips to Hawaii, Mississippi Delta, Brazil, Ecuador, Spain, Italy and other locations.

Career Opportunities

Because of the breadth of geography, there are a wide variety of career opportunities for geography graduates. These opportunities include careers in the following:

- urban and/or regional planning
- GIS analyst/programmer
- environmental consulting and management
- emergency management
- location analyst
- public health consulting and management
- state transportation departments
- city, county, state, and federal government
- education/teaching
- geoscientist/geo-technician
- travel writing
- energy companies
- tourism
- military

Geography's focus on spatial relationships, in conjunction with new advances in technology, have led to the development of a host of geographical tools used in a wide variety of fields. In fact, geospatial technology now affects almost every aspect of life, from navigating an unfamiliar neighborhood to locating the world's most wanted terrorists. Because these tools can be applied within virtually any field (government, business, military, etc.) geospatial technology is one of the fastest growing job fields and the demand for people with experience using them exceeds the supply. Aside from offering a major concentration that emphasizes these technologies, we also offer students an Interdisciplinary Minor in Geospatial Science (GSS) that emphasizes GIS, remote sensing and computer cartography. The combination of geography major and a GSS minor is highly marketable. In addition, we also offer a GIS certificate program for students desiring to pursue a limited number of geotechnical courses. With their broad background, geography graduates have an ability to see connections where others do not, and this enables geographers to work in many different fields. Geography literally offers a world of opportunities.

Suggested Minors

- GSS (Geo-spatial Science)
- Environmental Science
- Environmental Studies
- Geology
- Foreign Language
- Biology or Environmental Science
- History
- International Business
- Sociology
- Mass Communication
- Computer Science
- Political Science
- Secondary Education

Program Specific Requirements

Students must meet the academic standards established by the university.

Geology Program

Coordinator: Brian J. Cooper (bio_bjc@shsu.edu) (936) 294-1566

Website: Department of Environmental and Geosciences (<https://www.shsu.edu/academics/geography-geology/>)

Geology is the ultimate integrated science because all the principles and methods of the other sciences, as well as geologic principles and methods, are applied to an understanding of the **Earth** and the **Environment**. Geologists study rocks, of course, but Geology encompasses so much more - anything related to the Earth or Earth-systems and even other planets. Information derived from earth materials may eventually be used to forecast earthquakes, volcanic eruptions, and various environmental hazards. The information obtained may also be applied to help geologists locate various natural resources (water, metals and other mineral resources, and energy). Therefore, geology serves to enhance human existence by attempting to reduce risk and by providing the materials necessary for the expansion of civilization.

Academic Programs

The Geology Degree is designed for the person seeking a position in industry or planning to attend graduate school. The Geoscience Plan is designed for the person with a general interest in geology. Each plan is designed to provide an education in the fundamentals of geology. The required geology courses will give the student an understanding of the Earth and will provide an opportunity to observe, investigate, analyze, and interpret geological materials, processes, and structures. Both plans can be tailored to an individual's interest with specific electives and minors. For example, if a student is interested in **Environmental Geology**, then they would be advised by their advisor to take Hydrogeology rather than Petroleum Geology for their required geology classes; choose advanced geology elective courses such as Environmental Geology, Hydrology, and other environmentally related courses. The student would also choose Environmental Science as their minor.

Highlights

Located on the third floor of the Lee Drain Building, the department places considerable emphasis on the integration of lab-based analytical science with similarly rigorous analysis conducted by means of field work. In support, the department maintains a range of field and laboratory equipment which include: a Mackereth coring system, a vibracorer, a research flume, a portable XRF, an X-ray diffractometer, a catholuminescence microscope, a Scanning Electron Microscope equipped with an energy-dispersive spectrometer, plus a variety of GPS and GIS-linked surveying equipment. Many of our students obtain internships and work with faculty members on research projects.

Career Opportunities

Geology majors generally pursue careers in these areas:

- the environmental industry
- mining industry
- the petroleum industry
- government
- teaching
- geotechnical engineering

Geology students are provided with the knowledge and skills required to pursue an applied profession, a career in education, and/or continued education at the graduate level.

Suggested Minors

- Computer Sciences
- Environmental Science
- Environmental Studies
- Geography
- Geographic Information Systems
- Mathematics
- Other sciences (Biology, Chemistry, or Physics)

Program Specific Requirements

Geology program specific requirements include 8 hours in each of CHEM and PHYS; plus 7-8 hours of MATH.

Environmental Science Degree

Coordinator: Ross Guida (ross.guida@shsu.edu) (936) 294-1233

Website: Department of Environmental and Geosciences (<https://www.shsu.edu/academics/geography-geology/>)

Environmental scientists seek to protect both environmental and human health by assessing problems and seeking to find solutions through field, lab, and/or computer-based work. Working in environmental science-related jobs can involve collecting and analyzing soil, water, or air samples, mapping

wetlands and disasters, or modeling how pollution is moving through rivers, aquifers, and the air. Environmental Scientists may even find themselves informing the general public about hazards or testifying in court cases.

Environmental Scientists:

- Work in the private sector, government, or non-governmental positions
- Work in environmental consulting and for environmental engineering firms
- Work on enforcing or improving environmental regulations, laws, and policies
- Advise government officials responsible for developing policies
- Assess possible environmental and health impacts of development projects
- Serve as community advocates to ensure clean water and air for vulnerable populations.

No matter the sector they work in, environmental scientists are typically broadly trained across multiple disciplines. Course work for environment science is hands-on and lab-science heavy, including Biology, Chemistry, Geography, Geology, and Soil Science. In addition to being well versed in analyzing data using mathematical and statistical methods, environmental scientists must also have strong writing and oral communication skills. Further, it is important that environmental scientists understand societal impacts and the context of their physical science work through additional perspectives drawn from human geography, sociology, and political science.

Academic Programs

The Environmental Science degree has a choice of and three tracks/concentrations and is designed to fit the particular academic interests of our students and better prepare them for life beyond SHSU, particularly in terms of employment opportunities or graduate study. Students majoring in Environmental Science focus their studies within one of three concentrations; 1) Sustainability; 2) Pollution Abatement; or 3) Water Resources. All three concentrations require several core lab science courses in Biology, Chemistry, Geography, and Geology to provide an interdisciplinary foundation for upper-level coursework. Sustainability allows for more elective courses for those that want a broad Environmental Science background and more social science courses. Pollution Abatement is designed for students that want to focus on Biology and Chemistry-related Environmental Science work. Water Resources provides students with a strong foundation to assess water-related issues and includes courses in Aquatic Biology, Surface Water, Groundwater, and Water Quality-related applications. Across the Environmental Science concentrations, students gain experience in labs and the field. Students are also encouraged to pursue internship opportunities that can be counted toward prescribed major elective hours.

Highlights

Combining the strengths of SHSU's Biology, Chemistry, Geography, and Geology programs, Environmental Science is a great choice for students that want to help communities and solve problems. It's also a great choice for students that like science but have a hard time picking just one area of scientific interest. Students get diverse perspectives from different physical scientists and take some social science courses to understand how Environmental Science fits in a broad societal context. While the home of the program is located on the third floor of the Lee Drain Building, where the Geographic Information System (GIS) lab, remote sensing lab, Geology labs, and GPS units are located, students in Environmental Science have access to Chemistry labs and the state-of-the-art Biological Lab Sciences building. Multiple trips to SHSU's Field Station (<https://www.shsu.edu/centers/cbfs/>) are also included through multiple courses. Students in Environmental Science have access to the College of Science and Engineering Technologies' (<https://www.shsu.edu/academics/science-and-engineering-technology/>) two 12-passenger vans for field trips and equipment across multiple contributing physical science departments. In order to enhance learning, all of our rooms are outfitted with video-projection systems, and our lecture rooms have sound systems and dedicated computers with Internet access that are used by the instructors for teaching purposes. A number of our students obtain internships with Houston-area firms and organizations, and work with faculty members on a range of research projects. While there are some online elective course options, Environmental Science includes multiple hands-on, lab-oriented courses. The degree also regularly offers a number of field opportunities for students to learn outside the classroom. Some of these field courses involve travel and/or international experiences and have included trips to Central TX, the Texas coast, Hawaii, Central America, Europe, and Africa.

Career Opportunities

Because of the breadth of Environmental Science, there is a wide variety of career opportunities for graduates. These opportunities include careers in the following:

- Environmental Consulting
- Environmental Planning
- Environmental Policy and Politics
- Environmental compliance (inc. for Construction and Oil and Gas companies)
- Waste remediation and management
- Environmental Engineering
- Sustainability officer
- Conservation
- Environmental Protection
- Environmental Law

- Emergency Management
- Lab analyst (Air, soil, water, contamination, etc.)
- Public Health
- Dept. of Transportation
- City, county, state, and federal government
- Education
- Military

Environmental Scientists' broad backgrounds allow them to solve problems that require multiple disciplinary perspectives. Environmental scientists often work in the field, lab, or both. Many also write up reports that relate to development and current regulations and policies.

Suggested Minors

- NO MINOR IS REQUIRED WITH AN ENVIRONMENTAL SCIENCE MAJOR
- If students choose to do a minor, it may add time to their degree plan.
- Bachelor of Science, Major in Environmental Science (Pollution Abatement)
- Bachelor of Science, Major in Environmental Science (Sustainability)
- Bachelor of Science, Major in Environmental Science (Water Resources)
- Bachelor of Arts, Major in Geography (Environment, Culture, and Development)
- Bachelor of Science, Major in Geography (Environment, Culture, and Development)
- Bachelor of Science, Major in Geography, Geo-spatial Information Sciences
- Bachelor of Science, Major in Geology
- Bachelor of Science, Major in Geology (Geoscience)
- Undergraduate Certificate in Crime Analysis and Mapping
- Undergraduate Certificate in Geospatial Applications
- Minor in Crime Analysis and Mapping
- Minor in Environmental Science
- Minor in Environmental Studies
- Minor in Geography
- Minor in Geology
- Minor in Geo-Spatial Science

Environmental Science

Internships

Educational and research opportunities in Environmental Science are available through a variety of internship opportunities that will increase students' skills and employment opportunities.

Awards and Scholarships

- **G. SCOTT AND MARY S. MC CARLEY ENVIRONMENTAL SCIENCE EDDOWED SCHOLARSHIP FOR ENVIRONMENTAL SCIENCE STUDENTS:** \$1,000 annually. Must have a 3.0 GPA and be an Environmental Science student.

Request information from:

Ross Guida
 Environmental Science Degree Coordinator
 (936) 294-1233
 Department of Environmental and Geosciences
 Box 2148

Huntsville, TX 77341-2148

Geography

Student Organizations

- **Geographers of Sam Houston (GOSH)** - GOSH is intended to enhance appreciation for geography through club-sponsored field trips, guest lectures, and other activities, and to promote camaraderie among geography students.
- **Gamma Theta Upsilon (GTU)** - GTU is the National Geography Honor Society and was established to promote geographic awareness and the pursuit of geographic knowledge. To be eligible for membership in this honor society, students must have at least 9 hours of geography coursework, a minimum GPA of 3.3 in their geography coursework and overall, and the equivalent of 3 full-time college semesters completed.

Internships

Educational and research opportunities using GIS are available through a variety of internship opportunities that will increase students' skills and employment opportunities.

Richardson Endowment Awards

- **C. ALLEN WILLIAMS AWARD FOR GEOGRAPHY STUDENTS:** \$500-\$700 one semester.
Geography majors or minors, senior status.
- **CODY BARRON AWARD FOR GEOGRAPHY STUDENTS:** \$500-\$700 one semester.
Geography majors or minors, senior status.
- **GERALD L. HOLDER AWARD FOR GEOGRAPHY STUDENTS:** \$500 – \$700 one semester.
Geography majors or minors, senior status, 3.0 GPA Geography overall.
- **JAMES ELLISON KIRKLEY AWARD:** Two awards (amounts vary) to majors in history, political science, geography, or sociology.
Recipients are selected on basis of high academic achievement.
- **JOHN H. BOUNDS AWARD FOR GEOGRAPHY STUDENTS:** \$500-\$700 for one semester.
Geography majors or minors, senior status.
- **THE ELTON M. SCOTT AWARD FOR GEOGRAPHY STUDENTS:** \$500 – \$700 one semester.
Geography majors or minors, senior status. 3.0 GPA Geography overall.

Geology

Student Organizations

American Association of Petroleum Geologists (AAPG) Student Chapter - AAPG is an international professional geological society that exists to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct. The student chapter is run by students to facilitate networking with professional geologists, and provide other professional development opportunities.

Sam Houston Association of Geology Students (SHAGS) - SHAGS is a very active student organization that sponsors field trips to sites in Texas, Oklahoma, and Arkansas. Alumni, professors, and other professional geologists are invited to speak at SHAGS meetings. Geology majors benefit greatly from the sense of camaraderie gained during the field trips, meetings, and other activities.

Internships

Educational and research opportunities are available through a variety of internship opportunities in the fields of GIS, hydrocarbons, and environmental geology that will increase students' skills and employment opportunities.

Awards and Scholarships

- **CANNAN GEOLOGICAL SCHOLARSHIPS:** \$600 per year, junior or senior status, Geology majors, minimum GPA of 3.2 in Geology and overall 3.0, faculty recommendations required.
- **CHUCK CAUGHEY GEOSCIENCE ENDOWED SCHOLARSHIP:** Award covers the full cost of attending Sam Houston State University (full tuition, fees, books, and room and board) must be a geology major, must maintain an overall GPA of 3.0 or better, and demonstrate financial need.

- **HOUSTON GEOLOGICAL SOCIETY OUTSTANDING SENIOR AWARD:** Awards and scholarships funded by the Houston Geological Society given to just seven universities in Texas.
- **HOUSTON GEOLOGICAL SOCIETY SCHOLARSHIP:** Award recipients are determined by a faculty committee during the Spring semester.
- **BRIAN COOPER GEOLOGY SCHOLARSHIP:** Award recipients are determined by a faculty committee during the Spring semester.
- **SHAGS Award:** \$500 per year, awarded to two students, junior or senior status, Geology majors, minimum GPA of 3.0, faculty recommendations required.

Bachelor of Science, Major in Environmental Science (Pollution Abatement)

Environmental Science Degree

Coordinator: Ross Guida (ross.guida@shsu.edu) (936) 294-1233

Website: Department of Environmental and Geosciences (<https://www.shsu.edu/academics/geography-geology/>)

Environmental scientists seek to protect both environmental and human health by assessing problems and seeking to find solutions through field, lab, and/or computer-based work. Working in environmental science-related jobs can involve collecting and analyzing soil, water, or air samples, mapping wetlands and disasters, or modeling how pollution is moving through rivers, aquifers, and the air. Environmental Scientists may even find themselves informing the general public about hazards or testifying in court cases.

Environmental Scientists:

- Work in the private sector, government, or non-governmental positions
- Work in environmental consulting and for environmental engineering firms
- Work on enforcing or improving environmental regulations, laws, and policies
- Advise government officials responsible for developing policies
- Assess possible environmental and health impacts of development projects
- Serve as community advocates to ensure clean water and air for vulnerable populations

No matter the sector they work in, environmental scientists are typically broadly trained across multiple disciplines. Course work for environmental science is hands-on and lab-science heavy, including Biology, Chemistry, Geography, Geology, and Soil Science. In addition to being well versed in analyzing data using mathematical and statistical methods, environmental scientists must also have strong writing and oral communication skills. Further, it is important that environmental scientists understand societal impacts and the context of their physical science work through additional perspectives drawn from human geography, sociology, and political science.

Academic Programs

The Environmental Science degree has a choice of three tracks/concentrations and is designed to fit the particular academic interests of our students and better prepare them for life beyond SHSU, particularly in terms of employment opportunities or graduate study. Students majoring in Environmental Science focus their studies within one of three concentrations: 1) Sustainability; 2) Pollution Abatement; or 3) Water Resources. All three concentrations require several core lab science courses in Biology, Chemistry, Geography, and Geology to provide an interdisciplinary foundation for upper-level coursework. Sustainability allows for more elective courses for those that want a broad Environmental Science background and more social science courses. Pollution Abatement is designed for students that want to focus on Biology and Chemistry-related Environmental Science work. Water Resources provides students with a strong foundation to assess water-related issues and includes courses in Aquatic Biology, Surface Water, Groundwater, and Water Quality-related applications. Across the Environmental Science concentrations, students gain experience in labs and the field. Students are also encouraged to pursue internship opportunities that can be counted toward prescribed major elective hours.

Highlights

Combining the strengths of SHSU's Agriculture, Biology, Chemistry, and Environmental and Geosciences programs, Environmental Science is a great choice for students that want to help communities and solve problems. It's also a great choice for students that like science but have a hard time picking just one area of scientific interest. Students get diverse perspectives from different physical scientists and take some selected social science courses to understand how Environmental Science fits in a broad societal context. While the home of the program is located on the third floor of the Lee Drain Building, where the Geographic Information System (GIS) lab, remote sensing lab, Geology labs, and GPS units are located, students in Environmental Science have access to Chemistry labs and the state-of-the-art Biological Lab Sciences building. Multiple trips to SHSU's Field Station (<https://www.shsu.edu/centers/cbfs/>) are also included through multiple courses. Students in Environmental Science have access to the College of Science and Engineering Technology (<https://www.shsu.edu/academics/science-and-engineering-technology/>)'s two 12-passenger vans for field trips and equipment across multiple contributing physical science departments. In order to enhance learning, all of our rooms are outfitted with video-projection systems, and our lecture rooms have sound systems and dedicated computers with Internet access that are used by the instructors for teaching purposes. A number of our students obtain internships with Houston-area firms and organizations and other companies and agencies across the state and beyond. Students also work with faculty members on a range of research projects. While there are some online elective course options, Environmental Science includes multiple hands-on, lab-oriented courses. The degree also regularly offers a number of field opportunities for students to learn outside the classroom. Some of these field courses involve travel and/or international experiences and have included trips to central Texas, the Texas coast, Hawaii, Central America, Europe, and Africa.

Career Opportunities

Because of the breadth of Environmental Science, there is a wide variety of career opportunities for graduates. These opportunities include careers in the following:

- Environmental Consulting
- Environmental Planning
- Environmental Policy and Politics
- Environmental compliance (inc. for Construction and Oil and Gas companies)
- Water management and policy
- Waste remediation and management
- Environmental Engineering
- Sustainability officer
- Conservation
- Environmental Protection
- Environmental Law
- Emergency Management
- Lab analyst (air, soil, water, contamination, etc.)
- Public Health
- Department of Transportation
- City, county, state, and federal government
- Education
- Military

Environmental Scientists' broad backgrounds allow them to solve problems that require multiple disciplinary perspectives. Environmental scientists often work in the field, lab, or both. Many also write up reports that relate to development and current regulations and policies.

Suggested Minors

- NO MINOR IS REQUIRED WITH AN ENVIRONMENTAL SCIENCE MAJOR
- If students choose to do a minor, it may add time to their degree plan.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-environmental-science/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Code	Title	Hours
Bachelor of Science, Major in Environmental Science (Pollution Abatement)		
Core Curriculum		
Component Area I (Communication)		6
Component Area II (Mathematics) ¹		3
Component Area III (Life and Physical Science) ²		8
Component Area IV (Language, Philosophy, and Culture) ³		3
Component Area V (Creative Arts)		3
Component Area VI (U.S. History)		6
Component Area VII (Political Science/Government)		6
Component Area VIII (Social and Behavioral Sciences) ⁴		3
Component Area IX (Component Area Option) ⁵		4
Degree Specific Requirements		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4
MATH 1342	Elementary Statistics	3
or STAT 3379	Statistical Methods in Practice	
or MATH 3379	Statistical Methods in Practice	
MATH 1420	Calculus I ¹	4
Major: Foundation		
BIOL 1401	Environmental Science	4
BIOL 3320	Sustainability & Environment	3
or GEOG 3320	Sustainability & Environment	

BIOL 3409	General Ecology	4
BIOL 4330	Aquatic Biology	3
BIOL 4374	Biostatistics	3
CHEM 2323 & CHEM 2123	Organic Chemistry I: Lecture and Organic Chemistry I: Lab	4
CHEM 2401	Quantitative Analysis	4
CHEM 3368	Environmental Chemistry	3
GEOG 1401	Weather and Climate ²	4
GEOG 4331	Conservation of Natural Resources	3
GEOL 1403	Physical Geology ²	4
GEOL 3326	Environmental Geology	3
GEOL 4426	Hydrogeology	4
GEOL 4304	Geochemistry	3
PLSC 3440	Soil Science	4
POLS 3395	Environmental Policy	3

Major: Prescribed Electives

Select 11 hours from the following (at least 9 hours must be advanced): 11

AGET 3383	Soil & Water Conservation Engineering
BIOL 2420	Introduction to Applied Microbiology
BIOL 3461	Wildlife Biology
BIOL 3470	General Microbiology
BIOL 4320	Environmental Toxicology
CHEM 2125	Organic Chemistry II: Lab
CHEM 2325	Organic Chemistry II: Lecture
CHEM 4442	Air Quality
ECON 3352	Energy and Environmental Economics
ENGL 3330	Introduction to Technical Writing
GEOG 3301	Environmental Geography
GEOG 3310	Sustainable Development
GEOG 4100	Earth and Environment Seminar
GEOG 4330	Hydrology and Water Resources
GEOG 4333	Field Studies
GEOG 4361	Geographic Information Systems for Public Health
GEOG 4365	Applied Geographic Information Systems (GIS)
GEOG 4399	Environmental and Geoscience Internship
GEOG 4432	Geomorphology
GEOG 4468	Remote Sensing
GEOL 3330	Oceanography
GEOL 4100	Earth and Environment Seminar
GEOL 4312	Economic Geology
GEOL 4399	Environmental and Geoscience Internship
HLTH 4390	Environmental Health
PLSC 4330	Soil Fertility Management and Fertilizers
PLSC 4370	Forage Crops and Pasture Management
PLSC 4397	Integrated Pest Management
WMGT 2301	Principles of Wildlife Management
WMGT 3382	Habitat & Pond Management

Minor: Not Required ⁶**Total Hours****120**

¹ MATH 1420 is suggested, if eligible; otherwise, take MATH 1314. MATH 1420 satisfies three semester credit hours of the Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour for Component Area IX (Component Area Option).

² Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science).

- ³ SOCI 2319 is needed as a prerequisite for SOCI 4339.
- ⁴ ECON 2301 or ECON 2302. ECON 2301 is needed as a prerequisite for ECON 3352.
- ⁵ GEOG 2355 or GEOG 2356 is suggested plus one additional credit hour from Component Area IX (Component Area Option) if MATH 1420 or MATH 1410 are not taken.
- ⁶ A minor is **not required** for this degree program; however, a student has the option to add a minor, but to do so, additional semester credit hours will be needed above the degree program's stated total semester credit hours.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-environmental-science/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

First Year

Fall	Hours	Spring	Hours
Component Area IV ¹		3 Component Area IX ⁵	3
CHEM 1411		4 BIOL 1401	4

Total Hours: 120

¹ SOCI 2319 is needed as a prerequisite for SOCI 4339.

² Satisfies Core Curriculum requirement for Component Area I (Communication).

³ Satisfies Core Curriculum requirement for Component Area VI (U.S. History).

- 4 Satisfies three semester credit hours of the Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour for Component Area IX (Component Area Option).
- 5 GEOG 2355 or GEOG 2356 is suggested plus one additional credit hour from Component Area IX (Component Area Option) if MATH 1420 or MATH 1410 are not taken.
- 6 Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science).
- 7 Satisfies the Core Curriculum requirement for Component Area VII (Political Science/Government).
- 8 ECON 2301 or ECON 2302. ECON 2301 is needed as a prerequisite for ECON 3352.
- 9 See, Prescribed Electives course listing below.

Code	Title	Hours
Prescribed Electives⁹		
Select 11 hours from the following (at least 9 hours must be advanced):		11
AGET 3383	Soil & Water Conservation Engineering	3
BIOL 2420	Introduction to Applied Microbiology	4
BIOL 3461	Wildlife Biology	4
BIOL 3470	General Microbiology	4
BIOL 4320	Environmental Toxicology	3
CHEM 2125	Organic Chemistry II: Lab	1
CHEM 2325	Organic Chemistry II: Lecture	3
CHEM 4442	Air Quality	4
ECON 3352	Energy and Environmental Economics	3
ENGL 3330	Introduction to Technical Writing	3
GEOG 3301	Environmental Geography	3
GEOG 3310	Sustainable Development	3
GEOG 4100	Earth and Environment Seminar	1
GEOG 4330	Hydrology and Water Resources	3
GEOG 4333	Field Studies	3
GEOG 4361	Geographic Information Systems for Public Health	3
GEOG 4365	Applied Geographic Information Systems (GIS)	3
GEOG 4399	Environmental and Geoscience Internship	3
GEOG 4432	Geomorphology	4
GEOG 4468	Remote Sensing	4
GEOL 3330	Oceanography	3
GEOL 4100	Earth and Environment Seminar	1
GEOL 4312	Economic Geology	3
GEOL 4399	Environmental and Geoscience Internship	3
HLTH 4390	Environmental Health	3
PLSC 4330	Soil Fertility Management and Fertilizers	3
PLSC 4370	Forage Crops and Pasture Management	3
PLSC 4397	Integrated Pest Management	3
WMGT 2301	Principles of Wildlife Management	3
WMGT 3382	Habitat & Pond Management	3

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

A minor is not required for this degree program; however, a student has the option to add a minor, but to do so, additional semester credit hours will be needed above the degree program's stated total semester credit hours.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Environmental Science (Pollution Abatement) is designed to provide graduates with the following marketable skills:

- Use the scientific method to address environmental problems.
- Think critically and problem solve.
- Use statistics to evaluate hypotheses.
- Chemically analyze soil, water, and/or air samples.
- Apply knowledge of ecosystems and the environment to address environmental issues.

Bachelor of Science, Major in Environmental Science (Sustainability)

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BA in Geography (Environment, Culture, and Development) is designed to provide graduates with the following marketable skills:

- Use the scientific method to address environmental and human problems.
- Think critically and problem solve.
- Use statistics to evaluate hypotheses.
- Communicate and engage with technical writing.
- Gather, manage, analyze and interpret spatially-referenced data.
- Work with maps, spatially-referenced databases, and a range of geospatial technologies.
- Apply knowledge and awareness of ecosystems and cultural environments in order to address a range of environmental and social issues.

Bachelor of Science, Major Geography (Environment, Culture, and Development)

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-degree-in-geography/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Major: Prescribed Electives		
GEOL Advanced Electives		10
Minor: Required ⁴		
Minor (Advanced)		6
Minor		12
Total Hours		120-122

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics), one semester credit hour of Component Area IX (Component Area Option), and the Degree Specific requirement.

² CHEM 1411 and CHEM 1412 satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the Degree Specific requirement.

³ PHYS 1411 and PHYS 1422 also satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science) and the Degree Specific requirement.

⁴ All minors can be paired with this degree program.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-geology/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

First Year

Total Hours: 120-122

¹ Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science). PHYS 1411 and PHYS 1422 also satisfy this requirement.

² Satisfies Core Curriculum requirement for Component Area I (Communications).

³ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics), one semester credit hour of Component Area IX (Component Area Option), and the Degree Specific requirement.

⁴ All minors can be paired with this degree program.

⁵ Satisfies Core Curriculum requirement for Component Area VII (Political Science/Movement).

⁶ Satisfies Core Curriculum requirement for Component Area VI (U.S. History).

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Geology is designed to provide graduates with the following marketable skills:

- Observation, data collection, analysis, and interpretation.
- Prepare, process, and present data.
- Handle information in a range of different mediums, e.g. textual, numerical, oral, graphical.
- Written and verbal communication skills.
- Report writing skills.
- Problem-solving skills and lateral thinking.
- Self-motivation and resilience.
- Team-working skills and the ability to work on your own initiative.

Bachelor of Science, Major in Geology (Geoscience)

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-of-science-in-geology/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Undergraduate Certificate in Crime Analysis and Mapping

Additional Information: Reference the Program Landing Page (<https://www.shsu.edu/programs/undergrad-certificate/crime-analysis-and-mapping/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Students take courses in the Department of Criminal Justice and Criminology and the Department of Environmental and Geosciences to learn about the criminal justice system, crime analysis, GIS and mapping, and geospatial analysis.

Code	Title	Hours
Undergraduate Certificate in Crime Analysis and Mapping		
Required Courses		

CRIJ 2361 or CRIJ 2368	Introduction To The Criminal Justice System Criminal Investigation	3
CRIJ 4377	Special Topics In Criminal Justice	3
GEOG 2464	Introduction to Geographic Information Systems (GIS)	4
Select two from the following:		6
GEOG 3363	Computer Cartography	
GEOG 4311	GIS in Law Enforcement	
GEOG 4365	Applied Geographic Information Systems (GIS)	
Total Hours		16

Students must meet the university's general admission standards. Any student who meets these standards (Minimum GPA=2.0) can be considered for admission.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The Undergraduate Certificate in Crime Analysis and Mapping is designed to provide graduates with the following marketable skills:

- Understand crime analysis concepts and techniques with a focus on spatial analysis.
- Use applied research methods to understand community crime problems.
- Integrate law enforcement-related datasets into a GIS framework.
- Analyze and map crime data using geospatial software.
- Communicate analytic purposes and results to different audiences.

Undergraduate Certificate in Geospatial Applications

Students will take geospatial courses in the Department of Environmental and Geosciences to learn about GIS and related software applications, geospatial technology, mapping, cartography, and geospatial analysis.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/undergrad-certificate/geospatial-applications/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Students must meet the University's general admissions standards. Any student who meets these standards (Minimum GPA = 2.0) can be considered for admission. GEOG 2464 serves as the prerequisite for all upper-level GIS courses.

Code	Title	Hours
Undergraduate Certificate in Geospatial Applications		
Required Courses		
GEOG 2464	Introduction to Geographic Information Systems (GIS)	4
GEOG 4365	Applied Geographic Information Systems (GIS)	3
Prescribed Electives		
Choose three from the following:		9-10
GEOG 3363	Computer Cartography	
GEOG 4311	GIS in Law Enforcement	
GEOG 4361	Geographic Information Systems for Public Health	
GEOG 4367	GIS Programming	
GEOG 4468	Remote Sensing	
Total Hours		16-17

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/undergrad-certificate/geospatial-applications/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The Undergraduate Certificate in Geospatial Applications is designed to provide graduates with the following marketable skills:

- Apply software tools to analyze geospatial data.
- Design and create professional-quality maps.
- Use geospatial analysis to solve economic, social, and environmental problems.
- Discuss the use of GIS, remote sensing, and GPS applications in various disciplines.
- Construct workflows for geospatial projects.

Minor in Crime Analysis and Mapping

The minor in Crime Analysis and Mapping provides students with an interdisciplinary skillset with technical and analytical methods in criminal justice and geographic information systems (GIS). The minor will help students gain competencies in the basics of criminal justice, mapping and analyzing patterns that relate to crime, and perspectives on how integrating crime data with technology can lead to more robust analysis and targeting of resources for various law enforcement applications.

Code	Title	Hours
Minor in Crime Analysis and Mapping		
Required Courses		
CRIJ 2361 or CRIJ 2368	Introduction To The Criminal Justice System Criminal Investigation	3
CRIJ 4377	Special Topics In Criminal Justice	3
GEOG 2464	Introduction to Geographic Information Systems (GIS)	4
SCST 4363	Homeland Security Intelligence	3
Select two from the following:		6
GEOG 3363	Computer Cartography	
GEOG 4075	Readings in Geography	
GEOG 4311	GIS in Law Enforcement	
GEOG 4365	Applied Geographic Information Systems (GIS)	
Prescribed Electives		
Select one from the following:		3
CRIJ 2362	Criminology	
CRIJ 2367	Police Systems & Practices	
CRIJ 4384	Police Strategies	
GEOG 3363	Computer Cartography	
GEOG 4311	GIS in Law Enforcement	
GEOG 4365	Applied Geographic Information Systems (GIS)	
GEOG 4367	GIS Programming	
Total Hours		22

Note: Courses listed under two requirements (Required and Prescribed Electives) may only be taken once and may only fulfill one requirement.

Minor in Environmental Science

Students seeking a Minor in Environmental Science are required to complete:

Code	Title	Hours
Minor in Environmental Science (26-30 hours)		
Required Courses		
BIOL 1401	Environmental Science	4
BIOL 3320 or GEOG 3320	Sustainability & Environment Sustainability & Environment	3
CHEM 1411 or CHEM 1406	General Chemistry I Inorganic & Environmental Chemistry	4
GEOG 4331 or POLS 3395	Conservation of Natural Resources Environmental Policy	3
Select one of the following:		4
BIOL 1406	General Biology I ¹	

BIOL 1407	General Biology II ¹	
CHEM 1412	General Chemistry II	
GEOG 1401	Weather and Climate	
GEOL 1403	Physical Geology	
GEOL 1405	Geologic & Environmental Hazards	
Select one of the following:		3-4
BIOL 3409	General Ecology	
BIOL 4330	Aquatic Biology ¹	
GEOG 3301	Environmental Geography ¹	
GEOG 4330	Hydrology and Water Resources ¹	
GEOL 3326	Environmental Geology ¹	
GEOL 4426	Hydrogeology ¹	
PLSC 3440	Soil Science ¹	
Prescribed Electives		
Select two of the following:		6-8
BIOL 1406	General Biology I ¹	
BIOL 1407	General Biology II ¹	
BIOL 3409	General Ecology	
BIOL 3461	Wildlife Biology	
BIOL 4330	Aquatic Biology ¹	
CHEM 3368	Environmental Chemistry	
CHEM 4442	Air Quality	
GEOG 1401	Weather and Climate	
GEOG 2464	Introduction to Geographic Information Systems (GIS)	
GEOG 3301	Environmental Geography ¹	
GEOG 4330	Hydrology and Water Resources ¹	
GEOG 4432	Geomorphology	
GEOG 4468	Remote Sensing	
GEOL 1405	Geologic & Environmental Hazards	
GEOL 3326	Environmental Geology ¹	
GEOL 3330	Oceanography	
GEOL 4426	Hydrogeology ¹	
PLSC 3440	Soil Science ¹	
POLS 3395	Environmental Policy	
WMGT 2301	Principles of Wildlife Management	
WMGT 3382	Habitat & Pond Management	
Total Hours		27-30

¹ Course can only fulfill one requirement, either a) Required Course or b) Prescribed Elective.

Minor in Environmental Studies

The minor in environmental studies provides students with a broad range of social, historical, and scientific perspectives on the relationship between social systems and the environment. The minor includes a range of courses across the social sciences and humanities that will provide them with the skills and knowledge to engage with an array of environmental challenges at multiple scales. Students will gain competencies in: analyzing environmental issues from scientific, ethical, and policy perspectives; techniques for collecting, analyzing, and communicating environmental data; and problem-solving skills for addressing environmental issues in local communities and the broader society.

Code	Title	Hours
Minor in Environmental Studies		
Required Courses		
BIOL 1401	Environmental Science	3 or 4
or GEOG 1300	People, Places, and the Environment	
Select two of the following three course options:		6

BIOL 3320	Sustainability & Environment ¹	
or GEOG 3320	Sustainability & Environment	
GEOG 3301	Environmental Geography	
SOCI 4337	Environment And Society	
GEOG 3310	Sustainable Development	3
or SOCI 4339	Development & Sustainability	
GEOG 4331	Conservation of Natural Resources	3
or POLS 3395	Environmental Policy	
Select one of the following:		3
GEOG 3350	Cultural Geography	
or GEOG 4356	Urban Geography	
or SOCI 3335	Food and Society	
HIST 3395	American Environmental History	3
or PHIL 4334	Environmental Ethics	
Prescribed Electives		
Select one of the following:		3
COMS 3393	Environmental Communication	
ECON 3352	Energy and Environmental Economics	
GEOG 4351	Economic Geography	
GEOL 3326	Environmental Geology	
HLTH 4390	Environmental Health	
PHIL 4334	Environmental Ethics	
POLS 3395	Environmental Policy	
Total Hours		24-25

¹ Select either BIOL 3320 or GEOG 3320 (students can only complete 1 of these courses).

Minor in Geography

A Minor in Geography requires 18 semester credit hours, including:

Code	Title	Hours
Minor in Geography		
Required Courses		
Select one of the following:		3
GEOG 1300	People, Places, and the Environment	
GEOG 2355	World Regional Geography: Europe, Asia, and Australia	
GEOG 2356	World Regional Geography: Latin America, Africa, South Asia	
Human or Environmental Geography: Select one of the following		3
GEOG 2341	Physical Geography	
GEOG 3301	Environmental Geography	
GEOG 3350	Cultural Geography	
Geography Elective		3
Advanced Geography Electives		9
Total Hours		18

Minor in Geology

A Minor in Geology consists of the following courses:

Code	Title	Hours
Minor in Geology		
Required Courses		
GEOL 1403	Physical Geology	4

or GEOL 1405	Geologic & Environmental Hazards	
GEOL 1404	Historical Geology	4
Advanced Geology		12
Total Hours		20

Minor in Geo-Spatial Science

Code	Title	Hours
Minor in Geo-Spatial Science		
Required Courses		
GEOG 2464 & GEOG 4365	Introduction to Geographic Information Systems (GIS) and Applied Geographic Information Systems (GIS)	7
Select three of the following applied courses:		9-10
GEOG 3363	Computer Cartography	
GEOG 4361	Geographic Information Systems for Public Health	
GEOG 4367	GIS Programming	
GEOG 4468	Remote Sensing	
Select one of the following Geotechnique Applications:		3-4
GEOG 4330	Hydrology and Water Resources	
GEOG 4333	Field Studies	
GEOG 4351	Economic Geography	
GEOG 4356	Urban Geography	
GEOG 4357	Population Geography	
GEOG 4359	Transportation Geography	
GEOG 4432	Geomorphology	
Total Hours		19-21

Department of Mathematics & Statistics

Chair: Dr. Damon Hay (dhay@shsu.edu) (936) 294-4859

Website: Department of Mathematics and Statistics (<http://www.shsu.edu/academics/mathematics-and-statistics/>)

Mathematics is a powerful tool for solving practical problems, combining logic and precision with intuition and imagination. The basic goal of mathematics is to reveal and explain patterns - whether the pattern appears as electrical impulses in an animal's nervous system, as fluctuations in stock market prices, or as fine detail of an abstract geometric figure.

Mission

The Department of Mathematics and Statistics provides all students with the opportunity to receive an educational experience in mathematics and statistics of the highest quality, both inside and outside the classroom. By actively engaging in research and professional development, the faculty promote quality scholarship among themselves as well as our students.

Goals

The Department of Mathematics and Statistics strives to:

- advance the disciplines of mathematics, mathematics education, and statistics through quality research and teaching;
- prepare future mathematicians, mathematics educators and statisticians through high quality classroom and research experiences for undergraduate and graduate students; and
- offer high quality educational experiences for undergraduates of all majors through mathematics, mathematics education, and statistics service courses.

The Department undertakes the following efforts to support these goals:

- Directs a variety of undergraduate research programs
- Provides opportunities for undergraduate and graduate student travel to professional conferences
- Coordinates numerous grants with government and education agencies
- Offers discipline-related employment opportunities to students

Career Opportunities

- Accounting and Finance
- Computer Programming
- Data Science
- Sales and Marketing
- Management and Related Positions
- Actuarial Science
- Computer Systems Analysis
- Engineering
- Statistics
- Mathematics
- Operations Research
- Modeling
- Academic Positions - High School or College

Suggested Minors

- Chemistry
- Computer Science
- Economics
- Music
- Physics
- Pre-Med/Biology
- Statistics

Program Specific Requirements

Anyone considering a degree in Mathematics should consult an advisor in the Mathematics department prior to registering for any courses. Visit LDB 420 for more information.

- Bachelor of Arts, Major in Mathematics
- Bachelor of Science, Major in Data Science
- Bachelor of Science, Major in Mathematics
- Bachelor of Science, Double Major in Education and Mathematics
- Bachelor of Science, Major in Mathematics: 4+1 MS, Mathematics
- Minor in Mathematics
- Minor in Statistical Methods
- Minor in Statistical Theory
- Minor in Statistics and Data Science

Student Organizations

- Student chapter of the Mathematical Association of America (MAA)
- Student chapter of the American Mathematical Society (AMS)
- Pi-Mu-Epsilon Mathematics Honor Society
- Stat Club

Internships

Possible internships exist with NASA, the National Security Agency, Actuarial Firms, and the Oil Industry. However, federally-funded Research Experiences for Undergraduates (REUs) are the most popular programs among mathematicians over the summer. REU students spend 8 weeks of the summer at a different university, doing mathematics or statistics research. Not only are all expenses paid, a pretty generous stipend is earned at the end of the summer. For more information, see the NSF page on REUs. (http://www.nsf.gov/crssprgm/reu/list_result.jsp?unitid=5044)

Scholarships

The Department of Mathematics and Statistics offers several scholarships each year and Sam Houston State University offers additional, university-wide scholarships. Additional fellowships are available for students engaged in undergraduate research. For information on departmental scholarships, contact the Department of Mathematics and Statistics. Information on University scholarships may be obtained at Office of Academic Scholarships (<http://www.shsu.edu/dept/financial-aid/scholarships/>).

Director/Chair: **Damon Martin Hay**

Sheri Christi Aajul, MS (sca022@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Univ of Florida; BS, Univ of Florida

Di Gao, PHD (dxg085@shsu.edu), *Assistant Professor of Statistics, Department of Mathematics & Statistics*, PHD, North Dakota State University; MA, Univ of Missouri-Columbia; BEC, Tianjin University; BBA, Tianjin University

Isanka Upul Udayanga Garli Hevage, PHD (iug002@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas Tech University; MS, Texas Tech University

Farzana Hafeez, PHD (fxh021@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Oklahoma State University; MS, Univ of Central Oklahoma; MSC, Univ of Karachi; BS, Univ of Karachi

Damon Martin Hay, PHD (dhay@shsu.edu), *Associate Professor and Chair of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Univ of Houston-Main; MS, Univ of Houston-Main; BS, Univ of Texas At Austin

Melinda Ann Holt, PHD (mxm014@shsu.edu), *Professor of Statistics and Dean, COSET, Department of Mathematics & Statistics*, PHD, Baylor University; MA, Baylor University; BA, Baylor University

Yewen Huang, PHD (yhuang@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Univ of Houston-Main; BS, Hebei Normal University; BS, Hebei Normal University

Cheri Hudgeons, MS (cxh022@shsu.edu), *Senior Lecturer of Mathematics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Parker Jackson, MS (psj003@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

William A. Jasper, PHD (mth_waj@shsu.edu), *Professor of Mathematics Education, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Univ of Southern California; BS, Lafayette College

Jonathan Johnson, PHD (jcj055@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Texas At Austin; MS, Univ of Texas-Arlington; BS, Univ of Texas At Dallas

Maya E Johnson, PHD (mej030@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Texas A&M University; BS, Lincoln University

Dustin L Jones, PHD (dljones@shsu.edu), *Adjunct Faculty; Associate Dean COSET and Professor of Mathematics Education, Department of Mathematics & Statistics*, PHD, Univ of Missouri-Columbia; MS, Texas A&M University; BS, Southwest Baptist University

Ram Chandra Kafle, PHD (rckafle@shsu.edu), *Associate Professor of Statistics, Department of Mathematics & Statistics*, PHD, Univ of South Florida; MS, Univ of Akron; MS, Tribhuvan University; BS, Tribhuvan University

Doo Young Kim, PHD (dkim@shsu.edu), *Associate Professor of Statistics, Department of Mathematics & Statistics*, PHD, Univ of South Florida; MA, Ball State University; BS, Gachon University

Marilyn K. Knappen, MS (mkk027@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MS, Univ of Illinois-Urbana; BA, University of Iowa

Naomi Lynne Krawzik, PHD (stdnlv11@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of North Texas; MS, Sam Houston State University; BS, Alma College

Samuel Joseph Lippert, PHD (sjl054@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Montana; BS, Univ of Portland; BS, Univ of Portland

Cathy Lynn Lockwood, MS (cll011@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Brian M Loft, PHD (mth_bml@shsu.edu), *Associate Professor of Mathematics, Assistant Provost of Sponsored Programs, Department of Mathematics & Statistics*, PHD, Univ of Oregon; MS, Texas State Univ-San Marcos; BS, Louisiana Tech University

Martin E Malandro, PHD (mem037@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Dartmouth College; AM, Dartmouth College; BS, Texas Tech University

Ananda Bandulasiri Manage, PHD (amanage@shsu.edu), *Professor of Statistics, Department of Mathematics & Statistics*, PHD, Texas Tech University; MS, Texas Tech University; MS, Sam Houston State University; BS, University of Kelaniya

Taylor Elizabeth Martin, PHD (taylor.martin@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Rice University; MA, Rice University; BA, Univ of Rochester; BS, Univ of Rochester

Giuseppe Martone, PHD (gxm120@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Southern California; MS, University of Rome, Sapienza; BS, University of Rome, Sapienza

Iason Vasileios Moutzouris (ixm089@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*

Heshan Aravinda Pathirannehelage, PHD (heshap@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Florida; MS, Univ of Florida

Chi Hoang Do Phan, PHD (chp007@shsu.edu), *Assistant Professor of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Univ of South Florida; MA, Univ of South Florida; BA, Univ of South Florida

Amy E Ray, PHD (aer066@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Michigan State University; MS, Michigan State University; MED, Texas Christian University; BS, Texas Christian University

Robert Wesley Reddicks, MS (rwr016@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Tamara Robert, MED (txr054@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MED, Georgia State University; BS, Univ of Alabama-Birmingham

Diego Antonio Rojas, PHD (dar117@shsu.edu), *Visiting Assistant Professor of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Iowa State University; BS, Univ of Florida; BS, Univ of Florida

Pedro Antonio Romero Rojas, PHD (par031@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, PHD, University of Siegen; MSC, University of Siegen

Supun Thamara Samarakoon, PHD (ssamarakoon@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Sam Houston State University; BS, University of Colombo

Stephen Mark Scariano, PHD (sms049@shsu.edu), *Professor of Statistics, Department of Mathematics & Statistics*, PHD, Texas Tech University; MS, Texas Tech University; BS, Loyola Univ-New Orleans

Janet G Sipes, PHD (jgs050@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Arizona State University; MA, Univ of Missouri-Columbia; MS, Texas Woman's University; BA, Texas A&M - Commerce

Mary B Swarthout, PHD (mbs001@shsu.edu), *Associate Professor of Mathematics Education, Department of Mathematics & Statistics*, PHD, Ohio State University; MA, Miami University; BA, Berea College

Edward W. Swim, PHD (ews007@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas Tech University; MS, Colorado School of Mines; BS, Angelo State University

Timothy O Trujillo, PHD (txt031@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Denver; MS, New Mexico Inst/Mining/Tech; BS, New Mexico Inst/Mining/Tech

Rawya Ahmad Tubaishat, MS (rat037@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Prairie View A&M University

Yu Wang, MS (yxw026@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Texas A&M University; BS, North Dakota State University

Ellen Lorraine Weld, PHD (elw028@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Purdue University; BS, Ball State University

Matthew Stephen Williams, MS (mww013@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Margaret Sucec Young, MED (msyoung@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MED, Sam Houston State University; BS, Texas A&M University

Marsha Muecke Young, PHD (mmy008@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Baylor University; MA, Baylor University; MS, Sam Houston State University; BS, Sam Houston State University

Linda Reichwein Zientek, PHD (lrz002@shsu.edu), *Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Sam Houston State University; BS, Sam Houston State University

Bachelor of Science, Major in Data Science

Code	Title	Hours
Bachelor of Science, Major in Data Science		
Core Curriculum		
Component Area I (Communication)		6
Component Area II (Mathematics) ¹		3
Component Area III (Life and Physical Science) (Courses for Science Majors)		8
Component Area IV (Language, Philosophy, and Culture)		3
Component Area V (Creative Arts)		3
Component Area VI (U.S. History)		6
Component Area VII (Political Science/Government)		6
Component Area VIII (Social and Behavioral Sciences)		3
Component Area IX (Component Area Option)		4
Degree Specific Requirements		
MATH 1420	Calculus I ¹	4
Major: Foundation		
BANA 4373	Advanced Business Analytics for Economics and Business	3
COSC 1436	Programming Fundamentals I	4
COSC 1437	Programming Fundamentals II	4
COSC 3318	Data Base Management Systems	3
MATH 1430	Calculus II	4
MATH 3377	Introduction to Linear Algebra and Matrices	3
STAT 3379	Statistical Methods in Practice	3
STAT 3381	Sample Survey Methods	3
STAT 3382	Introduction to Statistical Computing	3
STAT 3385	Statistical Methods for Data Science	3
STAT 4371	Theory and Applications of Probability and Statistics I	3
STAT 4373	Nonparametric Statistics	3
STAT 4374	Regression Modeling & Analysis	3
STAT 4390	Introduction to Statistical Learning	3
Major: Concentration		
Select one concentration from below options: ²		33-34
Statistics		
Computer Science		
Economics		
Minor: Not Required ³		
Total Hours		120-121

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour of the Core Curriculum requirement for Component Area IX (Component Area Option). MATH 1420 satisfies the prerequisite requirement for MATH 1430.

² Select one Concentration (Statistics, Computer Science, or Economics) from the options below.

³ A minor is not required for this degree program; however, a student has the option to add a minor, but to do so additional semester credits hours may be needed above the degree program's stated total semester credit hours.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Code	Title	Hours
Major: Concentration (Statistics) ²		
GEOG 2464	Introduction to Geographic Information Systems (GIS)	4

¹ ECON 2301 and ECON 2302 satisfy the Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences).

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Data Science is designed to provide graduates with the following marketable skills:

- Use critical thinking skills, along with inductive and deductive reasoning, to translate substantive questions into well-defined problems requiring effective, on time solutions.
- Develop the competence and capacity for data collection, data wrangling, and data visualization techniques for pursuing real world problems.
- Utilize programming and database management skills to organize and analyze data effectively, including capabilities for developing statistical/predictive modeling.
- Apply statistical/machine learning techniques for model-building and testing, while also being effective in applying other data science methodologies to provide actionable insights.
- Demonstrate efficient and effective written and oral communication skills necessary for presenting problem solutions and results to both data-oriented and non-data-oriented stakeholders.

These skills will be introduced and continually refined, at the appropriate developmental levels, as students progress through the curriculum.

Bachelor of Arts, Major in Mathematics

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-degree-in-mathematics/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

¹ MATH 1420 satisfies Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour of Component Area IX (Component Area Option).

² PHYS 1411 or PHYS 1422 satisfies 4 hours of Core Curriculum requirement for Component Area III (Life and Physical Sciences)

³ WOLC 2311 satisfies Core Curriculum requirement for Component Area IV (Language, Philosophy, and Culture).

⁴ PHIL 2303 satisfies Core Curriculum requirement for Component Area VIII (Social and Behavioral Sciences).

⁵ ENGL 2332 satisfies three semester credit hours of the Core Curriculum requirement for Component Area IX (Component Area Option).

⁶ See the Courses for Science Majors Course List (from Component Area III) below.

⁷ Prescribed MATH Electives do not include MATH 3379/STAT 3379, MATH 3380, MATH 3381, MATH 3383, MATH 3384, MATH 3386, MATH 3387, MATH 4384, and MATH 4385.

⁸ Students should use the Minor and Advanced Electives to complete the 42-advanced hour requirement for graduation.

⁹ The following minor cannot be paired with this degree program: Minor in Mathematics.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.5 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use the Minor and Advanced Electives to complete the 42-advanced hour requirement for graduation.

Anyone considering a degree in Mathematics should consult an Advisor in the Department of Mathematics prior to registering for any courses. For more information, please, visit the Lee Drain Building, Room 420.

In order to satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science), except for the Department of Physics, the student must take classes from the following:

Code	Title	Hours
Courses for Science Majors (from Component Area III) ⁶		
BIOL 1406	General Biology I	4

BIOL 1407	General Biology II	4
BIOL 2401	Human Anatomy	4
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4

Any lab course from Geology or Geography

- ¹⁰ Satisfies Core Curriculum requirement for Component Area IX (Component Area Option).
- ¹¹ Satisfies Core Curriculum requirement for Component Area IV (Language, Philosophy, and Culture).

¹² Prescribed MATH electives do not include MATH 3379, STAT 3379, MATH 3380, MATH 3381, MATH 3383, MATH 3384, MATH 3386, MATH 3387, MATH 4384, and MATH 4385.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.5 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

Students should use the Minor and Advanced Electives to complete the 42-advanced hour requirement for graduation.

Anyone considering a degree in Mathematics should consult an Advisor in the Department of Mathematics prior to registering for any courses. For more information, please, visit the Lee Drain Building, Room 420.

In order to satisfy the Core Curriculum requirement for Component Area III (Life and Physical Science), except for the Department of Physics, the student must take classes from the following:

Code	Title	Hours
Courses for Science Majors (from Component Area III) ¹		
BIOL 1406	General Biology I	4
BIOL 1407	General Biology II	4
BIOL 2401	Human Anatomy	4
CHEM 1411	General Chemistry I	4
CHEM 1412	General Chemistry II	4
Any lab course from Geology or Geography		

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BA in Mathematics is designed to provide graduates with the following marketable skills:

- Ability to apply appropriate mathematical methods to data and problem solving.
- Ability to learn, synthesize and explain sophisticated information.
- Proficiency in scientific computing environments, databases and programming languages, such as Matlab, Mathematica, SageMath, Excel, Java and Python.

Bachelor of Science, Major in Mathematics

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/bachelor-degree-in-mathematics/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework to complete the BS in Mathematics degree.

Students must meet a 2.5 minimum overall major GPA in all major coursework to complete the BS in Mathematics degree.

Students must earn a 2.0 minimum SHSU GPA in all coursework to complete the BS in Mathematics degree.

Students must meet a 2.5 minimum SHSU major GPA in all major coursework to complete the BS in Mathematics degree.

Students should use the Minor and Advanced Electives to complete the 42-advanced hour requirement for graduation.

Anyone considering a degree in Mathematics should consult an advisor in the Department of Mathematics prior to registering for any courses. For more information, please visit the Lee Drain Building, Suite 420.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Mathematics: 4+1 MS in Mathematics is designed to provide graduates with the following marketable skills:

- Expertise in mathematical analysis and problem solving that is applicable in a wide variety of industry-related positions.
- Expertise in mathematical writing.
- Experience in multiple phases of course preparation and teaching of mathematics at the freshman level.
- Preparation for further study at the doctoral level in mathematics and closely related areas.
- Proficiency in a variety of scientific computing environments and programming languages.

Minor in Mathematics

A Minor in Mathematics includes the following courses:

Code	Title	Hours
Minor in Mathematics ¹		
Required Courses		
MATH 1420	Calculus I	4
MATH 1430	Calculus II	4
Select one of the following: ²		10
MATH 2440	Calculus III (and 6 semester hours of advanced mathematics with no more than 3 hours of courses cross-listed with STAT)	
10 semester hours of advanced mathematics with no more than 3 hours of courses cross-listed with STAT; excluding MATH 3379/STAT 3379		
Total Hours		18

¹ A student's major program of study may also impose requirements on a minor in mathematics. Thus, the selection of courses for a mathematics minor should be made with the counsel of the major advisor and a mathematics advisor.

² MATH 3380, MATH 3381, MATH 3382, MATH 3383, MATH 3384, MATH 3386, MATH 3387, MATH 4384, MATH 4385, and MATH 3379 / STAT 3379 may not be used as advanced mathematics electives toward the Minor in Mathematics.

Minor in Statistical Methods

A Minor in Statistical Methods consists of the following courses:

Code	Title	Hours
Minor in Statistical Methods		
Required Courses		
Select six of the following		18
STAT 3379	Statistical Methods in Practice	
STAT 3380	Statistical Design and Analysis of Experiments	
STAT 3381	Sample Survey Methods	
STAT 3382	Introduction to Statistical Computing	
STAT 4370	Special Topics in Statistics	
STAT 4373	Nonparametric Statistics	
STAT 4374	Regression Modeling & Analysis	
STAT 4375	Quality Control & Reliability	
STAT 4376	Time Series and Forecasting	
STAT 4377	Introduction to Applied Bayesian Analysis	
STAT 4390	Introduction to Statistical Learning	

STAT 4090	Independent Study	
Total Hours		18

Special topics courses include choices, such as Survival Modeling and Biostatistics.

A **concentration** of twelve semester hours is appropriate for students who need an understanding of statistics to augment study in another field but who do not require a minor in statistics. A typical concentration might consist of:

Code	Title	Hours
Courses Required		
STAT 3379	Statistical Methods in Practice	3
Select three of the following:		9
STAT 3380	Statistical Design and Analysis of Experiments	
STAT 3381	Sample Survey Methods	
STAT 3382	Introduction to Statistical Computing	
STAT 4370	Special Topics in Statistics	
STAT 4371	Theory and Applications of Probability and Statistics I	
STAT 4372	Theory and Applications of Probability and Statistics II	
STAT 4373	Nonparametric Statistics	
STAT 4374	Regression Modeling & Analysis	
STAT 4375	Quality Control & Reliability	
STAT 4376	Time Series and Forecasting	
STAT 4377	Introduction to Applied Bayesian Analysis	
STAT 4390	Introduction to Statistical Learning	
STAT 4090	Independent Study	
Total Hours		12

Minor in Statistical Theory

A Minor in Statistical Theory consists of the following courses:

Code	Title	Hours
Minor in Statistical Theory		
Required Courses		
MATH 1430	Calculus II ¹	4
STAT 4371	Theory and Applications of Probability and Statistics I	3
STAT 4372	Theory and Applications of Probability and Statistics II	3
Select four of the following:		12
STAT 3379	Statistical Methods in Practice	
STAT 3380	Statistical Design and Analysis of Experiments	
STAT 3381	Sample Survey Methods	
STAT 3382	Introduction to Statistical Computing	
STAT 4370	Special Topics in Statistics	
STAT 4373	Nonparametric Statistics	
STAT 4374	Regression Modeling & Analysis	
STAT 4375	Quality Control & Reliability	
STAT 4376	Time Series and Forecasting	
STAT 4377	Introduction to Applied Bayesian Analysis	
STAT 4390	Introduction to Statistical Learning	
STAT 4090	Independent Study	
Total Hours		22

¹ The prerequisite to this, MATH 1420, should be taken to complete Core Curriculum Area II (Mathematics). MATH 1430 may satisfy both major and minor requirements.

Minor in Statistics and Data Science

The Minor in Statistics and Data Science is designed to provide students with the knowledge, skills, and competencies to work in an increasingly data-driven world. Data science is a field of study that combines domain expertise, knowledge of mathematics and statistics, and programming skills to extract meaningful insights from data.

Students with the Minor in Statistics and Data Science may not also select the Minor in Statistical Methods.

Code	Title	Hours
Minor in Statistics and Data Science		
Required Courses		
STAT 3379	Statistical Methods in Practice	3
or STAT 3390	Probability and Statistics for Sciences	
STAT 3385	Statistical Methods for Data Science	3
STAT 4374	Regression Modeling & Analysis	3
STAT 4390	Introduction to Statistical Learning	3
Prescribed Electives		
Select two from the following:		6
STAT 3380	Statistical Design and Analysis of Experiments	
STAT 3381	Sample Survey Methods	
STAT 3382	Introduction to Statistical Computing	
STAT 4370	Special Topics in Statistics	
STAT 4371	Theory and Applications of Probability and Statistics I	
STAT 4372	Theory and Applications of Probability and Statistics II	
STAT 4373	Nonparametric Statistics	
STAT 4375	Quality Control & Reliability	
STAT 4376	Time Series and Forecasting	
STAT 4377	Introduction to Applied Bayesian Analysis	
Total Hours		18

Department of Physics and Astronomy

Chair: Joel W. Walker, Ph.D. (jwalker@shsu.edu) (936) 294-4803

Website: Department of Physics and Astronomy (<http://www.shsu.edu/academics/physics/>)

Program Summary

Physics and Astronomy are for creative and curiously-minded students who want a shot at cracking Nature's secret source code — people who are excited by questions like "What happened right after the Big Bang?", "How does time warp near a black hole?", or "Can atomic systems coexist in multiple realities at once?"

Physics and Astronomy are for inventive and enterprising students who want to design humanity's future — people who are motivated by questions like "Can clean fusion energy propel equitable access to technology and resources?", "How will quantum computing revolutionize our link with information?", or "When will self-sustaining communities be established on Mars?"

Physicists work to understand the most basic laws of nature in the most simple and general way possible. Physicists likewise apply this understanding to solving engineering and design problems in every facet of modern life. Our faculty specialize in Materials Science (exploring properties of dense atomic systems computationally and with x-ray / atomic-force imaging, and designing superior molecular compounds for engineering applications like batteries and superconductors) and Particle Physics (theory and high-performance computer simulation involving elementary constituents of matter and their interactions, the Large Hadron Collider in Switzerland, the search for dark matter, and mysterious properties of the neutrino).

Astronomers seek to understand our place in the Universe, and to unravel clues about its history from light reaching us across the expanse of space. Our faculty take a special interest in the data-based improvement of approaches to science education, and have research expertise in the topics of stellar spectroscopy and ionized gas in spiral galaxies. The university observatory houses several telescopes for in-person stargazing, and our indoor planetarium provides immersive simulations of the night sky as viewed from any location and date.

Academic Programs

The department offers a Bachelor of Science degree in Physics plus several options for Pre-Engineering. Physics and Engineering go together very well, because so much of Engineering Design is built upon the underlying foundation of Physics.

Pre-Engineering includes more Math (especially Calculus) than Engineering Technology does, and it leads to very different careers. The Accreditation Board for Engineering and Technology (ABET) says that Engineering programs often focus on theory and conceptual design, while Technology programs usually focus on application and implementation. Engineers often do work involving original research and development, and many continue on to Masters or Doctoral programs in Engineering. Technologists are most likely to work in construction, manufacturing, product design, testing, or technical services and sales.

In the Dual Degree, or "3+2" program, students earn degrees in both Physics and Engineering. This starts with three years at SHSU, completing the Core Curriculum, the Calculus and Physics introductory sequence, and a portion of the upper division Physics Curriculum. Students then apply to any accredited Engineering program at an institution of their choice for the last two years of degree work. One option is UT Tyler, where a transfer agreement guarantees admission for students with a 2.5 GPA. After completion of the Engineering Degree, credits are retroactively transferred back to SHSU so that the Physics Degree can be awarded simultaneously.

The "2+2" Pre-Engineering Tracks in Civil, Mechanical, and Electrical Engineering are four-year degrees where students transfer to an accredited Engineering Program (such as UT Tyler) after completing two years at SHSU.

The Bachelor of Science degree in Physical Science with Secondary Certification is available to students seeking careers in secondary education.

The Minor in Physics pairs well with other Science, Technology, Engineering, and Mathematics (STEM) majors. It also complements a number of cross-over careers such as Science Journalism, and K-12 Science Education.

Career Opportunities

A degree in Physics or Pre-Engineering leads to many profitable career options because it develops marketable attributes and skills that employers are greatly interested in. This includes mental flexibility, capacity for critical thought, abstraction and generalization, training in creative problem solving, intuition for mechanical and electrical systems, and proficiency in advanced mathematics, data analysis, and computer applications (including programming).

According to the American Institute of Physics (AIP), across the country, 95% of Physics Bachelors are either employed or enrolled in graduate school one year after graduation. PhD students in physics and astronomy usually receive a full tuition waiver plus a substantial wage or stipend. In the private sector, about 35% of graduates do engineering, 25% do computing or information, and 15% take other STEM-related jobs, all with competitive starting salaries. A shortage of high-school physics instructors means that plenty of attractive and well-paid teaching positions are currently accepting applications across the state.

Program Specific Information

Sam Houston State University is a wonderful place to study Physics, Astronomy, and Pre-Engineering. We provide an outstanding educational environment, with small class sizes, extensive personalized attention, and expert instruction. Our students build strong resumes with hands-on faculty-directed research experiences (in topics such as Particle Physics, Materials Science, and Astronomy Education), and have the option to work as paid assistants for introductory laboratory sessions. Most of our students receive scholarship assistance directly from the department and its donors, in amounts up to \$5,000 per year for outstanding candidates.

All students interested in Physics or Pre-Engineering enroll in the Physics Bootcamp (PHYS 1401) during their first semester on campus. This lets interested students see what physics is all about as early as possible, with no prerequisites. It ensures that they have math skills required in the next two years, and helps them understand what those skills are good for in Physics and Engineering. It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.

Vision & Mission

The Department of Physics and Astronomy at Sam Houston State University will be a preferred source of technically equipped employees and scholars, and a vital participant in the global pursuit of fundamental scientific knowledge.

- Faculty will make meaningful professional contributions to their respective research disciplines and actively mentor their students in the practice of scientific investigation.
- Students majoring in physics and pre-engineering, and minoring in astronomy, will be effectively prepared to confront the quantitative, conceptual, and analytical challenges associated with a related career or continuing education.
- All students, including those from other degree programs, will be exposed to the sciences in a manner which nurtures curiosity and develops critical thinking and problem-solving skills that may be usefully projected onto their various professional endeavors and roles in society.

Curriculum

Required Courses For Major

The Bachelor of Science degree requires at least 38 hours in Physics as follows:

Code	Title	Hours
Course Requirements		
PHYS 1401	Physics Boot Camp	4
PHYS 1411	Introduction To Physics I	4
PHYS 1422	Introduction To Physics II	4
PHYS 3370 & PHYS 4110	Introduction to Theoretical Physics and Advanced Undergraduate Laboratory I	4
PHYS 3391 & PHYS 3111	Modern Physics I and Modern Physics Laboratory I	4
PHYS 4366	Introduction to Quantum Mechanics	3
PHYS 4368	Electricity And Magnetism	3
PHYS 4370	Classical Mechanics	3
PHYS 4371	Thermodynamics and Statistical Mechanics	3
PHYS 4395	Undergraduate Research	3
Select 1 or more advanced electives:		3-12
PHYS 3395 & PHYS 3115	Electronics & Circuit Analysis and Electronics and Circuit Analysis Lab	
PHYS 4333 & PHYS 4113	Light And Optics and Light And Optics	
PHYS 4367	Introduction to Solid State Physics	
PHYS 4396	Selected Topics In Physics	
ASTR 3303	Life in the Universe	
ASTR 3383	Cosmic Catastrophes	
Total Hours		38-47

All Physics majors meet the requirements for a minor in mathematics.

- Bachelor of Science, Major in Physics/Engineering Dual Degree
- Bachelor of Science, Major in Physics
- Bachelor of Science, Major in Physics: Civil Engineering 2+2
- Bachelor of Science, Major in Physics: Electrical Engineering 2+2
- Bachelor of Science, Major in Physics: Mechanical Engineering 2+2
- Minor in Astronomy
- Minor in Physics

Employment as a Research or Teaching Assistant

Physics Majors may be paid to participate in faculty-lead research projects (funded by grants from the National Science Foundation or NASA, for example), to help students in introductory physics courses with their laboratory assignments, or to work in the campus tutoring center.

Student Organizations

The Society of Physics is a nationally recognized organization. Students organize science discussions, service projects, construction of demonstrations, graduate school preparation, field trips, tutoring, events hosting potential students, and attendance at professional meetings.

Scholarships

The Physics and Astronomy Department awards scholarships on a competitive basis. Almost all students enrolled in the major receive some assistance, and students with strong GPAs and financial need may be eligible for the prestigious Burroughs or Steele Scholarships, with award amounts from \$3,500 to \$5,000 per year. Interested applicants should inquire with the department at (936) 294-1601. Other Federal and University scholarships are also available, and additional information may be obtained at the Office of Academic Scholarships (<http://www.shsu.edu/dept/financial-aid/scholarships/>) or by telephone (936) 294-1672.

Director/Chair: **Joel W Walker**

James Blackman Dent, PHD (jxd087@shsu.edu), *Associate Professor of Physics, Department of Physics & Astronomy*, PHD, Texas A&M University; BS, Missouri Univ of Sci and Tech

Hui Fang, PHD (hfang@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Houston-Main; ME, Univ of Houston-Main; MS, Zhejiang University; BS, Zhejiang University

Barry Friedman, PHD (phy_baf@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Illinois-Urbana; MS, Univ of Illinois-Urbana; BA, Rice University

Daniel Taylor Horenstein, MS (dth041@shsu.edu), *Lecturer of Physics and Astronomy, Department of Physics & Astronomy*, MS, Georgia State University; BA, Columbia University

Carol Renee James, PHD (phy_crj@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BA, Rice University

Gan Liang, PHD (phy_gnl@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Rutgers University; BS, Beijing University

Scott T Miller, PHD (stm009@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Maryland-College Park; MS, Univ of Maryland-College Park; BA, Rutgers University; BS, Rutgers University

William Madsen Shepherd, PHD (shepherd@shsu.edu), *Assistant Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Calif-Irvine; MS, Northwestern University; MS, Northwestern University; BA, Northwestern University; BA, Northwestern University; BA, Northwestern University

Total Hours: 120

- ¹ Satisfies Core Curriculum requirement for Component Area III (Life and Physical Science).
- ² Satisfies Core Curriculum requirement for Component Area I (Communications).
- ³ Satisfies Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour of the Core Curriculum requirement for Component Area IX (Component Area Option).
- ⁴ Satisfies Core Curriculum requirement for Component Area VI (U.S. History).
- ⁵ Satisfies Core Curriculum requirement for Component Area VII (Political Science).

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

The following minor cannot be paired with this degree program: Minor in Physics.

All students interested in Physics or Pre-Engineering enroll in the Physics Bootcamp (PHYS 1401) during their first semester on campus. This lets interested students see what Physics is all about as early as possible, with no prerequisites. It ensures that they have math skills required in the next two years and helps them understand what those skills are good for in Physics and Engineering. It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.

A student may need preparatory work in Mathematics or might be eligible for advanced placement, either of which necessitates adjustment of the schedule. Such a student should consult a member of the Physics or Mathematics faculty concerning his/her schedule.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The BS in Physics is designed to provide graduates with the following marketable skills:

- Ability to creatively solve real-world problems.
- Sophisticated understanding of applied mathematics.
- Capacity to analyze and interpret complex data.
- Quantitative understanding of mechanical, electrical, and thermal systems.
- Model complex interactions with computer programming and technology.

Notes

Students must earn a 2.0 minimum overall GPA in all coursework.

Students must meet a 2.0 minimum overall major GPA in all major coursework.

Students must earn a 2.0 minimum SHSU GPA in all coursework.

Students must meet a 2.0 minimum SHSU major GPA in all major coursework.

While SHSU does not offer degrees in Engineering, the Department of Physics and Astronomy does provide several options for Pre-Engineering. Physics and Engineering go together very well; because, so much of Engineering Design is built upon the underlying foundation of Physics.

Pre-Engineering includes more Math (especially Calculus) than Engineering Technology does, and it leads to very different careers. The Accreditation Board for Engineering and Technology (ABET) says that Engineering programs often focus on theory and conceptual design, while Technology programs usually focus on application and implementation. Engineers often do work involving original research and development, and many continue on to Masters or Doctoral programs in Engineering. Technologists are most likely to work in construction, manufacturing, product design, testing, or technical services and sales.

*In the Dual Degree, or "3+2" program, students earn degrees in both Physics and Engineering. This starts with three years at SHSU, completing the Core Curriculum, the Calculus and Physics introductory sequence, and a portion of the upper division Physics Curriculum. Students then apply to any accredited Engineering program at an institution of their choice for the last two years of degree work. One option is UT Tyler (either the main campus or the Houston Engineering Center), where a transfer agreement guarantees admission for students with a 2.5 GPA. After completion of the Engineering Degree, credits are retroactively transferred back to SHSU so that the Physics Degree can be awarded simultaneously.

The "2+2" Pre-Engineering Tracks in Civil, Mechanical, and Electrical Engineering are four-year degrees where students transfer to an accredited Engineering Program (such as UT Tyler) after completing two years at SHSU.

The Department of Chemistry offers a similar "3+2" program combining Bachelor's of Science degrees in Chemistry (from SHSU) and Chemical Engineering (from an accredited program).

All students interested in Physics or Pre-Engineering enroll in the Physics Bootcamp (PHYS 1401 (<http://catalog.shsu.edu/search/?P=PHYS%201401>)) during their first semester on campus. This lets interested students see what physics is all about as early as possible, with no prerequisites. It ensures that they have math skills required in the next two years and helps them understand what those skills are good for in Physics and Engineering. It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.

For more information on the Pre-Engineering programs at SHSU contact:

Department Chair
Physics and Astronomy (<http://www.shsu.edu/academics/physics/>)
Sam Houston State University
Huntsville, Texas 77341-2267
(936) 294-1601

Students entering a Pre-Engineering program must consult with an academic advisor in the Department of Physics and Astronomy to ensure that their degree plan meets all admission requirements of programs into which they seek to transfer.

Total Hours		77

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour for Component Area IX (Component Area IX) as well as the major.

² Satisfies the Core Curriculum requirement for Component Area III (Life and Physical Science) as well as the major.

While SHSU does not offer degrees in Engineering, the Department of Physics and Astronomy does provide several options for Pre-Engineering. Physics and Engineering go together very well, because so much of Engineering Design is built upon the underlying foundation of Physics.

Students on the Civil Pre-Engineering plan complete 77 credit hours in residence at Sam Houston State University, focusing on the Core Curriculum and developing a firm foundation in math and the hard sciences. They then transfer to a partner institution to complete remaining requirements for award of a degree in Civil Engineering. Our academic articulation agreement with the University of Texas at Tyler (UT-Tyler) makes the transfer of matching credit a seamless process and guarantees acceptance for students meeting GPA requirements. However, students are also free to continue their study at any institution with an accredited Engineering program.

For students considering Pre-Engineering vs. Engineering Technology, it is very important to understand the similarities and differences between these programs. Engineering tracks include significantly more Math (especially Calculus) than Technology tracks do, leading to very different careers. The Accreditation Board for Engineering and Technology (ABET) says that Engineering programs often focus on theory and conceptual design, while Technology programs usually focus on application and implementation. Engineers often do work involving original research and development, and many continue on to Masters or Doctoral programs in Engineering. Technologists are most likely to work in construction, manufacturing, product design, testing, or technical services and sales. Students interested in Engineering are supervised by the Department of Physics and Astronomy. Students interested in Technology are supervised by the Department of Engineering Technology.

Students may also wish to consider the Physics and Engineering Dual Degree, or "3+2" program, where students earn Bachelors Degrees in both Physics and Engineering. This starts with three years at SHSU, completing the Core Curriculum, the Calculus and Physics introductory sequence, and a portion of the upper division Physics Curriculum. Students then transfer to UT Tyler (either the main campus or the Houston Engineering Center) or apply for acceptance to any accredited Engineering program of their choice for the last two years of degree work. After completion of the Engineering Degree, credits are retroactively transferred back to SHSU so that the Physics Degree can be awarded simultaneously.

All students interested in Physics or Pre-Engineering enroll in the Physics Bootcamp (PHYS 1401) during their first semester on campus. This ensures that students master the math skills required during the next two years and helps them understand what those skills are good for in Physics and Engineering. It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.

Bachelor of Science, Major in Physics, Electrical Engineering 2+2

Code	Title	Hours
Bachelor of Science, Major in Physics, Electrical Engineering 2+2		
Core Curriculum		
Component Area I (Communication)		6
Component Area II (Mathematics) ¹		3
Component Area III (Life and Physical Science) ²		8
Component Area IV (Language, Philosophy, and Culture)		3
Component Area V (Creative Arts)		3
Component Area VI (U.S. History)		6
Component Area VII (Political Science/Government)		6
Component Area VIII (Social and Behavioral Sciences)		3
Component Area IX (Component Area Option)		4
Degree Specific Requirements		
CHEM 1411	General Chemistry I ²	4
CHEM 1412	General Chemistry II ²	4

MATH 1420	Calculus I ¹	4
MATH 1430	Calculus II	4
PHYS 1401	Physics Boot Camp	4
PHYS 1411	Introduction To Physics I	4
PHYS 1422	Introduction To Physics II	4
Major: Foundation		
MATH 3376	Differential Equations	3
PHYS 3115	Electronics and Circuit Analysis Lab	1
PHYS 3395	Electronics & Circuit Analysis	3
Major: Concentration		
COSC 1436	Programming Fundamentals I	4
ETDD 1361	Engineering Graphics	3
ETEC 1010	Engineering Foundations	2
MATH 2440	Calculus III	4
Total Hours		78

¹ MATH 1420 satisfies the Core Curriculum requirement for Component Area II (Mathematics) and one semester credit hour for Component Area IX (Component Area IX) as well as the major.

² Satisfies the Core Curriculum requirement for Component Area III (Life and Physical Science) as well as the major.

While SHSU does not offer degrees in Engineering, the Department of Physics and Astronomy does provide several options for Pre-Engineering. Physics and Engineering go together very well, because so much of Engineering Design is built upon the underlying foundation of Physics.

Students on the Electrical Pre-Engineering plan complete 78 credit hours in residence at Sam Houston State University, focusing on the Core Curriculum and developing a firm foundation in math and the hard sciences. They then transfer to a partner institution to complete remaining requirements for award of a degree in Electrical Engineering. Our academic articulation agreement with the University of Texas at Tyler (UT-Tyler) makes the transfer of matching credit a seamless process and guarantees acceptance for students meeting GPA requirements. However, students are also free to continue their study at any institution with an accredited Engineering program.

For students considering Pre-Engineering vs. Engineering Technology, it is very important to understand the similarities and differences between these programs. Engineering tracks include significantly more Math (especially Calculus) than Technology tracks do, leading to very different careers. The Accreditation Board for Engineering and Technology (ABET) says that Engineering programs often focus on theory and conceptual design, while Technology programs usually focus on application and implementation. Engineers often do work involving original research and development, and many continue on to Masters or Doctoral programs in Engineering. Technologists are most likely to work in construction, manufacturing, product design, testing, or technical services and sales. Students interested in Engineering are supervised by the Department of Physics and Astronomy. Students interested in Technology are supervised by the Department of Engineering Technology.

Students may also wish to consider the Physics and Engineering Dual Degree, or "3+2" program, where students earn Bachelors Degrees in both Physics and Engineering. This starts with three years at SHSU, completing the Core Curriculum, the Calculus and Physics introductory sequence, and a portion of the upper division Physics Curriculum. Students then transfer to UT Tyler (either the main campus or the Houston Engineering Center) or apply for acceptance to any accredited Engineering program of their choice for the last two years of degree work. After completion of the Engineering Degree, credits are retroactively transferred back to SHSU so that the Physics Degree can be awarded simultaneously.

All students interested in Physics or Pre-Engineering enroll in the Physics Bootcamp (PHYS 1401) during their first semester on campus. This ensures that students master the math skills required during the next two years and helps them understand what those skills are good for in Physics and Engineering. It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.

It develops confidence, teamwork, camaraderie, and a sense of belonging in the department. A weekly group-based problem-solving practice session is integrated. The Bootcamp is typically offered each Fall and Spring term.

Minor in Astronomy

The Astronomy Minor pairs perfectly with the Physics Major for students continuing to a Master's or PhD program in Astronomy. It likewise goes well with Pre-Engineering or Engineering Technology, for students targeting employment in the burgeoning Texas aerospace sector, or with an Education Major for future science teachers. The Astronomy Minor is also accessible to all who simply love exploring the majesty of our universe, with no advanced physics or mathematics requirements.

Code	Title	Hours
Minor in Astronomy		
Required Courses		
PHYS 1403	Stars & Galaxies	4
PHYS 1404	Solar System Astronomy	4
ASTR 3303	Life in the Universe	3
ASTR 3383	Cosmic Catastrophes	3
Prescribed Electives		
Select one to two courses from the following:		4-6
PHYS 3397 & PHYS 3117	Astronomy and Astronomy Laboratory	
PHYS 4333 & PHYS 4113	Light And Optics and Light And Optics	
PHYS 4395	Undergraduate Research	
PHYS 4396	Selected Topics In Physics	
PHYS 4398	Senior Thesis	
Total Hours		18-20

Minor in Physics

A minor in Physics requires a minimum of 22 hours of coursework and shall include:

Code	Title	Hours
Minor in Physics		
Required Courses		
PHYS 1401	Physics Boot Camp	4
PHYS 1411	Introduction To Physics I	4
PHYS 1422	Introduction To Physics II	4
PHYS 3391 & PHYS 3111	Modern Physics I and Modern Physics Laboratory I	4
Select two advanced PHYS electives, typically from:		6-7
PHYS 3370 & PHYS 4110	Introduction to Theoretical Physics and Advanced Undergraduate Laboratory I	
PHYS 4366	Introduction to Quantum Mechanics	
PHYS 4368	Electricity And Magnetism	
PHYS 4370	Classical Mechanics	
PHYS 4371	Thermodynamics and Statistical Mechanics	
Total Hours		22-23

First Year Experience

Director: Kay Angrove (kangrove@shsu.edu) (936) 294-3422

Website: First Year Experience (<http://www.shsu.edu/fye/>)

Sam Houston State University has developed a comprehensive, coordinated approach toward the First-Year Experience including first-year seminar courses, learning communities, peer mentor support, and first-year course schedule building assistance for an optimal experience. New Student Convocation, an SHSU Common Reader program, and a comprehensive offering of leadership opportunities and support strategies for first-year students at SHSU round out the SHSU First-Year Experience.

UNIV 1101 Learning communities (<http://www.shsu.edu/dept/fye/FLC/>) provide students the opportunity to take a major-themed or special interest themed one-hour UNIV 1101: Learning Frameworks class section with other first-year students who have similar interests or classes. The learning communities are designed to foster the intellectual and social development of students through increased interaction with fellow students, faculty, and staff. SHSU learning communities are available in fall semesters. There are planned activities designed to enhance connections to students college major, to increase academic success, and to provide a positive social atmosphere outside of the classroom. Each UNIV 1101 First Year Learning Community includes a peer mentor for support from an experienced successful college student in addition to an instructor dedicated to first year student success.

For further information call (936) 294-3422, e-mail (fye@shsu.edu) or visit First Year Experience. (<http://www.shsu.edu/dept/fye/#wwwshsuedu/f>)

Honors College

Website: <http://honors.shsu.edu> (<http://honors.shsu.edu/>)

Email: Honors College (honors@shsu.edu)

The Elliott T. Bowers Honors College exists for the benefit of highly motivated and academically talented undergraduate students at Sam Houston State University. The Honors College provides these achievement-oriented students with the following benefits and opportunities:

- financial support, including scholarships and research funding
- interaction with other highly motivated students
- special course offerings, including honors seminars
- limited-enrollment classes
- close contact with engaged and highly productive faculty
- early registration
- supervised undergraduate research
- community service and civic engagement
- access to honors-only facilities (including honors residence halls on campus, honors lounge, honors library study room, and honors computer lab)

- a variety of cultural and social outings and events—on campus and off—throughout the academic year
- involvement in the annual Undergraduate Research Symposium and TEDx Conference

Honors students earn honors credit in a variety of specially designated classes or contracted courses and work toward the distinction of graduating “With Honors” or “With Highest Honors.” To qualify for graduation “With Honors,” students must be members in good standing in the Honors College and have completed 24 hours of honors credit, including participation in two interdisciplinary honors seminars. To qualify for graduation “With Highest Honors,” students must, in addition, complete the six-hour honors thesis in an approved discipline under the direction of a faculty member of their choice. Those who graduate “With Honors” or “With Highest Honors” receive an honors cord, stole, and medallion and are announced as honors graduates at commencement.

To be considered for admission to the Honors College, either when first entering SHSU or as a continuing SHSU student, students submit a special application to the Honors College Office.

Incoming freshmen are eligible for consideration if they have achieved one of the following:

- a composite SAT I score (Critical Reading + Math) of 1270 or above
- a composite ACT score of 27 or above
- graduated in the top 10 percent of their high school class
- 3.5 unweighted high school G.P.A.

Transfer and continuing SHSU students are eligible for consideration if they have achieved a college cumulative GPA of 3.25 or better.

Admission is competitive. Selections are determined by a comprehensive review of each completed application by the honors faculty admissions committee.

Each year, incoming first-time freshmen who have applied and been accepted to the Honors College by January 1 and have earned a composite SAT score of 1320 or composite ACT score of 29 or above are eligible for one of 23 Honors Scholarships (worth up to \$40,000 over four years). Moreover, students who have earned a composite SAT score of 1350 or composite ACT score of 30 or higher will be considered for one of two Bowers Scholarships (worth up to \$80,000 over four years). Scholarships are highly competitive, and eligible students will be reviewed by a special honors committee and may be invited for interviews. Awards are for fall semesters only.

Honors Seminars are designed to provide unique, broadly integrative, interdisciplinary educational experiences to all Elliott T. Bowers honors students. These courses are highly interactive between professors and students. These and other educational initiatives provide honors students with a rich and challenging interdisciplinary learning environment.

To remain in good standing once accepted to the Honors College, students must maintain a 3.25 grade point average, make steady progress toward completing honors requirements, be honors advised each semester, and attend a minimum of three honors engagement events per year.

McNair Scholars Program

The Ronald E. McNair Postbaccalaureate Achievement Program is designed to provide talented low-income/ first generation and ethnic minority undergraduate students with effective preparation for doctoral study. The McNair Program at Sam Houston State University encourages graduate studies by providing opportunities for undergraduates to define their goals, engage in research, and develop the skills and faculty mentor relationships that are critical to success at the doctoral level.

Dr. Lydia Fox (lcruzfox@shsu.edu) - **Director**

Department of Military Science

Chair: Lieutenant Colonel Joshua Limberg

The Department of Military Science at Sam Houston State University is administratively aligned with the Associate Provost and Vice President for Academic Affairs.

Course of Instruction

Army Reserve Officer's Training Corps (ROTC) classes are offered on an elective basis. Students may take the lower-division courses and summer Army training such as Airborne School without obligation for military service. Students who desire to pursue upper-division courses may complete the ROTC program and compete for an officer commission on Active Duty, in the U. S. Army Reserve, or Army National Guard. A minor in military science is offered.

Army ROTC Scholarships

The United States Army offers two, three, and four-year competitive scholarships annually. The four year scholarship is awarded by a National Board and can be accessed at <http://www.goarmy.com/rotc/scholarships.html>. Two and three year scholarships are vetted and awarded by the Department of Military Science based on annual availability and the strength of the applicant. Competitive candidates will have a minimum 2.5 GPA, strong physical fitness attributes, and demonstrated leadership capability. These scholarships pay full tuition and fees and provide \$1,200.00 for books and supplies. Scholarship and non-scholarship contract students receive a subsistence allowance of \$420 for up to ten months per year. Several other private scholarships are awarded annually to students enrolled in Military Science courses. All students are encouraged to contact the Department of Military Science for an application or to learn more.

Tuition Rates

In-state rates for fees and tuition are given to out-of-state students that have agreed to accept a commission in the U.S. Army, Army Reserve, or Army National Guard.

Academic Substitution

Limited course substitution is available with permission of both the PMS and the department chair concerned.

Academic Minor

Students may seek a minor in Military Science with the approval of the PMS and the approval of the dean of the college in which the student pursues his/her major. Requirements are eighteen hours of advanced Military Science, six hours from the Professional Military Education (PME) component courses, 3 hours approved Military History course, and 3 hours of English Composition II.

- No-Obligation Program
- Army Commissioning Program

Army Commissioning Program

1. **Army Commissioning Program (*Advanced Course*)**. This program is divided into two-year and four-year commissioning plans.
 - a. **Two-Year Compression Commissioning Plan.**
 - i. **Upperclassmen and Graduate Students.** Students who have already completed a portion of their degree plan can pursue a commission as an officer in the U.S. Army, Army Reserve, or Army National Guard. This program is offered to students who have no prior military or military-equivalent training and have approximately two years remaining to complete their undergraduate or graduate degree plan. To qualify, students first attend a four-week summer Basic Camp at Fort Knox, Kentucky. The Basic Camp provides new Cadets with foundational leadership skills, training in individual and collective tasks, and critical thinking and problem solving skills. Upon completion of training, the new Cadet understands the officer's role in leading change and the fundamentals of the Army as a profession. The government pays all travel expenses, furnishes room, board, and clothing, and pays students a per diem of approximately \$900.00. Moreover, students are eligible to compete for two-year scholarships and the university awards four credit hours for this training. After successfully completing the Basic Camp students may enroll in upper-division Military Science courses and receive a monthly allowance of \$420. Students must maintain a 2.5 GPA, pass the Army Physical Fitness Test, meet height and weight standards, and maintain high moral and ethical standards to remain enrolled and earn their commission as an officer.
 - ii. **Veterans.** Student Veterans and National Guard or Army Reserve members who have completed some military training and service may start the ROTC program at the upper-division level, when academically prepared (typically 60 or more credit hours and capable of completing remaining academic work in two academic years). Their applications to start the program will be approved by the Military Science Department Chair. National Guard and Army Reserve members may remain in the Guard or Reserve under the Simultaneous Membership Program (SMP). This course of action is strongly encouraged. Contracted juniors receive a monthly allowance of \$420. These stipends are in addition to any pay and entitlements provided by the Guard or Reserve.
 - iii. **Professional Military Education (PME) Component.** The United States Army mandates that Army ROTC students pursuing a commission as an Army officer complete certain Professional Military Education (PME) requirements in order to be commissioned. The PME consists of a baccalaureate degree and the completion of at least one undergraduate course from each of the following designated fields of study: written communications and military history. Students desiring to pursue a minor in Military Science, and/or a course of instruction which

will satisfy the requirements for a commission in the U.S. Army, are required to seek dual advising and approval from the university and the Military Science Department Chair in order to ensure that these special requirements are satisfied.

- iv. **Cadet Professional Development Training (CPDT).** During the compression commissioning plan, Military Science Level 3 students have the opportunity to conduct additional training beyond their attendance at Advance Camp. They can choose to attend Cadet Troop Leader Training (CTLT) or apply for internships. Additional opportunities include serving as a leader during a Basic Camp rotation or attending Army schools such as Airborne, Air Assault, Northern Warfare, or Scuba school. All of these opportunities require students to compete against their peers for a position and provide important skills and competencies required to earn their desired component and branch.

b. **Four-Year Progression Commissioning Plan.**

- i. **Lower-Division Courses (Basic Course).** Under the four-year commissioning plan, lower-division military science courses (MLSC 1101, 1211, 1212, 2101, 2211, 2212) are required prior to taking upper-division military science courses. These course must also be completed to commission as a military officer. Nevertheless, these courses remain open to all students without obligation for future military service. These basic courses provide instruction in leadership, communication skills, critical thinking, time management, and provide an introduction to the U.S. Army profession. The basic course highlights the career options, values/ethics, training, and benefits provided by the U.S. Army. Scholarship or contracted students will receive a monthly allowance of \$420. Students must maintain a 2.5 GPA, pass the Army Physical Fitness Test, maintain height and weight standards, and maintain high moral and ethical standards to remain enrolled and earn their commission as an officer.
- ii. **Upper-Division Courses (Advance Course).** The Upper-Division (3000 and 4000 level) courses offered by the department are normally taken during the junior and senior years or while pursuing graduate work. These courses prepare students for their future as commissioned officers in the United States Army. Enrollment in upper-division courses requires the student to commit (contract) to commissioning after graduation and serving in the U.S. Army Reserve, the Army National Guard, or the Active Army. Students enrolled in upper-division courses receive a monthly subsistence allowance of \$420. Students are required to attend the Advanced Course at Fort Knox, Kentucky during the summer between their junior and senior years. At the Advance course, students in the upper division participate in physically and mentally challenging instruction and training. During this training period, the student demonstrates their proficiency through leadership scenarios and through the completion of hands-on tasks. The government pays all travel expenses, furnishes room, board, and clothing, and pays students a per diem of approximately \$900.00. The university awards students four credit hours for the training. Lower-division military science courses are required prior to enrolling in upper-division courses if pursuing the four-year commissioning plan.
- iii. **Professional Military Education (PME) Component.** The United States Army mandates that Army ROTC students pursuing a commission as an Army officer complete certain Professional Military Education (PME) requirements in order to be commissioned. The PME consists of a baccalaureate degree and the completion of at least one undergraduate course from each of the following designated fields of study: written communications and , military history. Students desiring to pursue a minor in Military Science, and/or a course of instruction which will satisfy the requirements for a commission in the U.S. Army, are required to seek dual advising and approval from the university and the Military Science Department Chair in order to ensure that these special requirements are satisfied.
- iv. **Cadet Professional Development Training (CPDT).** During the four year commissioning plan, Military Science Level students have increased time and opportunites to conduct additional training beyond their attendance at Advance Camp. They can choose to attend Cadet Troop Leader Training (CTLT), apply for Cultural Understanding and Learning Programs (CULP) or apply for internships. Additional opportunities include serving as a leader during a Basic Camp rotation, acting as Opposing Forces (OPFOR) for an Advanced Camp rotation, or attending Army schools such as Airborne, Air Assault, Northern Warfare, or Scuba school. All of these opportunities require students to compete against their peers for a position and provide important skills and competencies required to earn their desired component and branch.

No-Obligation Program

1. **No-Obligation Program (Basic Course).** The lower-division (1000 and 2000 level) courses offered by the department are open to all students without obligation for present or future military service. These courses provide instruction in basic leadership and endurance skills that are applicable to any future profession. These courses are generally taken during the freshman and sophomore years. Students attending the no-obligation course may also participate (at no obligation) in summer Cadet Professional Development Training (CPDT) to include Basic Camp, Airborne, Air Assault, Northern Warfare, Mountain Warfare training, and the Advanced Camp Support Mission. Preference for CPDT goes to contracted Cadets, but non-contracted students will be considered on a case-by-case basis.
 - a. **BASIC CAMP.** Basic Camp is a four week developmental training camp conducted at Fort Knox, Kentucky. The camp provides hands-on leadership skills through immersive training scenarios. Specific skills developed include: radio training, weapons proficiency, tactical leadership, and basic Army standards and etiquette. The camp produces a Cadet grounded in foundational leadership doctrine and skills. Upon completion of training, the Cadet demonstrates proficiency in individual and collective tasks at the team and squad level and applies them in a physically demanding, complex, tactical environment. Cadets also comprehend critical thinking and problem solving skills using Troop Leading Procedures. Finally, Cadets learn the value of diversity and understand the officer's role in leading change. This camp teaches the fundamentals of the Army as a profession. The Cadet receives approximately \$900 per diem during training and all travel costs are covered by the government.
 - b. **AIRBORNE TRAINING.** This physically demanding school is scheduled during the summer over a three-week period at Fort Benning, Georgia. Students who successfully complete this school are qualified as Army parachutists and are awarded Army Paratrooper Wings. This training is offered to any student enrolled in Military Science, although available seats are limited.

- c. **AIR ASSAULT TRAINING.** This physically demanding school scheduled during the summer consists of ten days of training which includes a twelve mile road march, an obstacle course, classes in aircraft safety and familiarization, rappelling, rigging, and sling-loading. Air Assault school is offered at various Army posts throughout the United States. This training is offered to any student enrolled in Military Science, although available seats are limited.
- d. **NORTHERN WARFARE SCHOOL.** This is a two-week course conducted at Fort Greeley, Alaska. It consists of physically and mentally demanding training emphasizing movement in mountainous terrain, on glaciers and in in-land waterways. This training is offered to any student enrolled in Military Science, although available seats are limited.
- e. **MOUNTAIN WARFARE SCHOOL.** This is a two-week course conducted at Jericho, Vermont. This training is both physically and mentally challenging with emphasis placed on movement in mountainous terrain. This training is offered to any student enrolled in Military Science, although available seats are limited.
- f. **ADVANCED CAMP SUPPORT MISSION.** Cadets in the Basic Course track have the opportunity to support Advance Camp by serving as Opposing Forces (OPFOR) in the summer of their first or second year. They learn about the Advance Camp structure and gain a tactical training advantage over their peers during the course of this five week long support to the Advance Camp mission. Cadets earn approximately \$1,000 per diem for this summer training mission.

Course Descriptions

Accounting (ACCT)

ACCT 2301. Principles of Financial Accounting. 3 Hours. [TCCN: ACCT 2301]

Students are introduced to the fundamental concepts of financial accounting prescribed by U.S. generally accepted accounting principles (GAAP) and applied to transactions and events that affect business organizations. Topics may include the accounting cycle; the preparation of financial statements; the measurement and reporting of business income; and the valuation and presentation of assets; liabilities; and stockholders' equity. Emphasis is placed on the relevance of the business and economic information generated by the accounting process and how it is used in personal and business decision making. Students are exposed to International Financial Reporting Standards (IFRS). Students who plan to take ACCT 3313 must earn a minimum grade of C in ACCT 2301.

Prerequisite: 18 semester hours of college credit.

ACCT 2302. Principles of Managerial Accounting. 3 Hours. [TCCN: ACCT 2302]

Students are introduced to the fundamental concepts of managerial accounting appropriate for all organizations. Students will study information from the entity's accounting system relevant to decisions made by internal managers, as distinguished from information relevant to users who are external to the company. The emphasis is on the identification and assignment of product costs, operational budgeting and planning, cost control, and management decision-making. Topics may include product costing methodologies, cost behavior, operational and capital budgeting, and performance evaluation. Students who plan to take ACCT 3313 must earn a minimum grade of C in ACCT 2302.

Prerequisite: ACCT 2301.

ACCT 3304. Managerial Accounting. 3 Hours.

Students are introduced to further developed financial accounting concepts, interpretation, and the study of management uses of accounting data. This course includes a study of basic accounting concepts, interpretation of accounting reports, cost control and analysis, and methods of measuring performance. Non-Majors and Non-Minors only.

Prerequisite: ACCT 2302.

ACCT 3313. Intermediate Accounting I. 3 Hours.

Students engage in a thorough study of the accounting principles underlying the preparation of financial statements. This course is concerned primarily with the recording process, formats of the financial statements, the measurement and reporting of current and non-current assets and related revenues and expenses, and the measurement and reporting of current liabilities. The course emphasizes the environment of accounting and basic accounting theory.

Prerequisite: ACCT 2301 and ACCT 2302 with a minimum grade of C in each.

ACCT 3314. Intermediate Accounting II. 3 Hours.

A continuation of ACCT 3313, students extend the study of the preparation of financial statements to the measurement and reporting of long-term liabilities, stockholders' equity, and investments. Additional topics may include time value of money concepts, cash flow statements, accounting for leases, income taxes, and revenue recognition.

Prerequisite: ACCT 3313 with a minimum grade of C.

ACCT 3324. Accounting Information Systems. 3 Hours.

Students study principles of accounting systems design integrated into both manual and computerized systems with an emphasis on the accounting cycle, internal control structures, computerized transaction processing systems, relational databases, and integrated enterprise resource planning systems in accounting.

Prerequisite: ACCT 2301 and ACCT 2302.

ACCT 3340. International Accounting. 3 Hours.

Students are introduced to the accounting aspects of international business. Topics covered from an international perspective may include the interaction between accounting and its environment, differing national accounting practices, international harmonization of accounting and reporting, foreign currency translation and exchange rate issues, problems of inflation, transfer pricing and taxation, managerial accounting and analysis of foreign financial statements.

Prerequisite: ACCT 2302.

ACCT 3347. Cost Accounting. 3 Hours.

Students study cost accounting principles and techniques of assembling data for product costing and for managerial use in planning and control and decision making. Cost terminology, cost behavior, job order and process costing, budgeting, cost-volume-profit analysis, standard costs, and activity based costing are topics covered.

Prerequisite: ACCT 2301 and ACCT 2302 with a minimum grade of C in each.

ACCT 3353. Federal Taxation Concepts. 3 Hours.

Students study the basic tax concepts and income taxation of individuals with emphasis placed on the determination of income and statutory deductions to arrive at the net taxable income. Consideration is given to tax planning as well as decision-making and tax return problems.

Prerequisite: ACCT 2301 and ACCT 2302 with a minimum grade of C in each.

ACCT 4080. Independent Study. 1-3 Hours.

Individual study as arranged with members of the faculty. This course may be repeated and may be taken for Academic Distinction Program Credit. Variable Credit (1-3). Course Equivalents: ACCT 4380

Prerequisite: Consent of Department Chair.

ACCT 4085. Special Topic. 1-3 Hours.

This course of faculty-led study is designed to provide undergraduate students exposure to new Accounting topics and concepts in a course setting. Variable credit (1-3). Course Equivalents: ACCT 4385 .

ACCT 4317. Advanced Financial Accounting. 3 Hours.

Students examine financial accounting standards and procedures used in accounting and reporting for business combinations, intercorporate investments, and consolidated financial statements.

Prerequisite: ACCT 3314 with a minimum grade of C.

ACCT 4325. Emerging Technology in Accounting. 3 Hours.

Students examine emerging and recently developed technologies for the impact on the quantity and quality of accounting data. Various emerging technologies will be examined and used to gather, prepare, and process financial and non-financial accounting data and to manage the data to produce value-adding accounting information.

Prerequisite: ACCT 3313 with a minimum grade of C.

ACCT 4336. Governmental & Nonprofit Accounting. 3 Hours.

Students examine issues related to financial accounting and reporting for governmental and nonprofit entities. Governmental accounting coverage comprises fund accounting, budgeting and control, revenue and expenditure recognition in governmental funds, accounting for business-type and fiduciary activities, and fund-level and government-wide financial reporting. Accounting for nonprofit organizations includes coverage of accounting topics unique to charitable organizations, colleges and universities, and health-care entities.

Prerequisite: ACCT 3313 with a minimum grade of C.

ACCT 4352. Federal Taxation Concepts II. 3 Hours.

Students study basic concepts and income taxation of business entities and their effects on the owners' tax liabilities. They also examine the relationship and differences between financial and tax accounting. Consideration is given to tax research and planning as well as decision-making and tax return problems.

Prerequisite: ACCT 3353 and ACCT 3314 with a minimum grade of C in each.

ACCT 4360. Oil And Gas Accounting. 3 Hours.

Student are introduced to oil and gas accounting with an emphasis on accounting for costs incurred in the acquisition, exploration, development, and production of oil and natural gas using successful efforts, full cost, and tax accounting methods. Students are also introduced to joint interest accounting, gas pipeline accounting, the required disclosures for oil and gas activities, and analysis of oil and gas companies' financial statements.

Prerequisite: ACCT 3313 with a grade of C or better.

ACCT 4363. Fraud Examination. 3 Hours.

Students examine fraud within organizations with an emphasis on its detection and prevention. Topics may include the nature and causes of financial and occupational fraud, ways to prevent and deter fraudulent conduct, and procedures for uncovering and investigating fraud.

Prerequisite: ACCT 3313 with a grade of C.

ACCT 4372. Auditing Principles. 3 Hours.

Students are introduced to auditing concepts and procedures with an emphasis on generally accepted auditing standards; professional responsibilities; the nature, acquisition, evaluation, and documentation of audit evidence; internal control; and the auditor's reports.

Prerequisite: ACCT 3324 and ACCT 3314 with a minimum grade of C in each.

ACCT 4379. Professional Accounting Ethics and Responsibilities. 3 Hours.

Students examine a framework of ethical reasoning, professional values and attitudes for exercising professional skepticism, and other behavior that is in the best interest of the public and the accounting profession. The student will develop a foundation for ethical reasoning, including the core values of integrity, objectivity, and independence required of professional accountants. The ethics rules of the AICPA, SEC, and the Texas State Board of Public Accountancy will be emphasized.

Prerequisite: A minimum grade of C in both ACCT 3314 and ACCT 3324.

ACCT 4389. Internship In Accounting. 3 Hours.

Students are provided with an internship experience allowing the application of accounting and auditing skills in an actual work setting. Students generally will work full-time in public or industry accounting paid positions for a minimum of 150 hours.

Prerequisite: Junior standing, ACCT 3314, ACCT 3324, permission of the Department Chair of Accounting, and selection by an employing firm.

Agribusiness (AGBU)

AGBU 2317. Principles of Agricultural Economics. 3 Hours. [TCCN: AGRI 2317]

Students are introduced to fundamental economic concepts, such as supply and demand analysis, economics of production, profit maximization, and market failure; all related to practical application in agriculture. Course Equivalents: AGRI 2317

Prerequisite: College-level ready in Mathematics, Reading and Writing and completed 15 credit hours.

AGBU 2385. Analysis of the Agricultural Sector. 3 Hours. [TCCN: AGRI 1325]

Students are provided an overview of the various sectors and institutions servicing agriculture. Focus is on the marketing efforts and added value that each sector provides to farm products. The course emphasizes the structure of each area, and the trends that shape their activities. An introduction to marketing activities with emphasis on agricultural commodities is also provided. Course Equivalents: AGRI 2385

Prerequisite: College-level ready in Mathematics, Reading and Writing and completed 15 credit hours.

AGBU 2389. Agribusiness Financial Analysis. 3 Hours. [TCCN: AGRI 1325]

Students are introduced to financial management for agricultural enterprises. Topics may include: depreciation, balance sheet, income and expense, production records, income tax principles, enterprise budgeting, partial budgeting, cash flow budgeting, and analysis and interpretation of farm records. Course Equivalents: AGRI 2389

Prerequisite: College-level ready in Mathematics, Reading and Writing, and completed 15 credit hours.

AGBU 2396. Special Topics in Agricultural Business. 3 Hours.

Students examine special topics/issues in Agricultural Business at an introductory level. This course may be repeated up to three times as topics and subject matter change.

AGBU 3350. Agribusiness for Agriculture Education Teachers. 3 Hours.

This course is designed to present agribusiness concepts that are included in the curriculum of post-secondary schools of Texas. Subjects include budgeting, finance, insurance, organization and management, marketing, and government policies. Course Equivalents: AGRI 3350

Prerequisite: CISE Minors only, Sophomore standing, and AGBU 2317.

AGBU 3361. Agribusiness Organization & Management. 3 Hours.

Students study management principles relevant to agribusiness firms, marketing management, e-commerce and value-added agriculture, managerial concepts, human resource management, and business organizations. Course Equivalents: AGBU 4361, AGRI 4361

Prerequisite: AGBU 2317, AGBU 2389 and completed 45 credit hours.

AGBU 3367. Agricultural Finance. 3 Hours.

Students study advanced agribusiness management applications of borrowed capital to operations; methods of determining loan needs for farmers; budgeting incomes to facilitate repayment of loans; cost of using borrowed capital; management of financial resources in agribusiness; and time value of money applications. Course Equivalents: AGRI 3367

Prerequisite: AGBU 2389 with a grade of C or higher or instructor approval, and completed 45 credit hours.

AGBU 3385. Quantitative Methods for Agribusiness. 3 Hours.

Students study quantitative tools from the fields of economics, statistics, and management as they relate to agricultural business decision making. The analytical and quantitative principles are applied to a variety of agricultural business situations. Topics may include forecasting, decision analysis, regression, and linear programming. Computer-based methods are emphasized. Course Equivalents: AGRI 3385

Prerequisite: AGBU 2317 and (MATH 1324 or MATH 1314) and (MATH 1342 or MATH 1325 or STAT 3379) and completed 45 credit hours.

AGBU 4319. Agribusiness Ventures. 3 Hours.

Students investigate the initiation of new food and agricultural enterprises through identification of innovative opportunities. Effective entrepreneurial behaviors, environment analysis, and risk management for start-ups are emphasized.

Prerequisite: AGBU 3361.

AGBU 4340. Agribusiness Marketing. 3 Hours.

Students study the major marketing strategies and decisions that must be made by agribusiness firms, including target market selection, marketing research, sales forecasting, product policies, distribution channels, pricing, advertising, and market control. The development of a strategic marketing plan for an agribusiness firm is required. Course Equivalents: AGRI 4340

Prerequisite: AGBU 2317 and AGBU 2385, and completed 45 credit hours.

AGBU 4362. Natural Resource Economics. 3 Hours.

Students engage in a contemporary study of issues in land, natural resource, and environmental economics. Topics may include energy, forests, population, fisheries, world food production, and minerals and pollution. This course discusses market efficiency relative to allocations of natural resources and pollution. Course Equivalents: AGRI 4362

Prerequisite: AGBU 2317 and Junior standing.

AGBU 4363. Agricultural Sales & Consulting. 3 Hours.

Students explore the principles of professional sales techniques used by food and agricultural firms. Necessary skills required in the agribusiness industry such as interpersonal skills, sales techniques, and sales forecasting skills are developed and enhanced. Emphasis is placed on the phases of preparation, learning, communication, and evaluation involved in a person selling a product, service, idea, etc., to a client. The focus of the course will be on business-to-business selling and consulting. Course Equivalents: AGRI 4363

Prerequisite: AGBU 2317, AGBU 2385 and completed 45 credit hours.

AGBU 4365. Legal Issues in Agribusiness. 3 Hours.

Students examine legal concepts and practical legal problems facing rural residents and agribusinesses. Taught from a "preventive" perspective, students acquire the legal awareness necessary to become an effective and analytical agribusiness decision maker. Legal issues include statutes, common law (cases), torts, landowner liabilities, and contract law as they relate to managing agribusinesses and owning rural land. Course Equivalents: AGRI 4365

Prerequisite: AGBU 2317 and completed 45 credit hours.

AGBU 4369. Special Topic. 3 Hours.

Students examine special topics/issues in Agricultural Business at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: Junior standing.

AGBU 4374. Agricultural Market Analysis & Prices. 3 Hours.

Students study principles of agricultural market analysis to include: price analysis, price forecasting, forward contracting, futures market, market structure analysis, marketing and sales management. Course Equivalents: AGRI 4374

Prerequisite: AGBU 2317 and MATH 1342, and completed 45 credit hours.

AGBU 4375. Advanced Agribusiness Management. 3 Hours.

This course serves as a capstone course for agribusiness majors. The primary objective of the course is to help students integrate economic, financial, and strategic management concepts and apply them to analyzing the strategic options for agribusiness firms. Contemporary issues related to agribusiness are approached using information systems, industry representatives, field trips, and class presentations. In addition, the course emphasizes the development of important soft skills such as verbal and written communication, teamwork, and leadership. Course Equivalents: AGRI 4375

Prerequisite: AGBU 3367 and AGBU 4361 or AGBU 3361, and completed 90 credit hours.

AGBU 4377. Economics of Land Use & Planning. 3 Hours.

Students apply economic principles and legal policy relative to the allocation and conservation of natural resources and the environment. Topics, such as land use, energy policy, forestry, fisheries, water rights, animal rights, world food production, and pollution, are discussed in an economic and legal framework. Course Equivalents: AGRI 4377

Prerequisite: Junior Standing.

AGBU 4378. Farm & Ranch Management. 3 Hours.

Students focus on planning for the most efficient resource allocation in agricultural operations. This course uses previously taught economic, financial, and quantitative concepts and applies that to farm and ranch management. Course Equivalents: AGBU 3377, AGRI 3377

Prerequisite: AGBU 2317, AGBU 2389, and AGRI 1309.

AGBU 4386. Agriculture & Food Policy. 3 Hours.

Students examine and analyze the effects of government participation on farmers, ranchers, agribusiness firms and consumers. The main objective of this course is to establish the principles and conceptual framework encouraging productive discussions with other segments of society on agricultural policy issues. Topics may include the policy making process and the analysis of commodities, conservation, food safety, international trade, rural development programs, and the interrelationship of agriculture and agribusiness.

Prerequisite: AGBU 2317 and completed 75 credit hours Course Equivalents: AGRI 4386 .

Agricultural Communications (ACOM)

ACOM 2396. Special Topics in Agriculture Communications. 3 Hours.

Students examine special topics/issues in Agricultural Communications at an introductory level. This course may be repeated up to three times as topics and subject matter changes. Credit 3.

ACOM 3360. Communication Skills for Agriculturists. 3 Hours.

Students are provided an overview of information systems, principles, and procedures used in communicating agricultural news and information in various agricultural professions. Emphasis is placed on effective written and oral communication means in professional and media environments in addition to public relations efforts in agriculture. Sophomore standing. Course Equivalents: AGRI 3360

Prerequisite: ENGL 1302.

ACOM 4369. Special Topic. 3 Hours.

Students examine special topics/issues in Agricultural Communications at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: ENGL 1302.

Agricultural Engineering Techn (AGET)

AGET 2303. Introduction to Agricultural Engineering Technology. 3 Hours. [TCCN: AGRI 2303]

Students are introduced to current and emerging topics and industry related to agricultural engineering technology. Topics covered may include: bio-diesel, wind energy, GPS/GIS applications, nanotechnology, and theory of fusion of metals, efficiency of internal combustion engines, and other technology-related subjects. Course Equivalents: AGRI 2303

Prerequisite: None.

AGET 2396. Special Topics in Agricultural Engineering Technology. 3 Hours.

Students examine special topics/issues in Agricultural Engineering Technology at an introductory level. This course may be repeated up to three times as topics and subject matter changes.

AGET 3300. Agricultural Electrification. 3 Hours.

Students explore principles and theory of electricity and applications in agriculture. Topics covered may include the transmission and distribution of electricity, Ohm's Law, DC/AC current, safety, NEC, converting bio-mass to electrical power, peak demand, dispatchable power, wind energy, photo-voltaic cells, and net-metering. Sophomore standing. Course Equivalents: AGRI 3300

Prerequisite: AGET 2303 or ETDD 1361.

AGET 3301. Agriculture Power Units and Control Systems. 3 Hours.

Students study the selection, maintenance, and service of agricultural power units, including small engines overhaul and preventive maintenance on agricultural tractors. Course Equivalents: AGET 2301, AGRI 2301

Prerequisite: AGET 2303.

AGET 3350. Plasma Arc Cutting Technology. 3 Hours.

Students examine the principles, technologies, and applications of plasma cutting processes with a focus on applications in the agricultural industry. Topics may include programming, operating, and controlling plasma tables; the use of plate markers; and related operations. In addition, the selection and use of new and emerging technologies, safety requirements, equipment, and workplace planning, scheduling, supervision, and management are examined.

Prerequisite: AGET 2303 or approval of the instructor.

AGET 3380. Agricultural Machinery. 3 Hours.

Students study design, construction, adjustment, operation, and testing of agricultural machinery and equipment systems. Topics may include theoretical and effective capacities, costs of operation, valuation of used equipment and queuing theory. Sophomore standing. Completed 55 hours. Course Equivalents: AGRI 3380

Prerequisite: AGET 2303 or ETDD 1361.

AGET 3383. Soil & Water Conservation Engineering. 3 Hours.

Students explore principles of soil and water conservation, erosion control, storm water management, structures for floodwater routing, culvert design, design of waterways, and retention basins. Plane surveying, topographic mapping, geographical information, and global positioning systems are utilized. Sophomore standing. Course Equivalents: AGRI 3383

Prerequisite: AGET 2303 or ETDD 1361.

AGET 3386. Agricultural Structures and Environmental Control Systems. 3 Hours.

Students explore functional requirements of agricultural buildings; valuation, appraisal, and estimating; structural requirements of agricultural buildings; planning and designing major service and processing buildings. Topics discussed may include thermodynamics, confined livestock housing, and environmental controls. Junior standing. Course Equivalents: AGRI 3386

Prerequisite: AGRI 2303 or ETDD 1361.

AGET 4369. Special Topic. 3 Hours.

Students examine special topics/issues in Agricultural Engineering Technology at an advanced level. This course may be repeated up to three times as topics and subject matter change. Junior Standing.

Prerequisite: AGRI 2303 or ETDD 1361.

AGET 4372. Agriculture and Construction Equipment Technology. 3 Hours.

Students examine advanced agriculture and construction machinery technology, their uses in agriculture and the construction industries, and operate machinery in real-world scenarios. Emphasis will be given to safe machinery operation, machinery management, and economic impact.

Prerequisite: AGET 4385 or AGET 4387.

AGET 4381. Advanced Metal Fabrication in Agriculture. 3 Hours.

This course serves as a capstone course for agricultural science students with previous experience in agricultural engineering technology. Teams address and solve a complex problem and as a result may design and construct a building, trailer, or other equipment in the laboratory.

Prerequisite: AGET 2303.

AGET 4384. Fusing & Joining of Metals & Non-Metals. 3 Hours.

Students engage in a comprehensive study of the theories, principles, and procedures of bonding and fusing metallic and non-metallic materials by the electric arc, oxy-fuel, and adhesive processes. Technical classroom instruction, laboratory exercises, and field trip experiences involve selection and utilization of new and emerging technologies and equipment, workplace planning, supervision, and management. Junior standing. Course Equivalents: AGRI 4384

Prerequisite: AGET 2303 or ETDD 1361.

AGET 4385. Applied Electronics/Hydraulics. 3 Hours.

Students explore cutting edge applications and integration of electronic and hydraulic principles and applications in agricultural and industrial processes and distribution systems. Topics may include Ohm's Law, Pascal's Law, and principles and theory of fluid dynamics. Junior standing. Course Equivalents: AGRI 4386

Prerequisite: AGET 2303 or ETDD 1361 and AGET 3301 or AGET 3380.

AGET 4387. Agricultural Engines & Tractors. 3 Hours.

Students study principles of the internal combustion engine, fuel injection, carburetion, and computerized engine monitoring equipment. Selection, valuation, wear analysis, and maintenance of power units for agricultural and industrial applications, including those powered by alternative fuel, are covered. Junior standing. Course Equivalents: AGRI 4387

Prerequisite: AGET 2303 or ETDD 1361 and AGET 3301 or AGET 3380.

AGET 4390. Turf & Cropland Irrigation & Drainage. 3 Hours.

Students study design and selection of surface or sub-surface irrigation and drainage systems for golf courses, greenhouses, sports fields, crops, landscape applications, and construction sites. Principles of pressurized irrigation systems including crop water requirements, soil moisture, irrigation scheduling, sprinkler irrigation, trickle irrigation, pumps, pipelines, and irrigation wells are covered. Course Equivalents: AGRI 4390

Prerequisite: AGET 2303 or ETDD 1361 and Junior standing.

AGET 4391. Agricultural Chemical Application Technology. 3 Hours.

Students examine agronomic crops and pests. A foundation for the safe and effective use of agricultural chemicals and environmental sustainability are emphasized. Students gain experience and knowledge in the calibration, operation, and maintenance of agricultural chemical application equipment. Students are prepared for obtaining a commercial pesticide applicator license.

Prerequisite: AGET 2303.

AGET 4392. Precision Technology Applications. 3 Hours.

Global positioning and geographic information system software and equipment is applied in settings involving precision farming and construction. Course Equivalents: AGRI 4392

Prerequisite: AGET 2303 or ETDD 1361 and Junior Standing.

AGET 4393. Renewable Energy Sources for Agriculture. 3 Hours.

Students study existing and potential alternative energy sources and production capacities, including wind, solar, bio-mass conversion, hydrogen, ethanol, vegetable oil, and bio-diesel. Impacts on the environment, ecological systems, world food supply, and economy are studied. Course Equivalents: AGET 4393

Prerequisite: AGET 2303 or ETDD 1361.

AGET 4394. Grain Harvesting and Management in Agriculture. 3 Hours.

Students examine transportation, storage, and safety challenges found within the U.S. grain industry. Students explore selection and management of technology applications for improved grain handling. Additionally, safety and economic storage of grain forage and hay crops are emphasized.

Prerequisite: AGET 2303.

AGET 4396. Directed Studies in Agricultural Engineering Technology. 3 Hours.

Arranged professional development learning experiences incorporating a practical application of Agricultural Engineering Technology skills and practices. To include internships, individual research and industry studies. May be repeated for credit up to six hours.

Prerequisite: Sophomore standing.

Agriculture Education (AGED)

AGED 2396. Special Topics in Agricultural Education. 3 Hours.

Students examine special topics/ issues in Agricultural Education at an introductory level. This course may be repeated up to three times as a topics and subject matter changes. Credits 3.

AGED 3310. Teaching Agricultural Technology. 3 Hours.

Students study methods in delivering instruction in agricultural technology as well as the principles in managing high school agricultural mechanics laboratories in a safe and efficient manner. CISE minors only. Junior standing. Approval by Instructor. Course Equivalents: AGRI 3310

Prerequisite: AGET 2303 or ETDD 1390 or ETDD 1361.

AGED 3320. The Secondary Agriculture Education Program. 3 Hours.

This course is designed to develop competencies of secondary agricultural education teachers to teach essential knowledge and skills in agricultural business, agricultural mechanization, animal science, horticulture, plant and soil sciences and natural resources. Course Equivalents: AGRI 3320 .

AGED 4096. Independent Studies. 1-3 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of agricultural education skills and practices. This course may include internships, individual research and industry studies. May be repeated for credit up to six hours. Course Equivalents: AGED 4396

Prerequisite: Sophomore standing.

AGED 4364. Methods of Teaching Agriculture Education. 3 Hours.

Students study the professional competencies required for the teaching of agricultural education. Included is the development of curriculum and occupational education programs as well as evaluation of teaching techniques, procedures, and resource materials. Methods of teaching students with disabilities are discussed.

Prerequisite: Admission to the Student Teaching program in Agricultural Sciences.

AGED 4365. Student Teaching in Agriculture Education. 3 Hours.

Directed observation and student teaching in an approved high school agricultural education classroom are required. Participation is essential in related agricultural education and FFA activities, such as LDEs, CDEs, SDEs, livestock shows, and FFA alumni and young farmer programs, etc. Senior standing. Must be currently enrolled in AGED 4364, AGED 4380, and AGED 4366.

Prerequisite: Grade of C or better in AGED 3320.

AGED 4366. Student Teaching in Agriculture Education. 3 Hours.

Further directed observation and student teaching in an approved high school agricultural education classroom are required. Participation is essential in related agricultural education and FFA activities, such as LDEs, CDEs, SDEs, livestock shows, and FFA alumni and young farmer programs, etc. Co-requisite: AGED 4364, AGED 4365, and AGED 4394.

Prerequisite: Grade of C or better in AGED 3320.

AGED 4369. Special Topics in Agricultural Education. 3 Hours.

Students examine special topics/issues in Agricultural Education at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: Junior standing.

AGED 4377. Cooperative Extension Programs. 3 Hours.

Students acquire knowledge and skills needed for careers in the Cooperative Extension system through the understanding of its history, programmatic education, leadership, and employment opportunities. Students explore the roles and professional attributes of industry professionals and the various approaches to the delivery of adult and youth educational programs.

Prerequisite: Junior Standing.

AGED 4380. Responsibility of Professional Agricultural Science Teachers. 3 Hours.

This course is designed to assist future agricultural science and technology teachers in understanding the structure, organization, and management of public schools at the national, state, and local levels. Course content may include a study of the needs of the special learner, school finance and funding for career and technical education programs, agricultural science curriculum and graduation requirements, and cultural issues. The course also focuses on professionalism, program planning, personnel employment and evaluation, and legal issues critical to the success of agricultural science and technology teachers. Must be currently enrolled in AGED 4364, AGED 4365, and AGED 4366. Admission to the Student Teaching Program.

Prerequisite: Grade of C or better in AGRI 3320 and CISE 4364.

AGED 4388. Secondary Agriculture Education Program Management. 3 Hours.

Students focus on developing and managing the youth leadership aspect of agricultural science and technology programs in public schools.

Students learn about leadership and career development events, the agricultural education record book documentation system, program of activity development, financial management, student and chapter awards programs, and scholarships for agricultural education students.

Prerequisite: Completed 55 hours.

AGED 4394. Agriculture Education Learning Environments. 3 Hours.

Students examine classroom management and discipline approaches appropriate in secondary agricultural education (AGED) classrooms and laboratories. Proactive and preventative measures are discussed to ensure student safety and a successful learning environment. Note: Students who have taken AGED 4394 may not take AGED 5394. Co-requisite: AGED 4364, 4365, and 4366.

Prerequisite: Admission to the Student Teaching program in Agricultural Sciences.

Agricultural Sciences (AGRI)

AGRI 1131. Introduction to Professional Leadership Skills. 1 Hour. [TCCN: AGRI 1131]

Students explore career options available to professionals in agricultural sciences, education, and business. Specific requirements for the various professions are discussed by a series of guest speakers. Course is intended for beginning students.

AGRI 1309. Computers in Agriculture. 3 Hours. [TCCN: AGRI 1309]

This course is designed to acquaint students with software applications useful to agriculture and how various technological advances are applied in modern agricultural enterprises.

AGRI 2396. Topics in Agriculture. 3 Hours.

Students examine special topics/issues in agriculture at an introductory level. Topics may be offered in: Agriculture, Animal Science, Agricultural Business, Horticulture and Plant Science, Agricultural Communications, and Agricultural Engineering Technology. This course may be repeated up to three times as topics and subject matter change.

AGRI 4096. Independent Studies. 1-3 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of agricultural skills and practices. To include internships, individual research, and industry studies. Course may be repeated for credit, max 6. Course Equivalents: AGRI 4396

Prerequisite: Sophomore standing.

AGRI 4100. Applied Agricultural Technology. 1 Hour.

Arranged developmental learning experiences incorporating an application of agricultural skills and practices in an emphasis area of the student's choice. Individual study plans are devised by faculty to provide the student with broad-based knowledge.

Prerequisite: Sophomore standing.

AGRI 4120. Professional Career Skills. 1 Hour.

Students engage in a review of current careers in agriculture with emphasis on professional and managerial opportunities. Topics may include preparation of resume, interview skills, and other means of professional communication.

Prerequisite: Junior standing.

AGRI 4341. Brewing Technology. 3 Hours.

Students examine the use of barley, hops, yeast, and other ingredients in craft brewing production. Biological and chemical processes in preparing, cooking, and fermenting brewed beverages are studied. Beer styles and quality influenced by ingredients, cooking, fermentation, and storage will be examined. Students improve sensory perception of craft beer.

Prerequisite: PLSC 1307 and CHEM 1406 or CHEM 1407 or CHEM 1411 or CHEM 1412 and Approval of instructor.

AGRI 4350. Agricultural Biosecurity. 3 Hours.

Students study the potential spread and prevalence of contagious organisms, reproductive diseases and contaminants in the agriculture, food, fiber, and natural resource industries. Concepts dealing with isolation, resistance, sanitation, containment, transportation, and food safety issues and potential economic impact to the agricultural industry and others are major topics.

Prerequisite: Junior standing.

AGRI 4364. International Agriculture. 3 Hours.

Students gain a global perspective of production agriculture, marketing, food supply chain, international trade, political and economic influences on world food and fiber production and distribution systems. May be taken for repeated credit as the curriculum may vary based upon location.

Prerequisite: Sophomore standing, faculty approval.

AGRI 4369. Special Topics in Agriculture. 3 Hours.

Students examine special topics/issues in Agricultural Science at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: Junior standing.

AGRI 4371. Agricultural Safety & Health. 3 Hours.

Students examine the hazards and necessary safety precautions associated with the food, fiber, natural resources, and agricultural industry. Control strategies are explored and prevention methods identified. Hazards examined include machinery, livestock, controlled spaces, pesticides, and other issues common to the food, fiber, natural resources and agricultural industry.

Prerequisite: AGET 2303 or ETEC 1390 or ETDD 1361 and Junior standing.

AGRI 4388. Principles of Agriculture Leadership & Community Development. 3 Hours.

Students examine the characteristics of leadership theory, parliamentary procedure, personal development, and organizational structure.

Prerequisite: Junior standing or higher.

American Sign Language (SGNL)

SGNL 1401. Elementary American Sign Language I. 4 Hours.

Students who have had no previous instruction in American Sign Language develop vocabulary acquisition, cultural components, drills, sentence formation, and everyday conversation leading to proficiency. Language laboratory period weekly is required. Grade of C or better required in SGNL 1401 in order to continue to SGNL 1402. Instruction is in American Sign Language.

SGNL 1402. Elementary American Sign Language II. 4 Hours.

A continuation of SGNL 1401. Students add more speaking and writing toward advancing proficiency. Weekly language laboratory period is required. Instruction is in American Sign Language.

Prerequisite: Grade of C or better in SGNL 1401 or equivalent.

SGNL 2311. Intermediate American Sign Language I. 3 Hours.

A continuation of SGNL 1402. Students focus on more advanced skills. Instruction is in American Sign Language. Course Equivalents: SGNL 2401

Prerequisite: Grade of C or better in SGNL 1401 and SGNL 1402 or equivalent.

SGNL 2312. Intermediate American Sign Language II. 3 Hours.

A continuation of SGNL 2311. Students focus on fluent usage of American Sign Language with the purpose of mastering mid-level proficiency skills. Course Equivalents: SGNL 2402

Prerequisite: Grade of C or better in SGNL 1401, SGNL 1402, and SGNL 2311 or equivalent.

SGNL 3301. Advanced American Sign Language. 3 Hours.

As a continuation of Intermediate ASL II, students develop a high level of fluency in American Sign Language, using both expressive and receptive skills in regular weekly communications with persons in the Deaf Community. Students learn idioms and expansion features and discuss current events in the Deaf Community. Instruction is in American Sign Language.

Prerequisite: Grade of C or better in SGNL 1401, SGNL 1402, SGNL 2311, and SGNL 2312 or equivalent.

American Studies (AMST)

AMST 3311. Introduction to American Studies. 3 Hours.

This course is an introduction to American Studies, an interdisciplinary approach to understanding America and its cultures. By examining America's cultural productions through class discussions and reading and research, students will hone their analytical abilities, develop their understanding of history and culture, and acquire the skills to become critical, informed, and engaged global citizens. Course Equivalents: AMST 2311 .

Animal Science (ANSC)

ANSC 1119. Animal Science Laboratory. 1 Hour. [TCCN: AGRI 1119]

Laboratory for ANSC 1319. Course Equivalents: AGRI 1119

Prerequisite: Concurrent enrollment in ANSC 1319.

ANSC 1319. Animal Science. 3 Hours. [TCCN: AGRI 1319]

This is a basic course of study to acquaint students with the scope of animal science: origin, history and development of economically important species and breeds of livestock; concepts of selection, breeding, nutrition, management and research as applied to livestock production. Laboratory experiences (ANSC 1119) involve the practical skills needed to manage animal enterprises. Course Equivalents: AGRI 1319

Prerequisite: Concurrent enrollment in ANSC 1119.

ANSC 2321. Livestock Evaluation & Selection. 3 Hours. [TCCN: AGRI 2321]

This course is designed to present the basic principles and concepts in selection and evaluation of beef cattle, sheep, swine, and horses. The ability to present accurate and concise oral reasons for selecting and placing livestock is reviewed. Course Equivalents: AGRI 2321 .

ANSC 2330. Companion Animal Science. 3 Hours.

This course is an overview of the companion animal industry, including species and breeds, feeding and nutrition, reproduction, anatomy and physiology, care, management, training, health, behavior, and current research topics related to companion animals. Course Equivalents: AGRI 2330

Prerequisite: ANSC 1319 with a grade of C or better.

ANSC 2340. Application of Small Animal Behavior Modification. 3 Hours.

Students study instincts and behaviors of small animals and explore how to apply the knowledge to properly interact and train animals. Students learn training techniques that ensure animals are stable, well-behaved, and unobtrusive. Topics include inherited and learned behaviors, environmental considerations, and training techniques for positive behavioral modifications.

ANSC 2360. Animals and Society. 3 Hours.

This course acquaints the student with the broad role of animals in society from national, global, and historic perspectives. The impact of animals and domestic livestock on economic, social, and political policy are discussed. Emphasis is placed on agricultural and non-agricultural uses, societal and cultural perspectives, consumer influences, animal ethics, animal research, appropriate animal care, livestock quality assurance programs, animal welfare, animal rights and the animal-human bond. Course Equivalents: AGRI 2360 .

ANSC 2396. Special Topics in Animal Science. 3 Hours.

Students examine special topics/issues in Animal Science at an introductory level. This course may be repeated up to three times as topics and subject matter changes. Credits 3.

ANSC 3336. Livestock Marketing. 3 Hours.

Students study livestock marketing techniques, cash sales, risk management, forward contracting, problem solving using real-time livestock marketing situations, and risk of ownership in hypothetical livestock operations. Course Equivalents: AGRI 3336

Prerequisite: ANSC 1319 with a grade of C or better and Sophomore standing.

ANSC 3363. Anatomy & Physiology of the Domestic Animal. 3 Hours.

Students are introduced to anatomy and physiology of domestic animals. Aspects of the nervous, skeletal, muscular, circulatory, urinary, and endocrine systems are covered. Course Equivalents: AGRI 3363

Prerequisite: ANSC 1319 with a grade of C or better and Sophomore standing.

ANSC 3373. Animal Nutrition. 3 Hours.

This course consists of a scientific study of the processes of digestion, absorption, metabolism, physiology, and circulation of water, proteins, carbohydrates, lipids, vitamins, and minerals. Each nutrient is studied from the standpoint of chemistry, sources, function, and metabolism. Course Equivalents: AGRI 3373

Prerequisite: ANSC 1319 with a grade of C or better, 4 Credits in CHEM, and Sophomore standing.

ANSC 3376. Meat Science. 3 Hours.

Lecture topics may include muscle and skeletal biology, conversion of muscle to meat, food-borne illnesses, and HACCP. Labs focus on the methods of harvesting, preparation, preserving, and storing meat. Course Equivalents: AGRI 3376

Prerequisite: ANSC 1319 with a grade of C or better and Sophomore standing.

ANSC 3377. Meat and Muscle Biology. 3 Hours.

Students examine fundamental principles of muscle structure, function, fiber type, and repair, as well as the physiological transformation of muscle to an edible product. Additionally, students investigate how each of the characteristics of muscle affect the ultimate quality of a product through its conversion into meat.

Prerequisite: ANSC 1319 with a grade of C or better and Sophomore standing.

ANSC 4310. Animal Growth & Performance. 3 Hours.

Students study the physiological and endocrine system factors affecting growth and performance of domestic animals. The course may include the study of meat animal growth and developmental processes and factors that affect body/carcass composition, carcass quality and value. Course Equivalents: AGRI 4310

Prerequisite: ANSC 3373 and Junior standing.

ANSC 4336. Stocker & Feedlot Management. 3 Hours.

Students evaluate the basic principles involved in feeding, management, marketing, and disease control of stocker and feedlot cattle for economical production of beef. A review of scientific knowledge and research advances is applied to modern stocker and feedlot cattle operations. Course Equivalents: AGRI 4336

Prerequisite: ANSC 1319 with a grade of C or better and Junior standing.

ANSC 4337. Behavior and Management of Domestic Animals. 3 Hours.

Students study behavior associated with domesticated animals. The effects of selective breeding, physical and social environments, and the developmental stage on social organization are studied. Additionally, aggressive behavior, sexual behavior, productivity, and the training of domestic animals are examined. Course Equivalents: AGRI 4337

Prerequisite: ANSC 1319 with a grade of C or better and Junior standing.

ANSC 4339. Advanced Livestock and Horse Evaluation. 3 Hours.

Students engage in an advanced study of the visual appraisal, grading, and evaluation techniques affiliated with livestock and horses. The evaluation of conformation is studied along with the influence of heredity and environmental factors, industry trends and standards, and performance and production factors. Junior standing. Course Equivalents: AGRI 4339

Prerequisite: ANSC 2321 or ANSC 2390.

ANSC 4360. Livestock Management Techniques. 3 Hours.

Students explore skills and knowledge pertaining to the production of beef cattle, swine, goats, sheep, and horses. Laboratory exercises involve various management practices and selection of livestock based on visual evaluation and genetic performance. This course is not intended for animal science majors. Course Equivalents: AGRI 4360

Prerequisite: ANSC 1319 with a grade of C or better and must have completed 55 hours of coursework.

ANSC 4369. Animal Science Special Topics. 3 Hours.

Students examine special topics/issues in Animal Science at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: Junior standing.

ANSC 4376. Sheep & Goat Production & Management. 3 Hours.

Student study the application of basic genetic principles, physiology, and nutrition to practical sheep, meat goat, and Angora goat production systems; management; health care; and marketing of animals and fiber. Course Equivalents: AGRI 4376

Prerequisite: ANSC 1319 with a grade of C or better Junior standing.

ANSC 4380. Beef Cattle Production & Management. 3 Hours.

Students study basic principles and methods of breeding, nutrition, reproduction, management, marketing, and disease control relating to various segments of the beef industry. Application of the latest bovine research is reviewed. Laboratory exercises involve practical skills relating to performance records and management of beef cattle. Course Equivalents: AGRI 4380

Prerequisite: ANSC 1319 with a grade of C or better and Junior standing.

ANSC 4389. Animal Reproduction. 3 Hours.

Students explore the physiology of the male and female reproductive tract; hormones governing reproduction; the estrous cycle; mating; gestation; parturition; lactation; artificial insemination; embryo transfer technology; and factors affecting reproductive efficiency of common animal species used for agricultural purposes. Junior standing. Course Equivalents: AGRI 4389

Prerequisite: ANSC 1319 with a grade of C or better.

ANSC 4393. Animal Legal Issues. 3 Hours.

Students examine legal issues and laws that affect animal ownership, handling, transport, and other prominent interactions between humans, animals, and society. Differences between criminal, civil, and tort law are discussed, as well as the differences between written and case law, and the penalties and ramifications of violating these laws.

Prerequisite: ANSC 1319 with a grade of C or better and Junior standing.

ANSC 4394. Animal Feeds And Feeding. 3 Hours.

Students study the characteristics of feedstuffs; a review of the essential nutrients and digestion; ration and mixture formulation; feeding methods; and nutritional management of beef, swine, sheep, goats, poultry, and horses. Exercises consist of practical applications in formulating rations for livestock using conventional techniques and computers. Course Equivalents: AGRI 4394

Prerequisite: ANSC 3373, and C or better in MATH and Senior standing.

ANSC 4395. Animal Breeding & Genetics. 3 Hours.

Student explore the application of genetic principles to livestock improvement. Student study the genetic basis of selection and systems of mating, and the development of breeding programs based on the principles of population genetics. Course Equivalents: AGRI 4395

Prerequisite: ANSC 1319 with a grade of C or better and Junior standing.

ANSC 4397. Disaster/Emergency Management in Agriculture. 3 Hours.

Students learn key information and tactical strategies to prepare evacuation plans and protocols for animal agriculture business ventures while understanding the management and implementation of plans from a community perspective. Topics may include risk and hazard assessment; processes to identify critical control points, resources, and agencies necessary to build effective plans of action and mitigation agreements for disaster preparedness; and implementation of tactical plans involving animal and agricultural enterprises.

Prerequisite: ANSC 1319 with a grade of C or better and Junior standing.

ANSC 4398. Animal Diseases & Public Health. 3 Hours.

Student study diseases shared in nature between animals and man. Emphasis is placed on how these diseases exist in natural environments, modes of transmission, and methods of control and prevention. Students explore infectious agents and the clinical signs that they cause in both humans and animals. Course Equivalents: AGRI 4398

Prerequisite: ANSC 1319 with a grade of C or better and junior standing.

Arabic (ARAB)

ARAB 1411. Elementary Arabic I. 4 Hours.

Students with no previous instruction in Arabic discuss and drill Arabic alphabet, pronunciation, vocabulary and basic language codes, stressing an oral approach to the language with emphasis on conversation and oral drill. A weekly one-hour language laboratory is required. Grade of C or better required in ARAB 1411 in order to continue to ARAB 1412. Course Equivalents: ARAB 1311 .

ARAB 1412. Elementary Arabic II. 4 Hours.

A continuation of ARAB 1411. Students discuss and drill language codes with more complexity, stressing aural and oral skills. A weekly one-hour language laboratory is required. Course Equivalents: ARAB 1312

Prerequisite: Grade of C or better in ARAB 1411 or equivalent.

ARAB 2311. Intermediate Arabic I. 3 Hours. [TCCN: ARAB 2311]

A continuation of ARAB 1412. Students add more complex structures as a basis for reading and aural comprehension as well as for oral communication.

Prerequisite: Grade of C or better in ARAB 1411 and ARAB 1412 or equivalent.

ARAB 2312. Intermediate Arabic II. 3 Hours. [TCCN: ARAB 2312]

A continuation of ARAB 2311. Students focus on practical needs for communication, including short cultural reading passages and more complex grammar, with particular emphasis on roots of Arabic words.

Prerequisite: Grade of C or better in ARAB 1411, ARAB 1412, and ARAB 2311 or equivalent.

ARAB 3380. The Contemporary Arab World. 3 Hours.

Students focus on additional skill development in listening, speaking, reading and writing, and cultural knowledge with insights and perspective via the viewpoint and linguistic expression of the native Arabic speaker. Students describe the linguistic and cultural ramifications of historical, political, social and economic situations in Arab countries with some comparison among Arabic countries. Topics may include gender issues, progress and reforms, the rise of fundamentalisms and the Arab-Israeli conflict. Arabic is the language of instruction.

ARAB 4075. Individual Readings in Arabic. 1-3 Hours.

Advanced students engage in an independent study of an area of interest in Arabic Studies. The course may be repeated for credit as content varies. Variable Credit (1 to 3). Course Equivalents: ARAB 4375

Prerequisite: Consent of instructor and department chair.

ARAB 4370. Seminar in Selected Topics in Arabic Culture. 3 Hours.

Students conduct an in-depth study of a selected topic. The topic to be explored will change from year to year. This course may be repeated for credit as the content varies.

Prerequisite: Advanced standing in Arabic or consent of instructor.

Art (ARTS)

ARTS 1301. Introduction To The Visual Arts. 3 Hours. [TCCN: ARTS 1301]

Students are introduced the visual elements of art, their nature, functions, and relationships in Painting, Sculpture, and Architecture to the non-major.

Prerequisite: Non-Majors only.

ARTS 1302. Exploring Contemporary Art. 3 Hours.

This course includes a critical analysis of major themes in contemporary art, providing students with an appreciation of the artifacts of human imagination. Through the processes of synthesis and interpretation, students engage in critical, creative, and innovative communication about contemporary works of art.

ARTS 1303. Art History Survey I. 3 Hours. [TCCN: ARTS 1303]

Students examine works of art and architecture from the Prehistoric Period to the late Middle Ages in a global perspective.

ARTS 1304. Digital Art & New Technology. 3 Hours.

Students are introduced to the practice of digital art and design in the age of social media and mobile devices. The emphasis is on digital imaging as a medium for artistic expression. Non-majors only.

ARTS 1313. W.A.S.H. - 2-Dimensional. 3 Hours. [TCCN: ARTS 1311]

Students are introduced to the studio arts, art history, theory, and technology. The course is designed to immerse students in an intense program of researching, interpreting, and creating art in the twenty-first century. ARTS 1313 emphasizes the 2-dimensional arts. Its companion courses, ARTS 1314 and ARTS 1315, support this studio course with lectures, readings, visiting artists, and demonstrations. Co-requisites: ARTS 1314 and ARTS 1315.

ARTS 1314. W.A.S.H. - 3-Dimensional. 3 Hours. [TCCN: ARTS 1312]

Students are introduced to studio arts, art history, theory, and technology. The course is designed to immerse students in an intense program of researching, interpreting, and creating art in the twenty-first century. ARTS 1314 emphasizes the 3-dimensional arts. Its companion courses, ARTS 1315 and ARTS 1313, support this studio course with lectures, readings, visiting artists, and demonstrations. Co-requisites: ARTS 1315 and ARTS 1313.

ARTS 1315. W.A.S.H. - Lecture. 3 Hours. [TCCN: ARTS 1313]

Students are introduced to the concepts, theories, and information for development in ARTS 1313 and ARTS 1314, the studio components linked with this visual arts foundation course. The course provides an arena for students to experience lectures, demonstrations, seminar activities, and visiting speakers as well as the more traditional aspects of the discipline. The course is geared towards contemporary visual concerns and uses experimental techniques to expose students to an array of styles and methodologies. Co-requisites: ARTS 1313 and ARTS 1314.

ARTS 1316. Drawing. 3 Hours. [TCCN: ARTS 1316]

Students engage in an in-depth study of the fundamental principles of drawing and mark making. Students draw from observation and develop the ability to create 2-dimensional representations using Line, Value, Shape, Edge, Plane and Volume, Space, Texture, Perspective, and Gesture. The use of negative space and compositional strategies are emphasized. Traditions of drawing are examined, and drawing is placed in a historical context that emphasizes its importance in contemporary art.

ARTS 1319. Drawing II. 3 Hours. [TCCN: ARTS 1317]

Students build upon skills learned in Drawing I. Students practice and expand the ability to create 2-dimensional representations using Line, Value, Shape, Edge, Plane and Volume, Space, Texture, Perspective, and Gesture. Students develop original and personal drawing style which demonstrates their awareness of trends in contemporary art.

Prerequisite: ARTS 1316 .

ARTS 2313. Foundations In Digital Art. 3 Hours. [TCCN: ARTS 2313]

Students are introduced to the use of the computer as an art-making medium. Students are introduced to digital software and techniques, image creation and manipulation, digital design, compositional methods, and the use of digital tools as a vehicle of creative problem-solving and personal creative expression.

ARTS 2317. Life Drawing I. 3 Hours. [TCCN: ARTS 2323]

Students engage in drawing from the model in various media. Gesture drawing and figure structure are studied. Line, Value, and Shape, Plane, and Volume are used as elements to depict the figure in space with accurate proportions. The study leads toward a final portfolio that demonstrates proficiency representing the figure in cohesive and complete compositions. Course Equivalents: ARTS 1317

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315 and ARTS 1316 with a grade of C or better.

ARTS 2323. Principles Of Graphic Design. 3 Hours.

The first in the graphic design program of study, this course emphasizes creative thinking, problem solving, and the development of the design process. Each project builds upon the previous one in depth and complexity as students explore a range of visual communication challenges.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2313.

ARTS 2343. Animation Concepts And Techniques. 3 Hours.

Students are introduced to 2D animation techniques, including the principles of motion, storyboarding, and character design. Students are also introduced to the use of computers in animation.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, and ARTS 2313 with a grade of C or better.

ARTS 2344. 2-Dimensional Computer Animation. 3 Hours.

Students use computer software to create 2D animations that incorporate traditional techniques and styles. Story development and character animation are emphasized, and video editing techniques are practiced.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 2343 with a grade of C or better.

ARTS 2365. Analog Photography. 3 Hours.

Students are introduced to advanced exposure techniques and the principles necessary to master use of film and the photographic darkroom.

ARTS 2370. Digital Photography and Media. 3 Hours. [TCCN: ARTS 2356]

Students explore and implement the tools and techniques used in the creation, editing, and presentation of digital editorial photography and journalism.

ARTS 2375. Photographic Concepts. 3 Hours. [TCCN: ARTS 2356]

Students are introduced to basic camera functions and concepts, use of visual design elements, and articulation of personal ideas through the medium of fine art photography.

ARTS 3305. Painting I. 3 Hours.

Students are introduced to the materials, techniques, and concepts of oil painting. Emphasis is placed on painting from observation, the depiction of light and shadow, and basic color theory. Process based painting and concept-based abstraction are explored. Students learn to recognize and use the tools and materials and nomenclature related to oil painting including supports and grounds, mediums, binders, and brushes. The role of painting in art history and in contemporary art is examined.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316.

ARTS 3307. Performance and Video Art. 3 Hours.

Students explore performance and video art both in practice and theory, including live performance, performance and video, live presence/virtual spaces, performance for the camera, site specific performance, and collaborative performance.

Prerequisite: ARTS 1313, ARTS 1314, and ARTS 1315.

ARTS 3310. Printmaking. 3 Hours.

Students are introduced to the foundational print concepts and systems that are employed in all printmaking mediums. Students apply this knowledge to create prints which reflect these principles, and examine the role of printmaking in art history and in contemporary art.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316 and ARTS 2313.

ARTS 3314. Intermediate Studio. 3 Hours.

Students research, interpret, and create art in the twenty-first century. A variety of techniques are explored including 2-dimensional, 3-dimensional, and digital mediums. Projects are supported by readings, discussions, and writing assignments in contemporary art theory and criticism.

Prerequisite: ARTS 1313 and ARTS 1314 with a grade of C or better.

ARTS 3315. Collage. 3 Hours.

A class in which students follow the precepts of the twentieth century art form of using and exploring the juxtaposition and layering of a variety of materials and images. The dynamics of composition and a further investigation of the use of color and inherent capabilities of contrasting images and textures are studied. Students use a variety of materials including the found object, discarded papers, invented textures, and painted surfaces to create their imagery.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, ARTS 2313 and ARTS 3318.

ARTS 3317. Life Drawing II. 3 Hours.

Students explore the use of the figure as subject matter in art. Observational skills are practiced and refined, and personal expression is emphasized. A variety of media are explored. The use of the figure in contemporary art is studied.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, and ARTS 1317 or 2317.

ARTS 3318. Sculpture I. 3 Hours.

Students explore a variety of processes and materials as ways of learning the vocabulary of three-dimensional art. Students incorporate wood, metal, and found objects into art as ways of expanding their visual vocabulary. Group critiques help the student learn contemporary approaches to art making in order to improve their sculptural skills and to develop personal artistic vision. Course Equivalents: ARTS 2318

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315.

ARTS 3320. Ceramics I. 3 Hours.

Students are provided an introduction to clay, the potential it has as a material, and an overview of the basic principles involved in the forming/processing of it. The basic forming techniques explore all aspects of hand building (pinch, coil and slab construction) as well as an introduction to the wheel. Basic firing techniques and finishes will be discussed. The emphasis of the course is rooted in sculpture.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315 and ARTS 1316.

ARTS 3322. Typography. 3 Hours.

An introduction to the principles, processes, and terminology of typography, this course is intended to develop the student's sensibility in the use of letter, word, text, typographic hierarchy, and organizational systems.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, ARTS 2313, and ARTS 2323.

ARTS 3323. Graphic Design In Context. 3 Hours.

In consideration of audience, medium, and message, students focus on design practice as applied to contemporary issues. Students pursue a range of projects that require deep exploration of concept as well as individual expression of voice and creativity.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2323, ARTS 3322.

ARTS 3324. Corporate Identity Design. 3 Hours.

Students focus on the integrated design of identity systems, marketing materials, and branding applications in order to establish and promote corporate identities. Students develop research-based, comprehensive branding strategies and identity designs for interrelated applications.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 3323.

ARTS 3326. Graphic Design Production. 3 Hours.

Students focus on graphic design production techniques and the application of contemporary tools and processes employed by visual designers. This course emphasizes the mastery of a digital workflow, concluding with the physical output.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, ARTS 2313, ARTS 3322, ARTS 3323 with a grade of C or better.

ARTS 3330. Methods in Art Education. 3 Hours.

This class is designed to give the art education major the tools necessary to be successful in the classroom. The primary focus is the development of a teaching philosophy and curricula relevant to the all level teaching certification. Topics covered may include developing a teaching philosophy, preparing and presenting lesson plans, techniques in various art mediums that are applicable to the classroom, and strategies for assessments and critiques. Class discussions and readings on current art education topics are also required.

Prerequisite: ARTS 3385, CISE 3384.

ARTS 3335. Packaging Design. 3 Hours.

Students examine graphic communication and techniques for packaging, structural, and three-dimensional design challenges. Experimentation with a diverse range of material and form, imagery, typography, and color are explored for a targeted audience based on comprehensive research, including the design brief. In addition, packaging sustainability is addressed.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 3322 with a grade of C or better.

ARTS 3343. Introduction To 3D Computer Animation. 3 Hours.

Students study the basics of 3D Animation including 3D modeling techniques, key-framing and graph editing, shading, lighting, and rendering.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, and ARTS 2313.

ARTS 3344. Advanced 3D Computer Animation. 3 Hours.

This course is designed for students who are experienced with basic 3D animation concepts and technical practice. The course introduces more sophisticated concepts and techniques and emphasizes animation development through hands-on practice. The course will focus on animation concepts, creative animation design, and expanding students' knowledge of topics, tools, and techniques.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2343, and ARTS 3343 with a grade of C or better.

ARTS 3353. Motion Graphics. 3 Hours.

Students study the use of design elements including type, logos, and images to create motion graphics for digital video and interactive applications. Students are introduced to video capture and editing in addition to motion graphics tools and programming languages.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2313, and ARTS 3323 with a grade of C or better.

ARTS 3354. Experimental Animation. 3 Hours.

Students explore alternative techniques in the creation of animation to include cutout animation, pixilation, lo-fi animation as well as other emerging processes. Coursework focuses on experimental approaches to story and content generation. Readings and discussions are focused on technical, aesthetic, and theoretical issues relating to these disciplines.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, ARTS 2313, and ARTS 2343 with a grade of C or better.

ARTS 3355. Animation Pre-Production. 3 Hours.

Students create scripts, storyboards for animation, 2D and 3D animatics, and color schemes for animation and character designs. Proper cinematography techniques are emphasized.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, ARTS 2313, and ARTS 2343.

ARTS 3356. Visual Effects and Animation. 3 Hours.

Students explore visual effects for animation and digital film making. Students concentrate on the creative pipeline for the development of visual effects and the procedures for planning, creating, and applying such effects. Specific topics may include masking, particle systems, motion tracking, chroma key, and other related techniques. Students explore the use of visual effects for narrative and experimental contexts. Readings and discussions focus on technical, aesthetic, and theoretical issues relating to this discipline.

Prerequisite: ARTS 2343.

ARTS 3360. Photographic Printing. 3 Hours.

Students are provided an investigation of traditional and alternative photographic printing and mixed media processes. Students complete a portfolio of original photographic work demonstrating personal creative and conceptual development.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 3362. Environmental Portraiture. 3 Hours.

Blending portraiture and context, the environmental portrait illuminates the character and personality of its subject. Learning to photograph people in their natural surroundings thus capturing insight into their lives is the goal of this course. Students complete a portfolio of original photographic work focusing on the topic of environmental portraiture.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 3364. Photography Seminar. 3 Hours.

Each semester, the course will focus on a topic relevant in contemporary photography. Topics will rotate and vary from semester to semester. Readings, presentations, and research assignments will serve as the basis for the creative work produced in the seminar.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 3365. Film Appreciation. 3 Hours.**ARTS 3368. Photographic Lighting I. 3 Hours.**

Students learn the fundamentals of working with light both in the studio and on location. They are introduced to the use and control of existing light as well as high-powered electronic flash in the realm of digital photography.

Prerequisite: ARTS 1313, 1314, 1315, 2365, and 2375 with a grade of C or better.

ARTS 3370. Digital Photography & Imaging. 3 Hours.

Students are engaged in an advanced study of the tools, techniques, and applications of digital photography in the desktop computing environment. Emphasis is placed on non-destructive manipulation of images and digital workflow techniques.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 3373. Digital Imaging. 3 Hours.

Students explore advanced computer imaging techniques in support of individual student interests. Advanced capture, manipulation, and printing procedures are explored and applied in developing digital portfolios.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 2375 with a grade of C or better.

ARTS 3374. Alternative Photo Processes. 3 Hours.

Students are introduced to a variety of photographic processes including historical and non-silver processes. Digital and analog processes are combined with experimental techniques and used creatively to create non-traditional artworks.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 3375. Web Site Development. 3 Hours.

Students are introduced to the process of designing and creating websites. Beginning with an understanding of the Internet and basic coding, students work with authoring tools used in building and maintaining websites. The course emphasizes portfolio development and presentation.

Prerequisite: ARTS 2370.

ARTS 3382. The History Of Animation. 3 Hours.

Students engage in a survey of the History of Animation from early cartoons through contemporary special effects and 3D characters. The political, artistic, and social uses of animation are examined.

Prerequisite: ARTS 2386 OR ARTS 3385 with a grade of C or better.

ARTS 3383. Design History. 3 Hours.

Students are provided an in-depth study of styles, schools, philosophies, and parallel fields of design from the Industrial Revolution to the present. Emphasis is placed on the development of the profession of graphic design and its relationship to commerce and technology.

Prerequisite: ARTS 2386 or ARTS 3385.

ARTS 3385. Art History Survey II. 3 Hours.

Students examine works of art and architecture from the Renaissance to the present in a global perspective. Course Equivalents: ARTS 2386 .

ARTS 3386. Ancient Greek and Roman Art. 3 Hours.

Students examine the art and architecture of the ancient Greek and Roman empires. Studies will also include earlier civilizations such as the Minoans and Myceneans through the dissolution of the Roman Empire and the early medieval period. Students consider various art forms such as ancient coins, bronze and marble sculpture, Roman wall painting, and religious and civic architecture.

Prerequisite: ARTS 1303, ARTS 3385.

ARTS 3387. Renaissance Art History. 3 Hours.

Students engage in a survey of art and architecture of the Renaissance in a global perspective.

Prerequisite: ARTS 1303 and ARTS 3385.

ARTS 3388. Art and Culture in Context. 3 Hours.

Students explore works of art and architecture in a specific historical and cultural context. The influence of social, political, economic, and religious circumstances on the creation and use of art works will be considered, as well as relationships and transitions between popular culture and fine arts. Credit: 3.

Prerequisite: ARTS 1303 and ARTS 3385.

ARTS 4019. Special Topic. 1-6 Hours.

Students study problems selected within an area of specialization. Variable Credit (1-3). (This course may be taken for Academic Distinction credit. See Academic Distinction Program in this catalog.) Course Equivalents: ARTS 4319

Prerequisite: 6 hours of credit in the area of investigation, with permission of the instructor and department chair.

ARTS 4079. Independent Study. 1-3 Hours.

This course is provided to allow the student, under the supervision of a faculty member, to develop specialized skills and to conduct an investigation into an area of special interest. Regular meetings are held with the faculty sponsor. The course culminates in a portfolio of work and/or a scholarly written report. Departmental approval is required before the student may enroll in this course. May be repeated or taken concurrently to a maximum of 6 hours. (This course may be taken for Academic Distinction credit. See Academic Distinction Program in this catalog.) Variable Credit (1 to 3). Course Equivalents: ARTS 4379 .

ARTS 4305. Advanced Painting. 3 Hours.

Students explore traditional painting processes and concepts along with the introduction of non-traditional techniques and materials. Emphasis is placed on skill development and individual exploration of ideas.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 3305.

ARTS 4307. Painting In Aquamedia. 3 Hours.

Students focus on transparent watercolor. Landscape, still life, and the figure are emphasized, along with experimentation.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 3305 with a grade of C or better.

ARTS 4309. Book Arts. 3 Hours.

Students explore techniques and processes used to create books as an artistic expression. Techniques such as papermaking and bookbinding are used along with printmaking, photography, and drawing. Students use traditional and experimental book structures to create books that are personal expressions. Each student creates a series of books. The historical and conceptual foundations of contemporary artists' bookmaking are also examined.

Prerequisite: ARTS 3310.

ARTS 4310. Advanced Printmaking. 3 Hours.

Students study advanced problems in printmaking as well as special procedures and problems involving further investigation of various printmaking media and formats. An emphasis is placed on creative development.

Prerequisite: ARTS 1313, 1314, 1315, and 3310 with a grade of C or better.

ARTS 4311. Advanced Studio. 3 Hours.

This course is an interdisciplinary studio course emphasizing contemporary issues in art. Students are encouraged to work in a variety of mediums, cross boundaries between mediums, incorporate technology, and collaborate. They develop a body of work that is based on concepts relevant to personal expression and contemporary issues. Group and individual critiques are used to evaluate progress and students are encouraged to exhibit their work.

Prerequisite: 9 hours of advanced Art Studio or Photography courses with a grade of C or better.

ARTS 4313. W.A.S.H Practicum. 3 Hours.

Students will gain leadership and advanced critique skills while mentoring other students, contributing and participating in the Workshop in Art Studio and History (W.A.S.H) program. Additionally, students will be expected to complete an independent studio project. Departmental approval is required.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, Senior standing.

ARTS 4315. Professional Practices in Art. 3 Hours.

Students prepare professional portfolios and proposals for exhibitions, grants, residencies, and other opportunities. Students learn to document their artwork and to prepare a portfolio and professional materials for the job market and exhibitions. They present exhibitions and talks to the public in professional settings. Class discussions, guest lectures, and readings on current art topics are also required.

Prerequisite: ARTS 1313, ARTS 1314, and ARTS 1315 with a grade of C or better.

ARTS 4316. Advanced Drawing. 3 Hours.

Students study drawing problems with emphasis on the development of personal expressive techniques.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 1319 with a grade of C or better.

ARTS 4317. Museum And Gallery Practices. 3 Hours.

Students focus on the practices and operations of Alternative Art Spaces, Commercial Art Galleries, and Museums of Art. Students visit museums and galleries in the area and assist with exhibitions in university art galleries. The course covers art handling and installation, registration procedures, and curatorial theories and practices. Students curate and mount exhibits and prepare press materials and publicity as course projects.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 2386 or ARTS 3385 with a grade of C or better.

ARTS 4318. Sculpture II. 3 Hours.

Students explore three-dimensional media through the proper use of tools, working processes, and a variety of materials. Emphasis placed on skill development and individual exploration of ideas.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 3318.

ARTS 4320. Ceramics II. 3 Hours.

Students engage in a continued exploration of clay with an emphasis on personal expression and discovery. The course is geared towards those students dedicated to understanding the contemporary issues surrounding the material in relationship to their own work and methodology. There are a number of required readings/writings, along with several group discussions. Additional technical information is provided regarding advanced techniques (mold-making, firing wood/gas/soda kilns, and alternative building techniques). Interdisciplinary work is encouraged.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 3320 with a grade of C or better.

ARTS 4323. Senior Studio In Graphic Design. 3 Hours.

This capstone Graphic Design course prepares students to gain employment in the field by creating and producing a professional design portfolio, resume, social media presence, and self-promotional materials. Students will also gain knowledge about how to set up, prepare for, and conduct themselves during professional interviews.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2323, ARTS 3322, ARTS 3323, and ARTS 3324 with a grade of C or better.

ARTS 4325. Advanced Typographic Design. 3 Hours.

Students explore typography beyond its foundations. Students investigate the interdependence of type, image, and content, as they relate to visual communication. Experimental and hand-created type are explored with the goal of developing a sophisticated typographic voice.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, and ARTS 3323 with a grade of C or better.

ARTS 4331. Illustration. 3 Hours.

Students take an explorative and conceptual approach to contemporary illustration including both traditional and digital media. Students consider a range of design possibilities including visual metaphor as an illustrative solution.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2313, ARTS 2323, and ARTS 3322 with a grade of C or better.

ARTS 4333. Interactive Design. 3 Hours.

This is an advanced course for web design concepts and processes as well as motion graphics applying Dreamweaver, Flash, Photoshop, and ImageReady applications. Students address terminology of the web environment, usability, web file formats, JavaScript, web typography, and web graphics. In addition, students are introduced to web-based interactive multimedia including animation, sound, and motion graphics.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2313, ARTS 3322, ARTS 3323 with a grade of C or better.

ARTS 4343. Advanced Interactive Design. 3 Hours.

Students address usability, web file formats, multiple-platform design, advanced web typography, and the terminology of the interactive design environment. The course builds on theories and techniques introduced in ARTS 4333, including web design concepts, processes, and the application of programming languages to produce Responsive Website Design (RWD).

Prerequisite: ARTS 3322 and ARTS 4333.

ARTS 4350. Character Animation. 3 Hours.

Students explore the techniques of character animation and rigging, using pre-rigged characters and models in 3D computer software.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1319, ARTS 2313, ARTS 2343, and ARTS 3343 with a grade of C or better.

ARTS 4355. Shading, Lighting & Rendering. 3 Hours.

Students engage in an in depth study of surfaces and shaders including texture and image mapping, lighting for compositing, cel shading, and rendering methods.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1319, ARTS 2313, ARTS 2343, and ARTS 3343 with a grade of C or better.

ARTS 4356. 2D Interactive Animation. 3 Hours.

Students engage in an in-depth study of 2D Interactive Multimedia Technologies for the creation and distribution of content over the internet and as stand-alone desktop applications. Coursework is concentrated on the development of interactive audio and video, interactive narratives, and game production. Focus is on both asset creation and scripting for these types of applications. Readings and discussions focus on technical, aesthetic, and theoretical issues relating to this evolving art medium.

Prerequisite: ARTS 1313, 1314, 1315, 1316, 2313, 2343, and 3343.

ARTS 4357. 3D Interactive Animation. 3 Hours.

Students engage in an in-depth study of 3D Interactive Multimedia Technologies for the creation and distribution of content over the internet and as stand-alone desktop applications. Coursework is concentrated on the development of 3D models, environments, and animations for interactive narratives and game production. Additional topics may include the study of surfaces and shaders for 3D interactive media including texture and image mapping, lighting, shading, and rendering methods.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 1316, ARTS 2313, ARTS 2343, and ARTS 3343 with a grade of C or better.

ARTS 4358. Animation Portfolio. 3 Hours.

Students create a work in a specific area of expertise and author a demo reel using this work and refined work from previous courses. The animation profession and industry is explored and professional presentation and resume building are taught.

Prerequisite: 12 hours of animation courses with a grade of C or better.

ARTS 4368. Photographic Lighting II. 3 Hours.

This course is a continuation of ARTS 3368. Students learn advanced studio lighting techniques while completing a body of creative photographic work. Credit. 3. Course Equivalents: ARTS 3369

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, ARTS 2375 and ARTS 3368 with a grade of C or better.

ARTS 4370. Documentary Photography. 3 Hours.

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 4371. Human Form: A Photographic Study. 3 Hours.

Students take an investigative look into the use of the human form through the medium of photography. Students discuss a variety of contexts and representations of the human body throughout the history of art. Students complete a body of photographic work using or referencing the human figure. Course Equivalents: ARTS 3366

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 4372. Photographic Narratives. 3 Hours.

Students are provided a broad and intensive investigation of visual narratives through photographic representation. Photographic books, journals, installations, slide shows, and mixed media collage are explored as a means of developing visual fluency and personal expression. The implications of photographic sequencing and contextual significance are also an emphasis of this course. Course Equivalents: ARTS 3376

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 4373. Contemporary Issues in Photography. 3 Hours.

Students are provided an understanding of contemporary photographic trends. The work of photographers who are currently having an impact on fine art photography are discussed along with critical analysis of art theory. Students are expected to complete a body of photographic work that demonstrates personal conceptual development. Course Equivalents: ARTS 3378

Prerequisite: ARTS 1313, ARTS 1314, ARTS 1315, ARTS 2365, and ARTS 2375 with a grade of C or better.

ARTS 4380. Art History Seminar. 3 Hours.

Students examine the discipline and historiography of the field in this capstone course for art history majors. Students analyze theoretical texts in a seminar setting and apply research methods through different models of art historical analysis. Credit: 3.

Prerequisite: ARTS 4385.

ARTS 4381. History of Photography. 3 Hours.

Students study the history of photography from its earliest beginnings. Technical, visual, aesthetic, and social aspects are considered. Course Equivalents: ARTS 3381

Prerequisite: ARTS 2386 or ARTS 3385 with a grade of C or better.

ARTS 4384. Modern Art Before 1945. 3 Hours.

Students examine modern art in Europe and the United States through a critical engagement with ideas of modernism and methodologies from 1850 through World War II. Mediums to be studied may include photography, painting, drawing, sculpture, and early film. Credit 3

Prerequisite: ARTS 2386 or ARTS 3385 with a grade of C or better.

ARTS 4385. Art Since 1945. 3 Hours.

Students engage in an international examination of painting, sculpture, and other media since 1945. Students explore artistic production through social, political, historical, and theoretical frameworks.

Prerequisite: ARTS 2386 or ARTS 3385 with a grade of C or better.

ARTS 4387. History Of Mexican Art. 3 Hours.

Students engage in a survey of Mexican and Mesoamerican art. Students study images of prehistoric artifacts and the art and architecture of pre-Hispanic cultures, including the Olmec, Mixtec, Maya, and Aztec. The impact of the Spanish conquest, the role of art in the Mexican Revolution and the Socialist movement, Arte Popular, the Muralists, the late twentieth century, and contemporary Mexican art are also explored.

Prerequisite: ARTS 1303 and (ARTS 2386 or ARTS 3385) with a grade of C or better.

ARTS 4389. Criticism and Theory In the Visual Arts. 3 Hours.

Students study historical and contemporary aspects of major thinking concerning the visual arts.

Prerequisite: ARTS 1303 and (ARTS 2386 or ARTS 3385) and (ARTS 4385 or ARTS 4388) with a grade of C or better.

Astronomy (ASTR)

ASTR 3303. Life in the Universe. 3 Hours.

Students explore the evolution of life on Earth from an astronomical perspective and investigate the likelihood that this could happen elsewhere in the universe. This course also explores the possibility of communicating with intelligent species elsewhere in our galaxy and how humanity could best go about doing so. This course is typically taught every other spring term.

Prerequisite: PHYS 1403 or PHYS 1404.

ASTR 3383. Cosmic Catastrophes. 3 Hours.

Students build on knowledge of basic astronomical concepts discussed in previous coursework. Topics may include supernovae, neutron stars, black holes, gamma-ray bursts, worm holes, extra dimensions, and determination of the origin, state, and fate of the universe. This course is typically taught every other fall term.

Prerequisite: PHYS 1403 with a C or better.

Athletic Training (ATTR)

ATTR 2110. Taping and Bandaging. 1 Hour.

This skills-based course explores the appropriate utilization and application of preventative, therapeutic, and rehabilitative taping and bandaging used in the athletic training profession. The wrapping and bandaging of various extremities susceptible to injury in sport and activity are emphasized in this course. Course Equivalents: ATTR 2310 .

ATTR 2300. Introduction to Athletic Training. 3 Hours.

This course is an introduction to the profession of Athletic Training. Topics include methods of care, treatment, and rehabilitation of athletic injuries. Laboratory experiences are provided to assist the student with athletic injury scenarios. This course is offered in the Fall only.

Prerequisite: Department Approval.

ATTR 3370. Prevention & Care of Injuries. 3 Hours.

This course includes instruction and laboratory work in the care and prevention of injuries. It is designed to meet the needs of the athletic coach and physical education teacher. Course Equivalents: KINE 3370

Prerequisite: BIOL 2401 or BIOL 2403, and 45 Credit Hours or Department Approval.

ATTR 4369. Therapeutic Exercise Interventions. 3 Hours.

This course will focus on therapeutic exercise for a variety of injuries and conditions common in sport and exercise settings. Emphasis will be placed on timing and healing phases as indicators of appropriate interventions. Indications, contraindications, and precautions of various interventions will be included. This course is recommended for those students pursuing the allied health fields (e.g. physical and occupational therapy, athletic training, chiropractic, etc...)

Prerequisite: ATTR 3370 and BIOL 2403 or BIOL 2401.

Bassoon (BSSN)

BSSN 1101. Secondary Performances-Bassoon. 1 Hour.

Students study techniques and musicality related to bassoon in weekly individualized private instruction. Students admitted as a Bassoon primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

BSSN 1201. Individual Performances-Bassoon. 2 Hours.

The course consists of individualized private instruction on the bassoon. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students.

Prerequisite: Students must have instructor permission.

BSSN 3201. Individual Performances-Bassoon. 2 Hours.

The course consists of advanced individualized private instruction on the bassoon. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students.

Prerequisite: Students must have passed a sophomore proficiency jury.

BSSN 3202. Applied Bassoon with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the bassoon. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital.

Prerequisite: Students must have instructor permission.

Bilingual/Eng as Sec lang (BESL)

BESL 2301. Multicultural Influence On Learning. 3 Hours.

This course examines how the diversity of the United States influences classroom learning. Linguistic dialects, socio-economic status, and cultural diversity are among the factors examined in relation to the educational process.

BESL 3301. Second Language Acquisition. 3 Hours.

This course examines language acquisition theories and philosophies related to learning a second language from early childhood to adult. The course also examines the history, rationale, political, community and global perspectives of bilingual education and English as a second language programs. Emphasis is placed on the principles and implementation of how children learn a language or languages, and how educators can develop academic programs and curriculum plans incorporating local, state, and national policies. Field experiences in K-12 public schools may be required.

BESL 4088. Special Topics in Bilingual/ESL Education. 1-3 Hours.

This course is designed for persons interested in enhancing educational principles related to current bilingual and English as a second language issues. This course will address specific topics related to second language learning, methodologies, curriculum, instruction, evaluation, parent/community involvement, program design and field experiences. Course Equivalents: BESL 4302 .

BESL 4089. Independent Study in Bilingual/ESL/Education. 1-3 Hours.**BESL 4301. Spanish Fluency In Classroom. 3 Hours.**

This course is designed for persons interested in teaching in a Spanish instructional environment. Terminology specific to the instructional process, curriculum, and community is emphasized. Linguistic and cultural comparisons among different Spanish dialects represented in Texas are examined. The course is taught in Spanish.

BESL 4303. Curriculum In Bilingual and Second Language Programs. 3 Hours.

This course identifies appropriate curricula and teaching strategies to teach reading, language arts, mathematics, science and social studies to second language learners. Principles of current content area curriculum and instructional theory as related to language learning in a bilingual classroom are studied. This course is taught in Spanish. Field experiences in K-6 schools required. Taken concurrently with BESL 4304.

Prerequisite: 50 hours completed.

BESL 4304. Language Learning & Literacy Dev in Multilingual Students. 3 Hours.

This course provides an intensive study of the theories of language learning and literacy development for students learning English as a second language. Processes and strategies on the development of oral language and reading in the first and second languages are emphasized. Taught in Spanish. Field experience in K-6 public schools required. Taken concurrently with BESL 4303.

Prerequisite: 50 hours completed.

BESL 4305. Academic Language in Dual Language Programs. 3 Hours.

In this course students study formal academic language needed by bilingual educators with a focus on building content area vocabulary and appropriate terminology for teaching in dual language programs. Students engage in extensive practice in oral discourse, written expression, and the creation of culturally authentic didactic materials.

Prerequisite: BESL 4301.

BESL 4320. Student Teaching in the Bilingual/ESL Classroom. 3 Hours.

The EC-6 Bilingual Generalist candidate is assigned to student teaching in a bilingual/elementary classroom full time for approximately seven weeks.

Prerequisite: Admission to Student Teaching program.

Biology (BIOL)

BIOL 1401. Environmental Science. 4 Hours. [TCCN: ENVR 1401]

A general course designed to cover all areas relating to contemporary environmental issues. Topics may include air, water, and soil pollution; biodiversity, climate change; agriculture; pesticides; population growth; and energy. This course is designed for non-science majors to help them meet their General Education science requirement and as a required course in the Environmental Science degree. Includes a two-hour lab. BIOL 1401 cannot be applied to either a major or a minor in Biology. Fall, Spring, Summer. Course Equivalents: BIOL 1301

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 1406. General Biology I. 4 Hours. [TCCN: BIOL 1406]

Students examine the chemical basis of life, the structure and biology of the cell, molecular biology, genetics, and mechanisms of evolution. This course is one of two introductory courses (BIOL 1406 and BIOL 1407) which comprise a two-semester survey of modern biology. The course requires a 3 hour laboratory that is concurrently taken with the course. Fall, Spring, Summer.

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 1407. General Biology II. 4 Hours. [TCCN: BIOL 1407]

Students undertake a detailed survey of the major phylogenetic lineages. This includes a comparison of the systems of different organisms, the ecological roles and relationships of organisms, and their behavior. This course is one of two introductory courses (BIOL 1406 and BIOL 1407) which comprise a two-semester survey of modern biology. The course requires a 3 hour laboratory that is concurrently taken with the course. Fall, Spring, Summer.

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 1408. Contemporary Biology. 4 Hours. [TCCN: BIOL 1408]

This course is a presentation for the non-science major of contemporary hypotheses and the unifying principles of biology, including but not limited to: the scientific method and hypothesis testing, the definition of life, cell theory, the central dogma of biology (transcription of DNA to RNA to protein), genetic regulation and heredity, metabolism and homeostasis, organismal evolution, biodiversity, and ecology. The class builds scientific literacy and critical thinking skills for use in everyday life. Credit in BIOL 1408 as a laboratory science is contingent upon completion of the laboratory section. This course is designed for non-science majors to help them meet their General Education science requirement and cannot be applied to either a major or minor in Biology. Includes a two-hour lab. Fall, Spring, Summer. >b> Course Equivalents: BIOL 1308 .

BIOL 1436. Foundations Of Science. 4 Hours.

The course focuses on the nature of science as a reliable method of acquiring knowledge about the natural world. Students will learn how to apply key scientific facts, concepts, laws and theories to distinguish science from non-science, bad science, and pseudoscience by analyzing a variety of claims and case studies. By employing an innovative, interdisciplinary approach to science education, this course is designed to increase science literacy and critical thinking skills for introductory-level students. This course is designed for non-science majors to help them meet their General Education science requirement and cannot be applied to either a major or a minor in Biology. Students must enroll concurrently in the corresponding lab for this course. Includes a two-hour lab. Fall, Spring, Summer. Course Equivalents: GEOG 1436, GEOL 1436, ISCI 1436 .

BIOL 2110. Being a Professional Biologist. 1 Hour.

Students explore the biological sciences as a profession and gain proficiency in the skills required of successful professional biologists. Content areas in this seminar course may include career exploration, retrieval and use of scientific literature, bibliographic procedures, critical evaluation of claims, scientific professionalism, and locating/using campus resources.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407.

BIOL 2401. Human Anatomy. 4 Hours. [TCCN: BIOL 2401]

This course deals with structure and form of the human body. It includes studies of cells, tissues, and organ systems. Registration is primarily for students in prenursing or majors in kinesiology or health. Two-hour laboratory. Fall, Spring, Summer as needed. Credit in this course cannot be applied to either a major or minor in Biology.

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 2402. Human Physiology. 4 Hours.

This course will help students identify and understand the function of several important human organ systems and how these systems maintain homeostasis. Topics and the mechanisms involving circulation, digestion, metabolism, muscle action and respiration will receive the most emphasis. This course is designed to emphasize a clinical knowledge of physiology and techniques required by students studying nursing, physical therapy, and related health fields. Two-hour laboratory. Fall and Spring. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Minimum grade of C in BIOL 2401 and CHEM 1406 or CHEM 1306 and CHEM 1106 or CHEM 1411 or CHEM 1311 and CHEM 1111.

BIOL 2403. Human Anatomy & Physiology I. 4 Hours.

This course is the first course in a two-semester sequence that examines the systems of the human body using an integrated approach. Emphasis will be given to the study of cells and tissues, and the anatomical and physiological interrelationships of the skeletal, muscular, and nervous systems and special senses. Laboratory exercises will enhance the student's appreciation and comprehension of the biological concepts of structure and function of the human body.

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 2404. Human Anatomy & Physiology II. 4 Hours.

This course is the second course in a two-semester sequence that examines the systems of the human body using an integrated approach. Emphasis is placed on the study of the following systems: endocrine, cardiovascular, lymphatic and immune, respiratory, digestive, urinary, and reproductive. In addition this course requires in-depth application of topics related to cellular function and metabolism and of organ systems studied during Human Anatomy and Physiology I. Laboratory exercises will enhance the student's appreciation and comprehension of the biological concepts of structure and function of the human body.

Prerequisite: Minimum grade of C in BIOL 2403 and demonstrated college-level readiness in reading, writing, and math.

BIOL 2411. General Botany. 4 Hours. [TCCN: BIOL 1411]

Students are study general principles of botany. Emphasis is placed on morphology, taxonomy, genetics, physiology, and ecology of plants in an evolutionary and ecological context. Students may begin sequence with either BIOL 2411 or BIOL 2413. Includes a three-hour lab. Fall, Spring, Summer. Course Equivalents: BIOL 1311, 1411

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 2413. General Zoology. 4 Hours. [TCCN: BIOL 1413]

Students study general principles of zoology in an evolutionary context. Emphasis is placed on the anatomy, behavior, and ecology of animals. Students are introduced to evolutionary and ecological principles of biology. Students may begin sequence with either BIOL 2411 or BIOL 2413. Includes a three-hour lab. Fall, Spring, Summer. Course Equivalents: BIOL 1313, 1413

Prerequisite: Demonstrated college-level readiness in reading, writing, and math.

BIOL 2420. Introduction to Applied Microbiology. 4 Hours. [TCCN: BIOL 2420]

An introduction to microorganisms, their morphology, growth requirements, methods of culture, and the manner in which they affect health. Reactions of the body toward pathogenic organisms and the principles of immunity and chemotherapy are considered. Two-hour laboratory. Fall, Spring. Credit in this course cannot be applied to a major or minor in Biology.

Prerequisite: Minimum grade of C or better in BIOL 2403 and BIOL 2404, and CHEM 1411 or CHEM 1406.

BIOL 2440. Introductory Cell Biology. 4 Hours.

An introduction to the study of cells, including scientific method, biochemistry, metabolism, cell energetics, membranes, cellular evolution, DNA, protein synthesis, the cytoskeleton, cell division, and the cellular basis of inheritance, with emphasis on the development of problem solving skills. Three-hour laboratory. Fall, Spring, Summer.

Prerequisite: Minimum grade of C in BIOL 1406, BIOL 1407, and CHEM 1411.

BIOL 2441. Forensic Biology Concepts. 4 Hours.

Students examine general biological concepts that apply to forensic science and learn the foundations of biology as they apply to legal investigations. Course topics may include the abiotic and biotic influences of decomposition; techniques in studying human remains; the analysis of blood tissues, fluids, and wounds; principles of DNA analysis, and molecular biology as applied to forensics; and wildlife forensics. The course requires a 3 hour laboratory that is taken concurrently with the course. Fall, Spring.

Prerequisite: Minimum grade of C in BIOL 1406, BIOL 1407; CHEM 1411.

BIOL 3320. Sustainability & Environment. 3 Hours.

Students investigate and assess the impacts that human activity can have on the environment and will seek to identify innovative, cross-disciplinary solutions to many of the world's most pressing environmental challenges. Given that Sustainability Science involves making decisions and taking actions that are in the interest of protecting the natural world, course topics will include current sustainability issues related to population growth, agriculture, natural resources, energy usage, habitat degradation and ecological economics. This course is typically be offered every other fall semester. Also offered as GEOG 3320. Course Equivalents: BIOL 2320, GEOG 2320, GEOG 3320

Prerequisite: BIOL 1401.

BIOL 3364. Plant Taxonomy. 3 Hours.

A study of the characteristics and classification of plants emphasizing systematic techniques. Focus on identification of the more common plant families allows transfer of knowledge to other regions of the country and world. Two-hour laboratory. Spring.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407.

BIOL 3390. Science Teaching Methods. 3 Hours.

In this course, students seeking the Composite Science teaching certification for the 7th through 12th grade level examine topics related to science teaching pedagogies. Topics include relevant concepts and literature regarding the nature of science, the planning and implementation of scientific investigations and activities, theory-grounded lesson construction and implementation, the use of equipment and technology, and the implementation of safety practices in laboratory settings.

Prerequisite: BIOL 1413, BIOL 2440, CHEM 1411, CHEM 1412, GEOG 1401, GEOL 1403, GEOL 1404, PHYS 1301/1101, PHYS 1302/1102 or instructor approval.

BIOL 3409. General Ecology. 4 Hours.

A study of physical and biotic components of the environment, responses of organisms to their environment and each other. The course covers organismal, population, community, and ecosystem ecology. The application of ecological principles via field studies is an integral part of the laboratory. Three-hour laboratory and field work. Fall, Spring.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407.

BIOL 3410. Human Biology. 4 Hours.

This course deals with the study of structure and function of the human body. The structure of various organ systems are discussed and their function as organs and systems described. Three-hour laboratory. Offered as needed.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407).

BIOL 3420. Comparative Vertebrate Anatomy. 4 Hours.

A study of representative vertebrates, their anatomy, ontogeny, and phylogeny. Three-hour laboratory. Fall.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407.

BIOL 3430. Plant Physiology. 4 Hours.

General course dealing with principal life processes of plants. Topics include photosynthesis, respiration, nutrition, flowering, dormancy, hormones, growth, and development. Writing enhanced. As needed. Four hours lecture per week. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Minimum grade of C in BIOL 1311, BIOL 1111, BIOL 1313, BIOL 1113, BIOL 2440, CHEM 1311, CHEM 1111 or CHEM 1411 and CHEM 1312, CHEM 1112 or CHEM 1412.

BIOL 3440. General Physiology. 4 Hours.

The study of the primary mechanisms by which autotrophic and heterotrophic organisms function. Important fundamental aspects of cellular, regulatory, and systemic physiology are presented emphasizing the functional aspect of living systems at the cellular and molecular level. Students are expected to develop an integrate understanding of the areas presented and recognize the interdependence of these mechanisms in the maintenance of homeostasis. Three-hour laboratory. Spring.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413 and BIOL 2440) or (BIOL 1406 and BIOL 1407), and CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123.

BIOL 3450. Introductory Genetics. 4 Hours.

Study is made of the physical basis of inheritance and principles of heredity and variation. Topics include Mendelian genetics, cytogenetics, molecular basis of genetics, gene expression and regulation, and DNA technologies. Two-hour laboratory. Writing enhanced. Fall, Spring, and Summer as needed.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413 and BIOL 2440) or (BIOL 1406, BIOL 1407, and BIOL 2440), and CHEM 1411, CHEM 1412.

BIOL 3460. Pathophysiology. 4 Hours.

A study of basic physiological systems and underlying system dysfunctions associated with human disease processes across the life span. Relationships between etiologic agents and their consequence to human form and function will be stressed. Critical thinking processes integrating symptoms, treatment and prognosis will be applied to physiological perspectives. Four hours lecture per week. Fall and Summer as needed.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407).

BIOL 3461. Wildlife Biology. 4 Hours.

The history and basic principles, philosophy and concepts of wildlife management as they relate to habitats, people, and the problems associated with their interactions. Three-hour laboratory and field work. Spring.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413, or BIOL 1406 and BIOL 1407, and BIOL 3409.

BIOL 3470. General Microbiology. 4 Hours.

An introduction to microorganisms including bacteria, viruses, and fungi. Major areas considered are morphology, physiology, genetics, and pathology. Microorganisms are studied in relation to soil, water, food, industrial processes, and disease. Three-hour laboratory. Fall, Spring, and Summer as needed.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407), and CHEM 1412.

BIOL 3480. Developmental Biology. 4 Hours.

A study of the genetic control of cell growth, differentiation, and morphogenesis in the formation of tissues, organs, and anatomy of a living organism, with emphasis on embryonic development and the evolutionary conservation of developmental mechanisms.. Three-hour laboratory. Writing enhanced. Even year, Fall.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407) and BIOL 3450.

BIOL 3490. Histology. 4 Hours.

A study of animal tissues with emphasis on human materials. Identification and preparatory techniques are stressed. Three-hour laboratory. Spring.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407), and CHEM 1412.

BIOL 3492. Plant Morphology. 4 Hours.

Survey of the plant kingdom with emphasis on morphogenesis, comparative structure and life cycles of representative plant forms. Three-hour laboratory. Fall, Summer.

Prerequisite: Minimum grade of C in BIOL 1411, BIOL 1413, and BIOL 2440.

BIOL 4080. Field and Experiential Biology. 1-3 Hours.

This course provides students with a first-hand, off-campus, opportunity to experience biology in a specialized setting. Potential settings include both domestic and international sites, and may consist of particular ecological regions, biological reserves, field data collection sites, laboratories, and clinics. Variable Credit (1 to 3). Course Equivalents: BIOL 3380

Prerequisite: Approval of Instructor.

BIOL 4095. Undergraduate Research Topics in Biology. 1-4 Hours.

This course is designed to allow selected, advanced students in specific areas of biology to participate directly in biological research. The research project will be developed jointly by the student and a faculty mentor, and must be pre-approved by the Chair of the Department of Biological Sciences. Variable Credit (1-4). Demonstrated college-level readiness in reading, writing, and math. This course may be taken for Academic Distinction Credit. See Academic Distinction Catalog Program in this Catalog.

Prerequisite: Biology major, minimum Junior standing.

BIOL 4096. Special Topics In Undergraduate Biology. 1-4 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new biological topics and concepts in a course setting, prior to that course's formal Department, College, and University course adoption. This course may be repeated for different Special Topics (different courses). Variable Credit (1-4). Demonstrated college-level readiness in reading, writing, and math. This course may be taken for Academic Distinction Credit. See Academic Distinction Catalog Program in this Catalog.

Prerequisite: Biology major, minimum Junior standing.

BIOL 4110. Undergraduate Seminar. 1 Hour.

Discussions of current literature in the biological sciences. Required of senior Biology majors. Fall, Spring. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Biology major, Senior standing.

BIOL 4111. Undergraduate Seminar. 1 Hour.

Discussions of current research presented by faculty participating in the Department of Biological Sciences weekly seminar series. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Biology major, Senior standing.

BIOL 4306. Philosophy Of Biology. 3 Hours.

This course will help the student understand the philosophical issues associated with defining and applying theoretical terms and constructs within evolutionary biology. Even year, Spring. of Advanced Biology.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407), and 8 hrs.

BIOL 4320. Environmental Toxicology. 3 Hours.

(Also listed as ENVR 4320). This course presents basic toxicology as a qualitative and quantitative science of the effects of poisons (toxins) upon the environment, individuals, and populations. The course will also provide a comparison of the toxicology of human and other species' exposure to common environmental contaminants. Two one-hour lectures and one two-hour laboratory as needed.

Prerequisite: (BIOL 1411, BIOL 1413, and BIOL 2420) or (BIOL 1406 and BIOL 1407), and (8 hrs of Advanced Biology and MATH 3379) or BIOL 4374.

BIOL 4330. Aquatic Biology. 3 Hours.

This course covers physical, chemical, and biological features of inland waters; organisms of freshwater; factors in biological productivity; methods and equipment. Laboratory focuses on various methods of sampling biotic and abiotic components of freshwater systems. This course is designed to meet the needs of ecologists, biologists, environmental scientists, and teachers of science. Two-hour laboratory. Fall.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407, and Junior standing.

BIOL 4350. Immunology. 3 Hours.

Humoral and cell-mediated immunobiology, innate immunity, genetics, and chemistry are considered along with immunoanalysis and pathologies. Spring.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407), and BIOL 3470, CHEM 2323, and CHEM 2123.

BIOL 4360. Genetic Analysis of Human Disease. 3 Hours.

A study of the transmission and molecular basis of human genetic traits and genetic diseases. Various simple and complex genetic disorders will be examined using pedigree, molecular, and biochemical analyses. Novel approaches to the diagnosis and treatment of human genetic disorders will be discussed. Special topics examining the ethical, legal, social issues and concerns of genetic testing and discrimination, germ line therapy, genetic enhancement, and human cloning are examined. Spring. Odd years.

Prerequisite: Minimum grade of C in BIOL 3450.

BIOL 4361. Evolutionary Biology. 3 Hours.

Evolution is the core theory of modern biology. Students investigate the major principles of evolutionary biology, from the history of evolutionary thought through theory and current concepts of evolution. Emphasis will be placed on molecular and cellular evolution, mechanisms of evolution including natural selection, gene flow, founder effect, and speciation.

Prerequisite: Minimum grade of C in (BIOL 1411, BIOL 1413, and BIOL 2440) or (BIOL 1406 and BIOL 1407), and BIOL 3450.

BIOL 4362. Paleobiology. 3 Hours.

This course examines temporal and spatial changes of life on earth in an evolutionary context, particularly large scale events such as radiations and extinctions. Emphasis is placed on anatomy and taxonomy of fossil invertebrates and vertebrates. The laboratory component encompasses the collection, preparation, and description of a variety of fossil types.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407.

BIOL 4363. Genomics and Bioinformatics. 3 Hours.

Students analyze advances in genomics and bioinformatics and apply computational and bioinformatic approaches to understand the genome structure, function, and evolution. Topics may include DNA sequencing, sequence assembly, gene and protein sequence alignments, whole genome comparison, annotation of DNA sequences, promoter analysis, transcriptomics, proteomics, and phylogenetic analysis.

Prerequisite: Minimum grade of C in BIOL 3450 and Junior standing.

BIOL 4370. Microbial Ecology. 3 Hours.

This course introduces the student to basic ecological concepts through the study of microbial communities. Interactions at the microscopic and macroscopic levels will be discussed along with biogeochemical cycles. Bioremediation concepts will also be explored. Two one-hour lectures and one three-hour laboratory as needed. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: BIOL 1311, BIOL 1111, BIOL 1313, BIOL 1113, BIOL 2440, and BIOL 2420 or BIOL 3470, CHEM 2125 and CHEM 2325, and Junior standing.

BIOL 4374. Biostatistics. 3 Hours.

This course includes an introduction to statistical methods and their application to real biological problems. Topics include descriptive statistics, probability distributions, estimation, hypothesis testing, correlation and regression, and analysis of variance. Use of the computer in statistical analyses will also be stressed. Fall and Spring.

Prerequisite: (Minimum grade of C in MATH 1314 or MATH 1420 and 8 hours of advanced Biology) or (Junior standing, BIOL 3409, and C or better in MATH 1342, 1420, or 3379).

BIOL 4380. Medical Microbiology. 3 Hours.

An advanced study of the microorganisms that cause disease and of the disease processes with focus on bacteria and viruses. Emphasis will be placed on pathology, epidemiology and treatment/prevention of specific infectious diseases of medical importance. Spring. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Minimum grade of C in BIOL 3470 and Junior standing or consent of the instructor.

BIOL 4381. Advanced Molecular Biology. 3 Hours.

Students investigate key concepts in molecular biology and biochemical processes of prokaryotic and eukaryotic cells and their viruses. Topics include the detailed examination of genes and chromosomes, as well as the mechanisms of DNA replication, repair, and recombination. Additional topics may include regulation of gene expression, transcription, RNA processing, RNA interference, translation, protein folding and modification, as well as the relevant techniques used to study these biological processes.

Prerequisite: Minimum grade of a C in BIOL 3450, BIOL 3470, and CHEM 2323.

BIOL 4394. Biological Sciences Internship. 3 Hours.

A supervised, off-campus intern work experience in an approved area of the biological sciences with business, industry or government. This elective course provides the student with direct professional work experience in such areas as biotechnology, biomedical research, ecological assessment, wildlife biology, and science/nature education. Academic credit is based on a written technical report and an oral presentation. Writing enhanced. of advanced biology.

Prerequisite: Biology major and 6 hrs.

BIOL 4398. Senior Thesis I. 3 Hours.

In this class, a student works under close faculty supervision on a sustained research project to produce a thesis proposal. Project topics will vary based on advisor's research expertise. Students will gain hands on experience in conducting research and scientific writing. Successful completion of BIOL 4398 and BIOL 4399 may qualify the student to graduate with Academic Distinction (see the undergraduate catalog for additional requirements of the Academic Distinction Program).

Prerequisite: Senior standing and approval of the department chair.

BIOL 4399. Senior Thesis II. 3 Hours.

Students in this course work under close faculty supervision on a sustained research project to produce a thesis. Project topics will vary based on advisor's research expertise. Students will gain hands-on experience in conducting research and scientific writing. Successful completion of BIOL 4398 and BIOL 4399 may qualify the student to graduate with Academic Distinction (see the undergraduate catalog for additional requirements of the Academic Distinction Program).

Prerequisite: Minimum grade of B in BIOL 4398 and approval of the department chair.

BIOL 4410. General Entomology. 4 Hours.

Students examine insect morphology, taxonomy, development, and life histories. Collection techniques and the use of keys to identify insects are stressed.

Prerequisite: BIOL 2440 or BIOL 1406 and BIOL 1407.

BIOL 4430. Vertebrate Natural History. 4 Hours.

This course deals with the taxonomy, natural history, and ecology of vertebrates. Laboratories emphasize the identification of Texas vertebrate species and field techniques used in their study. Two-hour laboratory. Odd year, Spring.

Prerequisite: Minimum grade of C in BIOL 1411 and BIOL 1413 or BIOL 1406 and BIOL 1407.

BIOL 4460. Parasitology. 4 Hours.

Morphology, life cycles, physiological adaptations, evolution, and distribution of parasitic animals. Three-hour laboratory. Fall.

Prerequisite: Minimum grade of C in BIOL 2440 or BIOL 1406 and BIOL 1407.

BIOL 4470. Animal Behavior. 4 Hours.

A study of the mechanisms and functional explanations of behavior. Experimental approaches to addressing questions of behavior will be emphasized. Topics will include behavioral genetics, neuroethology, migration, habitat selection, foraging, communication, social behavior, reproductive strategies, and human sociobiology. Field studies and independent projects will be integral components of this course. Two-hour laboratory. Fall.

Prerequisite: Minimum grade of C in (BIOL 1411 and BIOL 1413) or (BIOL 1406 and BIOL 1407).

BIOL 4471. Invertebrate Zoology. 4 Hours.

This course will explore the diversity of invertebrate types morphologically, embryologically and physiologically. The ecological role of invertebrates will be emphasized. Two-hour laboratory. Even year, Fall.

Prerequisite: Minimum grade of C in BIOL 2440 or (BIOL 1406 and BIOL 1407).

BIOL 4480. Molecular Genetics. 4 Hours.

A hands-on study of the structure and function of molecules important for the Central Dogma of molecular biology, including DNA and protein, with emphasis on electrophoretic analysis and gene cloning. Three-hour laboratory. Fall, Spring.

Prerequisite: Minimum grade of C in BIOL 2440 or (BIOL 1406 and BIOL 1407), and BIOL 3450, BIOL 3470, CHEM 2125 and CHEM 2325.

BIOL 4481. Physiological Ecology. 4 Hours.

This course is a study of the functional processes of organisms within the context of ecological and evolutionary theory, focusing on mechanisms of organismal function, energetics, and the energetic consequences of homeostasis when function is influenced by the environment and other ecological and evolutionary processes. This course is designed for students preparing for graduate studies in integrative biology and does not meet the physiology requirement or recommendation for physiology of medical/dental or allied health programs. Three-hour laboratory. Spring. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Minimum grade of C in BIOL 3450, BIOL 3409, Concurrent enrollment allowed; Junior standing.

BIOL 4490. Cell Biology. 4 Hours.

A study of eukaryotic cell structure and function, including protein synthesis, membrane structure and function, intracellular trafficking, cell communication, cell motility, mitosis, and cell cycle control, with emphasis on the use of model organisms. Three-hour laboratory. Fall.

Prerequisite: Minimum grade of C in BIOL 2440 or BIOL 1406 and BIOL 1407, and BIOL 3450, BIOL 3470, CHEM 2125, and CHEM 2325.

BIOL 4493. Endocrinology. 4 Hours.

This course is designed to familiarize the student with the structure, development, comparative anatomy, and physiology of the endocrine system. Two-hour laboratory. Spring, or as needed. Demonstrated college-level readiness in reading, writing, and math.

Prerequisite: Minimum grade of C in BIOL 3450 and Junior standing.

Career and Technology (CATM)

CATM 4360. Work-Based Mentorship. 3 Hours.

Designed to provide students with the opportunity to gain specialized work-based experiences. Credit 1-9. May be repeated or taken concurrently to a maximum of 9 hours.

Business Analysis (BANA)

BANA 2372. Business Analysis. 3 Hours. [TCCN: BUSI 2305]

An introduction to the use of business statistics. Topics include: data visualization, descriptive statistics, probability, discrete and continuous distributions, statistical modeling, sampling distributions, and statistical inference.

Prerequisite: MATH 1314 or MATH 1324 or MATH 1410 or MATH 1420.

BANA 3363. Inter Business Analysis. 3 Hours.

This course is a continuation of BANA 2372 and is designed to introduce the use of statistics as a business tool in the face of incomplete knowledge. Students will learn the following topics in this course: estimation, hypothesis testing, analysis of variance, goodness-of-fit measures, correlation, simple and multiple regression.

Prerequisite: BANA 2372 or MATH 1342.

BANA 4080. Independent Study. 3 Hours.

The credit in this course varies according to the work performed. The student may pursue special studies for which a special course is not organized. Variable Credit (1 to 3).

Prerequisite: Departmental approval.

BANA 4365. Introduction To Business Forecasting & Economics. 3 Hours.

In this course, students will apply statistical methods for business and economic forecasting and for hypothesis testing, estimation, and analyzing economic data. Course Equivalents: ECON 4365

Prerequisite: 42 completed hours and ECON 2301 and ECON 2302 and BANA 3363 or MATH/STAT 3379.

BANA 4373. Advanced Business Analytics for Economics and Business. 3 Hours.

Students learn how to analyze business data using advanced statistical methods, tools and software. Topics include data preparation, data visualization, and deployment of automated analytics pipelines using the appropriate computer software.

Prerequisite: BANA 2372 or MATH 1342.

Business Administration (BUAD)

BUAD 1211. PGA/PGM Professional Development Seminar. 2 Hours.

This course is designed to guide students through the completion of the Level 1 materials of the PGA of America Professional Golf Management Program. This course is only available to students enrolled in the PGA/PGM program. The course may be repeated for a maximum of 8 academic credit hours. Course Equivalents: BUAD 1011, BUAD 1111 .

BUAD 1301. Introduction to Business Careers. 3 Hours. [TCCN: BUSI 1301]

Students are provided a survey of all the major business disciplines with an emphasis on helping define career objectives and supporting academic interest areas as well as an overview of what is involved in accounting, marketing, management, legal aspects of business, economics and finance. This course is an ideal choice for any students wanting to learn of opportunities in business and how to pursue them. The course is not open to business majors with junior or senior standing.

BUAD 2189. Pga/Pgm Internship. 1 Hour.

A course is designed to provide the student with an initial opportunity to apply academic skills in a practical work environment as required to complete the PGA/PGM Program. (See Internship Coordinator prior to enrolling.) All internships must be approved in advance in order to receive credit. The course may be repeated for a maximum of 2 hours of academic credit and is only available to students enrolled in PGA/PGM program.

BUAD 2321. Design and Presentation of Business Projects. 3 Hours.

The focus of this course is designing and delivering effective business presentations. Topics may include planning, developing, organizing, and delivering business presentations. Students will design/develop effective visual aids that will be used in their business presentations using computer-assisted software.

Prerequisite: 30 hours.

BUAD 3189. Pga/Pgm Internship III. 1 Hour.

A course designed to provide the student with additional opportunity to apply academic skills in a practical work environment as required to complete the PGA/PGM Program. (See Internship Coordinator prior to enrolling.) All internships must be approved in advance in order to receive credit. The course is only available to students enrolled in PGA/PGM program.

BUAD 3269. Advanced PGA/PGM Professional Development Seminar. 2 Hours.

This course is designed to guide students through the completion of the Levels 2 and 3 materials of the PGA of America's Professional Golf Management Program. This course is only available to students enrolled in the PGA/PGM program. The course may be repeated for a maximum of 6 academic credit hours. Course Equivalents: BUAD 3069, BUAD 3169 .

BUAD 3301. Business Legal Environment. 3 Hours.

Students cover legal environment from a "preventive law", practical perspective. Specific subjects may include: Litigation, Alternative Dispute Resolution, Torts, Business Organizations, Real and Personal Property Law. Students are provide an introduction to Environmental Law, Consumer Law, Securities Law, Human Resources Management Law (Labor Law), and Marketing Law (Anti-Trust). Course Equivalents: BUAD 2301 .

BUAD 3335. Business Communication. 3 Hours.

Students develop skills required to use communications as a business tool and a personal skill with emphasis on the logical development of routine, written messages, and reports.

Prerequisite: ENGL 1302 and 42 hours.

BUAD 3336. Successful Workplace Relations. 3 Hours.

This course is designed to provide the foundation for the development of successful workplace relationships. The course includes an overview of social and emotional intelligence skills that are most commonly used by successful business professionals. Skills are introduced for managing personal ethics, conflict, and trust, which are essential for managing and leading in the business environment. Credit: 3. Course Equivalents: BUAD 4348 .

BUAD 3337. Artificial Intelligence for Business Communication. 3 Hours.

Students apply artificial intelligence (AI) tools for communicating in business situations and explore the ethical and practical considerations of using these technologies.

Prerequisite: BUAD 3335 and 42 Credit Hours.

BUAD 3338. Entrepreneurial Law. 3 Hours.

Students examine the major legal issues confronting entrepreneurs and owners of small businesses. The course presents an overview of the legal issues, strategies and documents required to start a new business, raise capital and manage legal and civil liability. An assortment of legal documents, such as employment contracts, sales contracts, insurance contracts, and shareholder agreements will be examined. Procedures to protect intellectual property will also be addressed.

BUAD 3340. Visualized Messaging in the Workplace. 3 Hours.

Students learn and apply the principles and conventions of visual design and data visualization appropriate for business settings and use that knowledge to create workplace-appropriate messages that include essential visual elements. Students develop the skills to select and visually design relevant information and data to compose compelling, ethical business messages for internal and external decision-makers.

Prerequisite: MGIS 1305 OR CSTE 1330.

BUAD 3345. Entrepreneurship I - Startup. 3 Hours.

Students are provided an overview of theories of entrepreneurship, the process of creating wealth, and public policies that encourage new venture formation and economic growth.

BUAD 3355. Business Law. 3 Hours.

The focus of this course is on areas of modern commercial law as needed by business professionals in conducting business transactions in buying and selling goods and services. Common Law Contracts and negotiation strategies are presented. Students exam the Uniform Commercial Code includes Sales Law, Leasing, Commercial Paper - Negotiable Instruments, Commercial Storage and Distribution of Goods, and Transfer of Securities. Creditor's rights and U.S. Federal Bankruptcy Code are also covered.

BUAD 3357. Financial Compliance and Regulations. 3 Hours.

Students explore current financial and banking industry regulations critical to effective financial and banking management with an emphasis placed on how to create a compliance program that is in accordance with both state and federal regulatory agencies.

Prerequisite: Junior standing.

BUAD 3360. Human Resources Management Law. 3 Hours.

This course is designed for students who are seeking management positions and human resource management specialists. Students study employment law with particular emphasis on Federal Laws on discrimination, compensation and promotion issues, worker safety, and employment benefits. Taught from a "preventive law" perspective, students acquire skills needed to keep abreast of the changing legal environment for employers and employees. Sexual harassment, affirmative action, workers compensation, worker safety and practical overview of employment manuals and procedures provide valuable information for future employees, managers or business owners.

Prerequisite: 42 credit hours.

BUAD 3365. Real Estate Law. 3 Hours.

Students examine the legal aspects of real estate, including the legal principles and legal instruments used in real estate transactions.

Prerequisite: 42 credit hours.

BUAD 3370. Cyberlaw & E-Commerce Regulation. 3 Hours.

Students explore the legal aspects and regulation of content creation, social and digital marketing, e-commerce, intellectual property, online communication, digital privacy, and legal obligations and liability stemming from cybersecurity risk and compliance. Students apply these concepts to the complete business life cycle - from idea to operation to dissolution - while examining the legal and ethical issues affecting the online presence of businesses.

Prerequisite: 42 Credit Hours.

BUAD 3375. Entrepreneurial Sales. 3 Hours.

In this dynamic course, students delve into the practical and tactical aspects of a business founder - selling their vision to investors, prospective employees, and strategic partners within a sophisticated marketplace. Students engage in project-driven fieldwork both on and off campus, simulating the uncertainty inherent in entrepreneurship. Students think creatively, collaborate, and hone their sales prowess.

Prerequisite: 42 Credit Hours.

BUAD 3380. Ethics for Business Executives. 3 Hours.

Students examine ethical problems in business and the foundations for decisions involving ethical issues. Students identify ethical decision making with regard to fiduciary obligations, use of corporate resources, organizational culture, insider trading prohibitions, legal compliance obligations, whistleblowers, plant closures and leveraged buyouts, company loyalty and conflicts of interest as they impact the decision process in the functional areas of business.

Prerequisite: 42 Credit Hours.

BUAD 4080. Independent Study. 1-3 Hours.

An opportunity for the student to design a course, perhaps on a topic not offered or to more deeply investigate a subject of personal interest. A faculty member will be teamed up on a one-to-one basis to customize a project. Variable Credit (1 to 3). Course Equivalents: BUAD 4380

Prerequisite: Consent of the department chair.

BUAD 4085. Special Topic. 1-3 Hours.

This course of faculty-led study is designed to provide undergraduate students exposure to new General Business topics and concepts in a course setting. Variable Credit (1 to 3). Course Equivalents: BUAD 4385 .

BUAD 4289. Pga/Pgm Internship IV. 2 Hours.

A course designed to provide the student with an opportunity to apply advanced academic skills in a practical work environment as required to complete the PGA/PGM Program. (See Internship Coordinator prior to enrolling.) The course is only available to students enrolled in PGA/PGM program.

BUAD 4300. Social Entrepreneurship: A Practice-Based Approach. 3 Hours.

Students examine the diverse field of social entrepreneurship, where individuals and organizations use the marketplace to solve social problems in a creative and sustainable manner. Students practice the skills and mindset needed to succeed as a social entrepreneur and to impact the lives of others.

Prerequisite: BUAD 3345 and 42 Credit Hours.

BUAD 4310. Securities Regulation. 3 Hours.

Students examine the federal and state securities laws, including the process by which capital is raised to fund a business and the disclosure requirements to which issuers of securities are subject. Topics include initial public offerings, secondary offerings, crowdsourcing, angel funding, regulatory enforcement, insider trading and Texas Blue Sky laws.

BUAD 4321. Advanced Business Project Design and Presentation. 3 Hours.

Students deepen their expertise in strategic business communication as it relates to design and delivery. Students combine theoretical frameworks and practical application to create sophisticated communication strategies and projects; topics may include, but are not limited to, personal professional branding, podcasting, and training materials. Students apply interpersonal skills necessary for leading, managing, and collaborating effectively in professional environments. Credit Hours: 3.

Prerequisite: BUAD 2321 or 60 credit hours.

BUAD 4325. Negotiation in Business. 3 Hours.

The focus of this course is effective business negotiation. Students plan and execute negotiations in and outside the classroom. The course includes an overview of theoretical and tactical skills used to make professional business negotiations, and other elements that are essential for managing and leading in the business environment.

Prerequisite: None.

BUAD 4335. Intercultural Business Communication. 3 Hours.

This course prepares students for the complex leadership roles and communication tasks they will encounter in an increasingly multicultural, global work environment. The course familiarizes students with the cultural impacts on global business, managing culturally diverse work forces, transitions, relocations, diversity and performance; and explores cultural specifics of various countries.

BUAD 4340. International Business Law. 3 Hours.

An overview of the international legal environment from a commercial and entrepreneurial perspective. This course examines the implications of international laws on foreign investment, intellectual property, sales contracts, money and banking, financing of enterprises, labor regulation and hiring, taxation, and dispute settlement.

BUAD 4345. Entrepreneurship II - Growth. 3 Hours.

This course covers the growth and harvest/exit phases of an entrepreneurial business. It focuses on the challenges faced by such businesses as they move beyond startup. Students learn how to create value by growing a profitable business, and how to harvest the value through an appropriate exit strategy.

Prerequisite: BUAD 3345.

BUAD 4348. Entrepreneurship III - Cases. 3 Hours.

Designed for the aspiring entrepreneur or for those who are curious as to how wealth is created in a free market economy, this course provides a practical experience of how to evaluate business opportunities, how ventures are started with little or no capital, how wealth is realized, and how to develop innovative entrepreneurial skills and planning techniques to minimize the cost of experience. By the end of the course, students develop their own Personal Entrepreneurs Plan useful in focusing the direction of their personal careers. Course Equivalents: BUAD 3336

Prerequisite: BUAD 3345.

BUAD 4389. Internship. 3 Hours.

A course designed to provide the student with an opportunity to apply academic skills in a practical work environment. (See Internship Coordinator prior to enrolling.) All internships must be approved in advance in order to receive credit. The course may be repeated one time for a maximum of 6 hours.

Chemistry (CHEM)

CHEM 1105. Chemistry in Context Lab. 1 Hour. [TCCN: CHEM 1105]

Laboratory for CHEM 1305. Concurrent enrollment in CHEM 1305 is recommended.

CHEM 1305. Applying Chemistry to Society. 3 Hours. [TCCN: CHEM 1305]

Chemical phenomena, concepts and principles are explored within the context of the role of science and technology in society. A life-centered approach rather than a subject-centered one has been employed in the development of course curriculum. This course is specifically designed to satisfy the natural science core requirement of students who are not specializing in science. Concurrent enrollment in CHEM 1105 is recommended.

CHEM 1406. Inorganic & Environmental Chemistry. 4 Hours. [TCCN: CHEM 1406]

The elements and their compounds are considered from a non-technical standpoint with emphasis placed on more familiar materials. Two-hour laboratory. This course is for non-science majors. Course Equivalents: CHEM 1306 .

CHEM 1407. Introduction to Organic and Biochemistry. 4 Hours. [TCCN: CHEM 1407]

An orientation in organic chemistry is given in the first part of the course to allow treatment of the chemistry of nutrition and other biochemical aspects given in the last part. Two-hour laboratory. This course is for non-science majors. Course Equivalents: CHEM 1307

Prerequisite: CHEM 1406, CHEM 1411, or completion of a high school chemistry course.

CHEM 1411. General Chemistry I. 4 Hours. [TCCN: CHEM 1411]

The following topics are studied: chemical changes and laws governing them; nomenclature; introduction to thermodynamics; reactions involving oxygen, hydrogen, acids, bases, and salts; ionization; metathesis; the periodic table, and atomic and molecular structure. Three-hour laboratory. This course is for chemistry and other science majors. Fall, Spring, Summer I. Course Equivalents: CHEM 1311

Prerequisite: Minimum grade of C in MATH 1410, MATH 1314, MATH 1324 or MATH 2384 or equivalent, or a minimum Math score of 23 on the ACT or 560 on the SAT (580 on new SAT) or equivalent.

CHEM 1412. General Chemistry II. 4 Hours. [TCCN: CHEM 1412]

Descriptive chemistry, gas laws, equilibria, kinetics, thermodynamics, electrochemistry, and oxidation-reduction reactions are presented. Three-hour laboratory. Fall, Spring, Summer II. Course Equivalents: CHEM 1312

Prerequisite: A minimum grade of C in CHEM 1411.

CHEM 2123. Organic Chemistry I: Lab. 1 Hour. [TCCN: CHEM 2123]

Laboratory for CHEM 2323. Fall, Spring, Summer I.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, and prior credit for or concurrent enrollment in CHEM 2323.

CHEM 2125. Organic Chemistry II: Lab. 1 Hour. [TCCN: CHEM 2125]

Laboratory for CHEM 2325. Fall, Spring, Summer II.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2123, CHEM 2323, and prior credit for or concurrent enrollment in CHEM 2325.

CHEM 2323. Organic Chemistry I: Lecture. 3 Hours. [TCCN: CHEM 2323]

A study of chemical bonding and structure of organic molecules is made. Functional group reactions and syntheses are emphasized. Reaction mechanisms, nomenclature and isomerism are studied. Fall, Spring, Summer I.

Prerequisite: A minimum grade of C in CHEM 1411 and CHEM 1412.

CHEM 2325. Organic Chemistry II: Lecture. 3 Hours. [TCCN: CHEM 2325]

The general plan of CHEM 2323 is continued. Fall, Spring, Summer II.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, and CHEM 2123.

CHEM 2401. Quantitative Analysis. 4 Hours.

The fundamental principles of quantitative analysis are emphasized. Acid-base, complexometric, precipitation, and redox titrations, solution equilibria and spectrophotometric analysis are discussed. Laboratory exercises involve all types of volumetric procedures and colorimetric analysis. Four-hour laboratory. Fall, Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412.

CHEM 3339. Biochemistry II. 3 Hours.

This course is a study of the bioenergetics associated with the metabolic pathways and processes. The metabolism of carbohydrates, lipids, proteins, and nucleic acids; the interrelationship of the metabolic pathways; and the regulation of metabolism are emphasized. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125 and CHEM 3438.

CHEM 3361. Discoveries In Chemistry and Textiles. 3 Hours.

Attention will be focused on early scientists, the times in which they worked, important aspects of their efforts, and how their research continues to impact us today. Lectures will occur in the geographical areas where their work took place. Odd years during the Spring/Summer I break. Course Equivalents: FORS 3350

Prerequisite: CHEM 1406 or CHEM 1411, junior standing, and permission of the instructor.

CHEM 3367. Introduction to Inorganic Chemistry. 3 Hours.

General principles of inorganic chemistry are presented with a descriptive and practical rather than mathematical approach. Periodic relationships of elements and bonding, reactions and synthesis of inorganic compounds, acid-base chemistry are studied. Fall.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323.

CHEM 3368. Environmental Chemistry. 3 Hours.

The chemical principles underlying the effects of air, water, and soil pollution are covered. Specific attention is paid to gas phase radical reactions, light absorption characteristics of atmospheric components, solution chemistry of fresh and salt water systems, and the mobility and chemistry of metal components of soil systems. Spring even years.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2401, CHEM 2323 and CHEM 2325 (or concurrent enrollment in CHEM 2325).

CHEM 3438. Biochemistry I. 4 Hours.

The chemistry and functions of carbohydrates, lipids, proteins, enzymes, nucleic acids and vitamins; enzyme kinetics; the processes of and mechanisms of digestion and absorption; and biological buffers are studied. Four-hour laboratory. Fall, Spring, Summer 10-week.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, and prior credit or concurrent enrollment in CHEM 2125.

CHEM 4001. Directed Study In Chemistry. 1 Hour.

A directed study for undergraduates. This course is designed to allow independent study by advanced students. Instruction is on an individual basis. Variable Credit (1-3).

Prerequisite: A minimum grade of C in CHEM 2325 and approval of department chair.

CHEM 4088. Special Topics. 1-4 Hours.

Students explore an identified area of chemistry not covered in detail by other upper-level courses. This course may be repeated for credit if the topics vary. Variable Credit (1 to 4).

Prerequisite: Approval of department chair.

CHEM 4100. Chemical Literature Seminar. 1 Hour.

Methods of searching the literature in chemistry are presented. Emphasis is placed on the use of Chemical Abstracts, Beilstein, chemical patent literature, journals, and reference collections in the several specialties of chemistry.

Prerequisite: Prior credit or concurrent enrollment in CHEM 4440.

CHEM 4260. Advanced Integrated Laboratory. 2 Hours.

This course will involve in-depth experiments that require the use of sophisticated synthetic and analytical procedures in the areas of organic, inorganic or analytical chemistry. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 2401, CHEM 4448, and CHEM 4440.

CHEM 4327. Polymer Chemistry. 3 Hours.

Students examine reactions, synthesis, and mechanisms of polymerization processes as well as molecular weight distributions and structure/property relationships of polymers.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325 and CHEM 2125.

CHEM 4367. Advanced Inorganic Chemistry. 3 Hours.

Properties of atoms and ions, bonding theory and structure, acid-base theory, reactions of inorganic compounds, nonaqueous solvents, and coordination chemistry are studied. Emphasis is on the underlying theoretical concepts involved. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4448.

CHEM 4380. Forensic Chemistry. 3 Hours.

This is a one semester course focused on surveying important aspects of chemistry to forensic inquiries. Focus will be on the validity of results. Techniques and methods for selecting proper techniques to answer various questions will be discussed. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4440 and CHEM 4367 (or concurrent enrollment in CHEM 4367); MATH 1420.

CHEM 4395. Undergraduate Research In Chemistry. 3 Hours.

This course acquaints the senior student with techniques used in simple research problems.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, and CHEM 2125, or consent of the Chair of the Department of Chemistry.

CHEM 4440. Instrumental Analytical Chemistry. 4 Hours.

Spectrophotometry, separation techniques and mass spectrometry are discussed. Specific topics include the computer's use in the modern laboratory, ultraviolet and visible absorption, atomic absorption, flame emission, and inductively coupled plasma spectroscopy, infrared absorption, and gas and liquid chromatography. Instruments for these techniques are used in the laboratory work. Four-hour laboratory. Fall.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2325, CHEM 2401, and CHEM 4448.

CHEM 4441. Methods for Environmental and Industrial Analyses. 4 Hours.

Students covers the philosophy of modern instrumental methods used for environmental and industrial analyses. The topics to be covered may include quality control and quality assurance good laboratory practices, waste minimization and elimination, safe laboratory operation, ISO standards, EPA methodology, and statistical data analysis. Spring. Spring.

Prerequisite: A minimum grade of C in CHEM 2401, CHEM 2323 and CHEM 2325, and CHEM 3368.

CHEM 4442. Air Quality. 4 Hours.

An in-depth study of the sources of air pollution is made. Sampling procedures and the chemical analyses required for identification of pollutants are studied. Control methods for the restriction of air pollution are outlined. Four-hour laboratory. Spring odd years.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2401, CHEM 2323 and CHEM 2325.

CHEM 4443. Structural Spectroscopic Methods. 4 Hours.

This course is a survey of the spectroscopic and spectrometric methods for elucidation of structural information for chemical compounds with emphasis on the structural identification of unknowns. The methods of ultraviolet-visible spectrophotometry, Fourier-transform infrared spectroscopy, mass spectrometry, and both one- and two-dimensional nuclear magnetic resonance spectroscopy will be covered. Their relative strengths, complementary nature, and utility will be discussed. The focus will be the determination of chemical structures by spectroscopic/spectrometric methods. Spring even years. Spring even years.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125.

CHEM 4448. Physical Chemistry I. 4 Hours.

The foundations of thermodynamics and spectroscopic methods (radio-frequency, microwave, infrared, Raman, UV-visible, and X-ray) are developed from first principles with an atomistic point of view. Four-hour laboratory. Fall.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, MATH 1420, MATH 1430 and one year of physics.

CHEM 4449. Physical Chemistry II. 4 Hours.

The developments of thermochemistry, phase diagrams, equilibria, and kinetics are traced from the statistical mechanics of quantum states to the macroscopic observations of thermodynamics. Four-hour laboratory. Spring.

Prerequisite: A minimum grade of C in CHEM 1411, CHEM 1412, CHEM 2323, CHEM 2123, CHEM 2325, CHEM 2125, CHEM 4448.

Clarinet (CLAR)

CLAR 1101. Secondary Performances-Clarinet. 1 Hour.

Students study techniques and musicality related to clarinet in weekly individualized private instruction. Students admitted as a Clarinet primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

CLAR 1201. Individual Performances - Clarinet. 2 Hours.

The course consists of individualized private instruction on the clarinet. Instruction focuses on technique and musicality. Students will also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

CLAR 3201. Individual Performances - Clarinet. 2 Hours.

The course consists of advanced individualized private instruction on the clarinet. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

CLAR 3202. Applied Clarinet with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the clarinet. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital.

Prerequisite: Student's must have instructor permission.

Composition (COMP)

COMP 1101. Applied Composition I. 1 Hour.

The course is designed primarily for the music major interested in developing their compositional skills. It presumes no former background in composition but requires good musical training. Credit 1

Prerequisite: Students must have instructor permission.

COMP 3301. Applied Composition II. 3 Hours.

The course is designed primarily for the music major interested in developing their compositional skills. The course presumes a previous exposure to composition and presents the necessary tools to expand and refine the student's skills. Credit 3.

Communication Studies (COMS)

COMS 1361. Public Speaking. 3 Hours. [TCCN: SPCH 1315]

Students apply the research, composition, organization, and delivery of informative and persuasive speeches for various purposes and occasions. Topics may include strategies for reducing speaker apprehension and audience analysis.

COMS 2331. Introduction - Communication Theory & Research. 3 Hours.

Students study theories and research in the field of communication with an emphasis on interpersonal and family communication. Students prepare reviews of literature as well as scholarly abstracts.

COMS 2382. Communication for Business & the Professions. 3 Hours. [TCCN: SPCH 1321]

Students examine communication theories and research with the goal of developing skills in settings such as interviewing, group decision-making, speech preparation, and presentation. Topics may include interpersonal communication, leadership strategies, listening, and non-verbal communication. Not for COMS majors or minors. Non-Minors only. Non-Specializations only.

Prerequisite: Non-Majors only.

COMS 2386. Interpersonal Communication. 3 Hours. [TCCN: SPCH 1318]

Students examine theory and research in one-to-one communication in relationships. Topics may include perception, listening, conflict management, and the development and maintenance of relationships.

COMS 2393. Computer Mediated Communication. 3 Hours.

Students examine how computers mediate communication issues, such as interpersonal relationships, social networking, information literacy, political agendas, and entertainment. Course Equivalents: COMS 3340 .

COMS 3330. Communication in Sport. 3 Hours.

Students analyze the field of sport communication research. Students explore sport issues across various communication contexts. Students apply theory and research-based approaches to effectively communicate sport-related issues. Students also examine ethical considerations and the role of sport in culture.

COMS 3340. Communication, Culture, and Technology. 3 Hours.

Students examine how computers mediate communication issues, such as interpersonal relationships, social networking, information literacy, political agendas, and entertainment. Course Equivalents: COMS 2393 .

COMS 3341. Digital Communication Literacy. 3 Hours.

Students analyze strategies of self-presentation and impression management and apply theory and research-based approaches to effectively communicate messages through various social media platforms. Students gain practical knowledge in creating communication content for various audiences. Students implement these strategies on their own social media platforms as they learn to become more literate information consumers.

COMS 3350. Communication and Pop Culture. 3 Hours.

Students identify messages and meanings contained in popular culture, and examine how messages from music, television, films, celebrities, and advertising reflect and create social norms.

COMS 3360. Interpreting Visual Images. 3 Hours.

Students examine messages found in visual communication and analyze visual messages using theoretical constructs. Topics may include the persuasive impact of those visual messages.

COMS 3365. Humor in Communication. 3 Hours.

Students examine how humor functions across a variety of contexts, including interpersonal, organizational, public, and political. In the process, students apply theories and research about humor in communication.

Prerequisite: Junior standing or consent of instructor.

COMS 3370. Intercultural Communication. 3 Hours.

Students analyze the theory, research, and practice of communicating within and across cultures with an emphasis on application to the student's own intercultural communication. Topics may include a comparison of various cultures, culture shock, racism, and prejudice.

COMS 3371. Conflict, Negotiation, and Resolution. 3 Hours.

Students investigate the complexities of conflict in order to understand forces that make conflict challenging and to develop skills for examining and managing conflict more effectively in a variety of close relationship contexts.

COMS 3372. Interpersonal Health Communication. 3 Hours.

Students examine patient and physician communication skills. Topics may include communicating social support for those with serious illnesses, survivorship, identity issues, media influence, and e-health across a wide range of communication contexts. Course Equivalents: COMS 3391 .

COMS 3373. Environmental Communication. 3 Hours.

Students learn theory, research and practice with regard to environment and communication from both international and multi-disciplinary perspectives. Students will also learn how to identify environmental issues and use appropriate communication strategies to respond to/solve those issues. The course uses a lecture/discussion format. Course Equivalents: COMS 3393 .

COMS 3374. Persuasion. 3 Hours.

Students assess the principles of attitude and behavior change as they apply to the speaker, political campaigns, and social movements. Course Equivalents: COMS 3382 .

COMS 3375. Strategic Organizational Communication. 3 Hours.

Students analyze the impact of human communication technology on organizations of all types, including political, social, religious, and educational institutions. In the process, students may examine how communication technologies shape organizations, channel power, manage crisis, establish leadership, and redefine privacy and freedom of expression. Course Equivalents: COMS 3390

Prerequisite: Sophomore Standing.

COMS 3379. Freedom of Speech and Civic Communication. 3 Hours.

Students examine a broad range of free speech issues, including blasphemy, defamation, popular culture, political speech, privacy, public forums, symbolic speech, threats, and restrictions on free speech. The course is structured to expand the knowledge of the student about freedom of speech and to enable them to be more engaged citizens in their communities. To this end, the course not only covers the areas that the right to free speech encompasses, it also explores instances in which freedom of speech protections do not apply.

COMS 3382. Persuasion. 3 Hours.

Students assess the principles of attitude and behavior change as they apply to the speaker, political campaigns, and social movements. Course Equivalents: COMS 3374 .

COMS 3383. Small Group Communication. 3 Hours.

Students examine the theories and practices of interaction, leadership, and problem-solving in formal and informal small group settings.

COMS 3385. Community Applied Communication. 3 Hours.

Students improve research skills, critical thinking, leadership, individual and group communication skills. This is achieved through lecture and community interaction. Students work together to examine their community for need, investigate how to meet that need through the lens of established organizations, and present their findings. This is a capstone course. Course Equivalents: COMS 2385 .

COMS 3386. Learning to Listen: A Key Communication Competency. 3 Hours.

Students examine significance and complexity of the many different types of listening across various social, professional, and interpersonal contexts. Students use theory and research-based approaches to tackle issues surrounding listening as a cognitive process, a social and relational skill, and professional competency. They also examine emerging areas, such as mediated listening in the digital age.

Prerequisite: COMS 2386.

COMS 3390. Human Communication In Virtual Organizations. 3 Hours.

Students analyze the impact of human communication technology on organizations of all types, including political, social, religious, and educational institutions. In the process, students may examine how communication technologies shape organizations, channel power, manage crisis, establish leadership, and redefine privacy and freedom of expression. Course Equivalents: COMS 3375

Prerequisite: Sophomore standing.

COMS 3391. Interpersonal Health Communication. 3 Hours.

Students examine patient and physician communication skills. Topics may include communicating social support for those with serious illnesses, survivorship, identity issues, media influence, and e-health across a wide range of communication contexts. Course Equivalents: COMS 3372 .

COMS 3392. Risk Communication. 3 Hours.

Students illustrate the history of risk communication research. Students examine how to effectively communicate risks across various contexts including interpersonal communication, organizational communication, and mass communication. Students apply theory and research-based approaches to effectively communicate risks including health risks, environmental risks, and technological risks.

COMS 3393. Environmental Communication. 3 Hours.

Students learn theory, research and practice with regard to environment and communication from both international and multi-disciplinary perspectives. Students will also learn how to identify environmental issues and use appropriate communication strategies to respond to/solve those issues. The course uses a lecture/discussion format. Course Equivalents: COMS 3373 .

COMS 4091. Independent Study in Communication Studies. 1-3 Hours.

Students pursue particular problems or issues beyond the limits of current course offerings. Students may receive Academic Distinction credit for this course. See Academic Distinction Program in this catalog. May be repeated for credit. Senior standing. Variable Credit (1 to 3). Senior standing. Course Equivalents: COMS 4391

Prerequisite: 12 hours COMS completed and approval of the Chair.

COMS 4365. Nonverbal Communication. 3 Hours.

Students study systems of nonverbal communication and their effective use. Topics may include body language, vocalic, facial, and spatial communication. Students apply current theory and research in nonverbal communication to their own communication.

COMS 4366. Deceptive Communication. 3 Hours.

Students assess lying and other forms of deception in a variety of communication contexts, including interpersonal, public, and legal. Students gain empirical, ethical, and critical understandings of deception including their own deception and that of others.

COMS 4378. Internship In Communication Studies. 3 Hours.

Students apply skills and theories learned in the classroom to on-the-job situations. Internships may occur with public relations and governmental agencies, businesses, and non-profit organizations.

Prerequisite: At least junior standing, 12 COMS hours completed, and approval of the Chair.

COMS 4381. Communication Theory. 3 Hours.

Students analyze and apply contemporary theories of communication.

Prerequisite: 12 hours COMS completed.

COMS 4386. Family Communication. 3 Hours.

Students examine interpersonal communication within families. Topics may include family conflict, family structure, culture and the family, and family stories.

Prerequisite: COMS 2386.

COMS 4387. Relationship Communication. 3 Hours.

Students explore communication as it occurs in various types of personal relationships with a special focus on romantic relationships and close friendships. Topics may include long-distance and mediated relationship forms. Students work to enhance the quality of communication and satisfaction within relationships.

Prerequisite: Sophomore standing.

COMS 4392. Seminar In Communication Studies. 3 Hours.

Students explore new and special interest areas of communication scholarship offered on a rotating basis.

Prerequisite: Sophomore standing.

Computer Science (COSC)

COSC 1436. Programming Fundamentals I. 4 Hours. [TCCN: COSC 1436]

This course is an introduction to programming. Topics include fundamental concepts of computer programming and software development methodology, including data types, control structures, functions, arrays, and the mechanics of programming running, testing, and debugging. The development of procedures and the writing and testing of programs to implement them are emphasized. This course includes a 2-hour lab-based component. This course assumes a general familiarity with computers.

Prerequisite: Grade of C or better in MATH 1410, MATH 1314, or MATH 1316, basic keyboarding, and PC skills.

COSC 1437. Programming Fundamentals II. 4 Hours. [TCCN: COSC 1437]

This course is a continuation of COSC 1436 and focuses on design, implementation, and re-usability of computer programs with abstract data types. Fundamentals of object-oriented design and programming paradigms are also emphasized. Course contents may include basic abstract data types such as List, Stack, and Queue, introduction to algorithm analysis, searching and sorting, graph-related abstract data types. A two-hour lab-based component is required for students to practice computer programming in more than one programming environment.

Prerequisite: COSC 1436.

COSC 2327. Introduction to Computer Networks. 3 Hours.

Students are introduced to installation, usage, and management of computer hardware and operating systems for business. Topics may include scripting, macros, intelligent agents. Installation and management of networks, the Internet, and communications software is covered.

Prerequisite: COSC 1436.

COSC 2329. Computer Organization & Machine Language. 3 Hours. [TCCN: COSC 2425]

Students are introduced to instruction set architectures, emphasizing central processor organization and operations. Specific topics may include data representations, register architectures, addressing modes, the fetch/ execute cycle; interrupts, subprogram calls, I/O services, digital logic gates and basic Boolean algebra, and sequential and combinational circuits. Programs are assigned in a representative assembly language to explore these areas.

Prerequisite: COSC 1437 with a C or better (may be taken concurrently).

COSC 2340. Special Topics in Computer Science. 3 Hours.

Topics and courses are selected to suit individual needs of students. The course may be repeated for additional credit as long as a different topic is covered.

Prerequisite: COSC 1437.

COSC 2347. Special Topics/Programming. 3 Hours.

Students engage in an in-depth study of a programming language used to implement information systems. Real time components, visual techniques, and artificial intelligence are utilized as appropriate. This course may be repeated for credit with the approval of the undergraduate advisor. A different language must be covered to receive approval for repeat credit.

Prerequisite: COSC 1437.

COSC 3312. Numerical Methods. 3 Hours.

Student study the concepts underlying the use of the computer for interpolation, approximations, solutions of equations and the solution of both linear and nonlinear systems equations. Mathematical software and/or user written programs are utilized. Also offered as MATH 3394.

Prerequisite: COSC 1436 and MATH 1430 or consent of instructor.

COSC 3318. Data Base Management Systems. 3 Hours.

Students explore the design of information systems using database software and query language/programming interfaces. Data warehouse concepts are introduced. Legacy systems, LAN and distributed systems based systems are used to give the student hands-on experience in systems development.

Prerequisite: COSC 1437 .

COSC 3319. Data Structures and Algorithms. 3 Hours.

Student are introduced to such topics as orthogonal lists, strings, arrays, linked lists, multilinked structures, indexed and direct files, and generalized data management and database management systems.

Prerequisite: COSC 1437.

COSC 3321. Digital System Design. 3 Hours.

This course is an introduction to Boolean Algebra and graph theory with emphasis on their applications in the design of digital computer software and hardware. Logic systems are designed and analyzed.

COSC 3327. Computer Architecture. 3 Hours.

COSC 3327. Computer Architecture. 3 Hours. This course is a continuation of COSC 2329, exploring computer organization and architectures in more depth and breadth. Specific topics may include milestones in the philosophy of computer design, Karnaugh maps for circuit minimization, memory types and organization, caching, pipelining, micro-architectures, parallel architectures, I/O devices, buses and bus protocols. Throughout the course, physical and performance considerations are stressed along with the hardware's interaction with operating systems.

Prerequisite: COSC 2329.

COSC 3331. Human-Computer Interaction. 3 Hours.

Students are provided a comprehensive introduction to the principles and techniques of human-computer interaction. Students examine the event-driven model through the development of applications utilizing graphical design environments and the use of rapid application prototyping to explore a variety of techniques for HCI, particularly in relation to mobile and other non-traditional devices.

Prerequisite: COSC 1437.

COSC 3332. Game Programming and Design. 3 Hours.

(Prior Course ID: CS 378); This course allows those students who desire to learn more about game programming to apply what they have learned in their foundation courses in that area. Gaming is a compelling way to motivate students to learn challenging technical concepts such as programming, software engineering, algorithms, and project management.

Prerequisite: COSC 2329.

COSC 3337. Information Systems Design & Management. 3 Hours.

This is a course in the design and implementation of large-scale file and persistent object-based information systems. Client/server systems are covered.

Prerequisite: COSC 2347.

COSC 4050. Independent Study. 1-3 Hours.

Students conduct individual research on specific topics that are not covered in the current Computer Science undergraduate curriculum. Each student will participate in comprehensive research activities with a faculty member who is specialized in the student's interest area. Therefore, the course content will vary based upon the topic that both the student and the mentoring faculty member choose. Students' performance will be evaluated based on their research progress and output. Variable Credit (1 to 3).

Prerequisite: Consent of the instructor.

COSC 4149. Seminar in Computer Science. 1 Hour.

Students learn fundamental ideas of emerging technologies and their real-life applications in ever-evolving software and hardware computing environments. The content of the course may vary from semester to semester, but will include current trends, issues, and professional skills.

Prerequisite: Senior standing in Computer Science.

COSC 4314. Data Mining. 3 Hours.

Students are provided an introduction to the newly-emerging field of data mining. Data mining is concerned with the automatic extraction of novel information and knowledge from large amounts of data in practical real world problems. Topics may will include fundamental concepts, data preparation and feature selection, standard data mining algorithms (including but not limited to association, classification, clustering, and prediction), and applications and evaluation of data mining techniques.

Prerequisite: COSC 3318 and COSC 3319.

COSC 4316. Compiler Design & Construction. 3 Hours.

Students study the design and implementation of assemblers, interpreters and compilers. Topics may include symbol tables, lexical scanning, syntactic analysis, object code generation and storage allocation. Programming assignments will involve implementation of functional components of a translator.

Prerequisite: COSC 2329 and COSC 3319.

COSC 4318. Advanced Language Concepts. 3 Hours.

Students study programming languages which support the Object-Oriented Programming (OOP) paradigm. Programming assignments are used to illustrate the features and weaknesses of the language and to develop the student's proficiency in the use of OOP technology.

Prerequisite: 3 advanced hours of COSC.

COSC 4319. Software Engineering. 3 Hours.

This course is an introduction to formal methods of specifying, designing, implementing and testing software for large programming projects. Methods of estimating and predicting reliability are discussed.

Prerequisite: 6 advanced hours of COSC and COSC 3318.

COSC 4320. System Modeling and Simulation. 3 Hours.

This course is an introduction to modeling and simulation for analysis of computer software and hardware. Application of simulation analysis to design and development of computer software and systems, including modeling of computer and software components are discussed. Design, coding and use of discrete event simulation software will be covered.

Prerequisite: 6 advanced hours COSC and MATH 3379.

COSC 4326. Network Theory. 3 Hours.

Students examine the theoretical basis for data communication together with an examination of the structures and protocols associated with the control of error, congestion and routing. The course may include an examination of network administration fundamentals and socket programming in client-server applications.

Prerequisite: 6 advanced hours of COSC.

COSC 4327. Computer Operating Systems. 3 Hours.

This course is concerned with software organization of computer systems. It is intended to bring together the concepts and techniques of programming languages, data structures and computer organization by considering their role in the design of general computer systems. The problems which arise in multi-accessing, multiprogramming, and multiprocessing are emphasized.

Prerequisite: COSC 3327 and COSC 3319.

COSC 4332. Computer Graphics. 3 Hours.

Students are introduced to graphical APIs used in developing graphical user interfaces and multimedia applications. Topics covered are selected from the PHIGS, Windows, Presentation Manager, X-Windows, digital video and other appropriate technologies.

Prerequisite: 6 advanced hours of COSC.

COSC 4337. Digital Signal Processing. 3 Hours.

Students examine the nature of signal processing and its application to real-world applications such as speech synthesis, video processing, genomics, and biomedical signal processing, and distributed sensor networks. Students address theoretical, algorithmic and practical issues.

Prerequisite: COSC 3327.

COSC 4340. Special Topics in Computer Science. 3 Hours.

Topics of general interest are offered on a timely basis. Previous topics include Cognitive Computing, Embedded Linux Systems, Visual Graphics/Component Systems. Variable Credit (1-3). advanced COSC and senior standing.

Prerequisite: 6 hrs.

COSC 4347. Embedded System Design and Internet of Things. 3 Hours.

Students learn theoretical concepts and hands-on skills for the design and implementation of embedded and IoT (Internet of Things) systems using embedded hardware development tools. Topics may include hardware integration, real-time operating systems, serial and wireless communication, digital/analog input and output, registers and memory management systems, embedded system programming techniques, and designing IoT systems.

Prerequisite: COSC 3327.

COSC 4349. Professionalism and Ethics. 3 Hours.

Students examine the nature, need and value of well-formed ethical constructs within the digital forensics profession. Included in this course is a discussion, through case studies, of the nature of professionalism, personal and professional codes of ethics and conduct, and the professional handling of ethical and moral conflict. Students also explore the role of the professional in public policy and the awareness of consequences of ethical dissent and whistle blowing.

Prerequisite: Junior standing.

Computer Science Technology (CSTE)

CSTE 1330. Introduction to Computers. 3 Hours.

This is a computer literacy course. Basic computing concepts are presented. Assignments provide a hands-on experience in using microcomputer applications. Multimedia and the Internet are introduced. May not be taken for credit toward a CS major or minor. This course may be taken as a classroom based course or as an online course.

CSTE 1331. Visual Computing. 3 Hours.

This course is an introduction to programming using the visual paradigm, aimed at students with little or no background in programming. The core notions of problem solving through programming are introduced, following an object-oriented approach to visual programming.

CSTE 1333. Digital Life. 3 Hours.

Students address the various roles of computational technology in society that both underpin and shape economic, scientific, political, leisure, and social activity. Emphasis is placed on the importance of digital literacy, digital citizenship, digital creativity, and ethics and law.

CSTE 2330. Multimedia Technologies. 3 Hours.

Students examine the use of modern multimedia tools in the production of professional communication materials. Students specifically examine multi-platform image, sound and video editing tools, CD/DVD, wiki and podcast production tools as well as supporting web-publishing tools and scripting techniques for the purpose of enriching the professional communication environment. May not be taken for credit toward a COSC major or minor.

CSTE 3330. Web Technologies. 3 Hours.

Students explore the concepts and techniques associated with the development of modern dynamic Web sites. Topics covered may include web design fundamentals, modern web development tools, style sheets, markup languages, accessibility, session management, interactive communication and security. In addition, students examine a number of Web 2.0 technologies that support blog, wiki and social networking applications.

Prerequisite: CSTE 2330.

CSTE 4330. Web Server Technologies. 3 Hours.

Students explore web server technologies associated with the server components, web scripts, web forms, and dynamic interactive features.

Prerequisite: CSTE 3330.

Construction Management (ETCM)

ETCM 1363. Wood Frame Construction. 3 Hours. [TCCN: ARCH 2312]

This course is a study of materials and methods of wood frame construction found in residential and commercial construction focusing on aspects of load-bearing structural design elements. Instruction is given in the correct use of hand tools and machine tools, job safety, job-site controls, material handling, equipment, and application. Laboratory experiences include design and construction of a wood frame structure with elements typically found in residential construction. (2-2). Course Equivalents: ITEC 1363.

ETCM 2350. Surveying. 3 Hours. [TCCN: ENGR 1307]

Students learn fundamentals of surveying methodologies and apply them to construction and civil engineering projects. Course topics may include theory of errors in observations, distance measurements, leveling methods, angles, azimuths and bearings, total station methods, and traverse computations.

Prerequisite: ETCM 1363.

ETCM 2363. Architectural Design. 3 Hours.

This course consists of the development of a set of plans and specifications for a small residence. Course Equivalents: ITEC 2363, ETDD 2363

Prerequisite: ETDD 1390 or ETDD 1361 or ETCM 1363 or FACS 1360 or FACS 2364.

ETCM 2367. Metal Building Systems. 3 Hours.

This course is a study of materials and methods of construction found in metal building systems. Instruction is given in the correct use of hand and power tools, job safety, job-site controls, material handling, equipment and application. Aspects of load design calculations, fastener use, metal coatings, and erection equipment are studied. Laboratory instruction includes basic metal working processes (welding, sheet-metal, foundry) used in metal frame construction. Course Equivalents: ETCM 3367, ETDD 2367, ITEC 1367

Prerequisite: ETCM 1363.

ETCM 2396. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new construction management and technology topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010 and ETCM 1363.

ETCM 3320. Mechanical, Electrical & Plumbing (MEP) Systems in Buildings. 3 Hours.

Students design and implement typical Mechanical, Electrical and Plumbing (MEP) systems that are part of residential and commercial construction. Topics include design criteria, installation, and operation methods used to conserve both energy and water in buildings.

Prerequisite: PHYS 1301 or 1302 and Sophomore Standing.

ETCM 3353. Construction Project Management. 3 Hours.

Students practice the management principles and techniques associated with managing construction projects. Students apply the most proven methods in construction project management as well as new techniques emerging from the current construction industry and recent research. Lecture and Lab.

Prerequisite: MATH 1316 and ETCM 1363.

ETCM 3368. Concrete/Masonry Construction. 3 Hours.

This course is a study of materials and methods of construction found in concrete and masonry structures. Concrete chemistry, mixing and placement equipment, testing, finishing techniques, reinforcing, formwork, specification, and job-site safety implementing these materials are studied. Laboratory experiences include batch sampling and testing and small group projects implementing concrete and masonry methods and materials. Sophomore standing. Course Equivalents: ITEC 3368

Prerequisite: ETCM 1363.

ETCM 3370. Construction Technology II. 3 Hours.

This course focuses on non-structural construction typically found in cabinetry, trim, and furniture construction. Included is the study of woods, synthetic materials, hardware, and wood joinery. Instruction is given in the correct use of hand and machine tools, job safety, job-site controls, and material specification. Lab experiences include designing, planning, construction, and finishing of a piece of cabinetwork or furniture. Sophomore standing. Course Equivalents: ITEC 3370

Prerequisite: ETCM 1363.

ETCM 3371. Civil Design Technology. 3 Hours.

This course will consist of drafting techniques and requirements necessary for civil engineering offices. Topics include survey drafting, map drafting, topos, site plans, subdivision plats, profile drawings and other related topics. Sophomore standing. Course Equivalents: ITEC 3371

Prerequisite: ETDD 1361 or ETDD 1390.

ETCM 3372. Construction Drafting. 3 Hours.

This course is a study of drafting techniques and requirements for the commercial and heavy construction industries and will add to the skill set of construction management students. Topics will include foundation design, commercial building design, structural detail, and premanufactured metal constructed building design. Demonstrations, student inquiry, in-class problem solving, and three dimensional (3D) modeling will be utilized. Course Equivalents: ITEC 3372

Prerequisite: ETDD 1361 or ETCM 1363.

ETCM 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of construction management skills and practices. To include internships, individual research and industry studies. Variable Credit (1-6).

Prerequisite: Sophomore standing.

ETCM 4310. Construction Cost Estimating. 3 Hours.

Students learn the procedures for estimating construction costs of residential and light commercial projects. Topics may include the preparation of quantity surveys (take-offs), organizing cost information for contract documents, and the development of material, labor, and equipment costs. Lectures cover the skills and background to perform construction estimating, and students gain practical experience in estimating costs for material, labor, and equipment in labs.

Prerequisite: MATH 1316 and ETCM 2363.

ETCM 4315. Construction Scheduling. 3 Hours.

Students learn the concepts used in planning and scheduling of construction projects, including development of a project plan, progress reports, and deliverables. Students acquire the skills and background to perform construction scheduling, and they gain practical and software experience in using schedule networks, critical path methods, resource allocation, and project control techniques in labs.

Prerequisite: MATH 1316 and ETCM 2363.

ETCM 4330. Construction Equipment & Procedures. 3 Hours.

This course is designed to provide a general knowledge of construction applications and procedures. Emphasis is on site preparation, foundations, and concrete. Emphasis will be placed on the responsibility of general or prime contractors and specialty contractors. Students will be taught cost estimation and procedures for bidding. Course Equivalents: ITEC 4330

Prerequisite: ETCM 1363 or ETDD 1361.

ETCM 4368. Building Materials. 3 Hours.

The study of the materials used in building and construction projects including properties, mechanics, and life-cycle impact. Emphasis is placed on chemical, physical, and electrical properties of materials with specific attention to soil, asphalt, steel, and sustainability. Course Equivalents: ITEC 4368

Prerequisite: ETCM 2367 and ETCM 3368.

ETCM 4369. Special Topic. 3 Hours.

Individual study in specialized areas of Construction Management. To be directed and approved by the Industrial Technology advisor. This course is designed to be a multitopic course. The student can take the course under various special topics being offered.

ETCM 4370. Construction Plans & Documents. 3 Hours.

This course is designed to give a clear insight into the particular problems of construction and proper construction procedures. The site selection, availability of services, grading, subsurface explorations to determine foundation needs, construction organization, and other activities of construction are presented in logical units. Course Equivalents: ITEC 4370

Prerequisite: ETCM 2363 or ETCM 3372 and ETCM 3368 and Junior standing.

ETCM 4371. Building Information Modeling. 3 Hours.

This course focuses on current issues in the construction industry from a Building Information Modeling standpoint. This approach incorporates the integrated project delivery method, productivity measurement, digital modeling, and construction process modeling for construction scheduling.

Prerequisite: ETCM 2363 or ETCM 3372.

Counselor Education (COUN)

COUN 2332. Career Development. 3 Hours.

This course will help students explore a lifelong plan for career development. Students will use real life assessments to determine aptitudes, interests and values related to careers. Students will learn how to utilize on campus and internet resources to develop resumes, portfolios and practice job interviewing skills. Activities in this course are designed to give students an advantage for entering the job market. Course Equivalents: COUN 3322 .

COUN 3321. Introduction to the Helping Relationship. 3 Hours.

This course will provide an introduction to the helping relationship, especially as it relates to educational and community settings. Students will be challenged to consider their motivations, needs, and goals related to the art of helping. Students will engage in a service learning project as part of exploring the nature of the helping relationship. Students will also be introduced to basic attitudes, dispositions and skills needed for helping relationships and counseling. Course Equivalents: 2331 .

COUN 3322. Career Development. 3 Hours.

This course will help students explore a lifelong plan for career development. Students will use real life assessments to determine aptitudes, interests and values related to careers. Students will learn how to utilize on campus and internet resources to develop resumes, portfolios and practice job interviewing skills. Activities in this course are designed to give students an advantage for entering the job market. Course Equivalents: COUN 2332 .

COUN 3331. Introduction to Principles Of Counseling. 3 Hours.

This course will provide students with an overview of the counseling profession to include professional issues, ethics, history, credentialing, professional associations, and roles of counselors in various settings. Emphasis is placed on the development of professional identity, the value of the counseling relationship, and theory. Students will choose from several activities allowing them to recognize the value of counseling in human service activities.

COUN 3332. Therapeutic Play Skills. 3 Hours.

Participants will learn the basic principles that guide child-centered play sessions via didactic and experiential activities. The course will help participants understand how child-centered play sessions facilitate the recognition and expression of feelings in children, as well as strengthen problem-solving skills, pro-social skills, and engagement with parents. Students will role-play facilitative skills including recognizing and responding to children's feelings, play session limit setting, and building children's self-esteem. Students will have opportunities to observe live and videotaped child-centered play sessions.

COUN 4088. Special Topics in Counseling. 3 Hours.**COUN 4089. Independent Study in Counseling. 1-3 Hours.**

This independent study course will allow the undergraduate student to conduct in-depth study in a specific topic area related to counseling and human services. Topics will vary as needs demand. May be repeated as scheduled topics vary. Course Equivalents: COUN 4387 .

COUN 4379. Wellness Counseling. 3 Hours.

This course is an introduction to the history of wellness and the contributions of various cultures to the wellness concept. Several models and theories for the practice of counseling are addressed. Behavior change models and current research related to specific wellness domains will be explored with a focus for working with clients from a wellness perspective.

Criminal Justice (CRIJ)

CRIJ 2361. Introduction To The Criminal Justice System. 3 Hours. [TCCN: CRIJ 1301]

(SH Prior Course ID: CJ 261); An introductory course designed to familiarize students with the facets of the criminal justice system, including the processing of offenders, punishment and its alternatives, and the future of the criminal justice system.

CRIJ 2362. Criminology. 3 Hours. [TCCN: CRIJ 1307]

(SH Prior Course ID: CJ 262); An introductory course designed to familiarize students with the scientific field of criminology. Students cover the nature and extent of criminal behavior; past and present theories for crime and delinquency; and the evaluation of prevention, control, and treatment programs.

CRIJ 2364. Fundamentals Of Criminal Law. 3 Hours. [TCCN: CRIJ 1310]

(SH Prior Course ID: CJ 264); A course in substantive criminal law which includes the definition of law, definition of crime, general principles of criminal responsibility, elements of major crimes, punishments, conditions or circumstances which may excuse criminal responsibility, the court system, and the basic concepts of criminal law with an emphasis on the penal law of the State of Texas.

CRIJ 2365. Correctional Systems and Practice. 3 Hours. [TCCN: CRIJ 2313]

(SH Prior Course ID: CJ 265); Students are provided with an overview and evaluation of contemporary correctional systems and a discussion of recent research concerning correctional institutions and various field services.

CRIJ 2367. Police Systems & Practices. 3 Hours. [TCCN: CRIJ 2328]

(SH Prior Course ID: CJ 267); Students cover the philosophy and history of law enforcement in the United States; limitations imposed on law enforcement in a democratic society in accordance with the United States Constitution; agencies of law enforcement; and the role and place of law enforcement in the justice process.

CRIJ 2368. Criminal Investigation. 3 Hours.

Students are provided with a brief overview of the science behind crime detection and a detailed discussion of techniques used for case management and documentation, the concept of proof, the impact of emergent technology on the investigative process, interacting with victims and witnesses, and interviewing suspects. A particular emphasis is placed on the investigation of particular types of crimes including homicides, sex offenses, child abuse, and hate crimes. .

Prerequisite: CRIJ 2367 or consent of instructor.

CRIJ 2394. Courts And Criminal Procedure. 3 Hours.

(SH Prior Course ID: CJ 294); Students examine procedural requirements for judicial processing of criminal offenders, including concepts of evidence sufficiency, standards of proof, due process, and constitutional safeguards.

CRIJ 3338. Introduction to Police Personnel Management. 3 Hours.

Students will gain a foundational understanding of recruitment, selection, training, performance evaluation, discipline, and labor relations within law enforcement agencies. Students will explore theories and application practices for future roles in police administration and management.

CRIJ 3339. History of the Criminal Justice System. 3 Hours.

(SH Prior Course ID: CJ 339); Students explore the major social, economic, legal and political events that have contributed to the formation of the criminal justice system in the United States. Emphasis is on the common roots of the different components of the present system.

Prerequisite: CRIJ 2361 .

CRIJ 3340. Gender and Crime. 3 Hours.

Students investigate definitions of gender, gender roles, and how gender impacts offending, victimization, and criminal justice processing. The influence of gender on working in the criminal justice system as professionals is evaluated. In addition, criminological theories are evaluated in light of gender and the relationship between gender and the criminal justice system.

Prerequisite: CRIJ 2361 and CRIJ 2362.

CRIJ 3361. Comparative Criminal Justice Systems. 3 Hours.

(SH Prior Course ID: CJ 361); Students study criminal justice in societies other than the United States, including, but not limited to, the European, Asian, and African regions. Emphasis is on the uncommon roots of criminal justice in these regions and the effectiveness of such systems in responding to criminal behavior.

Prerequisite: CRIJ 2361 and CRIJ 2362.

CRIJ 3362. White Collar Crime. 3 Hours.

(SH Prior Course ID: CJ 362); Students analyze the ideas and perspectives that are dominant in the fields of criminal justice and criminology on white-collar crime. Topics such as organizational crime, occupational crime, legislation aimed at white collar crime, law enforcement, causes of white-collar crime, and possible forms of intervention are discussed.

Prerequisite: CRIJ 2361 and CRIJ 2362.

CRIJ 3363. Violent Offenders. 3 Hours.

(SH Prior Course ID: CJ 363); Students examine the psychological and behavioral characteristics of the most violent criminal types. The course will cover many topics of criminality, violence, and their causes and will introduce students to the behavioral and psychological issues relevant for understanding, assessing, and managing abnormal criminal behavior. Topics may include sanity, psychopathy, criminal profiling, mental disorders, gangs, serial killers, stalking, women who kill, threat assessment, and/or collective violence.

Prerequisite: CRIJ 2361 or CRIJ 2362 .

CRIJ 3364. Special Offenders and Special Needs. 3 Hours.

(SH Prior Course ID: CJ 364); Students engage in the identification and study of special or unusual offenders with special or unusual needs. Special offenders include those who are rarely covered in standard criminology classes, such as wildlife poachers, serial killers, computer hackers, substance abusers, and business and professional scam artists.

Prerequisite: CRIJ 2361 and CRIJ 2362 .

CRIJ 3368. Understanding Sexual Offending. 3 Hours.

(SH Prior Course ID: CJ 368); Students are provided with an overview of the sexual offender. The origins and various motivations for sexual offending are explored as well as the treatment strategies and their relative effectiveness with different offender groups. Various approaches to community supervision are examined as are controversial issues such as castration of sex offenders.

Prerequisite: CRIJ 2361 or CRIJ 2362 .

CRIJ 3370. Human Trafficking. 3 Hours.

Students learn the history of human trafficking, anti-trafficking enforcement efforts, theories of human trafficking, and legislation. Students gain a comprehensive understanding of the issue of human trafficking and responses by the criminal justice system to prevent and monitor this form of crime.

CRIJ 3372. Foundations of Crime Analysis. 3 Hours.

Students learn about the discipline of crime analysis and how this approach is commonly used in local, state, and federal law enforcement. Students gain an understanding of the foundations of crime analysis as it relates to the profession and the role analysts play in criminal investigations and surveillance.

CRIJ 3374. Community Corrections. 3 Hours.

Students learn techniques and procedures utilized in the supervision of adults and juveniles on probation and parole, and other residents of community-based corrections facilities. Students also learn about the practical problems confronting probation, parole, and other community-based corrections officers. Prerequisites CRIJ 2361 and CRIJ 2365.

CRIJ 3378. Introduction To Methods Of Research. 3 Hours.

(SH Prior Course ID: CJ 378); Students are introduced to the scientific approach to understanding the social world, the relation between theory and research, research design, and data collection. This course is designed to help students gain an understanding of the research process involved in examining criminal justice issues.

CRIJ 3390. Contemporary Issues in Police Management. 3 Hours.

Students gain an understanding of complex management issues for law enforcement agencies. Through case studies and lectures, students explore key issues such as leadership, organizational culture, community relations, diversity, technology, and accountability. Students develop the critical thinking skills necessary to understand and address the complexities of managing modern police organizations.

CRIJ 3394. Global Terrorism and Homeland Security. 3 Hours.

(SH Prior Course ID: CJ 394); Students are provided with an overview of the field of terrorism. Using a multi-dimensional approach that draws from international relations, law, and police strategies, an emphasis is placed on research and analysis. Students also gain the ability to examine and scrutinize international strategies aimed at reducing terrorist incidents.

Prerequisite: CRIJ 2361 or CRIJ 2362 .

CRIJ 3396. Juvenile Delinquency and Juvenile Justice. 3 Hours.

(SH Prior Course ID: CJ 396); Students cover the nature and extent of delinquency, explanatory models and theories for delinquent behavior, the juvenile justice system, juvenile court practices and procedures, and the role of the police officer and correctional officer when dealing with juvenile youths.

CRIJ 4073. Undergraduate Internship in Criminal Justice. 1-12 Hours.

Students complete a minimum of three months in an approved criminal justice or social agency setting taken preferably between junior and senior years. The course is designed to provide the student with an opportunity to apply academic learning in practical situations. See the College's Internship Coordinator for details about this program. Variable Credit (1 to 12). Course Equivalents: CRIJ 4373 .

CRIJ 4330. Law And Society. 3 Hours.

(SH Prior Course ID: CJ 430); Students explore the nature, functions, limitations and objectives of law; civil procedure; civil law and selected social problems; for example, abortion and euthanasia; the civil courts; the grand jury and petit jury; torts; civil liability for police and correctional officers; and family law.

CRIJ 4332. Legal Aspects Of Corrections. 3 Hours.

(SH Prior Course ID: CJ 432); Students explore legal problems from conviction to release; pre-sentence investigations, sentencing, probation and parole; incarceration; loss and restoration of civil rights with an emphasis on practical legal problems confronting the probation and parole office and the correctional administrator.

CRIJ 4336. Understanding Human Behavior. 3 Hours.

Students examine underlying influences that affect human behavior, including biological, cultural, psychological, and social factors. Students will explore a wide range of influences that contribute to personality development and social behaviors commonly observed in the criminal justice system.

CRIJ 4360. Crime And The Media. 3 Hours.

(Prior SH course id: CJ 460); Students survey the connections between the mass media, crime, and criminal justice; explore how the criminal justice system, criminals, and crime are portrayed in film, TV drama, and news media; and examine how the media reflect our collective perceptions of crime, violence, and victimization as well as shape attitudes toward crime.

CRIJ 4362. Substance Use And Abuse. 3 Hours.

(SH Prior Course ID: CJ 462); Students engage in the description, classification, and analysis of the causes and correlates of substance use problems.

CRIJ 4363. Cybercrime. 3 Hours.

A seminar in which students focus on topics related to cybercrime, including legal, enforcement, behavioral, and social factors that influence its perpetration, prevention, and prosecution.

Prerequisite: Junior/Senior standing .

CRIJ 4365. Professionalism and Ethics In Criminal Justice. 3 Hours.

(SH Prior Course ID: CJ 465); Students study the theories and practices in areas of legality, morality, values, and ethics as they pertain to criminal justice. Topics may include police corruption, brutality, and methods of dealing with such practices as well as the concept of profession and professional conduct.

CRIJ 4367. Correctional Strategies. 3 Hours.

(SH Prior Course ID: CJ 467); This course examines treatment options in both institutional and field corrections settings. There is a focus on special populations, including mental health populations and their treatment, aging in prison, women, HIV populations, and issues surrounding race and ethnicity.

Prerequisite: Junior Standing and CRIJ 2365 .

CRIJ 4368. Global Organized Crime. 3 Hours.

(SH Prior Course ID: CJ 468); Students examine the evolution and development of global and transnational organized crime. Various theories that explain the existence of organized crime around the world are examined in addition to a survey of how global organized crime groups have adapted to the 21st century, barriers to international police cooperation, the impact of failed states, civil war and corruption, and the modern relationship between organized crime and terrorists groups.

CRIJ 4373. Undergraduate Internship in Criminal Justice. 3 Hours.

(SH Prior Course ID: CJ 473); Students complete a minimum of three months in an approved criminal justice or social agency setting taken preferably between junior and senior years. The course is designed to provide the student with an opportunity to apply academic learning in practical situations. See the College's Internship Coordinator for details about this program.

CRIJ 4374. Philosophy of Crime & Justice. 3 Hours.

Students examine foundations of the American criminal justice system, considering questions such as: is there a moral justification of punishment; what basic principles guide law enforcement in practice; how did these principles come to be in place; and how do they connect to the moral and political ideals on which the country was founded? Students critically engage with philosophical, legal, sociological, and historical resources.

CRIJ 4376. Independent Studies in Criminal Justice. 1-3 Hours.

(SH Prior Course ID: CJ 476); This course is designed for advanced criminal justice and criminology students who are capable of rigorous independent study. Registration upon approval of the appropriate Assistant Dean of the College of Criminal Justice and the instructor directing the course. Credit to be arranged.

CRIJ 4377. Special Topics In Criminal Justice. 3 Hours.

This course is designed to give advanced undergraduate students academic flexibility. May be repeated for credit.

CRIJ 4382. Social Deviance. 3 Hours.

(SH Prior Course ID: CJ 482); Students study the psychological and sociological aspects of socially deviant behavior and theoretical overviews and implications for social control and social policy.

CRIJ 4384. Police Strategies. 3 Hours.

Students analyze police policies with particular attention to the current major problem areas from the point of view of both the administrator and the line operations officer with an integration of established scientific knowledge with practical police experience in the various areas of police functioning.

Prerequisite: CRIJ 2367 .

CRIJ 4385. Criminal Justice and Social Diversity. 3 Hours.

(SH Prior Course ID: CJ 485); Students examine how social diversity and inequality shape the way criminal behavior is defined and controlled through the application of the criminal law and criminal justice system. Attention is given to the disparity of criminal offending, victimization, and criminal justice processing across demographic groups as well as explanations for observed disparities. In addition, students explore subordinate group members as criminal justice professionals.

Prerequisite: Senior standing .

CRIJ 4386. Problem Analysis In Criminal Justice. 3 Hours.

(SH Prior Course ID: CJ 486); This course serves as a capstone for the Criminal Justice undergraduate students. Students use skills and knowledge from prior courses to address challenges facing the criminal justice system with a focus placed on application of research skills and analytic techniques to address these issues. Students conduct basic research to recommend criminal justice policy.

Prerequisite: Senior Standing, CRIJ 3378 and STAT 3379 or equivalent .

CRIJ 4387. Multiculturalism in Criminal Justice. 3 Hours.

Students explore the goals, benefits, and challenges of multiculturalism in the criminal justice system. Topics may include the experiences of marginalized groups including African Americans, Latinx Americans, Asian Americans, Native Americans, women, the LGBT community, the elderly, and youth within the criminal justice system. Emphasis is also placed on multiculturalism within the workforce. Training tools and policy recommendations are offered and discussed.

CRIJ 4394. Constitutional Issues In Law Enforcement. 3 Hours.

Students focus on the intersection of the U.S. Constitution and the criminal justice system. Laws that govern policing are primarily based upon the United States Constitution, United States Supreme Court decisions, and statutes passed by the United States Congress and state legislatures. Major decisions of the U.S. Supreme Court serve as the core resource, including those addressing Fourth, Eighth, and Fourteenth Amendment governmental authority issues. Although a focus is placed on these resources, the material is presented in a format and in a language designed to meet the needs and interests of non-lawyers, while preserving the meaning and content of the law as interpreted by the courts. Emphasis is placed on development of analytical reasoning skills through the case study method.

Dance (DANC)

DANC 1101. Dance Workshop. 1 Hour.

This is a practical workshop in support of the Department of Dance concerts and activities. Duties include costume construction, backstage and front of house support, and audio/video recording and dubbing.

DANC 1201. Pilates-Based Conditioning for Dance. 2 Hours.

This is an introductory course in Pilates-based body conditioning. Designed by Joseph Pilates in the early 20th Century, Pilates is a movement-based exercise method that stretches, strengthens, and balances the body. Much of its popularity today is due to its regenerative effects on the body-its ability to encompass and connect the mind, body, and spirit with result of health, wholeness and a highly refined overall movement system.

DANC 1204. Folk Dance Forms. 2 Hours.

Students study dances indigenous to Europe, Mexico and the United States are in relation to their cultural derivations. Special consideration is given to dance as a cultural and recreational activity.

DANC 1206. Theater Dance Forms. 2 Hours. [TCCN: DANC 1206]

Specific theatrical dance forms such as ballet, jazz, modern dance, and Hip Hop are studied in specially dedicated sections.

DANC 1221. Introduction to Ballet Dance Technique. 2 Hours. [TCCN: DANC 1241]

Students are introduced to the theory and practice of ballet. No previous experience in dance is required.

DANC 1222. Introduction to Modern Dance Technique. 2 Hours. [TCCN: DANC 1245]

Students are introduced to concepts of modern dance and gives students practice in self expression through movement. No prior experience in dance is required.

DANC 1223. Jazz Dance Technique I. 2 Hours. [TCCN: DANC 1247]

Students are introduced to the dance vocabulary and movement of jazz technique. No prior dance experience is required.

DANC 1228. Tap Dance Technique I. 2 Hours. [TCCN: DANC 1110]

Students are introduced to tap technique and practiced. No prior dance experience is expected.

DANC 1229. Hip Hop Dance Technique. 2 Hours.

This course provides students practice in forms of hip hop dancing. No previous experience is required.

DANC 1233. Intermediate Ballet. 2 Hours.

Students pursue classical ballet technique with an emphasis on technical development and extended movement sequences. Students explore movement, musicality, and artistry through the embodied study of classical ballet and its history.

Prerequisite: Dance Experience, Departmental Approval.

DANC 1234. Intermediate Modern Dance. 2 Hours.

Students pursue modern dance technique with an emphasis on improving anatomical awareness and developing integrated movement patterns often associated with contemporary dance. Students explore floor work and dance as a form of expression.

Prerequisite: Dance Experience, Departmental Approval.

DANC 1333. Ballet Dance Technique I. 3 Hours. [TCCN: DANC 1241]

This course establishes the fundamentals of ballet, including alignment, technique and vocabulary. May be repeated for credit, max of 6 credits.

DANC 1334. Modern Dance Technique I. 3 Hours. [TCCN: DANC 1245]

This course establishes the fundamental of modern dance technique. May be repeated for credit, max of 6 credits.

DANC 1372. Dance and Popular Culture. 3 Hours.

This course is a video survey of the vast range of theatrical dance that has taken place in the twentieth century. Forms and styles covered include ballet, modern/postmodern, jazz, musical theater, tap, contemporary dance, and dance for music video.

DANC 2223. Jazz Dance Technique II. 2 Hours. [TCCN: DANC 2247]

This course expands on the basic dance vocabulary and movements offered in DANC 1223, Introduction to Jazz. Students must have prior experience in jazz dance.

DANC 2228. Tap Dance Technique II. 2 Hours.

This course builds on the basics of tap offered in DANC 1228, Tap Dance Technique I. Students must have prior experience in tap dancing.

DANC 2331. Pilates Body Conditioning II. 3 Hours.

The focus of the course is to develop a solid personal matwork practice at all levels from pre-Pilates through intermediate work, with a strong application of the principles of the Pilates method of body conditioning. Experiences with classical Pilates apparatus will supplement and enrich the matwork exercises.

Prerequisite: DANC 1201.

DANC 2332. Social And Folk Dance Forms. 3 Hours. [TCCN: DANC 1128]

Social and folk dance forms of ethnic and social significance are studied and performed in relation to their cultural derivations and historical perspectives and their use in period theatrical/concert production. Special emphasis is placed upon the importance of ethnic art forms to contemporary society.

DANC 2333. Ballet Dance Technique II. 3 Hours. [TCCN: DANC 2241]

This is a ballet technique class designed for students with fundamental ballet technique. May be repeated for credit, max of 12 credits. Open by audition only.

DANC 2334. Modern Dance Technique II. 3 Hours. [TCCN: DANC 2245]

This is a modern dance technique class designed for students with fundamental dance technique. Students who are not dance majors must have permission of instructor or department chair to register. May be repeated for credit, max 12 credits.

DANC 2373. World Dance: Exploring Cultures. 3 Hours.

Students experience dances from different world regions. Although comparisons between cultures will become evident, the primary objective is to identify and study cultural characteristics.

DANC 2376. Choreography I. 3 Hours. [TCCN: DANC 1301]

Students learn to analyze the various components of design and to create basic dance studies that demonstrate understanding of dance as a craft and as an art.

Prerequisite: A minimum of intermediate standing in ballet or modern dance, or permission of the instructor is required to register for this course.

DANC 3301. Pilates Teaching Methods I. 3 Hours.

Students become familiar with the foundational principles and concepts behind the Pilates Method of body conditioning in preparation for teaching its matwork component. Course work will address breath, core activation, neutral spine, and lumbo-pelvic stability as they apply to the proper execution of beginning to intermediate-level exercises. An essential aspect of the course is observation of professional Pilates teachers in practice, with both individual clients and in a group instruction setting. Course requirements include regular class meetings, a minimum of 15 documented hours of teacher observation, a journal of observations, and written and practical evaluation.

Prerequisite: DANC 1201, DANC 2331, and either DANC 3374 or BIOL 2401.

DANC 3333. Ballet Dance Technique III. 3 Hours.

This is an intermediate level ballet technique class that presumes substantial ballet training. Open by audition only. May be repeated for credit, max of 12 credits.

DANC 3334. Modern Dance Technique III. 3 Hours.

This is an intermediate level modern dance technique class that presumes substantial modern dance training. Open by audition only. May be repeated for credit, max of 12 credits.

DANC 3335. Jazz Dance Technique III. 3 Hours.

This course is designed for the dancer with sound foundations in jazz technique. The course focus is on developing technical skills, increasing strength and flexibility, and developing performance quality in jazz dance. May be repeated for credit, max of 9 credits. Open by audition only.

DANC 3336. Improvisation & Partnering. 3 Hours.

Through the study of improvisational and partnering techniques, students explore a wide range of movement and develop spontaneous problem-solving skills. Additionally, students learn proper body mechanics that will assist them in various partnering techniques.

DANC 3372. Dance History. 3 Hours.

A chronological survey is made of the history of dance from the 1700's to the modern period. Special emphasis is placed on the philosophic relationship of dance to the various cultural epochs. Course Equivalents: DANC 2372 .

DANC 3374. Principles Of Dance Technique. 3 Hours.

Students are provided the student with an overview of the movement system emphasizing the subjective control experience in dance. Methods of tuning the system, including body therapies, conditioning regimes, body awareness techniques, and dance training. These methods are practiced, reviewed, and compared.

DANC 3376. Choreography II. 3 Hours.

This course builds on skills developed in DANC 2376, Choreography I. Students develop duet and small group compositional studies.

Prerequisite: DANC 2376 and/or permission of the instructor.

DANC 4092. Special Topic. 1-3 Hours.

Opportunities are offered for thorough study of a variety of topics which students may choose in dance. Such topics as Historical Period Dance, Ethno-cultural Studies, Choreographic Projects, et cetera are illustrative. Course Equivalents: DANC 4392 .

DANC 4093. Independent Study. 1-3 Hours.

Opportunities are offered for individual study of an approved problem in dance. May be repeated for credit. Credit 1-3. Course Equivalents: DANC 4393 .

DANC 4301. Pilates Teaching Methods II. 3 Hours.

Students gain a greater level of expertise in the Pilates Method of body conditioning as they prepare to teach its mat work component. Using the foundational concepts and principles learned in DANC 3301, they will further explore the integration of the musculo-skeletal system in movement by way of the Advanced and Super-Advanced exercises. In addition, they will address the conduct of a group instruction setting over a period of time to become familiar with the process of bringing students to a more advanced level in their individual practice. An important aspect of the course is the actual teaching of both private lessons and group classes to gain practical experience as teachers. Course requirements include regular class meetings, a minimum of 35 documented hours of student teaching, and written and practical evaluation.

Prerequisite: DANC 1201, DANC 2331, DANC 3301, and either DANC 3374 or BIOL 2401.

DANC 4330. Repertory. 3 Hours.

The student is involved in rehearsals in which dance works by faculty and guest artists, as well as the great masters of choreography, are staged or reconstructed in preparation for major dance program performances. Students are provided experience in the rehearsal process, culminating in performance. Students cast in productions experience the rehearsal and creation process of dance repertory, culminating in performance in a formal dance concert.

DANC 4333. Ballet Dance Technique IV. 3 Hours.

This is a pre-professional level of ballet technique in which dancers develop a high degree of technical ability and expressive range. Open by audition only. May be repeated for credit, max of 12 credits.

Prerequisite: DANC 3333 or permission of the instructor.

DANC 4334. Modern Dance Technique IV. 3 Hours.

This is a pre-professional level of modern dance technique in which dancers develop a high degree of technical ability and expressive range in the modern dance idiom. Open by audition only. May be repeated for credit, max of 12 credits.

Prerequisite: DANC 3334 or permission of the instructor.

DANC 4335. Jazz Dance Technique IV. 3 Hours.

This is a pre-professional level of jazz dance technique in which dancers develop a high degree of technical ability and expressive range. Open by audition only. May be taken for repeat credit, max of 9 credits.

DANC 4372. Dance Criticism & Analysis. 3 Hours.

Students develop critical skills, applying multiple lenses, and approaches that are needed for the analysis of choreography and choreographers. Exploring the political and social contexts that inform the work broaden students' understandings of external influences on creative expression. Emphasis is on writing informed, insightful analyses of the form, content, context, and effectiveness of choreographic works.

DANC 4376. Choreography III. 3 Hours.

This course is designed to help the student develop extended solo, duet, and ensemble works for performance, expanding on compositional tools from DANC 2376, Choreography I, and DANC 3376, Choreography II.

Prerequisite: DANC 3376 and/or permission of the instructor.

DANC 4377. Senior Studio. 3 Hours.

In this capstone choreography course, students develop skills needed to create and produce dance. These skills include conducting an audition, coordinating a rehearsal schedule, directing and managing dancers through the creative process, and communicating effectively with costumers and lighting designers. The culminating efforts of this class result in a fully-produced dance concert in which each student completes and presents the choreography developed during the course.

Prerequisite: DANC 3376.

DANC 4384. Dance Pedagogy. 3 Hours.

This course acquaints students in dance with methods for teaching ballet and modern dance technique. Students gain theoretical and practical experience, focusing on the use of anatomically-correct and systematic approaches to developing dance skills. Class structure, design of exercises, effective communication with students, and selection of appropriate musical accompaniment are examined. Course Equivalents: DANC 4374 .

DANC 4388. Dance and Technology. 3 Hours.

This course is a continuation of the choreography series and enables students to effectively pursue technology in their creative endeavors. Students are introduced to methods of integrating media technologies into the dancer's experience in the areas of dance graphics, sound design for dance, and dance video. Students learn camera, computer, and software skills that will facilitate their ability to expand creative expression as well as enhance their ability to package and promote themselves as artists in a variety of media.

Prerequisite: DANC 2376 and DANC 3376.

DANC 4389. Career Resources in Dance. 3 Hours.

This course is designed for the graduating dance student who is preparing to enter the job market. Emphasis is placed on resume building, the job search, and the audition process. Students create and package a portfolio that includes a resume, letter of application, video resume, an audition solo, and an artistic statement.

Deaf Studies and Sign Language (DSSL)

DSSL 3310. Deaf Culture. 3 Hours.

Students explore the influence of Deaf Culture on society as a whole. Students situate Deaf Culture within diversity of cultures through an in-depth discussion of historical, cultural, linguistic, political, and geographical aspects of the Deaf Community.

DSSL 3320. Linguistic Structures of American Sign Language (ASL). 3 Hours.

Students use linguistic principles to examine the structure of American Sign Language, including phonology, morphology, semantics, syntax, and pragmatics. The students integrate ASL skills with linguistic concepts to describe language phenomena within the Deaf Community. Instruction is in ASL. Credit 3

Prerequisite: Grade of C or better in SGNL 1401, SGNL 1402, SGNL 2311, and SGNL 2312.

Design and Development (ETDD)

ETDD 1361. Engineering Graphics. 3 Hours. [TCCN: ENGR 1304]

This is an introductory engineering drawing course. Topics covered may include orthographic projection, isometric drawing, geometric construction, sectioning, and dimensioning using drafting equipment, freehand sketching, and two dimensional renderings with CAD software. Course Equivalents: ITEC 1361 .

ETDD 1366. Machining Technology I. 3 Hours.

This course serves as an introduction to the problems, techniques, and processes of modern machining technology. Instruction is given in the use of hand and machine tools, introduction to computer numerical control, product planning and development, metric measurement, safety, and opportunities for employment in the machining industry. Course Equivalents: ITEC 1366, ETEC 1366 .

ETDD 1390. Introduction to Computer Aided Drafting. 3 Hours. [TCCN: ENGR 1304]

This course is intended to provide the student with an understanding of Computer-Aided Drafting Principles. Students will utilize the software command structure of a CAD program to complete a number of typical and practical application exercises. Course Equivalents: ITEC 1390 .

ETDD 2366. Machining Technology II. 3 Hours.

Students learn Computer Numerical Control (CNC) programming as it applies to fundamental milling and turning operations. Topics may include machine tool axis motions, cutting tool setup, methods of work piece setup, cutting tool path design, cutting tool compensation, and canned cycles. Students use computer-aided manufacturing (CAM) software to create toolpaths and programs for multi-axis CNC milling and turning machines.

Equivalent Courses: ETEC 2366

Prerequisite: ETDD 1366.

ETDD 2396. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new engineering design development topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010 and ETDD 1361.

ETDD 3310. Product Design & Development. 3 Hours.

This course explores the processes by which products are brought to the market place. Processes are examined with special emphasis placed on manufacturing, prototyping, patent and trademark procedures, industrial design, problem solving, and decision-making. In addition, creating and working in cross-functional teams to produce products for consumer use is addressed. Course Equivalents: ITEC 3310

Prerequisite: Sophomore standing, ETDD 1390 or ETDD 1361.

ETDD 3366. Intro to Virtual and Augmented Reality. 3 Hours.

Students learn and apply the foundational skill set for Virtual Reality (VR) and Augmented Reality (AR) development and design. Topics include 3D modeling, C# Scripting, and publication for Android or iOS mobile devices.

ETDD 3379. Industrial Design & Drafting. 3 Hours.

This course includes the illustration and preparation of drawings and the related symbolism used in electrical and fluid fields. Related and required piping and fitting fundamentals are also covered. Course Equivalents: ITEC 3379

Prerequisite: ETDD 1390 or ETDD 1361 and Sophomore standing.

ETDD 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of design and development skills and practices. To include internships, individual research and industry studies. Variable Credit (1-6).

Prerequisite: Sophomore standing.

ETDD 4339. Advanced Computer-Aided Drafting and Modeling. 3 Hours.

This is a computer applications course for design and drafting and introduces students to the techniques used to produce technical models/drawings. Students will learn drafting practices and how to apply them using computer-aided software. Prior knowledge of drafting software and/or prior experience of working with computers is advantageous, but not required/expected. Students will produce technical drawings using various computer design and drafting practices. Concepts of 2D drawings will be covered along with an introduction to three dimensional parametric modeling. The intent is to develop fundamental knowledge and skills that are conceptually applicable to any computer-aided design (CAD) system. Course Equivalents: ITEC 4339

Prerequisite: ETDD 1361 and Junior standing.

ETDD 4369. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new engineering design development topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010, ETDD 1361, and Junior Standing.

ETDD 4380. Material Hand & Plant Layout. 3 Hours.

This course is the study of the basic requirements needed to develop the most efficient layouts of equipment and of operating and service facilities whether in manufacturing plants, warehouses, or other industrial or business applications. Special emphasis is on the necessary coordination between plant layout, materials handling, work simplification and production planning, and operation control. Junior standing. Course Equivalents: ITEC 4380

Prerequisite: ETDD 1361.

ETDD 4388. 3-Dimensional Parametric Design. 3 Hours.

This is a computer applications course for parametric design and drafting, in which the computer is used to produce parametric technical models/drawings. Students will learn drafting practices and how to apply them using computer aided software. Students will further be able to produce technical drawings using 3D CAD packages. Concepts of creating 2D drawings will be covered along with introduction to 3D parametric modeling. The course will enable the student to use Autodesk Inventor in advanced parametric design/drafting and other courses. Course Equivalents: ITEC 4388

Prerequisite: ETDD 1390 or ETDD 1361.

Digital Forensics (DFSC)

DFSC 1316. Digital Forensics & Information Assurance Fundamentals I. 3 Hours.

Students are introduced to the fundamentals of Digital Forensics (DF) and Information Assurance (IA) technologies. Topics may include basics of DF and IA, numbering systems, logic, Boolean operations, network packets, OSI layers, TCP/IP protocols, basic scripting and compiled languages, and basics of hardware and file system forensics.

DFSC 2316. Digital Forensics & Information Assurance Fundamentals II. 3 Hours.

Students focus on Digital Forensics (DF) and Information Assurance (IA) processes and methodologies. Topics may include preparation of the investigator, proper acquisition of evidence, authentication, analyzing data without modifying it, reporting findings, and risk assessment of evidence. In addition, current methodologies, such as cryptography and network security, Internet programming, smartphone forensics, network forensics, and cloud forensics are discussed.

Prerequisite: DFSC 1316.

DFSC 2320. Hardware Forensics. 3 Hours.

Students explore techniques in the duplication, recovery, and restoration of digital evidence, which includes hard disks, floppy drives, CD formats, DVD formats, zip drives, mobile phones, PDA's smart cards, memory technologies, and other devices capable of storing digital information.

Prerequisite: DFSC 1316.

DFSC 3316. Cryptography and Network Security. 3 Hours.

Students study both the theory and practice of cryptography and computer and network security, and focus on the security aspects of the web and the internet. Students survey cryptographic tools used to provide security, such as shared key encryption, public key encryption, key exchange, and digital signature algorithms. In addition, students review how these tools are used in the current Internet protocols and network security applications, including wireless network protocols. System security issues, such as viruses, worms, intrusion, and firewalls are also discussed.

Prerequisite: DFSC 1316.

DFSC 3320. Digital Forensics Tools. 3 Hours.

Students explore tools for the recovery of information on protected or damaged hardware for the purpose of providing evidence of misuse or abuse of systems. Topics also may include the chain of evidence, protocols for data recovery, cryptographic analysis, password recovery, the bypassing of specific target operating systems, and obtaining data from digital devices that have been damaged or destroyed.

Prerequisite: DFSC 1316.

DFSC 4050. Independent Study. 1-3 Hours.

Students conduct individual research on specific topics that are not covered in the current Digital Forensics undergraduate curriculum. Students participate in comprehensive research activities with a faculty member who is specialized in the students' interest area. Therefore, the course content varies based upon the topic that both the students and the mentoring faculty member choose. Students' performance will be evaluated based on their research progress and output. Variable Credit (1 to 3).

Prerequisite: Consent of the instructor.

DFSC 4317. Information Security. 3 Hours.

Students are provided an introduction to basic security needs. Course topics may include, but are not limited to individuals vs. government privacy issues, federal encryption standards, the different layers of security currently available, the practical application of user level and system level cryptography, and strategies for evaluation and selection of security methods.

Prerequisite: DFSC 2316.

DFSC 4318. Malware. 3 Hours.

Students focus on analyzing, dissecting, debugging, and reverse-engineering malicious software. Topics may include conventional and advanced static and dynamic analysis of malware in a virtual environment using disassemblers, debuggers, packers/unpackers and virtual machine tools.

Prerequisite: DFSC 1316.

DFSC 4319. Principles of Data Quality. 3 Hours.

Students are provided a rigorous exploration of data quality concepts, assessment techniques, and problems in organizational information systems, databases, and data warehouses. A combination of state-of-the-art literature review and hands-on projects is used to develop knowledge and ability to analyze and clean the data.

Prerequisite: 6 advanced COSC/DFSC hours.

DFSC 4338. Cyber Warfare. 3 Hours.

Students examine the philosophies, targets, and tactics of organizations involved in the development of cyber offensive and defensive capabilities. Topics may include emerging cyber warfare trends and the role of the private sector and the U.S. government in identifying, protecting, detecting, responding to, and recovering from cyber warfare threats.

Prerequisite: DFSC 1316.

DFSC 4340. Special Topics In Digital Forensics. 3 Hours.

Topics of general interest are offered on a timely basis. Previous topics include DC3 Challenge.

Prerequisite: 6 advanced hours of DFSC and senior standing.

Early Childhood Education (ECHE)

ECHE 3128. Field Experience - Early Childhood Education. 1 Hour.

Students will practice behavior management techniques with children in public school pre-kindergarten or kindergarten classrooms. This course is taken concurrently with ECHE 3229.

Prerequisite: 60 hours.

ECHE 3229. Guidance Of Young Children. 2 Hours.

Classroom and behavior management techniques which are appropriate for young children will be presented with an emphasis on inductive discipline which leads to self-discipline.

Prerequisite: 60 hours.

ECHE 3301. Social Guidance - Young Child. 3 Hours.

Students study the theory, principles, and methods employed in the socialization, guidance, and management of children birth-3 years. The emphasis of the course is on promoting children's successful adjustment to multiple ecological systems to encourage the development of self-discipline and executive function. Ten hours of field experience required.

ECHE 3302. Early Childhood Education Theories. 3 Hours.

Students focus on philosophies of learning through examination of the cognitive, behavioral, and social learning theories relevant to early childhood education. Students examine the strengths and weaknesses of each theoretical perspective to gain an understanding of how they impact the early childhood learning environment and curriculum.

ECHE 3313. Early Childhood Cognition. 3 Hours.

This course is intended to provide a foundation for viewing the early years of life as a distinctly different period in the child's life. The early childhood view of the world is based on the child's developing physical, cognitive, linguistic, and socio-emotional skills and processes. Focus will include an emphasis on the child, the family, and the environment in which the child lives. Course Equivalents: ECHE 2313.

ECHE 3316. Assessment in Early Childhood. 3 Hours.

Students develop knowledge about a variety of assessment procedures appropriate for use with young children. Advantages and limitations of assessment techniques, including standardized test results, are examined. Observation techniques and authentic, classroom-based assessments are major areas of emphasis in the course. Ten hours of field experience required.

ECHE 3325. Creative Arts for Educators. 3 Hours.

In this course, students explore the underlying concepts of art, music, dramatic interpretation, theater, and dance and movement. Students learn to integrate these artistic expressions throughout the early childhood curriculum.

ECHE 3363. Working With Families in Diverse Communities. 3 Hours.

This course is an in-depth study of the relationships between families and schools in diverse communities. Topics addressed in this course include discussions of major theories that support partnerships with parents; models for parent, school, and community partnerships; home, school and community influences on children's lives; parenting styles; family dynamics; parent education strategies; communication with parents; and the rights and responsibilities of parents, children and teachers. Field experience with young children, their families, and the community will be required.

Prerequisite: 60 hours.

ECHE 4088. Special Topics in Early Childhood Education. 1-3 Hours.

This course is designed to permit individual students to study specific areas of interest and need. Course Equivalents: ECHE 4388

Prerequisite: Approval of Department Chair.

ECHE 4089. Independent Study in Early Childhood Ed. 1-3 Hours.**ECHE 4333. Developmentally Appropriate Programs for Young Children. 3 Hours.**

An in-depth study will be made of developmentally appropriate practices in schools for young children. Appropriate curriculum and instruction, thematic unit development, and a study of the Texas Essential Knowledge and Skills are major areas of emphasis. Field experience is required.

Prerequisite: 60 hours.

ECHE 4343. Curriculum for Early Childhood. 3 Hours.

In this course, students analyze and practice developmentally appropriate pedagogy that strengthens the link between age appropriate, active, engaged learning with identified state standards for the early childhood classroom (preschool - kindergarten). Fifteen hours of field experience in preschool/kindergarten classrooms are required as part of this course.

ECHE 4349. Language and Literacy Development. 3 Hours.

Candidates will investigate language acquisition and early literacy experiences of children from birth through kindergarten. Special emphasis is given to the characteristics of early learning environments and the teacher's role in the development of language processes, early experiences with print, and integrating early language and literacy activities into experiences of young children.

Prerequisite: ECHE 3313.

ECHE 4350. Preschool Child Wellness. 3 Hours.

In this course candidates will identify and analyze principles of wellness in the early childhood setting. Topics include health and physical fitness, signs of neglect and abuse, educator legal and ethical responsibilities, and communication with parents regarding young children's well being.

Prerequisite: 60 hours.

ECHE 4373. Early Childhood Theory and Cognition. 3 Hours.

This course is a required course for the Bachelor of Arts in Applied Science in Early Care and Education. The class is designed for early childhood preschool and Head Start teachers who are not seeking Texas Teacher Certification. Topics include an emphasis on the young child's cognitive, physical, and social abilities as a foundation for planning appropriate classroom experiences.

ECHE 4399. Student Teaching in the Kindergarten Classroom. 3 Hours.

Approximately six to seven weeks of student teaching experience in a public pre-kindergarten or kindergarten is provided.

Prerequisite: Admission to Student Teaching Program.

Economics (ECON)

ECON 1100. Economics of Social Problems. 1 Hour.

This course will develop needed critical thinking skills by requiring students to analyze the distributional effects, equity, benefits/costs, and unintended consequences of policies. Students will learn the importance of becoming engaged citizens with an emphasis on efficiency and equity issues. The course will enhance student offerings by providing an additional option to complete the one hour elective in the Social and Behavioral Science component of the university core.

ECON 2300. Introduction To Economics. 3 Hours. [TCCN: ECON 1301]

This course is a combination of micro-economic and macro-economic principles. It is designed for those who are neither majors nor minors in economics but who would benefit from a one semester introduction to economic principles. No credit given for ECON 2300 if ECON 2302 or ECON 2301 previously completed.

ECON 2301. Principles Of Macroeconomics. 3 Hours. [TCCN: ECON 2301]

In this course, students will survey the following topics: the economic role of government, public finance and taxation, unemployment and inflation, national income theory, money and banking, economic fluctuations and growth, and international trade and finance.

ECON 2302. Principles Of Microeconomics. 3 Hours. [TCCN: ECON 2302]

In this course, students will survey basic economic principles including individual decision making, price theory, analysis of the firm, competition and monopoly, and the distribution of income.

ECON 3340. Economics and Business in the Global Economy. 3 Hours.

Students examine the foundations of the international business environment within the global environment. They explore the opportunities and challenges of doing business in the contemporary, ever-changing, and increasingly globalized world.

ECON 3341. Comparative Economics Systems. 3 Hours.

In this course, students will examine market oriented, free enterprise capitalism, and its development, compared with alternative economic system.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3344. Contemporary International Issues in Economics. 3 Hours.

In this course, students will survey current literature dealing with international trade and financial issues.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3351. Labor Economics. 3 Hours.

In this course, students will examine unemployment, wage theory, collective bargaining, labor legislation, and proposals for the solution of labor problems. The recent problems of labor are given special consideration.

Prerequisite: 42 completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3352. Energy and Environmental Economics. 3 Hours.

In this course, students will examine how human values, activities, and institutions affect the environment and how the tools of economics can be used to evaluate public policy alternatives designed to improve the quality of the environment.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3357. Intermediate Microeconomics. 3 Hours.

In this course, students will study the following topics: pricing and output policies of firms; resource pricing; and distribution under condition of perfect competition, monopoly, oligopoly, and monopolistic competition.

Prerequisite: ECON 2302 and BANA 2372 or MATH 1342.

ECON 3360. Behavioral Economics. 3 Hours.

Students use economic tools coupled with insights from other behavioral sciences to better describe and predict human behavior as it relates to economic decisions, and to generate improved policy prescriptions. Topics may include prospect theory, judgment biases, self-control, financial anomalies, and incentives.

Prerequisite: 42 hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3370. Economics of Business and Government. 3 Hours.

In this course, students will study the complex relationship between the business sector and the public sector in the United States and in the global marketplace. Topics will include the regulation of business in its various formats and the promotion of business nationally and internationally.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3372. Intermediate Macroeconomics. 3 Hours.

In this course, students will examine the following topics: national income concepts and measurements; the analysis of the factors influencing the level of national income, employment, price, and production; and applications to current problems.

Prerequisite: ECON 2301 and BANA 2372 or MATH 1342.

ECON 3373. Urban And Regional Economics. 3 Hours.

In this course, students will analyze issues of spatial economics, including why cities are formed, patterns of residential and business location, transportation problems, crime, poverty, and suburban sprawl.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 3374. Economics of Public Finance and Public Policy. 3 Hours.

In this course, students will examine the function of government in the marketplace with emphasis on public goods, externalities, taxation, fiscal federalism, and cost-benefit analysis.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 4080. Independent Study. 1-3 Hours.

Individual study arranged with a member of the Economics and International Business faculty. Conferences and written reports are typically required. A carefully prepared research paper concludes the course. This course may be taken for Academic Distinction Credit and can be used for internship credit. This course may be repeated. Variable Credit (1-3). Course Equivalents: ECON 4380

Prerequisite: 42 completed hours and departmental approval.

ECON 4085. Special Topic. 1-3 Hours.

This course of faculty-led study is designed to provide undergraduate students exposure to new Economics topics and concepts in a course setting. Variable credit (1-3). Course Equivalents: ECON 4385 .

ECON 4340. International Economics. 3 Hours.

In this course, students will survey a wide range of topics of international economics with emphasis on international trade theory and policy.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 4348. Economic Development. 3 Hours.

In this course, students will examine the theoretical explanations and historical factors of economic development and underdevelopment, as well as analyze policies for accelerating development in third world countries.

Prerequisite: 42 Completed hours and ECON 2301 and ECON 2302.

ECON 4350. Health Economics and Finances. 3 Hours.

The health care sector comprises one-sixth of the U.S. Gross Domestic Product and has grown continuously over the last 20 years. Given the large employment by the health care sector and the complex policy issues regarding health care, students will benefit from a clear understanding of the structure of the industry.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2302 or departmental approval.

ECON 4353. Economics Of Sports. 3 Hours.

In this course, students will apply economic principles to sports and analyze economic aspects of sports including: demand and supply, advertising, team output decisions, and league/conference organization role of government.

Prerequisite: 42 Completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 4357. Managerial Economics. 3 Hours.

Students learn to apply economic theory to analyze and improve business decision-making. It includes such topics as market analysis, production and costs, pricing, choice under uncertainty, and strategic interactions.

Prerequisite: ECON 2301 and ECON 2302 and BANA 3363 and FINC 3320.

ECON 4360. International Field Studies in Economics. 3 Hours.

This course is the study of economic policy, institutions, firms, and consumer behavior of the host country in a study abroad program.

Prerequisite: 42 Completed Hours, ECON 2300 or ECON 2301 or ECON 2302, and departmental approval.

ECON 4362. Econometrics for Business. 3 Hours.

This course focuses on the process of gathering and analyzing nonexperimental economic data. Students will analyze cross-sectional, time series, and panel data; using multiple regression techniques and interpret the results within an economics framework.

Prerequisite: ECON 2300 or ECON 2301 or ECON 2302, and BANA 3363 or MATH/STAT 3379.

ECON 4365. Introduction to Business Forecasting and Economics. 3 Hours.

In this course, students will apply statistical methods for business and economic forecasting and for hypothesis testing, estimation, and analyzing economic data. Course Equivalents: BANA 4365

Prerequisite: 42 completed hours and ECON 2301 and ECON 2302 and BANA 3363 or MATH/STAT 3379.

ECON 4367. Data Science for Business and Economics. 3 Hours.

Students examine and apply various data science methodologies and advanced statistical inference techniques used in economic, business, and public policy. Topics include logit regression models, random forest estimators, partialling out estimators for causal inference in business and economics, and an introduction to machine learning techniques.

Prerequisite: 42 hours, BANA 3363 or STAT 3379 or MATH 3379.

ECON 4373. Monetary Economics. 3 Hours.

In this course, students will study the role of money in a market economy with special attention given to national and international monetary and banking systems, as well as to their influence on the levels of income, employment, and international capital movements. (Taught only in the Fall.)

Prerequisite: 42 completed hours and ECON 2300 or ECON 2301 or ECON 2302.

ECON 4389. Internship. 3 Hours.

This course is designed to provide the student an opportunity to apply academic skills in a practical work environment under the supervision and guidance of a working professional.

Prerequisite: Overall GPA of 2.5 or greater, ACCT 2301, ACCT, 2302, ECON 2301, ECON 2302, BANA 2372 or MATH 1342, and departmental approval.

Electronics Technology (ETEE)

ETEE 1340. Introduction to Circuits. 3 Hours. [TCCN: ENGT 1401]

This course is designed to provide fundamental understanding of electronics in DC circuits. Emphasis is on knowledge and application of electrical safety, power generation, metering instruments and circuit analysis. Laboratory experiences include hands-on circuit construction and basic troubleshooting. Course Equivalents: ITEC 1340 .

ETEE 2320. Circuits and Systems. 3 Hours. [TCCN: ENGT 1402]

This course is an in-depth study of the electronic principles associated with AC circuits. Topics of study include network theorems, circuit analysis methods, resonance, filters and frequency responses of reactive circuits. Course Equivalents: ITEC 2320

Prerequisite: ETEE 1340 or consent of instructor.

ETEE 2396. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new electrical and electronics technology topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010 and ETEE 1340.

ETEE 3313. Industrial Robotics. 3 Hours.

Students learn and apply the knowledge of industrial robotics hardware and software to integrate automation in manufacturing. Laboratory experience includes hands-on programming of a robotic arm and various troubleshooting techniques. Completion of this course helps prepare students for a robotics certification.

Prerequisite: ETEE 1340 or Consent of Instructor.

ETEE 3345. Digital Electronics. 3 Hours.

This course is a study of the principles and applications of digital logic circuits including logic gates, counters, shift registers, and combinational logic circuits. Laboratory experiences consist of experimental problems. Course Equivalents: ETEE 4373, ITEC 4373

Prerequisite: ETEE 2320.

ETEE 3350. Analog Electronics. 3 Hours.

This course is designed to provide in-depth knowledge and experience in the principles and applications of solid-state devices. Specific emphasis is placed on the construction, characteristics and applications of diodes, rectifiers, transistors, thyristors and integrated circuits. Laboratory experience is gained through circuit construction, testing and troubleshooting. Course Equivalents: ITEC 2350

Prerequisite: ETEE 2320 or consent of instructor.

ETEE 3360. Electrical Power & Machinery. 3 Hours.

Students explore DC machines, single and three-phase AC machines, and the fundamentals of electrical power systems. Topics include single and three-phase synchronous and induction machines, power transformers, DC motors and generators, and smart-grid systems with distributed renewable energy.

Prerequisite: ETEE 1340, ETEE 2320, and MATH 1420.

ETEE 3373. Control Systems Technology. 3 Hours.

This course introduces the principles of control theory with an emphasis on linear control systems. Topics may include open-loop and closed-loop industrial control system, principles and operation of electrical switching, time and control devices, AC and DC motor controls, servomechanisms, transducers, instrument symbology, and industrial detection systems. Course Equivalents: ITEC 3373

Prerequisite: ETEE 2320 and MATH 1420.

ETEE 3376. Microcontroller Applications. 3 Hours.

This course introduces microcontroller architecture and microcomputer systems, including memory and input/output interfacing. Topics include low-level language programming, bus architecture, I/O systems, interrupts, and other related topics. The functional and technological characteristics of microcontroller structures, memory components, peripheral support devices, and interface logic will be examined. Various hardware configurations and interfacing techniques will be discussed. Course Equivalents: ETEC 3376

Prerequisite: ETEE 2320 and Junior Standing or Consent of Instructor.

ETEE 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of electronics technology skills and practices. To include internships, individual research and industry studies. Variable Credit (1-6).

Prerequisite: Sophomore standing.

ETEE 4351. Automation and Programmable Logic Controllers (PLCs). 3 Hours.

This course explores the concepts of automation, electrical control systems, and programmable logic controllers. Topics may include principles of control system operations, numbering systems as applied to electrical controls, types of programmable logic controllers and their operation, equipment interfacing, and ladder logic programs. Application-oriented laboratory experiments and design problems are used to enhance students' knowledge and skills.

Prerequisite: ETEE 3350 or Consent of Instructor.

ETEE 4352. Instrumentation & Interfacing. 3 Hours.

This course focuses on computer-aided instrumentation and interfacing. Topics include real-time industrial data acquisition hardware and software, sensors, signal conditioning, and the design of data acquisition systems using software tools.

Prerequisite: ETEE 1340, ETEE 2320, and ETEE 3350.

ETEE 4355. Electronic & Digital Communication. 3 Hours.

Students learn fundamental technologies and advanced concepts for electronic and digital communications. Topics include propagation, AM/FM modulation/demodulation, receivers/transmitters, antennas, digital coding, wire and wireless communications, and other related subjects.

Prerequisite: MATH 1420 and ETEE 3350.

ETEE 4369. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new electrical and electronics technology topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010, ETEE 1340, and Junior Standing.

ETEE 4375. Digital VLSI Design and Field Programmable Gate Arrays. 3 Hours.

Students design and build a digital system, such as a CMOS integrated circuit. Topics include CMOS transistor operation, manufacturing process for CMOS VLSI chips, implementation of logic gates in CMOS, specifically layout, design rules, and circuit families. Students also learn advanced digital circuit design techniques for analyzing and optimizing timing and power at the circuit level, synthesis, timing analysis, functional verification, design-for-test, and layout with the aid of CAD, and FPGA/VHDL tools.

Prerequisite: ETEE 3345 and ETEE 3350.

Elementary Education (CIEE)

CIEE 2333. Becoming A Teacher. 3 Hours.

This required course for those seeking EC-6 or 4-8 certification is an introduction to the concept of teaching as a professional career that makes a difference in the lives of children, youth and their families. The course engages the teacher candidates in the examination of social economics, language diversity, historical, political, curriculum, theoretical, and philosophical issues related to making a commitment to education.

Prerequisite: 18 Hours.

CIEE 3323. Curriculum for Intermediate Grades. 3 Hours.

Curriculum for Intermediate Grades will prepare teacher candidates to analyze and plan EC-6 and 4-8 content using the Texas Essential Knowledge and Skills. For those seeking EC-6 and 4-8 certification only. Must be completed before content methods.

Prerequisite: 54 Hours.

CIEE 3334. Mathematics Instruction In Elementary Grades. 3 Hours.

This course emphasizes making mathematics meaningful to children. Experience is provided in the selection and evaluation of mathematics curriculum and audio-visual materials and the preparation of appropriate instructional materials. Students observe and teach mathematics lessons in elementary grades classroom. Field experiences required. This course is taken as part of Field I Block for EC-6 Certification. Course Equivalents: CIEE 4334

Prerequisite: CIEE 3374 and Admission to Educator Preparation Program and Departmental Approval.

CIEE 3335. Science Instruction In Elementary Grades. 3 Hours.

This course emphasizes making science meaningful to children. Experience is provided in the selection and evaluation of science curriculum resources and the preparation of appropriate instructional materials. Students observe and teach science lessons in an elementary grades classroom. Field experiences required. This course is taken in semester 1 of Year Long Residency. Course Equivalents: CIEE 4335

Prerequisite: Admission to Educator Preparation Program and Departmental approval.

CIEE 3336. Social Studies Instruction In Elementary Grades. 3 Hours.

This course emphasizes making social studies meaningful to children. Experience is provided in the selection and evaluation of social studies curriculum resources and the preparation of appropriate instructional materials. Students observe and teach social studies lessons in elementary grades classroom. Field experiences required. This course is taken in semester 1 of Year Long Residency. Course Equivalents: CIEE 4336

Prerequisite: Admission to Educator Preparation Program and Departmental approval.

CIEE 3343. Curriculum and Assessment. 3 Hours.

In this course, teacher candidates focus on design, implementation, and evaluation of curriculum including components of highly successful programs. Emphasis is on assessment strategies that strengthen the link between curriculum and responsive instructional practices for meeting the needs of all learners. Admission to Educator Prep Prg (TCHR)

CIEE 3374. Human Growth & Learning. 3 Hours.

This course examines growth and learning in elementary environments. Major theories of the teaching-learning process are studied. Human development related to education is emphasized. Special attention is paid to the cultural milieu. Field experiences in public schools (10 hours). Required for EC-6 certification.

CIEE 3385. Creating Positive Classroom Communication. 3 Hours.

The purpose of this course is to provide the prospective elementary school teacher with the experiences in classroom management and discipline theories appropriate for the diverse population of students in the elementary school. This course is taken as part of the Elementary Methods Block for EC-6 Certification.

Prerequisite: CIEE 3374, admission to Educator Preparation Program and departmental approval.

CIEE 4088. Special Topics in Elementary Education. 1-3 Hours.

This course will examine special topics in the field of Elementary Education. Variable credit (1-3.)

CIEE 4089. Independent Study in Elementary Education. 1-3 Hours.

Designed to permit individual students to study specific areas of interest and need. Course Equivalents: CIEE 4375

Prerequisite: Departmental Approval.

CIEE 4116. Integrating Technology II. 1 Hour.

The purpose of this course is to plan, organize, deliver, assess, and evaluate instruction for diverse learners in a public school. Incorporating the effective use of technology at each level of the instructional cycle. In addition, this course incorporates the implementation of appropriate media for communication with and among colleagues, mentors, and students. For those seeking EC-6 certification only.

Prerequisite: Senior standing.

CIEE 4117. Assessment. 1 Hour.

This course focuses on the study and application of assessment to ascertain the development of knowledge and skills of children in the classroom. Emphasis is placed on the integration of assessment with technology and complexities in working with ELL learners. This course is offered in conjunction with student teaching. For those seeking EC-6 certification only.

Prerequisite: Senior standing and completion of the Methods Block coursework.

CIEE 4227. Integrating Technology I. 2 Hours.

This course will apply technology and computers to support instruction in various content areas. The course will explore, evaluate, and utilize computer/technology resources to design and deliver instruction as well as to assess student learning. Field experience required.

Prerequisite: Senior standing, CIEE 3374 and CIEE 3385.

CIEE 4367. Integrating Technology Into Instruction In Elementary Grades. 3 Hours.**CIEE 4376. Developing a Professional Teacher Portfolio. 3 Hours.**

The purpose of this course is to provide the prospective elementary or middle school teacher the opportunity to organize artifacts on the development, exploration, integration, application, and teaching of content knowledge, pedagogical knowledge and skill development in the development of a professional teacher portfolio.

Prerequisite: Concurrent enrollment in student teaching and Departmental Approval.

CIEE 4377. Early Adolescent Learners. 3 Hours.

In this course, teacher candidates focus on the developmental changes that occur in early adolescence and the best practices that influence instruction in middle grades (grades 4-6).

Prerequisite: CIEE 3374.

CIEE 4384. Assessment Of Student Learning. 3 Hours.

This course will prepare teacher candidates to become successful in developing assessment strategies that help strengthen the link between the elementary school curriculum and responsive instructional practices for meeting the needs of diverse learners. This course is taken as part of student teaching.

Prerequisite: Admission to Educator Preparation Program and Departmental approval.

CIEE 4391. Student Teaching Elementary School. 3 Hours.

The student is assigned to student teach in an elementary school classroom for two placements totaling approximately twelve to fourteen weeks. This time is divided among observation, participation, teaching and conference activities in two classrooms that span certification grades. This course corresponds to one of those placements. As an example, an EC-6 student will have one placement in a lower grade such as 1st grade and the second placement in a higher level such as 5th grade.

Prerequisite: Senior status and admission to Student Teaching.

CIEE 4392. Student Teaching Elementary School. 3 Hours.

The student is assigned to student teach in elementary school classrooms for two placements totally approximately twelve to fourteen weeks. This time is divided among observation, participation, teaching and conference activities in two classrooms that span the certification grades. This course corresponds to one of those placements. Substitutions in specialized program areas include BESL 4320, SPED 4384, or CISE 4397. Corequisite: EDUC 4301.

Prerequisite: Senior status and admission to Student Teaching.

Engineering Technology (ETEC)

ETEC 1010. Engineering Foundations. 1-2 Hours.

This course focuses on leadership and study skills necessary for succeeding in the many career options available to professionals in industrial technology, business, and engineering education. Variable Credit (1 to 2). Course Equivalents: ETEC 1100, ITEC 1100 .

ETEC 1371. Descriptive Geometry. 3 Hours. [TCCN: ENGR 1304]

This course emphasizes problems of space relations of points, lines, surfaces, intersections, and developed surfaces, and their application to the graphical solution of engineering problems. Course Equivalents: ITEC 1371 .

ETEC 2382. Manufacturing Processes. 3 Hours. [TCCN: ENGT 2310]

Students examine a broad range of manufacturing processes with an emphasis on understanding manufacturing procedures and changes of physical properties of material during these processes. Topics may include forming and shaping processes, material removal processes, joining processes, casting and solidification processes, engineering metrology and instrumentation, and other aspects of manufacturing.

ETEC 2396. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new engineering technology topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010.

ETEC 3300. Technology Innovations. 3 Hours.

This course provides a study of societal technologies and their effects on the daily lives of consumers. The course presents the pervasive nature of technology innovations and increases the awareness of the promises of uncertainty associated with the use of technology as a human enterprise. .

Course Equivalents: ITEC 3300

Prerequisite: ETEC 1010 and Sophomore standing.

ETEC 3340. Solar and Wind Energy Systems. 3 Hours.

This course will examine grid-connected and stand-alone solar photovoltaic and wind energy systems. System components including batteries, PV modules, charge controllers, maximum power point trackers, vertical and horizontal axis turbines, aerodynamics of wind turbines, wind farms and sighting, and inverters will be discussed. A comprehensive review of power production methods from solar and wind resources will be included, along with site surveying, commercial development, economics, and environmental impacts.

Prerequisite: ETEE 1340 and Junior Standing.

ETEC 3344. Computer Integrated Manufacturing. 3 Hours.

Students examine the concept of Computer Integrated Manufacturing and its industrial applications. Topics include smart manufacturing, Computer Aided Process Planning, robotics in manufacturing systems, rapid prototyping, and the cost estimating of different manufacturing processes.

Prerequisite: ETEC 2382 and ETDD 2366.

ETEC 3360. Related Science, Mathematics, & Technology in Occupations. 3 Hours.

This is the written portion of an 18-hour segment of proficiency examinations. Consent of department chair. Course Equivalents: ITEC 3360

Prerequisite: Sophomore standing.

ETEC 3361. Related Science, Mathematics, and Technology in Occupations. 3 Hours.

This is the written portion of an 18-hour segment of proficiency examinations. Course Equivalents: ITEC 3361

Prerequisite: Consent of department chair.

ETEC 3362. Manipulative Skills in Occupations. 3 Hours.

This segment is for the manipulative portion of the proficiency examination. Consent of department chair. Course Equivalents: ITEC 3362

Prerequisite: Sophomore standing.

ETEC 3363. Manipulative Skills in Occupations. 3 Hours.

This segment is for the manipulative portion of the proficiency examination. Course Equivalents: ITEC 3363

Prerequisite: Consent of department chair.

ETEC 3364. Related Subjects in Occupational Personal Qualifications. 3 Hours.

This is the oral portion of the proficiency examination. Consent of department chair. Course Equivalents: ITEC 3364

Prerequisite: Sophomore standing.

ETEC 3365. Related Subjects in Occupations and Personal Qualifications. 3 Hours.

This is the oral portion of the proficiency examination. Course Equivalents: ITEC 3365

Prerequisite: Consent of department chair.

ETEC 3367. Engineering Materials Techniques. 3 Hours.

Students learn about the physical properties, industrial applications, limitations, and selection of engineering materials such as polymers and metals.

Topics include atomic structure, stress and strain, phase diagram, standard material tests, and environmental considerations. Course Equivalents:

ETEC 4367, ITEC 4367

Prerequisite: ETEC 1010.

ETEC 3374. Time And Motion Study. 3 Hours.

A study of the principles of motion economy, work measurement and improvement of production methods as they apply to modern industry. Attention is given to human relations, work simplification, and selected charting procedures. Course Equivalents: ITEC 3374

Prerequisite: Sophomore standing.

ETEC 3375. Statics. 3 Hours.

This course examines qualitative and quantitative treatments of forces and moments. Designing trusses, constructing free body diagrams, and performing equilibrium analysis for coplanar systems are included. Course Equivalents: ITEC 3375

Prerequisite: PHYS 1301, PHYS 1101, and MATH 1316 or MATH 1420.

ETEC 3382. Manufacturing Processes II. 3 Hours.

Students learn manufacturing processes of extrusion, injection molding, and thermoforming applied to polymers and composite materials. Topics include different types of additive manufacturing processes such as fused deposition modeling, vat photopolymerization, binder jetting, sheet lamination, and powder bed fusion.

Prerequisite: ETEC 2382 or consent of instructor.

ETEC 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of engineering technology skills and practices. To include internships, individual research and industry studies. Variable Credit (1-6).

Prerequisite: Sophomore standing.

ETEC 4099. Engineering Innovation. 1-3 Hours.

In this course, students work closely with faculty to design, develop, and implement innovative engineering projects as part of their capstone experience. Variable credit 1-3. Course Equivalents: ETEC 4199

Prerequisite: Faculty Approval.

ETEC 4199. Senior Design I. 1 Hour.

In this course, students work closely with faculty to design, develop, and implement innovative engineering projects as part of their capstone experience.

Prerequisite: Senior Standing.

ETEC 4315. Quality Assurance and Control. 3 Hours.

Students learn principles and practices related to quality assurance and quality control in engineering. They develop quality control charts and analyze product liability and process capability. They solve problems related to reliability, failure modes, and engineering quality systems such as ISO standards, supplier certification requirements, and Six Sigma. Topics include the evolution of quality assurance and control practices in engineering applications, and modern quality tools as related to strategic planning, cost of quality, customer satisfaction, and employee involvement. Statistical methods are used to evaluate process capability, inspection data, continuous improvement efforts, and lean manufacturing techniques. Junior Standing.

Prerequisite: STAT 3379 or consent of instructor.

ETEC 4340. Alternative Energy Technology. 3 Hours.

This course examines existing and potential ambient alternative energy sources, production capacities, energy harvesting, conversion, and storage techniques. The course will also examine fundamental concepts, terminology, definitions, and nomenclature common to all energy systems. Course Equivalents: ITEC 4340

Prerequisite: ETEE 1340.

ETEC 4350. Utilities Project Management. 3 Hours.

Students examine key energy and industry utility competencies including project management, bidding and negotiation, technical job execution, and safety management. This class is designed to immerse students into the field of Engineering, Procurement, and Construction (EPC), through real projects from the industry.

Prerequisite: Junior standing and consent of instructor.

ETEC 4355. Agile Technology Framework. 3 Hours.

Students learn values, principles and practices related to Agile Technology Framework. Students also examine best practices in the evolution of agile process development in engineering, manufacturing and digital transformations. Topics may include project framework, Agile House of Lean model, Agile roadmap, system thinking, Scrum and Kanban, Agile Cycles, story writing, and Agile Tools.

Prerequisite: MATH 1314 and Junior Standing.

ETEC 4369. Special Topics in Industrial Technology. 3 Hours.

Individual study in specialized areas of Industrial Technology. To be directed and approved by the Industrial Technology advisor. This course is designed to be a multitopic course. The student can take the course under various special topics being offered. Sophomore standing. Course Equivalents: ITEC 4369

Prerequisite: Approval of faculty, program coordinator and chair.

ETEC 4374. Biomedical Instrumentation I. 3 Hours.

Students investigate the foundational theory, techniques, and applications of devices used in the field of healthcare. Course content is delivered in didactic and lab settings and may include the application of anatomy and physiology to the understanding of equipment outputs, safety, and limitations. Topics may include biopotentials, electrodes, transducers, and the varied display outputs of the patient-machine interface.

Prerequisite: ETEC 1010.

ETEC 4375. Biomedical Instrumentation II. 3 Hours.

Students investigate advanced concepts of biomedical instrumentation. Topics include ultrasonics, lasers, and surgical equipment with a focus on equipment performance analysis and troubleshooting.

Prerequisite: ETEC 4374.

ETEC 4376. Strength of Materials. 3 Hours.

This course focuses on the analysis of stresses, strains, deflection, and deformation in bodies under the action of loads. Topics include statically indeterminate axially loaded members, thermal deformation, distribution of bending and shearing stresses in beams, stress and shear flow formulas, combined stresses and Mohr's circle, torsion on a circular shaft, empirical column formulas, and bolted joint failures.

Prerequisite: ETEC 3375.

ETEC 4377. Biomedical Imaging. 3 Hours.

Students apply engineering theory to the operations of common medical imaging modalities. Course content will be delivered in didactic and lab settings. Topics may include the scope and limitations of engineering requirements to produce and display the appropriate content associated with radiography, fluoroscopy, mammography, computed tomography, magnetic resonance imaging, ultrasound, positron emission tomography, and single-photon emission computerized tomography.

Prerequisite: ETEC 4374.

ETEC 4384. Supervisory Personnel Practice. 3 Hours.

This course introduces students to the principles of management as pertaining to personnel. Responsibilities of management, industrial economics, supervisory information, training, group dynamics, work simplification, labor and human relations, working conditions, morale, motivation, and mental health are covered. Course Equivalents: ITEC 4384

Prerequisite: ETEC 1010 or Junior standing.

ETEC 4390. Directed Studies. 3 Hours.

Designed to provide students with the opportunity to gain specialized experience in one or more of the following areas: internship, laboratory procedures, individualized study, innovative curricula, workshops, specialized training schools, and seminars. Internship is required of all teacher education majors. May be repeated or taken concurrently to a maximum of 9 hours. Faculty, Program Coordinator and Chair approval required. Course Equivalents: ITEC 4390

Prerequisite: Sophomore standing.

ETEC 4391. Work Base Mentorship. 3 Hours.

Students work in their specialization in the industry. Students may complete their internship in one or two semesters. Students must work 100 clock hours for 1 college credit. Faculty, Program Coordinator and Chair approval required. Course Equivalents: ITEC 4391

Prerequisite: Junior standing.

ETEC 4399. Senior Design II. 3 Hours.

Students learn advanced topics and gain hands-on skills in engineering technology fields while working in team environments. Topics and activities may include design and implementation processes, application of project management that culminates with analysis, drawings, installation or prototype, and testing of a significant project. Presentation and technical reports are required.

Prerequisite: ETEC 4099 and Senior Standing.

English (ENGL)

ENGL 0111. Tutorial for Basic Writing. 1 Hour.

This course is a one-hour writing tutorial, which focuses on basic conventions of college writing, providing instruction in the fundamentals of English grammar, mechanics, word choice, vocabulary, and spelling. The primary concerns are the word, the sentence, the paragraph, and the short theme. The goals of the course are to raise the students' level of understanding of SAE (Standard American English), support them in the ENGL 1301 in which they are simultaneously enrolled, and prepare them for ENGL 1302. Prerequisite: Score of 360-362 in writing in the Texas Success Initiative Assessment Test or Departmental Approval. Credit in this course will not be allowed to count toward graduation or computation of grade point average or classification of students by hours completed. (Course does not fulfill University degree requirements.)

Prerequisite: Score slightly below passing on the writing portion of the Texas Success Initiative (TSI) Assessment Test or departmental approval.

ENGL 1301. Composition I. 3 Hours. [TCCN: ENGL 1301]

Students develop rhetorical knowledge, including negotiating purpose, audience, context, and conventions. Students practice their writing processes including drafting and revising for a variety of purposes. Students may be subject to companion course INRW 0014 depending on their TSI status.

ENGL 1302. Composition II. 3 Hours. [TCCN: ENGL 1302]

Students build on their rhetorical knowledge, incorporating more complex methods in their writing processes, including using research in student writing, writing for specific contexts, and/or multimodal composing. Students integrate critical thinking skills into writing, including analysis, synthesis, interpretation, and evaluation.

Prerequisite: ENGL 1301.

ENGL 2332. World Literature I: Before the 17th Century. 3 Hours. [TCCN: ENGL 2332]

Students analyze the philosophical insights and aesthetic values of classical, medieval, and renaissance masterpieces. Students write papers based on themes and concepts included in the works studied. All students may enroll. English majors must take this course. Course Equivalents: ENGL 2331

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 2333. World Literature II: From the 17th Century and After. 3 Hours. [TCCN: ENGL 2333]

Students read selected works of representative writers of various cultures beginning from the seventeenth century through the present. Students write papers based on themes and concepts included in the works studied. All students may enroll.

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 3330. Introduction to Technical Writing. 3 Hours.

Students study special problems of technical literature and technical report writing. Students also design content for written communications in business, industry, and government.

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 3334. Literature and Film. 3 Hours.

Students evaluate the structure, imagery, characterization, and themes of novels, short stories, essays, and poems associated with those of selected motion picture films.

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 3336. Studies in Women's Literature. 3 Hours.

Students investigate works by women writers that span a variety of genres, nationalities, and literary periods.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3337. African-American Literature. 3 Hours.

Students explore the historical, political, and literary problems particular to African-American writers. Students also study the development of African-American identity through cultural expression in a variety of media and genres.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3338. Studies in Multicultural Literature. 3 Hours.

Students examine the themes, techniques, and literary movements from different cultures. Students may focus on more than one ethnic or national culture.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3360. Survey of American Literature to 1865. 3 Hours.

Students survey the themes, genres, and authors in American literary history from the period of exploration and settlement through the American Renaissance and the Civil War. All English majors must take this course.

Prerequisite: ENGL 1301, ENGL 1302, and either ENGL 2332 or ENGL 2333.

ENGL 3361. Survey of American Literature from 1865 to the Present. 3 Hours.

Students examine the authors, genres, and movements in American literature from 1865 to the present. Students specifically study the representative works of Realism, Naturalism, Modernism, and Post-Modernism. All English majors must take this course.

Prerequisite: ENGL 1301, ENGL 1302 and either ENGL 2332 or ENGL 2333.

ENGL 3363. Mythology. 3 Hours.

Students investigate myths and their application to literary studies. Students in the Secondary Education certification program may take this course to fulfill the Language Arts composite.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3364. Folklore. 3 Hours.

Students study the folk motifs of various cultures throughout the world. Students in Secondary Education certification program may take this course to fulfill the Language Arts composite.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3370. Modern Drama. 3 Hours.

Students investigate the major figures in modern British, American, and Continental drama.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3371. Sociolinguistics. 3 Hours.

Students study language in its social and cultural contexts by examining linguistic diversity in relation to societal variables such as region, age, class, ethnicity, and gender. Students also study the variation in an individual speaker's language dependent on changes in setting, goals, and participants.

Prerequisite: ENGL 1301 and 1302.

ENGL 3372. Introduction to Linguistics. 3 Hours.

Students learn the basic foundations of English linguistics. Topics may include the sound system of English, the structure and meaning of words and sentences, language use in context, language and the brain, dialect and register variation, and the place and history of English among the languages of the world.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3373. English Grammar. 3 Hours.

Students build on their pre-existing linguistic knowledge of the English language to further analyze the infinite number of grammatical patterns that stem from a mere handful of rules. Students identify different grammatical forms and their functions, different sentence types, and transformations.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3374. Teaching Writing and Literature. 3 Hours.

Students examine the theories and practices of teaching writing and literature in secondary education. Students focus on classroom practices, definition of standards, invention, assignment design, evaluation of student writing, and approaches to teaching young adult literature.

Prerequisite: ENGL 1301, ENGL 1302, ENGL 3373 and ENGL 2332 or ENGL 2333.

ENGL 3377. Argument and Persuasion. 3 Hours.

Students learn the art of successful argumentative and persuasive writing by surveying the history of argument, the structuring of a sound argument, and stylistics.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3378. Designing Written Documents. 3 Hours.

Students analyze major rhetorical and visual design theories in order to create professional texts that integrate effective visual and written strategies and that create complete and compelling messages across a variety of workplace genres.

Prerequisite: ENGL 1301, ENGL 1302 and ENGL 3330.

ENGL 3379. Introduction to Creative Writing: Creative Nonfiction. 3 Hours.

Students develop the techniques of writing creative essays such as personal essays, memoir, and lyric essays.

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 3380. Advanced Composition. 3 Hours.

Students examine the rhetorical forms and approaches to the problems of composition.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3381. Introduction to Creative Writing: Fiction. 3 Hours.

Students develop the techniques of writing fictional pieces such as short stories, plays, and novels.

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 3382. Introduction to Creative Writing: Poetry. 3 Hours.

Students develop the techniques of writing poems.

Prerequisite: ENGL 1301 and ENGL 1302.

ENGL 3383. Practicum in Publishing. 3 Hours.

Students evaluate topics and issues related to editing and publishing. Students also work with internal or external organizations for semester-long internships.

Prerequisite: ENGL 1301, ENGL 1302, and either ENGL 3381 or ENGL 3382.

ENGL 3384. Early English Masterworks. 3 Hours.

Students analyze the works of major figures in British literature from the beginning to 1798. All English majors must take this course.

Prerequisite: ENGL 1301, ENGL 1302, and either ENGL 2332 or ENGL 2333.

ENGL 3385. Later English Masterworks. 3 Hours.

Students analyze the works of major figures in British literature from 1798 to the present. All English majors must take this course.

Prerequisite: ENGL 1301, ENGL 1302, and either ENGL 2332 or ENGL 2333.

ENGL 3388. Texas Crossroads. 3 Hours.

Students examine the intersections among literature, history, science, culture, and politics of the "Crossroads" area of Texas.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3390. The Bible As Literature. 3 Hours.

Students evaluate the narrative, structures, and themes of selected books of the Old and New Testament. Students also examine Hebrew and Christian scriptures in translation, analyze various genres in the Bible, and consider the cultural and mythological context of selected passages and the literary influences made by these passages.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3391. Studies in Shakespeare: Tragedies and Histories. 3 Hours.

Students read and analyze a various number of Shakespeare's tragedies and histories, ranging from the earliest experiments of his career, to the great history plays of the 1590s, and through the major tragedies of the early 1600s.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 3392. Studies in Shakespeare: Comedies and Romances. 3 Hours.

Students read and analyze a various number of Shakespeare's comedies and romances, spanning from his early years, through the great festive comedies of the late 1590s, through the "Dark Comedies" of the 1600s, to the romances of the last years of his career.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 4330. Writing in the Professions. 3 Hours.

Students further build on their foundation in technical writing by applying the methods previously learned to prepare and edit specialized documents in various professional writing situations.

Prerequisite: ENGL 1301, ENGL 1302, and ENGL 3330.

ENGL 4331. Composition Theory and the Teaching of Writing. 3 Hours.

Students study major theories of composition to learn pedagogical techniques for composition appropriate for elementary and secondary students.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4335. Studies in Rhetoric. 3 Hours.

Students investigate the methods of rhetoric. Topics may include rhetorical theory, style and stylistics, rhetorical criticism, ethical issues in rhetoric, and rhetoric literature.

Prerequisite: ENGL 1301, ENGL 1302.

ENGL 4339. Teaching Literature of Diversity. 3 Hours.

Students read and evaluate literary works by women and by persons of color that are appropriate to teach in the secondary English classroom.

Prerequisite: ENGL 1301 and ENGL 1302, ENGL 2332 or ENGL 2333, and 3 hrs of ENGL 3000 level.

ENGL 4340. Professional Style and Editing. 3 Hours.

Students engage in an advanced study of style and editing in the specialized conventions of technical and professional communication. Students also learn to analyze, generate, and refine technical prose.

Prerequisite: ENGL 3330.

ENGL 4350. Technical Writing Internship. 3 Hours.

In this course, students gain direct work/career experience in service/learning or business/corporate settings. They apply the principles, concepts, and theories acquired in classwork with an emphasis on technical writing in professional organizations.

Prerequisite: ENGL 3378 and ENGL 4340 or special permission from the instructor.

ENGL 4360. The English Romantic Movement. 3 Hours.

Students survey the major works of the Romantic Movement in England, focusing on those of Wordsworth, Coleridge, Byron, Keats, and Shelley.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4363. Studies English Renaissance. 3 Hours.

Students read and evaluate non-dramatic literature of England written between 1500 and 1660.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4364. Methods of Teaching English in Secondary Schools. 3 Hours.

Students learn and apply the techniques of selecting, organizing, and presenting English subject matter and skills to students in secondary school. All English majors and minors working toward a secondary teaching certificate must take this course.

Prerequisite: ENGL 1301, ENGL 1302, ENGL 3374 and ENGL 2332 or 2333.

ENGL 4365. Victorian Literature. 3 Hours.

Students examine the works of major writers of the Victorian period and examine the political, social, and economic background of the age.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4367. History of English Language. 3 Hours.

Students survey the English language and its relationship to other Indo-European languages. Students also study the changes in English sounds, morphology, syntax, and lexicon from Anglo-Saxon times to the present.

Prerequisite: ENGL 1301, ENGL 1302, either (ENGL 2332 or ENGL 2333), and 3 hours of 3000 level ENGL.

ENGL 4369. Studies in Selected Genres in American Literature. 3 Hours.

Students examine major writers, themes, and/or historical movements within a selected genre in American literature. Topics may vary from semester to semester, and at any one point may include subjects such as modern poetry, the short story, the Naturalists, folklore, regional literature, nonfiction prose, or other subjects.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4370. American Regional Literature. 3 Hours.

Students read and evaluate the works of selected Southern/Southwestern writers. Students focus on artistic merit and may also examine additional material such as folklore, local color, and historical documents.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4372. American Literature: 1820's - 1860's. 3 Hours.

Students investigate the emergence of a distinctive American literary art and focus on writers such as Poe, Emerson, Thoreau, Hawthorne, Melville, and Whitman.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4374. Studies In The English Novel. 3 Hours.

Students examine a variety of topics and figures prominent in the British novel.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4375. Special Problems In English. 3 Hours.

Advanced students study individual topics or problems in English. Students may only take the course by permission of the Department Chair. They also may take it for Academic Distinction credit. See, Academic Distinction Program in this catalog.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4376. Tudor And Stuart Drama. 3 Hours.

Students examine the development of the drama in England and the predecessors and contemporaries of Shakespeare.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4377. Literature of the Restoration and 18th Century: 1660-1800. 3 Hours.

Students study the drama, poetry, and prose of the long eighteenth century. Students read the works of writers such as Dryden, Swift, Pope, and Johnson within their cultural contexts.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4378. Studies In World Fiction. 3 Hours.

Students evaluate a variety of topics and figures in world fiction.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4380. Advanced Creative Writing: Nonfiction. 3 Hours.

Students focus on the theory and craft of creative nonfiction and emphasize learning the process of peer review of student writing in the areas of memoir, the personal essay, personal cultural criticism, and literary journalism.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and ENGL 3380.

ENGL 4381. Advanced Creative Writing: Fiction. 3 Hours.

Students focus on the theory of modern and contemporary fiction and emphasize learning the process of peer review of student writing in the areas of the novel and short fiction.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and ENGL 3381.

ENGL 4382. Advanced Creative Writing: Poetry. 3 Hours.

Students focus on the techniques of writing poetry and read related outside sources on poetic theory and form.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and ENGL 3382.

ENGL 4383. The Development of Drama in America. 3 Hours.

Students survey major movements and significant figures in American dramatic literature, reading works of writers ranging from Royall Tyler to the present.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4384. Studies In The American Novel. 3 Hours.

Students examine a variety of topics and figures in the American novel.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4385. Studies In Chaucer. 3 Hours.

Students study in depth the works of Chaucer, placing emphasis on "The Canterbury Tales" as they reflect the man and his times.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4386. Literature Of The Middle Ages. 3 Hours.

Students examine selected works of Old and Middle English literature with some continental works. Topics may include, at various times, works as early as Beowulf (ca. 8th-9th c.) to ones as late as Malory's "Morte D'Arthur" (late 15th c.).

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4387. 20th Century Literature of England, Ireland, & Commonwealth. 3 Hours.

Students study a variety of 20th-century literature by writers associated with England, Ireland, or English-speaking groups (not American) formerly colonized by the British. Students read literary works by major figures, learn of the cultural and historical forces influencing these works and writers, and develop an understanding of the main concepts and movements that distinguish this body of literature. Topics may vary from term to term.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4390. Literary Criticism And Theory. 3 Hours.

Students survey the major modes of literary criticism. Students also review the basic concepts underlying specific theories of literary criticism and their application and impact within a literary field selected by the instructor.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 hours of 3000 level ENGL.

ENGL 4394. Studies in 17th Century British Literature. 3 Hours.

Students engage a range of British literature in the seventeenth century, focusing mostly on the major authors of this period.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2342 or ENGL 2311, and ENGL 3384.

ENGL 4399. Study In Selected Literary Approaches and Topics. 3 Hours.

Students focus on the works originating from a particular author, region, period, theme, genre, or critical approach. Topics vary from semester to semester.

Prerequisite: ENGL 1301, ENGL 1302, either ENGL 2332 or ENGL 2333, and 3 completed hours ENGL 3000-level.

Environmental Science (ENVR)

ENVR 1101. Environmental Science Lab. 1 Hour.**ENVR 1301. Environmental Science. 3 Hours.****ENVR 3305. Legal Aspects Of Pollution Control. 3 Hours.**

A study comparing various state and federal laws with particular emphasis on the State of Texas statutes will be conducted. Nature of evidence for prosecution under these laws will be considered. Fall.

Prerequisite: BIOL 1401, and CHEM 2401.

ENVR 3310. Environmental Sanitation. 3 Hours.

A study of topics relating to public health and sanitation. The causative agents of human diseases of public health importance are characterized, and present knowledge of prevention and control of these diseases is reviewed. Two-hour laboratory. Odd year, Fall. of Chemistry.

Prerequisite: BIOL 1311, BIOL 1111, BIOL 1313, BIOL 1113, BIOL 2420 OR BIOL 3470, and 8 hrs.

ENVR 3320. Solid Wastes And Recycling. 3 Hours.

A study of solid wastes and recycling pertaining to sources, storage, processing, economics, and legal issues involved. Physical and chemical components of wastes and waste processing and their environmental effects will be stressed. Odd year, Spring.

Prerequisite: BIOL 1311, BIOL 1111, BIOL 1313, BIOL 1113, BIOL 2420 or BIOL 3470, ENVR 3305, GEOL 1303, GEOL 1103, and CHEM 2401 and Junior standing.

ENVR 3330. Industrial Hygiene. 3 Hours.

A study of industrial hygiene and occupational health and safety. This course will present the basics of industrial hygiene and work place monitoring. Emphasis will be on fundamentals of work place hazard recognition, techniques of evaluation, and methods of control. Even year, Spring.

Prerequisite: BIOL 1311, BIOL 1111, BIOL 1313, BIOL 1113, CHEM 2401, and PHYS 1301, PHYS 1101, PHYS 1302, PHYS 1102.

ENVR 3430. Water Supply and Waste Water Distribution. 4 Hours.

Water supply, development, treatment and distribution; waste water collection and treatment; water purification and reuse; and the chemistry and ecology of aquatic systems are studied. Two-hour laboratory. Fall.

Prerequisite: BIOL 1301, BIOL 1101, CHEM 2401, and MATH 1420.

ENVR 4095. Special Topics in Environmental Science. 1-3 Hours.

Individual study in specialized areas of Environment Science. To be directed and approved by the Environmental Science advisor. Variable Credit (1-3).

ENVR 4110. Undergraduate Seminar. 1 Hour.

Student discussions of current scientific literature in environmental science. Required of environmental science majors. Fall, Spring.

Prerequisite: Senior standing.

ENVR 4111. Undergraduate Seminar. 1 Hour.

Student discussions of current scientific literature in environmental science. Required of environmental science majors. Fall, Spring.

Prerequisite: Senior standing.

ENVR 4305. Hazardous Waste Management. 3 Hours.

This course deals with the technical and regulatory aspects of handling and disposing of toxic and hazardous wastes based on recently mandated legislation procedures. This course will educate current students in an area that is of major national concern and will update persons already working in the field of environmental science. Spring.

Prerequisite: CHEM 2401, BIOL 1401, GEOL 1403, and Junior standing.

ENVR 4320. Environmental Toxicology. 3 Hours.

(Also listed as BIOL 4320). This course presents basic toxicology as a qualitative and quantitative science of the effects of poisons (toxins) upon the environment, individuals, and populations. The course will also provide a comparison of the toxicology of human and other species' exposure to common environmental contaminants. Two one-hour lectures and one two-hour laboratory. Even year, Fall. CHEM, and Junior standing.

Prerequisite: BIOL 1311, BIOL 1111, BIOL 1313, BIOL 1113, and BIOL 2420 or BIOL 3470; MATH 3379 or BIOL 4374; 8 hrs.

ENVR 4361. Environmental Science Field Experience. 3 Hours.

A supervised off-campus intern work experience in an approved area of Environmental Science with industry, business, or government. This course provides the student with direct professional work experience with industry or governmental entity. Academic credit is based on a written technical report and an oral presentation. Summer. of advanced Environmental Science and approval of instructor.

Prerequisite: 6 hrs.

ENVR 4405. Air Quality. 4 Hours.

Equine Science (EQSC)

EQSC 2364. Equine Science. 3 Hours.

Students engage in a survey of the working and pleasure horse industry; breed selection, breeding, feeding, diseases, unsoundness, and management. Laboratory work involves evaluation, care and grooming, tack and equipment, and basic management. Course Equivalents: AGRI 2364, AGRI 3364

Prerequisite: ANSC 1319 with a grade of C or better.

EQSC 2365. Equine Safety and Handling. 3 Hours.

Students gain knowledge and skills in the proper techniques and behavior when working around horses safely and effectively. Topics include animal and human behavior, handling, and human-animal interaction techniques, controlling and manipulating horse movement, health and animal well-being assessment, and basic management strategies and techniques.

Prerequisite: ANSC 1319 with a grade of C or better.

EQSC 2390. Selection and Evaluation of Horses. 3 Hours.

This course allows the student to become familiar with the basic concepts necessary to select and evaluate horses from a judge's perspective. Evaluation of conformation, balance, symmetry, cadence, suppleness, and impulsion is used to understand these concepts. The ability to prepare and present oral and written reasons to support critical thinking and decision-making skills is reviewed. Course Equivalents: AGRI 2390 .

EQSC 2396. Special Topic. 3 Hours.

Students examine special topics/issues in Equine Science at an introductory level. This course may be repeated up to three times as topics and subject matter changes. Credits 3.

EQSC 3340. Equine Behavior & Training I. 3 Hours.

This course will aid in developing skills to increase horsemanship ability and knowledge so that the student can more effectively communicate with the young horse. The fundamentals of equine behavior are studied. Ground training methods are applied to teach the young horse discipline while increasing the training and value of the horse. Stable management, equipment, and pedigrees will also be discussed. Course Equivalents: AGRI 3340

Prerequisite: EQSC 2364.

EQSC 3355. Foaling Practicum. 3 Hours.

Students engage in practical, hands-on experiences of foaling mares. Endocrinology of parturition, nutritional management of mares and foals, and rebreeding management of post-partum mares are examined.

Prerequisite: EQSC 2364.

EQSC 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of equine skills and practices. Topics may include internships, individual research, and industry studies. Variable Credit (1-6).

Prerequisite: Sophomore standing.

EQSC 4367. Stock Horse Equitation. 3 Hours.

The course will be an in-depth study of equitation including simple and advanced maneuvers that are essential to various types of equine performance events. Students will be expected to strengthen communication skills between horse and rider through various exercises. The university equestrian team will be developed from this course. Junior standing. Course Equivalents: AGRI 4367

Prerequisite: EQSC 3340.

EQSC 4369. Special Topic. 3 Hours.

Students examine special topics/issues in Equine Science at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: Junior standing.

EQSC 4373. Equine Reproduction. 3 Hours.

Students explore the general principles and applications of equine reproduction is presented. Course material may include reproductive anatomy of the mare and the stallion and endocrinology as related to reproduction. Course Equivalents: AGRI 4373

Prerequisite: EQSC 2364 and Junior standing.

EQSC 4379. Equine Nutrition. 3 Hours.

Students engage in an overall evaluation of the equine digestive system, in regards to anatomy, physiology, digestive processes, nutrient requirements, feedstuffs, management, and health care. Current topics in equine nutrition research are also discussed. Junior standing. Course Equivalents: AGRI 4379

Prerequisite: EQSC 2364.

EQSC 4387. Equine Exercise Physiology. 3 Hours.

Students examine current concepts and research regarding physiological changes occurring during the training and conditioning of horses for athletic endeavors. Topics may include the industries of horse sales, training, physical rehabilitation, veterinary medicine, types of tack, and equipment used in training, among others.

Prerequisite: EQSC 2364 and EQSC 4379.

EQSC 4391. Equine Behavior & Training II. 3 Hours.

Students study equine behavior, safety, and training techniques. Laboratory work involves planning record keeping systems, feeding schedules, tack and equipment, training young stock for work and pleasure, and specialized management practices. Course Equivalents: AGRI 4391

Prerequisite: EQSC 3340 and Junior standing.

Euphonium (EUPH)

EUPH 1101. Secondary Performances- Euphonium. 1 Hour.

Students study techniques and musicality related to euphonium in weekly individualized private instruction. Students admitted as an Euphonium primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

EUPH 1201. Individual Performances-Euphonium. 2 Hours.

The course consists of individualized private instruction on the euphonium. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

EUPH 3201. Individual Performances-Euphonium. 2 Hours.

The course consists of advanced individualized private instruction on the euphonium. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

EUPH 3202. Applied Euphonium with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the euphonium. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Fashion Merchandising (FAMD)

FAMD 1332. Introduction to Fashion Merchandising. 3 Hours.

Students examine the history, characteristics, and global interrelationships of all segments of the fashion industry; and identify how fashion is conceived, marketed, and sold. Students learn and demonstrate knowledge of the evolving nature of the fashion business as they relate to the four levels of the fashion industry which include the Primary, Secondary, Retail, and Auxiliary Levels of Merchandising. Students are also introduced to fashion related terminology, resources, processes, practices, industry participants, and career opportunities. Course Equivalents: FACS 1332 .

FAMD 1369. Introduction to Textiles. 3 Hours.

This course provides an introduction to fiber science and technological advances in the manufacture of textile products. It focuses on the complex interrelationships of fibers, yarns, fabrics, finishes, and coloring processes. Offered spring semesters. Course Equivalents: FACS 1369, FACS 2369 .

FAMD 2333. Fashion Merchandising Technology. 3 Hours.

Students explore fashion merchandising and design-related software and technologies used in the fashion and retailing industries. Students are introduced to the computer as a creative tool to upgrade and maintain their skills with the current industry standards. The latest software is taught with an emphasis on fashion industry applications. Course Equivalents: FACS 2333

Prerequisite: FAMD 1332.

FAMD 2366. Fashion in Society. 3 Hours.

Basic fashion theory is studied along with theories of dress and adornment from both psychological and sociological perspectives. The course also examines the individual's attitudes toward and perceptions of personal dress and the appearance of others. Offered fall semesters. Course Equivalents: FACS 2366 .

FAMD 2375. Fashion Promotion. 3 Hours.

Promotion principles are applied to the merchandising of fashion goods through special events, displays of merchandise, and advertising and personal selling. Offered spring semesters. Course Equivalents: FACS 2375, FACS 3378

Prerequisite: FAMD 1332.

FAMD 3325. Digital Fashion Retailing. 3 Hours.

Students employ the principles of omni-channel retailing through the development and management of layered, digitally connected, and coordinated shopping experiences. Settings include retail channels such as brick and mortar, catalog, e-commerce, and mobile with a focus on the customer experience. Students also identify effective interactive marketing strategies, including social media and search engine optimization as they design integrated marketing strategies across various digital platforms. Offered in summer only. Course Equivalents: FACS 3325

Prerequisite: FAMD 1332 and FAMD 2333.

FAMD 3348. Buying I Merchandise Control. 3 Hours.

Techniques of merchandise control including retail mathematics involved in markup, markdown, stock control, open-to-buy, inventory control, pricing and financial statements are studied. Consideration is given to managerial decisions based on the mathematical information encountered in retailing. Taken prior to HUSC 4369 Internship. Offered fall semesters. Course Equivalents: FACS 3348, FACS 3363, FACS 4363

Prerequisite: FAMD 1332, FAMD 2333, or consent of instructor.

FAMD 3368. Fashion Forecasting. 3 Hours.

Students gain a comprehensive understanding of fashion product trends, including researching and interpreting fashion direction, analyzing comparable market offerings, and developing color, style and fabric trends. Customer shopping preferences, revenue optimization, global collaboration, and selling innovation are explored through creative problem-solving. Course Equivalents: FACS 3368

Prerequisite: FAMD 1332 and FAMD 2366.

FAMD 3371. Fashion Merchandising Management. 3 Hours.

This course addresses fundamental principles for successful merchandising of fashion goods, including sales, buying, and marketing procedures. Analysis of consumer and customer demands also are explored. Taken prior to HUSC 4369 Internship. (3-0). Offered fall semesters. Course Equivalents: FACS 3371

Prerequisite: FAMD 2375.

FAMD 3375. Fashion Brand Management. 3 Hours.

Students will develop, build, and sustain a consistent fashion brand strategy. Students will employ creative thinking skills in communicating strategic and engaging brand experiences, promotions, and content specific for fashion products. Students explore multiple types of fashion branding strategies, from luxury brands to mass-market brands. Course Equivalents: FACS 3375

Prerequisite: FAMD 2333 and FAMD 2375.

FAMD 4329. Global Issues in Fashion. 3 Hours.

Students examine the global nature and scope of the production and distribution of fashion goods. Students evaluate current political, social, and economic developments within the international marketplace and develop strategies to address challenges that face the global fashion industry. Offered spring semesters. Course Equivalents: FACS 4329

Prerequisite: FAMD 3371.

FAMD 4348. Buying II: Planning & Allocation. 3 Hours.

Students examine and interpret the influence of merchandise planning and allocation on retail profit and analyze buying patterns and trends. Students develop merchandise plans and strategies for appropriate allocation of inventory. The roles and responsibilities of fashion merchandising buyers, planners, and allocators are explored. Course Equivalents: FACS 4348

Prerequisite: FAMD 2333 and FAMD 3348.

FAMD 4359. Fashion Innovation and Creativity. 3 Hours.

Students use design-based thinking to engage with the unique challenges of product innovation and processes. Students work in cross-functional teams to develop creative innovation strategies applied to the fashion system framework to impact and drive positive change. Offered spring semesters. Course Equivalents: FACS 4359

Prerequisite: FAMD 3368.

FAMD 4367. Seminar in Clothing, Textiles, and Merchandising. 3 Hours.

This course consists of inquiry in special areas of the fashion industry: marketing, production, consumption, socioeconomic and behavioral aspects of consumers. This course also will explore the link between the fashion industry and the physical and mental well-being of producers and consumers of fashion goods. Offered fall semesters. Course Equivalents: FACS 4367

Prerequisite: FAMD 2366, FAMD 3325.

Finance (FINC)

FINC 1307. Personal Finance. 3 Hours. [TCCN: BUSI 1307]

Students study the problems of personal financial management. Topics may include savings, risks, investment considerations, insurance, and taxation. Recommended for non-business majors.

FINC 3310. Financial Institutions and Markets. 3 Hours.

Students explore the process of providing external funds and finance with emphasis on the role of financial institutions and markets. The nature, participants, instruments, and relationships of the money and capital markets are examined.

FINC 3320. Business Finance. 3 Hours.

Students study financial principles as applied to corporate investment and financing decisions. The ethical role of the financial manager is examined as it relates to value creation.

Prerequisite: ACCT 2302 (can be taken concurrently) and MATH 1324 or equivalent.

FINC 3330. Financial Spreadsheet Modeling. 3 Hours.

This course extends coverage of financial principles and presents advanced analytical techniques. This course is designed to augment the knowledge and skills required for upper level finance courses. Topics may include financial math, mastery of spreadsheet skills, advanced capital budgeting and cash flow estimation techniques, working capital management techniques, financial statements and ratios, and advanced risk analysis.

Prerequisite: FINC 3320 (can be taken concurrently)

FINC 4080. Independent Study. 1-3 Hours.

The student may pursue special studies for which a special course is not organized. Variable Credit (1 to 3). Course Equivalents: FINC 4380

Prerequisite: Consent of department chair.

FINC 4085. Special Topic. 1-3 Hours.

This course of faculty-led study is designed to provide undergraduate students exposure to new Finance topics and concepts in a course setting. Variable Credit (1 to 3).

FINC 4315. Entrepreneurial and Small Firm Finance. 3 Hours.

Students study the development, implementation, and control of financial plans, strategies, and policies by owner-managers of small firms. Financing alternatives for small firms are explored. The course is typically offered only during the Spring semester.

Prerequisite: FINC 3320.

FINC 4320. Commercial Banking. 3 Hours.

This course incorporates the roles of banks in the financial services industry and the specific functions in a bank. Case studies are utilized to reinforce the materials and provide first-hand experience about bank operations. The course also presents the roles of the regulatory authorities and their interaction with banks. Special attention is given to recent changes in bank regulation.

Prerequisite: FINC 3310 and FINC 3320.

FINC 4325. Selling Financial Services. 3 Hours.

Students study the process and principles involved in selling financial instruments and services with an emphasis on the special aspects related to selling/marketing in the banking industry. Both financial products and services will be addressed. The course is typically offered only during the Fall semester.

FINC 4330. Commercial Bank Lending. 3 Hours.

Students study theoretical issues and various applications relevant to the commercial lending activities of a bank, using finance principles. Readings and case studies are utilized to provide a contemporary perspective.

Prerequisite: FINC 3320.

FINC 4335. Financial Statement and Credit Analysis. 3 Hours.

Students study theoretical issues and various applications relevant to the analysis of financial statements, using finance and accounting principles. Readings and case studies are utilized to provide a contemporary perspective.

Prerequisite: FINC 3320 .

FINC 4340. International Finance. 3 Hours.

Students are provided with a background in international finance by examining financial circumstances/problems unique to business entities engaged in international business. Topics may include the structure and functioning of the foreign exchange market, the identification, measurement and management of foreign exchange risks, trade financing, investment analysis, financing choices, and financial control of international operations.

Prerequisite: FINC 3320.

FINC 4345. Investments. 3 Hours.

Students analyze securities markets, money market instruments, mutual funds, stocks, bonds, options, futures, and other securities. Theoretical concepts in investment analysis and trading applications are developed. Analysis of derivative securities and their use in the context of hedging are introduced.

Prerequisite: FINC 3320.

FINC 4355. Securities Analysis and Portfolio Management. 3 Hours.

This course is an advanced analysis and study of the techniques for selecting and combining securities into a portfolio. Content may include identifying appropriate investment objectives, structuring an appropriate statement of investment policy, and techniques for investment management. Emphasis is placed on diversification and risk management. This course is typically offered only during Spring semesters.

Prerequisite: FINC 4345.

FINC 4365. Seminar in Financial Derivatives. 3 Hours.

Students study options, futures, and other financial derivative contracts. The course may include the markets, valuation, and specification of these derivative contracts, and their use in corporate financial risk management. This course is typically offered only during the Fall semester.

Prerequisite: FINC 3320 .

FINC 4389. Undergraduate Internship in Finance. 3 Hours.

A course is designed to provide the student with an opportunity to apply academic skills in a practical work environment. (See Finance Internship Coordinator prior to enrolling. A minimum of 150 work hours in a pre-approved finance organization. May be repeated for a maximum of 6 hours credit granted for internship.)

FINC 4390. Managerial Finance. 3 Hours.

This course includes an in-depth study of some of the tools used in financial management. Problems in the valuation of securities, capital costs, capital budgeting, risk analysis, capital structure, financial statement analysis, and dividend policy are stressed.

Prerequisite: FINC 3320.

Flute (FLUT)

FLUT 1101. Secondary Performances-Flute. 1 Hour.

Students study techniques and musicality related to flute in weekly individualized private instruction. Students admitted as a Flute primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

FLUT 1201. Individual Performances-Flute. 2 Hours.

The course consists of individualized private instruction on the flute. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

FLUT 3201. Individual Performances-Flute. 2 Hours.

The course consists of advanced individualized private instruction on the flute. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

FLUT 3202. Applied Flute with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the flute. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Food Science and Nutrition (FSCN)

FSCN 1367. Basic Nutrition. 3 Hours.

Basic principles of nutrition for personal health and wellness. Current concepts in diet adequacy and nutritional needs of individuals is stressed. The influence on healthy diet practices and their relationship to health promotion and disease prevention is the focus. Diet quality and the impact of food choices are explored. Course Equivalents: FACS 1367 .

FSCN 1441. Food Preparation And Selection. 4 Hours. [TCCN: AGRI 1329]

Scientific principles in the preparation of selected basic food products are applied. Consideration is given to the composition and properties of food, methods of preparation and processing to retain nutrients, standards for desirable products, simple meal service, and food economics. Practical application is made through laboratory experiences. (3-2). Course Equivalents: FACS 1441 .

FSCN 2362. Nutrition. 3 Hours. [TCCN: HECO 1322]

Study is made of the fundamental concepts of nutrition. The various nutrients, their sources, metabolism, physiology and interrelationships are emphasized. Healthy eating guidelines for health promotion and disease prevention and requirements for different stages of growth and development for individuals and populations are studied. (3-0). Meets requirement for pre-nursing curriculum. Course Equivalents: FACS 2362

Prerequisite: 3 hours completed in BIOL or CHEM and 3 hours completed in MATH.

FSCN 3329. Nutrition through the Lifespan. 3 Hours.

Students in this course focus on nutrient needs throughout the lifespan and the physiological basis for these needs. Instruction focuses on the interrelationships of diet, nutrition, body composition, emotional development, behavior, and aging. Factors related to the development of food behaviors at various life stages and current research trends focused on lifespan nutrition issues are explored. Offered fall semesters. Course Equivalents: FACS 3329

Prerequisite: FSCN 2362 with a C or better and 45 credit hours.

FSCN 3330. Professionalism in Dietetics. 3 Hours.

Students gain knowledge of professional practice expectations for the nutrition and dietetics practitioner level of practice. Topics will address the governance of nutrition and dietetics practice, such as the Scope of Practice for the Registered Dietitian Nutritionist and the Code of Ethics for the Profession of Nutrition and Dietetics. Other topics address state licensure and certification in the practice of nutrition and dietetics, individual National Provider Identifier (NPI), and coding and billing of nutrition and dietetics services to obtain reimbursement for services from public or private payers, fee-for-service, and value-based systems.

Prerequisite: FSCN 2362.

FSCN 3339. Community Nutrition. 3 Hours.

This course examines the role of nutrition in health promotion and disease prevention in community groups. Tools for developing community nutrition interventions are emphasized. Students will implement a community intervention using behavior theories, needs assessment, developing goals, objectives and program evaluations. Government food and nutrition programs and health care delivery system are also examined. Students will study the legislative, sociological, and scientific aspects of public and community health. Offered spring semesters. Course Equivalents: FACS 3339

Prerequisite: FSCN 2362 with a C or better and 45 credit hours.

FSCN 3367. Food Science. 3 Hours.

This course provides fundamentals of physical and chemical structures and properties of food materials and foods during harvesting, preparation, processing, preservation and storage. (1-4). Offered spring semesters. , FSCN 1441 and FSCN 2362. Course Equivalents: FACS 3367

Prerequisite: CHEM 4 hrs.

FSCN 3370. Nutritional Pathways. 3 Hours.

This advanced course establishes knowledge and understanding of nutritional concepts in the biochemical context. Biochemical, physical and metabolic functions of the nutrients; pathways of nutrients from ingestion, assimilation and metabolism; digestive and metabolic interactions between drugs and nutrients are discussed. (3-0). Offered fall semesters. Course Equivalents: FACS 3370

Prerequisite: CHEM 1412, Junior Standing, and FSCN majors only.

FSCN 3380. Advanced Nutrition. 3 Hours.

Course focus is on concepts of normal nutrition in relation to the chemistry and physiology of the human body; analysis of methods used in assessing human nutrition status; evaluation of current nutritional problems. Offered spring semesters. Course Equivalents: FACS 3380, FACS 4378

Prerequisite: FSCN 2362 with a C or better and FSCN 3370.

FSCN 3445. Quantity Food Purchasing, Preparation, & Service. 4 Hours.

Course provides experience in menu planning, food preparation, service, and use of institutional equipment in quantity food service. Principles and methods of buying, preparing, and serving food for various types of quantity food facilities are considered. Factors affecting food quality, food costs, and quantity food production as related to the time factor are emphasized. Lab experience is arranged with SHSU Dining Services. Students must complete a minimum of 24 lab hours by participating in the lab activities and observing personnel, equipment, layout, food safety, food production and service procedures. (2-2). Course Equivalents: FACS 3445

Prerequisite: FSCN 1441 or FSMG 2441, 45 hours completed.

FSCN 4360. Clinical Dietetics I. 3 Hours.

Study of medical nutrition therapy. Course includes current diet manipulations for disease conditions including the provision of enteral and parenteral nutrition. Nutritional adequacy for disease conditions and the impact of sociological, economic, psychological factors on nutritional status is addressed. Case studies and work with clients to gain hands-on knowledge is required. Offered fall semesters. FSCN majors only. Course Equivalents: FACS 4360

Prerequisite: FSCN 3380 and FSCN 4371, FSCN majors only.

FSCN 4361. Clinical Dietetics II. 3 Hours.

Continuation of the study of the applications of medical nutrition therapy from FACS 4360. It includes current diet therapy for a variety of disease conditions including the provision of enteral and parenteral nutrition. Nutritional adequacy for disease conditions and the impact of sociological, economic, psychological factors on nutritional status is addressed. It includes class discussions, case studies and work with clients to gain hands-on knowledge. Students utilize the scientific literature to understand evidence-based practice. Offered spring semesters. FSN majors only. Course Equivalents: FACS 4361

Prerequisite: FSCN 4360.

FSCN 4370. Advanced Food Service Organization and Management. 3 Hours.

Course is focused on principles of organization and management as they relate to food service systems; development of managerial and motivational skills; communications; decision making; management by objectives. (3-0). Offered spring semesters. Course Equivalents: FACS 4370

Prerequisite: FSCN 3445.

FSCN 4371. Nutrition Assessment. 3 Hours.

A study of nutrition assessment methods for determining nutrition diagnoses and care. Skills development in obtaining nutrition histories, diet analysis, motivational interviewing, body composition and performing nutrition-focused physical examinations. Students will learn to develop nutrition prescriptions and counseling plans as well as documentation of nutrition care. Experiential learning is utilized. Offered spring semesters. Course Equivalents: FACS 4371

Prerequisite: FSCN 3370 or concurrent enrollment, FSCN majors only.

FSCN 4372. Nutrition Counseling and Education. 3 Hours.

Students gain skills in nutrition counseling, education, and communication to improve food and nutrient intake for health, wellness, and medical nutrition therapy in diverse individuals and groups across the lifespan. Opportunities for student demonstration will reinforce methods to facilitate behavior change and/or behavior modification.

Prerequisite: FSCN 3329.

FSCN 4373. Cultural Food Practices. 3 Hours.

Cultural food practices from around the world will be studied. Students will learn various nutrition education strategies used to make effective dietary changes in keeping with cultural norms. An exploration and appreciation of how cultural factors affect our food patterns will assist in developing cultural competency. Offered fall semesters. Course Equivalents: FACS 4373

Prerequisite: FSCN 2362, FSCN 3339, and FSCN 3380.

FSCN 4374. Research in Nutrition Science. 3 Hours.

Students gain required knowledge and skills in research methodology in nutrition science, interpretation of research literature, and integration of research principles into evidence-based practice guidelines for medical nutrition therapy. Students learn to integrate scientific information and translate nutrition research into practice while developing effective and professional oral and written communication and documentation. Students gain knowledge to locate, interpret, evaluate, and use professional literature to make ethical, evidence-based practice decisions; select and use appropriate information technologies to locate and apply evidence-based guidelines and protocols; and apply critical thinking skills.

Prerequisite: CHEM 2123 and CHEM 2323, Junior Standing.

Food Service Management (FSMG)

FSMG 1331. Introduction to the Hospitality Industry. 3 Hours.

An overview of the hospitality industry, this course includes restaurants, hotels and resorts. Includes historical perspective, analysis of the industry in terms of professional opportunities and the future outlook for the industry. (3-0). Offered fall semesters. Course Equivalents: FACS 1331 .

FSMG 2441. Meal Management in Hospitality. 4 Hours.

This course includes choice, purchase, preparation and service of meals in hospitality settings. Through laboratory experiences emphasis is given to table settings and appointments, various forms of meal service and special occasion functions. The importance of acceptable social procedures and aesthetic values related to the above activities are stressed. (3-2). Offered spring semesters. Course Equivalents: FACS 2441 .

FSMG 3334. Lodging Operations. 3 Hours.

A study is made of principles involving basic operations of hospitality facilities including guest expectations, management of services, budget control, personnel management and security. (3-0). Offered spring semesters. Course Equivalents: FACS 3334

Prerequisite: FSMG 1331.

Forensic Science (FORS)

FORS 3331. Foundations of Applied Anthropology. 3 Hours.

This is an introductory course on the study of the biology of humans from an applied anthropological perspective. It is a foundation course for students interested in careers in applied anthropology, biological or forensic anthropology, nursing, medicine, or crime scene investigation. Students are introduced to all four fields of anthropology: archaeology (prehistoric and historic human activity), cultural anthropology (medical practices in past and present cultures), biological anthropology (primates, basic genetics, human evolution, human biological diversity, and forensic anthropology), and linguistics (language and communication and forensic linguistics) and how these fields are intertwined and applied in a variety of disciplines. The course content focuses predominantly on biological aspects of man and in human society. Course Equivalents: CRIJ 3331 .

FORS 3366. Forensic Science. 3 Hours.

Students are introduced to a wide variety of forensic science disciplines. Students gain basic knowledge of evidence handling, fingerprints, impression evidence, trace materials, firearms and toolmarks, serology and forensic DNA, controlled substances and toxicology. Course Equivalents: CRIJ 3366 .

FORS 3380. Introduction to Forensic Chemistry. 3 Hours.

Students are provided an introduction to forensic chemistry. Current practices, technologies, and techniques are discussed for some of the most common forensic chemistry disciplines.

Prerequisite: CHEM 2325 and FORS 3366.

FORS 3420. Human Osteology: Analysis of Human Bone. 4 Hours.

Students thoroughly examines the human musculoskeletal system, covering the structure and function of bone including bone growth and development and the distinction between juvenile and adult skeletal elements. The course is designed to equip the student with thorough knowledge of the normal appearance of the human skeleton and its variation caused by population variation, genetic disorders, diseases, or trauma. Course Equivalents: CRIJ 3420 .

FORS 4077. Special Topics in Forensic Science. 1-4 Hours.

This course is designed to give advanced undergraduate students academic flexibility by allowing them to take structured courses on emerging topics or other matters about which there are no courses already approved in the catalog. Variable Credit (1-4).

Prerequisite: Senior standing.

FORS 4310. Physical Evidence Techniques. 3 Hours.

Students are provided an overview of physical evidence concepts and identification techniques. Pattern recognition of physical evidence, including fingerprints, bloodstains, gunshot residue, tire prints, shoeprints, fire investigation, firearms, and digital evidence will be discussed. The use of electronic databases in pattern evidence comparison are addressed. Prerequisite: FORS 3366.

FORS 4317. Applied Statistics for Forensic Science. 3 Hours.

Students apply statistical methods to forensic science problems. Concepts including data distributions, sampling, significance and confidence intervals, likelihood ratios, probability, conditional probability, Bayes' theorem, and odds may be included. Measurement uncertainty and metrological traceability are also covered to meet forensic laboratory accreditation requirements. Statistics are applied to problems relating to topics such as forensic toxicology, seized drugs, trace evidence, firearms, and questioned documents.

FORS 4320. Fundamentals of Forensic Biology. 3 Hours.

Students explore fundamental principles of forensic biology including serology and DNA. Current technologies and procedures used within the field of forensic biology are discussed.

Prerequisite: FORS 3366.

FORS 4330. Fingerprint Examination. 3 Hours.

Students learn the process of fingerprint identification, including the nature, physiological properties and morphogenesis of fingerprints. Students cover the different methods of physical and chemical development of fingerprints from various surfaces, the interpretation of fingerprint patterns and their classification, as well as the methodology of Analysis, Comparison, Evaluation and Verification (ACE-V) that fingerprint examiners apply in their casework.

Prerequisite: FORS 3366 & FORS 4310.

FORS 4343. Advanced Techniques in Forensic Anthropology. 3 Hours.

Students are provided practical experience in the application of various methods that aid in the identification of unknown skeletal remains, such as geometric morphometrics and digital imaging. Students gain understanding in the histology and biomechanics of bone and identify and differentiate bone pathology from bone trauma. In addition, students are trained in proper writing in forensic anthropology and manuscript preparation, including photography of bone trauma and pathology.

Prerequisite: FORS 4442.

FORS 4364. Crime Scene Investigation Techniques. 3 Hours.

Students are provided a foundational overview of criminalistics from the standpoint of crime scene investigation. Theoretical understanding and mock experience in crime scene processing is provided. Basic criminalistic and laboratory techniques are introduced and discussed. Course Equivalents: CRIJ 4364

Prerequisite: FORS 3366.

FORS 4380. Ethics and Professional Practice. 3 Hours.

Students are provided an overview of ethics and professional practice in forensic science. Ethical dilemmas, bias, and organizational culture are explored.

Prerequisite: FORS 3366.

FORS 4442. Introduction to Forensic Anthropology. 4 Hours.

Students are equipped with the methodologies and applications of forensic anthropology. The course includes extensive hands-on exercises working with the human skeletal system. Students learn and apply the methods used in building the human biological profile, which includes the determination of sex, age, ancestry, and stature based on skeletal features. Students learn the biomechanics of bone and identify skeletal pathologies and/or trauma. Course Equivalents: CRIJ 4442

Prerequisite: FORS 3420.

French (FREN)

FREN 1411. Elementary French. 4 Hours.

Students who have no previous instruction in French study an introduction to French pronunciation, vocabulary, and basic language codes stressing an oral approach to the language with special emphasis on conversation and oral drill. A weekly one-hour language laboratory is required. Competent speakers of French or those with considerable knowledge of the language should take the CLEP prior to registering. Grade of C or better required in FREN 1411 in order to continue to FREN 1412. Instruction is in French.

FREN 1412. Elementary French. 4 Hours.

This course is a continuation of FREN 1411. Students discuss and drill language codes with more complexity. Stress is placed on aural and oral skills. A one-hour language laboratory period weekly is required. Competent speakers of French or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411 or equivalent.

FREN 2311. Intermediate French I. 3 Hours. [TCCN: FREN 2311]

A continuation of FREN 1412. Students study readings of medium difficulty as a basis for reading and aural comprehension as well as for oral communication. Competent speakers of French or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411 and FREN 1412 or equivalent.

FREN 2312. Intermediate French II. 3 Hours. [TCCN: FREN 2312]

A continuation of FREN 2311. Students focus on practical needs for communication. Competent speakers of French or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, and FREN 2311 or equivalent.

FREN 3362. Survey of French Literature I. 3 Hours.

Students in this course examine topics and texts in French literature from pre-medieval to the seventeenth centuries. Students read, analyze and discuss the texts that have shaped European history, society, and culture. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 3363. Survey of French Literature II. 3 Hours.

Students in this course examine topics and texts in French literature from the eighteenth century to the present. Students read, analyze, and discuss the texts in French that have shaped European history and society, and culture. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 3365. French Grammar And Stylistics. 3 Hours.

Students focus on fluent usage of oral and written French. Students intensively study selected written work with the purpose of mastering mid-level proficiency skills. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 3367. French Phonetics and Conversation. 3 Hours.

Students study the basic theory of French pronunciation and intonation. With ample opportunity for drill, students achieve an intermediate level of oral proficiency. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 3380. French Culture & Civilization. 3 Hours.

Students portray the overall picture of the role played by French culture and civilization throughout the world. This course will provide cultural background for French majors or minors. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4075. Individual French Readings. 1-6 Hours.

Individual students who may need study of a particular era or genre or author can enroll. Enrollment in this course is restricted and approval for such must be obtained from the Program Coordinator. The course may be repeated for credit as content varies. Variable Credit (1-3). Course Equivalents: FREN 4375

Prerequisite: Advanced standing in French or consent of instructor and department chair.

FREN 4364. Modern French Usage and Conversation. 3 Hours.

Students of all levels, including those seeking oral proficiency focus on extemporaneous speech and conversation dealing with modern topics. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4370. Seminar in Selected Topics of Literacy, Language, and Civilization. 3 Hours.

Students conduct an in-depth study of a selected topic by which French majors and minors, tracking specific skills, may acquire the necessary knowledge of francophone culture and/or the ability to speak, read, and write the French language at an advanced level. The topic to be explored will change from semester to semester. The course may be repeated for credit as the content varies.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4377. French for Business Communication. 3 Hours.

Students focus on vocabulary, expressions and language used in oral and written business communication in French. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4379. Francophone Literature. 3 Hours.

Students survey the major topics in Francophone literatures and film from the French-speaking regions of the world. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4380. French in North America. 3 Hours.

Students examine linguistic variations of French in North America by examining phonological, lexical, syntactic, and morphological variations. North American Francophone communities, such as Quebec, Caribbean Islands (e.g., Martinique, Guadeloupe, Haiti), and Louisiana, are examined through history, social context, political situations, and demographic context. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4381. Translation and Interpretation. 3 Hours.

Students examine translation and interpretation strategies from French into English and vice-versa. Students analyze and practice methods, techniques, and practical situations where French translation and interpretation into English, and English translation and interpretation into French, are required for communication. Instruction is in French.

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

FREN 4382. French for Healthcare. 3 Hours.

Students examine vocabulary and idiomatic expressions used in healthcare. Students acquire fluency in oral and written French in topics relevant to healthcare professionals, such as the human body, diseases, illnesses, therapies, medication, and healthcare administration. Instruction is in French. Credit 3

Prerequisite: Grade of C or better in FREN 1411, FREN 1412, FREN 2311, and FREN 2312 or equivalent.

Geography (GEOG)

GEOG 1300. People, Places, and the Environment. 3 Hours. [TCCN: GEOG 1302]

Students are introduced to the discipline of geography, or the study of the world from a spatial perspective. This includes an examination of both the cultural and physical environments and the social, economic, political, and environmental factors that influence human activities and societies across the globe. Students will also be introduced to geospatial technologies (e.g., GPS and Google Satellite Imagery) currently utilized to investigate geographical issues. The course may involve field trips that incorporate course material. Course Equivalents: GEOG 1321 .

GEOG 1401. Weather and Climate. 4 Hours. [TCCN: GEOL 1447]

The basic concepts of meteorology and climatology are introduced. Atmospheric temperature, pressure, winds, moisture, and air masses and storms are systematically covered, followed by an overview of the major climates and ecosystems of the earth. Environmental problems related to weather, climate, and ecosystems are considered throughout. The lab portion of weather and climate is an activity-related treatment of the basic components of meteorology and climatology. Specific topics covered are similar to the lecture. Course Equivalents: GEOG 1301 .

GEOG 2341. Physical Geography. 3 Hours. [TCCN: GEOG 1301]

Students examine the basic physical and biological systems of planet Earth, including the atmosphere, oceans, landforms, soils, and ecosystems. Emphasis is placed on understanding the distribution, scale, and dynamic inter-relationships and processes, which shape the physical and biological landscape as well as the ways in which humans alter the environment and are, in turn, affected by the environment.

GEOG 2355. World Regional Geography: Europe, Asia, and Australia. 3 Hours. [TCCN: GEOG 1303]

Students are provided a general overview of the land and people. Topics discussed may include the physical environment, cultural characteristics and the various ways people live and make their living. Attention is focused upon the relationships which exist between location, the physical environment and human activity. Examples of countries covered are Russia, Germany, France, China, Japan, and United Kingdom.

GEOG 2356. World Regional Geography: Latin America, Africa, South Asia. 3 Hours. [TCCN: GEOG 1303]

Students are provided a general overview of the land and people. Topics discussed may include the physical environment, cultural characteristics and the various ways people live and make their living. Attention is focused upon the relationships which exist between location, the physical environment and human activity. Examples of countries covered are Mexico, Brazil, Argentina, Egypt, Republic of South Africa, Israel, Iran, and India.

GEOG 2364. Geo-Spatial Technology. 3 Hours.

Students are introduced to technologies, such as geographic information systems (GIS) and global positioning systems (GPS), that are used to map and study the Earth. The emphasis is placed on the application of these technologies in areas of environmental and natural resources management, business and marketing, and law enforcement and national security. Course Equivalents: GEOG 3364 .

GEOG 2464. Introduction to Geographic Information Systems (GIS). 4 Hours.

Students are introduced to the basics of geographic information systems (GIS) with an emphasis on environmental and resource management applications. Students design and develop a digital spatial database, perform spatial analyses, create hardcopy maps, and generate reports. Students are introduced to several GIS software packages. This course does incorporate a laboratory component. Course Equivalents: GEOG 4464 .

GEOG 3301. Environmental Geography. 3 Hours.

Environmental Geography is a study of the spatial dimensions of the interaction between humans and their physical environment. Key principles of how the earth and the earth's ecosystems work, how they are interconnected, and how humans use and impact these natural resource systems will be introduced. Course Equivalents: GEOG 2301 .

GEOG 3310. Sustainable Development. 3 Hours.

Sustainable development is both a fundamental concept used to understand the modern world and a tool to address global issues. Students examine this concept using the framework of geography and a global perspective. Students focus on the intersections of environment and society, including environmental, economic, and social barriers to development, environmental and social impacts of development, and the role of environmental sustainability in achieving global development goals.

Prerequisite: 60 credit hours and 3hrs of GEOG.

GEOG 3320. Sustainability & Environment. 3 Hours.

Students investigate and assess the impacts that human activity can have on the environment and will seek to identify innovative, cross-disciplinary solutions to many of the world's most pressing environmental challenges. Given that Sustainability Science involves making decisions and taking actions that are in the interest of protecting the natural world, course topics will include current sustainability issues related to population growth, agriculture, natural resources, energy usage, habitat degradation and ecological economics. This course is typically be offered every other fall semester. Also offered as BIOL 3320. Course Equivalents: BIOL 2320, BIOL 3320, GEOG 2320

Prerequisite: BIOL 1401 or (60 credit hours and 3 hours of GEOG).

GEOG 3340. Meteorology. 3 Hours.

Students explore weather phenomena and the atmospheric processes that generate them as well the methods used to measure the controlling factors. Topics may include atmospheric thermodynamics, black body radiation, weather instruments, weather forecasting, satellite imagery, Doppler radar, and numerical models.

Prerequisite: GEOG 1401; MATH 1314 or MATH 1410; or permission of instructor.

GEOG 3342. Climatology. 3 Hours.

Students explore the meaning of the term climate, processes that affect climate, how Earth's climate has changed, and effects of climate change on humans and the environment. Topics may include characteristics of Earth's atmosphere, climate teleconnections, climate interactions with other components of the Earth system, water cycle, climate classifications, potential causes of climate change, climate modeling, and climate policy.

Prerequisite: GEOG 1401; MATH 1314 or MATH 1410; or permission of instructor.

GEOG 3350. Cultural Geography. 3 Hours.

Students focus on the concept of culture from a spatial or geographical perspective, examining culture as it relates to the geographic landscape. Topics may include the spatial dynamics of language, religion, race, ethnicity, music, sport, folk and popular cultures, and the built environment. In addition, students are provided an examination of symbolic landscapes, contested spaces, subaltern geographies, representations of place in film and literature, gendered spaces, and place-situated identities.

GEOG 3352. Tourism Geography. 3 Hours.

Students are provided an introduction to the geography of tourism. Topics may include the historical development of travel and tourism, place promotion, location of tourism destinations, geographic resources of tourism, and the physical and social outcomes of tourism.

Prerequisite: GEOG 1321 or GEOG 2355 or GEOG 2356.

GEOG 3358. Historical Geography of the United States. 3 Hours.

Students survey the changing geography of the United States including initial exploration, European perception of North America, geographical expansion of the United States to the Pacific, and geographical factors underlying the urbanization and industrialization of the nation.

GEOG 3359. Regional Geography: the United States and Canada. 3 Hours.

Students are provided a general overview of the land and people of the United States and Canada. Topics covered may include the physical environment (weather patterns, landforms and water resources), cultural differences, and the various ways people live and make their living. Attention is focused upon the relationships which exist between location, the physical environment and human activity. This course is available on-line and via traditional classroom delivery.

GEOG 3362. Map Use & Map Interpretation. 3 Hours.

Students learn how to use and interpret topographic maps and helps them to develop an appreciation of their use as tools by geographers.

Students are familiarized to map projections and their limitations, various coordinate systems, map measurements, GPS, and the basics of air photo interpretation.

GEOG 3363. Computer Cartography. 3 Hours.

Fundamentals of thematic mapping, including appropriate usage, projections, base-map compilation, data measurement and analysis, map design and construction, color principles, and other cartographic concepts are emphasized.

Prerequisite: GEOG 2464.

GEOG 4075. Readings in Geography. 1-3 Hours.

A course designed specifically for advanced students of geography who are capable of independent study. Registration is permitted only upon approval of the program coordinator. This course may be taken for Academic Distinction credit. See Academic Distinction Program in this catalog.

Variable Credit (1-3). Course Equivalents: GEOG 4375 .

GEOG 4076. Special Topics. 1-3 Hours.

This course of faculty-led study is designed to explore geographical topics and concepts in a course setting. Students engage in either an in-depth, interdisciplinary study of a particular geographic region in the world, or a systematic study of a geographic topic. The course is repeatable for different regions or different topics. Variable Credit (1 to 3).

Prerequisite: GEOG 1321, or GEOG 2355, or GEOG 2356, or permission of instructor.

GEOG 4100. Earth and Environment Seminar. 1 Hour.

Students majoring in Environmental Science, Geography, or Geology discuss environmental problems and career opportunities with professionals in the field.

Prerequisite: Senior Standing.

GEOG 4311. GIS in Law Enforcement. 3 Hours.

Students learn applications of geospatial technologies in law enforcement. Topics include methodologies and characteristics of GIS, intelligence, and crime incident data, GPS, imagery, heat mapping, and change detection related to law enforcement.

Prerequisite: GEOG 2464.

GEOG 4330. Hydrology and Water Resources. 3 Hours.

Students examine the hydrologic cycle with an emphasis on surface water processes. Specific topics may include precipitation, infiltration, evapotranspiration, fluvial processes, and sediment transport. Using the physical concepts and equations related to these topics, students analyze water-related hazards, including flooding and drought, as well as water management and policy. While Texas-specific issues are emphasized, students explore both U.S. and international geographies of hydrology, water resources, and water management. Course Equivalents: GEOG 4430

Prerequisite: (GEOL 1403 or GEOG 2341 or GEOL 1405 or GEOG 4432) and (MATH 1314 or MATH 1342 or MATH 1420); or permission of instructor.

GEOG 4331. Conservation of Natural Resources. 3 Hours.

Students explore the impact of human activities on the natural world, environmental protection, and the wise use of the earth's resources. Topics may include: environmental history, economics, law and ethics, ecology, population issues, agriculture and grazing, soil conservation, forestry, endangered and exotic species, water availability and water pollution, hazardous and solid waste management, air pollution (including global warming), energy resources (fossil, nuclear, and renewable), and the impact of technology on the future health of the planet.

GEOG 4333. Field Studies. 3 Hours.

Use of geospatial technologies such as Global Positioning Systems (GPS), laser surveying, digital aerial photography and computerized mapping (GIS) are stressed. Applications of these technologies will include surveying, water resources, forestry, soil science, wetlands delineation, urban and transportation planning, automobile accident reconstruction and crime scene evidence recovery. Half of the class meetings take place at a variety of outdoor locations.

GEOG 4351. Economic Geography. 3 Hours.

Students examine of the importance of location to human activity. The locational characteristics of primary, secondary, and tertiary economic activities are examined, with an emphasis on land use and urban form, its theory, and descriptive analysis as well as an explanation of market forces and their consequences. Writing enhanced. Course Equivalents: GEOG 3351 .

GEOG 4356. Urban Geography. 3 Hours.

Students are introduced to the scope and nature of urban areas from a geographical or spatial perspective. Students focus on the spatial structure of urban areas and examine the geography of cities using an urban systems approach. Emphasis is placed on the North American city and its problems: land use, transportation, political fragmentation, physical environment, demographic and social change, economic dynamics, residential patterns, urban culture, poverty, etc. Trends in urbanization in both developed and developing worlds are discussed. Writing enhanced. **Prerequisite:** GEOG 1321 or GEOG 2355 or GEOG 2356.

GEOG 4357. Population Geography. 3 Hours.

Students examine spatial patterns and processes influencing the distribution, density, composition, and growth in human populations. Students focus on migration, and to a lesser extent, on fertility and mortality together with socio-economic, political, and environmental causes and consequences of population dynamics that vary between regions and over time. Writing enhanced.

Prerequisite: GEOG 1321 or GEOG 2355 or GEOG 2356.

GEOG 4358. Geography of Texas. 3 Hours.

Students engage in a survey of the regional geography of Texas. Consideration is given to the significance of primary and secondary activity within the state, urbanization, and potential for development.

GEOG 4359. Transportation Geography. 3 Hours.

Students are introduced to the concepts, theories, and methods of transportation geography. Students cover transportation infrastructure, modes of terminals, transportation economics, urban transportation, logistics, and transportation planning. In addition, students course cover various analytical techniques applied in transportation analysis, such as network analysis, gravity models, location-allocation modeling, and geographic information systems in transportation studies.

Prerequisite: GEOG 1321 or GEOG 2355 or GEOG 2356 or permission of instructor.

GEOG 4360. Cultural Field Study. 3 Hours.

Students focus on a number of topics and concepts that fall within the sub-discipline of cultural geography. Students engage in place-based learning, with the primary emphasis being a field experience that directly exposes students to processes and concepts introduced and discussed in the classroom. These may include migration, urbanization, economic transformations, demographic change, social and technological change, racial segregation, civil rights, heritage tourism and other topics. Writing enhanced.

Prerequisite: 6 GEOG advanced hours or permission of Instructor.

GEOG 4361. Geographic Information Systems for Public Health. 3 Hours.

Students cover the theory and application of Geographic Information Systems (GIS) for public health. Topics include an overview of the principles of GIS in public health and practical experience in its use. In addition, students cover the application of GIS mapping and analyzing the geographic distribution of populations at risk and health outcomes. The practical component involves the use of desktop GIS software packages.

GEOG 4365. Applied Geographic Information Systems (GIS). 3 Hours.

Applied GIS is designed to meet the needs for a highly applied course with realistic practical training extending the fundamental principles learned in Introduction to Geographic Information Systems (GEOG 2464). The application of GIS technology to mapping, modeling and management of large data bases are emphasized.

Prerequisite: GEOG 2464.

GEOG 4367. GIS Programming. 3 Hours.

Students learn computer programming principles and their applications in a Geographic Information Systems (GIS) environment, as well as modern programming languages for working within a variety of GIS software platforms. Students master the use of programming scripts to manipulate basic mapping objects, complete geo-processing tasks, debug and error handling, and create custom geospatial tools.

Prerequisite: GEOG 2464 or approval of instructor.

GEOG 4399. Environmental and Geoscience Internship. 3 Hours.

Students apply environmental, geoscience, and/or GIS skills in a work environment. Students work with a faculty advisor and their employer to complete employer-assigned internship requirements.

Prerequisite: Junior Standing.

GEOG 4432. Geomorphology. 4 Hours.

Students focus on surficial processes and the resulting landforms. Specific topics may include landscape processes associated with streams, glaciers, wind, coasts, mass wasting, weathering and soil development, and geologic structure. Surface processes are also discussed in the context of human impacts and the environment. Labs emphasize landform analysis and applied problems through interpretation of topographic maps and aerial imagery and field trips. Two-hour laboratory.

Prerequisite: (GEOL 1403 or GEOL 1405 or GEOG 2341) and (MATH 1314 or MATH 1342 or MATH 1420 or MATH 3379); or permission of instructor.

GEOG 4468. Remote Sensing. 4 Hours.

Students are introduced to the methods used to analyze and interpret aerial photography and satellite imagery. Emphasis is placed on multispectral satellite imagery, digital image processing, and land use and land cover analysis using remotely sensed imagery. Lab included.

Prerequisite: GEOG 2464.

Geology (GEOL)

GEOL 1403. Physical Geology. 4 Hours. [TCCN: GEOL 1403]

Students are introduced to the materials, processes, and structure of the earth. Topics may include earthquakes, volcanoes, plate tectonics, mountain building, weathering and erosion, glaciation, oceans, and mineral resources. The laboratory taken concurrently with the lecture includes experiences that involve the study of rocks, minerals, and map interpretations. Course Equivalents: GEOL 1303 .

GEOL 1404. Historical Geology. 4 Hours. [TCCN: GEOL 1404]

Students are introduced to the history of the earth and its past inhabitants, including a section on the dinosaurs and their extinction. Students are given a broad overview of the tectonic evolution of the planet, indicated by various major mountain-building events; ancient environments and changing sea levels recorded in sedimentary deposits; and the evolution of life represented by the fossil record. The laboratory taken concurrently with the lecture includes the study of common animal and plant fossils and problems that illustrate practical applications of geological principles. Course Equivalents: GEOL 1304 .

GEOL 1405. Geologic & Environmental Hazards. 4 Hours. [TCCN: GEOL 1405]

Students are introduced to the interrelationship between humans and the geologic environment, which includes the potential hazards posed by geologic processes and the planning that needs to be done to lessen their impact. It is designed to give students an overview of the fundamental Earth Science and natural hazards, including causes and effects of earthquakes, tsunamis, volcanoes, floods, landslides, hurricanes, climate change, etc. Earth materials and their uses by humans are also emphasized. Discussion will focus on personal and societal adjustments to these hazards. Course Equivalents: GEOL 1305 .

GEOL 1436. Foundations of Science. 4 Hours.

Students focus on the nature of science as a reliable method of acquiring knowledge about the natural world. Students learn how to apply key scientific facts, concepts, laws and theories to distinguish science from non-science, bad science, and pseudoscience by analyzing a variety of claims and case studies. By employing an innovative, interdisciplinary approach to science education, this course is designed to increase science literacy and critical thinking skills for introductory-level science students. Students must enroll concurrently in the corresponding lab for this course. Course Equivalents: BIOL 1436, GEOG 1436, ISCI 1436 .

GEOL 3301. Field Methods. 3 Hours.

Students are provided experience with common field techniques used in geologic mapping and geologic investigations. An emphasis is placed on techniques and skills used for systematic field observations and data collection for construction of stratigraphic columns, structural cross-sections, and the development of geologic maps. The course has a mandatory two-week field component.

Prerequisite: GEOL 1304/GEOL 1104 or GEOL 1404 and GEOL 1303/GEOL 1103 or GEOL 1403 or GEOL 1305/GEOL 1105 or GEOL 1405.

GEOL 3326. Environmental Geology. 3 Hours.

Students are introduced to geological processes and materials, and how they affect people and the environment. Specific topics include earthquakes, volcanism, mass wasting, floods, coastal hazards, and climatic change. Optional topics may include such items as energy and water resources, subsidence, and waste disposal.

Prerequisite: GEOL 1303/GEOL 1103 or GEOL 1403 or GEOL 1305/ GEOL 1105 or GEOL 1405.

GEOL 3330. Oceanography. 3 Hours.

Students engage in a survey of the general principles of oceanography is made. The geology of ocean basins, tide-water processes and the chemistry of sea water are studied. Biophysics of the sea and environmental problems are considered.

Prerequisite: GEOL 1303/1103 or GEOL 1403 or GEOL 1305/1105 or GEOL 1405.

GEOL 3332. Forensic Geology. 3 Hours.

Students cover many of the basic geological principles and techniques used in solving crime. A significant part of the course involves case studies as well as hands-on field and laboratory analyses.

Prerequisite: GEOL 1303, GEOL 1103 or GEOL 1403 plus CHEM 1311, CHEM 1111 or CHEM 1411 plus CHEM 1312, CHEM 1112, or CHEM 1412, and MATH 1316.

GEOL 3404. Mineralogy. 4 Hours.

Students cover crystallography, genesis of minerals, identification and classification of minerals, and optical mineralogy. Includes lab work.

Prerequisite: GEOL 1303/GEOL 1103 or GEOL 1403 or GEOL 1305/GEOL 1105 or GEOL 1405 and GEOL 1304/GEOL 1104 or GEOL 1404 and CHEM 1311/CHEM 1111 or CHEM 1411 and CHEM 1312/CHEM 1112 or CHEM 1412 and MATH 1316 or MATH 1410.

GEOL 3405. Petrology. 4 Hours.

Students engage in the classification, origin, occurrence and associations of igneous, sedimentary, and metamorphic rocks. Includes optical petrology using thin sections.

Prerequisite: GEOL 3404.

GEOL 3415. Paleontology of Invertebrates. 4 Hours.

Students focus on the fundamental concepts, principles, and methods involved in deciphering the origin, development, and extinction of past life as revealed through the study of invertebrate fossils.

Prerequisite: GEOL 1304/GEOL 1104 or GEOL 1404.

GEOL 4095. Special Topics in Geology. 1-3 Hours.

Individual study in special areas of geology. Topic content is usually selected and agreed upon by the student and a member of the Geology faculty. Sometimes special topics courses are offered by the Geology faculty. This course may be taken for Academic Distinction credit. See Academic Distinction Program in this catalog.. Variable Credit (1-3). May be repeated for credit. May be repeated for credit. Course Equivalents: GEOL 4395

Prerequisite: Prerequisites and credit will be determined by the faculty member.

GEOL 4100. Earth and Environment Seminar. 1 Hour.

Students majoring in Environmental Science, Geography, or Geology discuss environmental problems and career opportunities with professionals in the field.

Prerequisite: Senior Standing.

GEOL 4304. Geochemistry. 3 Hours.

Students are provided a general introduction to all types of geochemistry that includes a discussion of the underlying chemical concepts, with an emphasis on the applications to geological environments. The chemical concepts include isotopic chemistry, thermodynamics, crystal chemistry, and aqueous solutions. The geological metasomatism, geothermobarometry, and environmental geochemistry. and C or better in CHEM 1412, and C or better in MATH 1420, and C or better in GEOL 1403 or GEOL 1405. Course Equivalents: GEOL 3304

Prerequisite: GEOL 3404 OR 60 hrs.

GEOL 4312. Economic Geology. 3 Hours.

Students explore the origin and occurrence of economically important minerals. A portion of the course is devoted to petroleum.

Prerequisite: GEOL 1403 or GEOL 1405 plus GEOL 1404.

GEOL 4320. Petroleum Geology. 3 Hours.

Students review the origin and development of petroleum and natural gas deposits, and surveys the various tools used to prospect for commercial deposits of oil and natural gas.

Prerequisite: GEOL 1403 or GEOL 1405 plus GEOL 1404.

GEOL 4331. Geology of North America. 3 Hours.

Students study of the geologic history of the continent of North America. Topics may include paleogeography, major depositional areas and stratigraphic units, and paleotectonics.

Prerequisite: GEOL 1403 or GEOL 1405 plus GEOL 1404.

GEOL 4337. Plate Tectonics. 3 Hours.

Students are introduced to the movement of lithospheric plates. Topics to be covered may include earthquakes, volcanism, seismic tomography, the evolution of continents and ocean basins, and the influence of the earth's interior on these processes. Lecture only.

Prerequisite: GEOL 1303/1103 or GEOL 1403 or GEOL 1305/1105 or GEOL 1405 and GEOL 1304/1104 or GEOL 1404.

GEOL 4360. Field Geology. 3 Hours.

These courses will consist of on-site studies in structure, stratigraphy, petrology and paleontology. Field trips are taken to appropriate areas in Texas and/or surrounding states. T

Prerequisite: Senior standing.

GEOL 4361. Field Geology. 3 Hours.

These courses will consist of on-site studies in structure, stratigraphy, petrology and paleontology. Field trips will be taken to appropriate areas in Texas and/or surrounding states. T

Prerequisite: Senior standing.

GEOL 4399. Environmental and Geoscience Internship. 3 Hours.

Students apply environmental, geoscience, and/or GIS skills in a work environment. Students work with a faculty advisor and their employer to complete employer-assigned internship requirements.

Prerequisite: Junior Standing.

GEOL 4400. Stratigraphy & Sedimentation. 4 Hours.

Students study the principles and methods used in describing, classifying, and correlating strata, which includes studies of modern and ancient depositional environments. Lab/field work included.

Prerequisite: GEOL 3404.

GEOL 4402. Structural Geology. 4 Hours.

Students cover the principles of deformation of the Earth's lithosphere with emphasis on mechanical principles, identification and interpretation of structures from the microscopic scale to the scale of mountain belts. Other topics may include regional tectonics and application in petroleum exploration. Lab work focuses on graphical and quantitative techniques of analyzing geologic structures.

Prerequisite: GEOL 4400, PHYS 1301, PHYS 1101, and MATH 1316.

GEOL 4413. Methods in Applied Geophysics. 4 Hours.

Applied Geophysics involves measurements made on the surface of the Earth that are interpreted to yield the distribution of subsurface properties, particularly those having economic and engineering importance. Students are provided an introduction to the latest methods used to map the distribution of physical properties beneath the surface of the Earth and is widely recommended for students who plan to pursue careers that directly or indirectly involve subsurface imaging and analysis.

Prerequisite: GEOL 1403 or GEOL 1405, MATH 1420, PHYS 1301, PHYS 1101, PHYS 1302, PHYS 1102, or by permission of instructor.

GEOL 4414. Sea Level Change and the Geological Record. 4 Hours.

Students examine the various modern causes of relative and absolute sea level change. In addition, students engage in an analysis of ancient geological sedimentary and stratigraphic records from the perspective of what they reveal about rates and scales of sea level change in the past as well as implications for the future. Sequence stratigraphic concepts (commonly used in the petroleum industry) are critically examined via field-based and paper and core-based studies.

Prerequisite: GEOL 1403 or GEOL 1405 plus GEOL 1404.

GEOL 4426. Hydrogeology. 4 Hours.

Students are introduced to the study of groundwater and its role in the hydrologic cycle. Topics may include properties and distribution of water on the surface, in the vadose zone and in aquifers; behavior, modeling, and geology of groundwater aquifers; human use and abuse of water resources, including groundwater contamination and extraction; and water law economics, and aquatic ecology. A lab with field trips focus on measurement and modeling of groundwater.

Prerequisite: MATH 1420 or permission of instructor, and GEOL 1403 or GEOL 1405 or GEOG 2341.

German (GERM)

GERM 1411. Elementary German. 4 Hours.

Students who have had no previous instruction in German develop vocabulary acquisition, international cultural components, pronunciation, drills, sentence formation, and everyday conversation leading to proficiency. A weekly one-hour language laboratory period is required. Competent speakers of German or those with considerable knowledge of the language should take the CLEP prior to registering. Grade of C or better required in GERM 1411 in order to continue to GERM 1412. Instruction is in German.

GERM 1412. Elementary German. 4 Hours.

A continuation of GERM 1411. Students add more speaking and writing toward advancing proficiency. A weekly one-hour language laboratory period is required. Competent speakers of German or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in German.

Prerequisite: Grade of C or better in GERM 1411 or equivalent.

GERM 2311. Intermediate German I. 3 Hours. [TCCN: GERM 2311]

A continuation of GERM 1412. Students add emphasis on written and oral skills. Competent speakers of German or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in German.

Prerequisite: Grade of C or better in GERM 1411 and GERM 1412 or equivalent.

GERM 2312. Intermediate German II. 3 Hours. [TCCN: GERM 2312]

Students focus on fluent usage of oral and written German. Students study selected written work with the purpose of mastering midlevel proficiency skills. Competent speakers of German or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in German.

Prerequisite: Grade of C or better in GERM 1411, GERM 1412, and GERM 2311 or equivalent.

GERM 2364. Multicultures of American-German. 3 Hours.

Students increase awareness of Central European culture in America with particular emphasis on the nineteenth and the twentieth centuries. This course may be conducted in English or German. Credit for this course may be applied to the major or minor only with permission of department chair.

Prerequisite: Grade of C or better in GERM 1411, GERM 1412, GERM 2311, and GERM 2312 or equivalent.

GERM 3368. German Media. 3 Hours.

Students study German Media by focusing on conversational, listening, reading, and vocabulary skills. Students watch German television programs and read articles from major German magazines and newspapers. Includes a review of German grammar.

Prerequisite: Grade of C or better in GERM 1411, GERM 1412, GERM 2311, and GERM 2312 or equivalent.

GERM 3380. Modern German Culture. 3 Hours.

Students overview the cultures of German speaking countries (Germany, Austria, and Switzerland) from 1780 to the present.

Prerequisite: Grade of C or better in GERM 1411, GERM 1412, GERM 2311, and GERM 2312 or equivalent.

GERM 4075. Individual Readings in German. 1-3 Hours.

Individual students who may need study of a particular era, genre, or author may enroll. Enrollment in this course is restricted and approval of such must be obtained from the department chair. The course may be repeated for credit as content varies. Variable Credit (1 to 3). Course Equivalents: GERM 4375

Prerequisite: Consent of instructor and department chair.

GERM 4360. Modern German Literature. 3 Hours.

Students overview the literatures of German-speaking countries (Germany, Austria, and Switzerland) from 1770 to the present.

Prerequisite: Grade of C or better in GERM 1411, GERM 1412, GERM 2311, and GERM 2312 or equivalent.

GERM 4370. Seminar in Selected German Topics. 3 Hours.

Students conduct an in-depth study of a selected topic. The topic to be explored will change from year to year. This course may be repeated for credit as the content varies. Enrollment for this course must be granted by the Department Chair.

Prerequisite: Grade of C or better in GERM 1411, GERM 1412, GERM 2311 and GERM 2312 or equivalent.

Guitar (GUIT)

GUIT 1101. Secondary Performances-Guitar. 1 Hour.

Students study techniques and musicality related to guitar in weekly individualized private instruction. Students admitted as a Guitar primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

GUIT 1201. Individual Performances-Guitar. 2 Hours.

The course consists of individualized private instruction on the guitar. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

GUIT 3201. Individual Performances-Guitar. 2 Hours.

The course consists of advanced individualized private instruction on the guitar. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

GUIT 3202. Applied Guitar with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the guitar. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Harp (HARP)

HARP 1101. Secondary Performances-Harp. 1 Hour.

Students study techniques and musicality related to harp in weekly individualized private instruction. Students admitted as a Harp primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

HARP 1201. Harp. 2 Hours.

The course focuses on harp playing technique, historical performance practice, and fundamentals of harp performance.

Prerequisite: Permission of the instructor.

HARP 3201. Harp. 2 Hours.

Students are provided advanced training and instruction including performance technique, interpretation of music, performance practice in various major musical periods, alternate tunings, and the history of harps and harp playing.

Prerequisite: Passing the sophomore proficiency in harp.

HARP 3202. Applied Harp with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the harp. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Health (HLTH)

HLTH 1360. The Fundamentals of Health Promotion and Health Careers. 3 Hours.

Students explore the determinants of health; theories of health behavior; the nature and history of health education; and the role of the health educator as a professional in the school, work, clinical, and community settings to promote health and prevent disease.

HLTH 1366. Lifestyle and Wellness. 3 Hours. [TCCN: PHED 1304]

Students explore a variety of health issues, which influence the well-being of an individual throughout the life cycle. The student is given an opportunity to develop a personal philosophy of wellness and self-responsibility for health through self-assessment, investigation of factors affecting one's health, and the examination of behavior modification strategies.

HLTH 2330. First Aid and CPR - American Red Cross. 3 Hours. [TCCN: PHED 1306]

A course for those who wish to acquire knowledge of Red Cross emergency and preventive measures. Successful completion leads to CPR, first aid, and responding to emergency certification. Students may also become instructors through additional American Red Cross training. (Also listed as KINE 2330). Course Equivalents: KINE 2330 .

HLTH 2372. Health & Medical Terminology. 3 Hours.

This course provides medically oriented students with the cognitive skills they need to understand the foundations of medical technology for health professionals. The content of this course focuses on the prefixes, suffixes, and roots of medical terms that are associated with multiple disease processes, medical protocols, and the human anatomical system.

HLTH 2381. Consumer Health Education. 3 Hours.

Students study the factors which influence the consumer marketplace for health related products and services. Topics may include fraud and quackery, advertising, health care professional services, alternative medicine, consumer protection agencies, and consumer protection through self-responsibility.

HLTH 2383. Multicultural Health Issues. 3 Hours.

Students address health issues and problems that various ethnic groups face in the United States. Cultural differences in health behaviors, health care access, and promotion and prevention programs are emphasized.

HLTH 2391. Human Diseases. 3 Hours.

Introduction to the relationship between the human body and disease, both communicable and non-communicable. Includes historical aspects of various diseases, etiology, prevention and control, prevalence, symptoms, and treatment. Course Equivalents: HLTH 3391 .

HLTH 3219. Group Exercise Instruction. 2 Hours.

Students are presented a comprehensive and research-based discussion and application of all formats of group exercise instruction. These formats include lifestyle-based, dance-based, equipment-based, and mind-body classes. The students are presented foundational knowledge for group exercise instructors.

Prerequisite: KINE 2119 or concurrent enrollment.

HLTH 3345. Health Statistics. 3 Hours.

Students are presented an overview of statistical measures used in the health sciences. The problems-based course provides students with hands-on applications of statistical software that is oriented to authentic health issues and cases. An emphasis is placed on the application of statistical tools to answer and solve real-world public health related questions and problems.

Prerequisite: MATH/STAT 1370.

HLTH 3350. Principles of Public Health. 3 Hours.

Students are prepared with the knowledge, skills, core values, and professional dispositions that they need to work in one of the diverse areas of public health.

Prerequisite: HLTH 1360, HLTH 2391, and 55 credit hours completed.

HLTH 3355. United States Health Care Systems. 3 Hours.

Students are provided with a comprehensive survey of the components, organization, and management of the US health care system. Topics of the course may include the historical perspectives, structure, operations, economic indicators, and current/future directions of the U.S. health care delivery system.

Prerequisite: HLTH 1360, HLTH 2391, and 55 credit hours completed.

HLTH 3360. Epidemiology. 3 Hours.

Students examine the basic epidemiological tenets, research techniques and technologies, findings of association and causation, distribution of diseases, and those factors that explain such distributions. Emphasis is placed on the interactions of biological, social, and economic factors in relation to accessibility of health services and geographical variations in health risks. Must have 60+ hours.

Prerequisite: HLTH 1360, HLTH 2391, and MATH/STAT 3379 or 1342 or 1370.

HLTH 3361. Health Planning & Evaluation. 3 Hours.

Students engage in a survey of the use of program planning models and health behavior theories in the wellness setting as well as assessment and evaluation processes for wellness management programs.

Prerequisite: HLTH 1360, HLTH 2391, and 55 credit hours completed.

HLTH 3380. Drug Use and Abuse. 3 Hours.

Students explore the use and misuse of drugs and their effects on the health of individuals. Course Equivalents: HLTH 2380 .

HLTH 3382. Child & Adolescent Health. 3 Hours.

Students focus on the causes of and approaches to physical, social, mental, and emotional health problems among young people. Emphasis is placed on creating an environment in which children and adolescents can learn to make prudent decisions regarding health related behaviors. .

HLTH 3385. Safety Education. 3 Hours.

Students are presented the foundations of accident prevention and injury control. Applications are made to motor vehicle, home, recreational, and occupational safety.

Prerequisite: HLTH 1360, HLTH 2391.

HLTH 3390. Family Life & Sex Education. 3 Hours.

Students focus on the formation of intimate relationships: family, marriage, and friends. Individuals are directed into the study of their personal backgrounds, lives, and dreams in preparation for marriage, including problems of relationships: rape, battering partners, sexually transmitted diseases, and divorce.

HLTH 3392. Health Communication and Literacy. 3 Hours.

Student engage in an exploration of different modalities of communicating health issues and information to audiences in different settings. Emphasis is given to listening, writing and speaking skills. Students learn how to make effective presentations using computer applications to design print and visual aid materials.

Prerequisite: HLTH 1360, HLTH 2391.

HLTH 4117. Practicum. 1 Hour.

Students participate in a guided faculty experience in the area of research, grants, program planning, or other experiential learning activity. This course is designed to enhance the professional skills and dispositions of students entering the field of Public Health.

Prerequisite: HLTH 1360, HLTH 2391 Course Equivalents: KINE 4117 .

HLTH 4317. International Perspective of Environmental Health. 3 Hours.

Students examine international, environmental, and public health concerns through the interaction of the environmental triad: Population, poverty, and pollution. Students examine national policy responses to mitigate and adapt to environmental concerns, and how these policies may differentially impact human health.

Prerequisite: HLTH 3350 or permission of the instructor.

HLTH 4360. Research Methods/Statistics. 3 Hours.

Students are provided an introduction to research methodology, evaluation, and statistical analysis with direct application to health education and health promotion. Students learn how to apply these techniques to writing a grant proposal.

Prerequisite: HLTH 1360, HLTH 2391, and Junior standing.

HLTH 4363. Interventions for Wellness. 3 Hours.

Students address the skills and resources needed to implement and facilitate specific interventions within a comprehensive wellness program. The development and delivery of programs including tobacco management, weight control, nutrition, physical activity, workplace safety, disease prevention, and other applicable interventions are addressed.

Prerequisite: HLTH 1360, HLTH 2391, and Junior Standing.

HLTH 4365. Health Care Policy. 3 Hours.

Students are prepared in the essential health policy and law as well as the policies and legal issues impacting health care and public health systems. The methods used to formulate health policies and laws are included, as well.

Prerequisite: HLTH 1360, HLTH 2391, and Junior Standing.

HLTH 4366. Health Informatics. 3 Hours.

Students are prepared with innovative and best practice technological applications to support human health by individuals, professionals, care delivery organizations, and communities. Internet-based health resources, smart phone/mHealth applications, telehealth, health-related social networks, and policies to connect people and technologies securely across health care ecosystems are applied.

Prerequisite: HLTH 3350.

HLTH 4367. Economics for Health Managers. 3 Hours.

Students are provided an overview of economic principles and analysis tools as applied to the health care industry. Traditional market-based economic theories are examined along with the significant role that government entities play in health care. Course topics may include health care supply, demand, elasticity, risk, cost, pricing, and insurance costs.

Prerequisite: HLTH 1360, HLTH 2391, HLTH 3355, ECON 2302 or ECON 2301, Senior Standing.

HLTH 4370. AIDS: Current Health Problems and Prevention. 3 Hours.

Students examine the intensity and magnitude of health problems due to HIV and AIDS. Students explore the nature of HIV, its transmission and progression, and the management of AIDS. The course focuses on prevention of the spread of AIDS among school-age children and young adults and addresses the economical, sociological, and ethical issues of AIDS.

Prerequisite: Junior standing.

HLTH 4371. Patient Navigation. 3 Hours.

Bilingual Health Care Studies students are prepared with advanced health care concepts, resources, and skills related to patient navigation by applying Culturally and Linguistically Appropriate Services (CLAS) in various health care settings with an emphasis on the integration of patient navigation into, and through, the US health care system. Students evaluate topics related to patient navigation background and history, discuss the National Standards for CLAS in Health Care, and examine the roles and responsibilities of an effective culturally and linguistically competent patient navigator.

Prerequisite: HLTH 1360, HLTH 2391, HLTH 3391, and Senior standing.

HLTH 4375. Health Laws and Ethics. 3 Hours.

Students are provided with the fundamentals of health law and ethics. The course explores the multi-faceted aspects of employer-employee relations in the health care setting and the legal ramifications associated with patient relations, patient care, and medical records. In addition, the students explore and analyze the issue of ethics in contemporary health care situations.

Prerequisite: HLTH 1360, HLTH 2391, HLTH 3355, Senior standing.

HLTH 4380. Global Health. 3 Hours.

Students are provided with an in-depth approach to the social, economic, environmental, cultural, and intellectual issues that determine the health status of global populations.

Prerequisite: Junior Standing.

HLTH 4384. Internship Preparation. 3 Hours.

Students are provided with practical experience in wellness programming and leadership skills that are necessary to successfully complete an internship in the wellness management field. Students are provided with job acquisition skills in resume development, interviewing techniques, and the job search process.

Prerequisite: Senior Standing.

HLTH 4387. Community Health. 3 Hours.

Students engage in an overview of the political, social, economic, and cultural variables affecting the health of a community. Topics may include foundations of community health, health resources, health through the life span, governmental and voluntary programs, and international health initiatives.

Prerequisite: 55 credit hours completed.

HLTH 4390. Environmental Health. 3 Hours.

Students investigate community environmental health problems. Topics may include population problems, housing, sanitation, air and water pollution, and other environmental health issues. An emphasis is placed on school-community action programs to conserve the environment.

Prerequisite: Junior standing.

HLTH 4391. Capstone and Grant Writing. 3 Hours.

Students explore the critical elements of grant development which include the acquisition, implementation, budgeting, and evaluation processes associated with successful grant writing. Students integrate program planning methods, needs assessment protocols, surveillance data applications, community organization techniques, and health behavior change strategies into a viable grant proposal related to their field of study.

Prerequisite: Senior standing and HLTH 3350, 3361 and 4387.

HLTH 4392. Problems in Health. 3 Hours.

Students engage in a directed individual study of an approved field problem in health and/or allied fields.

Prerequisite: HLTH 1360, HLTH 2391, and Departmental approval.

HLTH 4393. Professional Preparation for Health Careers. 3 Hours.

Students are prepared for their professional internship. Course content focuses on the contemporary areas of assessing, planning, implementing, and evaluating health programs; communicating health needs; serving as a resource person; and coordinating health needs in a community.

Prerequisite: HLTH 1360, HLTH 2391, and 12 hours of Health.

HLTH 4394. Internship Program. 3 Hours.

Students are provided with opportunities to demonstrate assessment, organization, group process and program planning skills in a health community setting.

Prerequisite: HLTH 1360, HLTH 2391, and HLTH 4393 with a C or better.

HLTH 4395. Special Topics in Health. 3 Hours.

Students prepare an investigative summary that examines the social, physical, mental, economic, and political variables which impact an area of Public Health within their specific degree area. The investigative summary will be presented in a virtual or face-to-face format to health program faculty.

Prerequisite: HLTH 1360, HLTH 2391.

History (HIST)

HIST 1301. United States History to 1876. 3 Hours. [TCCN: HIST 1301]

Students examine the colonial origins of the United States and growth of the republic to 1876.

HIST 1302. United States History Since 1876. 3 Hours. [TCCN: HIST 1302]

Students examine the history of the United States from 1876 to the present.

HIST 2311. World History to 1500. 3 Hours. [TCCN: HIST 2311]

Students examine the history of the world from the dawn of civilization in Mesopotamia, China, India, Egypt, and Mesoamerica through the Middle Ages in Europe and Asia. Topics may include the Middle Ages, Renaissance, Reformation, and the rise of nation states.

HIST 2312. World History since 1500. 3 Hours. [TCCN: HIST 2312]

Students examine the history of the world from 1500 to the present. Topics may include European expansion overseas; imperialism and colonization; the Industrial Revolution; the Enlightenment; the French Revolution; nineteenth century nationalism and democracy; the colonial rebellions in Africa, Latin America, and Asia; World War I; World War II; the Cold War; and the collapse of the Soviet Union.

HIST 3075. Independent Study. 1-3 Hours.

Students may take this course for Academic Distinction Credit. See Academic Distinction Program in this catalog. Course Equivalents: HIST 4075, HIST 4375 .

HIST 3300. The Historian's Craft. 3 Hours.

Students learn the fundamental architecture and tools of the discipline, including the analysis, interpretation, and contextualization of evidence. Students conduct research in primary and secondary sources, and apply historical writing skills.

HIST 3301. Applied Public History. 3 Hours.

Students apply the theories and best practices of public history to develop an original exhibit or event for the public. The course promotes the collaborative study and practice of history and may be offered with Academic Community Engagement distinction.

Prerequisite: HIST 3388.

HIST 3310. Mesoamerican History. 3 Hours.

Students examine the history of Mesoamerica, a broad geographic area comprised of peoples, including the Maya, Zapotec, and Aztec. Students analyze how the peoples of this region accomplished their achievements in architecture, calendrics, astronomy, art, the sciences, and literature.

HIST 3311. African Civilizations to 1800. 3 Hours.

Students examine the history of Africa between 16,000 BC and 1800 AD. Topics may include the historical roots of Africa's cultural diversity; evolutions in agriculture and technology; trade and commerce; the Indian Ocean Slave Trade; and the development of social, economic, and political institutions.

HIST 3312. History of East Africa. 3 Hours.

Students examine East Africa's rich and varied past, from the earliest times to the present. Major themes may include the cultural diversity of the region, the growth of complex societies, the slave trade, East Africa's place in the wider setting of the Indian Ocean World, colonial conquest and African responses, the regaining of African political independence, and challenges facing modern independent states.

HIST 3317. War & Revolution in China. 3 Hours.

Students examine the profound changes that China has undergone from the early twentieth century until the present day, focusing on the themes of war and revolution. Topics may include the collapse of the old dynastic system, the Japanese invasion of China, the Chinese Civil War, the Cultural Revolution, and protest movements in the late twentieth century.

HIST 3318. Colonial Southeast Asia. 3 Hours.

Students examine European, U.S., and Japanese empire-building in Southeast Asia from the seventeenth century until the mid-twentieth century. Topics may include European maritime empires in the South Pacific, colonial rivalries in Southeast Asia during the nineteenth century, the U.S. Philippines, and anti-colonial movements.

HIST 3322. Black Civil Rights Movement. 3 Hours.

Students examine the black civil rights struggle in the United States from the late 19th century to the present. Topics include the black response to Jim Crow laws, the emergence of national civil rights organizations as well as local activism and historical events that have served as catalysts for change in civil rights legislation. Course Equivalents: HIST 4333 .

HIST 3323. History of American Slavery. 3 Hours.

Students examine slavery as an integral part of America's social, cultural, and economic development as a country, and also as a catalyst to the establishment of antislavery and abolitionist movements. Course Equivalents: HIST 4363 .

HIST 3325. Era of the American Revolution: 1763-1789. 3 Hours.

Students examine the issues of conflict between English continental colonies and British imperial policy which led to the movement for independence. Topics may include internal colonial conflicts and attempts to solve the federal problem culminating in the formation of the Constitution. Course Equivalents: HIST 4368 .

HIST 3326. The History of the West. 3 Hours.

Students examine the settlement and development of the Trans-Mississippi West and its influence upon national and international affairs. Course Equivalents: HIST 4370 .

HIST 3327. Topics in the History of Gender and Sexuality. 3 Hours.

Students examine how the understanding of gender and sexuality differs historically according to factors such as race, class, ethnicity, religion and/or sexual orientation. Course Equivalents: HIST 4383 .

HIST 3328. Modern France: From the Revolution to the Present. 3 Hours.

Students examine the history of France from 1789 to the present. Topics include the military, political, and diplomatic history of France in this era. Course Equivalents: HIST 4380 .

HIST 3329. Contemporary Latin America. 3 Hours.

Students examine the development of the South American Republics from their independence to the present. Topics may include social, economic, and political development. Course Equivalents: HIST 4395 .

HIST 3330. Modern China and Japan. 3 Hours.

Students examine the history of modern China and Japan from the last Chinese dynasties to the present. Topics may include the resilience and weaknesses of China's imperial system; the challenges posed to China's traditions by Western economic and cultural penetration; China's twentieth century experiments in forms of government and in direction of its cultural development; and the political, economic, social, and intellectual history of Japan from the beginning of the Meiji period (1868) to the present. Course Equivalents: HIST 4378 .

HIST 3332. Modern Asian History. 3 Hours.

Students examine Asian history since the fourteenth century. Topics may include the modernization of Asia and the influence of colonization, nationalism, and industrialization on present-day Asia.

HIST 3333. Religion in World History. 3 Hours.

Students examine the origins, development, and modern manifestations of the major living world religions. Topics may include the peoples, times, and places of the founders of each tradition; the classical literature within each tradition and the canonization of these sacred writings; and the significant sects and schisms within the religions that have influenced major events in world history.

HIST 3334. Renaissance Europe. 3 Hours.

Students examine the intellectual, political, social, and cultural history of Europe from the fourteenth to sixteenth centuries, a period that saw, starting in Italy, a rebirth of the values and culture of Classical Greco-Roman civilization. Topics may include intellectual and artistic movements and the profound implications these had for European values, worldview, politics, and art.

HIST 3335. Germany and Central Europe Since 1815. 3 Hours.

Students examine German and Central European history. Topics may include the principal political, economic, and social trends since the Congress of Vienna.

HIST 3336. Middle East Since 1700. 3 Hours.

Students examine the political, social, economic, and cultural development of the Middle East since the seventeenth century. Topics may include the decline of traditional empires; the encroachment of Europe; the Eastern Question; the development of nationalism among the Turks, Arabs, and Iranians; Islam and modern ideologies; and the Middle East in the twentieth century.

HIST 3337. The Bible & Reform in Europe. 3 Hours.

Students examine the religious, social, and cultural history of Europe from the sixteenth into the seventeenth centuries, a period that saw the fracturing of a unified Christendom. Topics may include religious and theological changes and the profound implications these had for European politics, social norms, cultural values, and economic endeavors.

HIST 3338. Economic History of the Industrial Revolution to Present. 3 Hours.

Students examine the Industrial Revolution in nineteenth-century Britain and twentieth-century United States. Topics may include the relationship between agriculture and industry, the rise of the corporation, the development of the international monetary system, and systems of trade.

HIST 3339. French Revolution and Napoleonic Wars. 3 Hours.

Students examine the history of France during the French Revolution Napoleonic Era, 1789-1815. Topics may include the military and political history of the era, with a detailed examination of the battles and campaigns of the Napoleonic Wars.

HIST 3340. Mexican Americans Since 1848. 3 Hours.

Students examine the history of Mexican-Americans in what is now the United States Southwest. The course begins with the 1848 Treaty of Guadalupe Hidalgo that ended the war between the United States and Mexico and created a Mexican-American minority within the U.S. Topics may include such themes as the indigenous background of this population, the Chicana/o perception of the Southwest as a homeland, and the effect of that perception on the history of this ethnic group.

HIST 3341. Black Europe, 1500 to present. 3 Hours.

Students explore the Black experience in Europe from 1500 to the present, focusing primarily on Great Britain, France, and Germany. Topics may include the religious and scientific origins of race in European culture, the legacy of slavery in European societies, and African and Caribbean anti-colonial politics. Topics may also include the experiences of Black soldiers in the world wars, decolonization and postwar mass migration, and the impact of the United States civil rights movement on the European Black community.

HIST 3347. Early Modern France, 1453-1789. 3 Hours.

Students examine major political, cultural, economic, social, intellectual, and artistic developments in France between 1453 and 1789. Topics may include the crisis of the Later Middle Ages, Renaissance France, the Protestant Reformation and the French Wars of Religion, the French Counter-Reformation, Absolutism, Overseas Expansion, the Enlightenment, and France on the eve of the French Revolution.

HIST 3348. The Pacific War. 3 Hours.

Students examine Japan's participation in the Pacific War, and the effect of WWII on Japan and East Asia. Topics may include the rise of militarism in Japan, the Sino-Japanese War, colonial expansion, total war, the U.S. occupation, post-war economic growth, and war memories.

HIST 3349. Modern China. 3 Hours.

Students examine major political, social, and cultural developments of Communist China from 1949 to the present. Topics may include the history of Chinese communism, the Great Famine, the Cultural Revolution, China after Mao Zedong, China's involvement in the Cold War, the era of post-socialist market reforms, and its role in the age of globalization. Students also examine how revolution and reforms were experienced by those who lived through them.

HIST 3350. Early Christianities. 3 Hours.

Students engage in an interdisciplinary and cross-cultural examination of central themes in the history of early Christianities beginning with the transformation of the Jesus Movement into a separate Christian religion and concluding with the divisions made permanent by the Fourth Crusade.

HIST 3351. Japan: The Age of the Samurai. 3 Hours.

Students examine medieval and early modern Japanese history. Beginning with the emergence of warrior bands, students explore how military men established regimes, managed vendettas, and mobilized resources. Topics may include warrior ideology, samurai rule, and the dissolution of the samurai caste.

HIST 3352. The Roman Empire to Byzantium. 3 Hours.

Students engage in a cross-disciplinary investigation of the Roman Empire from Augustus to Heraclius, including the transformation of the Roman Empire into Christian Byzantium and its complex relationship with the rival Parthian and Sasanian Empires based in modern-day Iran. Topics include the multi- and cross-cultural dimensions of Romano-Byzantine society and the generation of a tri-continental Byzantine "commonwealth." .

HIST 3355. Urban and Suburban History. 3 Hours.

Students examine the growth and development of cities and suburbs in the U.S., paying particular attention to public policy, race, class, ethnic enclaves, and connections between American and global cities. Topics may include major metropolitan areas, such as Houston, Texas. Students conduct research into the city and its surrounding suburbs and locales. Credit 3 .

HIST 3356. Austria-Hungary and its Legacy. 3 Hours.

Students explore the history of the Habsburg Empire and its successor states from the dissolution of the Holy Roman Empire to the region's integration into the European Union. Topics include nationalism; democracy and multiculturalism; the struggle for women's rights; industrialization and workers' movements; Jewish history; war and political collapse; intellectual history; and the Cold War.

HIST 3357. World War I (1914-1918). 3 Hours.

Students examine World War I from its European origins to its emergence as a global conflict. Topics may include the formation of political and military alliances; emerging role of the state; role of industrial economies in waging war; home front cultures and societies; major land campaigns of the Eastern and Western Fronts; war at sea; the Bolshevik Revolution in Russia, which emerged out of the war; and the complexity of the peacemaking process.

Prerequisite: Junior standing.

HIST 3358. Silk Roads to Atlantic World. 3 Hours.

Students engage in an interdisciplinary investigation of the contexts, impulses, and implications of long-distance interplay among cultures in both pre-modern and modern times. Students apply scholarly models of cross-cultural interactions using three specific case studies: the ancient Silk Roads, the trans-Eurasian Mongol Empire, and the trans-Atlantic Columbian Exchange.

HIST 3359. Germany at War and Peace. 3 Hours.

Students examine the history of militarism and warfare in Germany, from the rise of the Prussian state in the eighteenth century through the present. Topics may include the relationship between warfare and the development of German politics, society, and culture. Major historical figures include Frederick the Great, Clausewitz, Otto von Bismarck, and Adolf Hitler. Students examine how contemporary, pacifist German politics emerged out of two difficult centuries of warfare.

Prerequisite: Junior standing.

HIST 3361. The United States and the Vietnam War. 3 Hours.

Students examine the United States involvement in Southeast Asia from 1945 to 1975. Topics may include the issues of nationalism and communism in Southeast Asia; the first Indochina war between the French and Vietnamese; the United States military effort in Indochina from 1965 to 1975; the postwar political, economic, and social problems in the region; the effect of the Vietnam War on American culture and foreign policy.

HIST 3362. The Middle East, 500 - 1700. 3 Hours.

Students examine the political, social, economic, and cultural development of the Middle East from the eve of the rise of Islam through the seventeenth century. Topics may include the Middle East before Islam; the Rise of Islam; the faith and practices of Islam; the Rightly-Guided Caliphs; Shi'ah and Sunni Islam; the Umayyad and Abbasid Caliphates; the Crusades and Islam; Islam and the Steppe Empires; the rise and apogee of the Ottoman Empire; and Islam's initial response to the encroachment of the west.

HIST 3363. Britain to 1714. 3 Hours.

Students examine the development of the British peoples from prehistoric times to the end of the Stuart dynasty. Topics may include the peoples of Wales, Scotland and Ireland.

HIST 3364. Modern Britain 1714-Present. 3 Hours.

Students examine the effects of industrial change, the enmity of France in foreign affairs, Great Britain's renewed expansion overseas following the American Revolution, movements favoring social and economic reform, and political trends to the present.

HIST 3365. Russian History. 3 Hours.

Students examine the roots of Russia (Kiev, Christianity, the Mongol occupation, Ivan the Terrible, the Times of Troubles) and survey Russian history from Peter the Great to the present.

HIST 3366. Modern European Military History. 3 Hours.

Students examine European military history and its links to political, social, and cultural changes from 1600 to the present day. Topics may include major wars in Europe, European military conflicts in the Middle East and North Africa, and the wars of decolonization.

HIST 3367. Europe in the Age of Absolutism and Revolutions: 1648-1815. 3 Hours.

Students examine significant issues in European history from 1648 to 1815. Topics may include developments in political theory, natural science and economics, as well as the tensions in the old social order, which helped instigate the French Revolution.

HIST 3368. European History: 1815-1914. 3 Hours.

Students examine the history of the principal European powers from the Congress of Vienna to World War I.

HIST 3369. The World In The 20Th Century. 3 Hours.

Students examine global politics and diplomacy since World War I.

HIST 3370. Ancient History. 3 Hours.

Students examine the history of the civilizations of the Ancient Near East, Greece, and Rome with special emphasis upon their contribution to the cultural heritage of the western world.

HIST 3371. Medieval History. 3 Hours.

Students examine the political, economic, social, intellectual, and religious institutions and developments in Europe from the collapse of the Roman Empire in the fifth century to the Renaissance.

HIST 3372. Historiography. 3 Hours.

Students survey various historical interpretations and develop research skills.

HIST 3373. Topics in the History of Science and Medicine. 3 Hours.

Students examine the history of science and medicine. Topics include the development of scientific knowledge across the centuries.

HIST 3374. United States Religious History to 1865. 3 Hours.

Students examine the history of US religious ideas, practices, and traditions between European first contact and the Civil War. Topics may include indigenous religions, colonialism, Puritanism, dissent, the constitutional laws on religious liberty, new religious movements, Catholicism, and the Civil War. Special attention will be given to diverse and competing religious expressions.

HIST 3375. United States Religious History from 1865. 3 Hours.

Students examine the history of US religious ideas, practices, and traditions between the end of the Civil War and the present. Topics may include the growth of secularism, immigration, modernism and fundamentalism, the religious right, and religion during the world wars and civil rights movement. Special attention will be given to diverse and competing religious expressions.

HIST 3376. Early America to 1783. 3 Hours.

Students examine early American history from the beginnings of European colonization through the American Revolution and the War for American Independence.

HIST 3377. America in Mid-Passage, 1783-1877. 3 Hours.

Students examine United States history from 1783 to 1877. Topics may include the origins of the U.S. Constitution, the early republic and rise of the two party-system, the nature of Jeffersonian and Jacksonian democracy, the sectional crisis and the Civil War, and the era of Reconstruction.

HIST 3378. Emergence of Modern America, 1877-1945. 3 Hours.

Students examine United States history from 1877 to 1945. Topics may include discussions of the Industrial Revolution, the Populist and Progressive movements, World War I, the era of the 1920s, the Great Depression and New Deal, and World War II.

HIST 3379. Recent America, 1945 to Present. 3 Hours.

Students examine United States history from the end of World War II to the present. Topics may include discussions of the Cold War; the civil rights and environmental movements; the Vietnam War, the Gulf War, and the global war on terrorism; the public policy debates surrounding the role of the federal government in the modern economy; and the evolution of American popular culture.

HIST 3380. The American Civil War. 3 Hours.

Students examine the sectional conflicts of the 1850s, the Civil War, and Reconstruction. Topics may include the military, political, social, and diplomatic history of the era. Course Equivalents: HIST 4369 .

HIST 3381. British Empire & Commonwealth. 3 Hours.

Students examine the British Empire and Commonwealth to the present time. Topics may include the rise of colonial and dominion nationalism, the imperial conferences, and the unfolding of the British Commonwealth of Nations.

HIST 3382. Immigration and Ethnicity in American History. 3 Hours.

Students examine ethnic group relations, nativism, and racism in the historical development of American civilization, with special emphasis on the patterns of assimilation and non-assimilation of ethnic groups.

HIST 3383. American Women's History. 3 Hours.

Students examine U.S. women's history. Topics may include work, marriage, family, sexuality, reproduction, education, and the social forces that have aided or blocked change in women's roles in American society. Particular attention is paid to differences in race, class, and ethnicity.

HIST 3385. American Diplomatic History. 3 Hours.

Students examine selected topics in U.S. Diplomatic History.

HIST 3386. Military & War In America. 3 Hours.

Students examine the U.S. military experience, from the colonial period to the present. Topics may include the military, political and diplomatic history of the great conflicts of the United States.

HIST 3387. World War II. 3 Hours.

Students examine the inter-war and World War II era from 1919 to 1945, emphasizing the events leading to the war in Europe, the rise of Nazi Germany, the major battles and campaigns in the European theatre, and the aftermath of the war. Topics may include the rise of the Japanese Empire, the events leading to the outbreak of war in Asia and the Pacific, and the major battles and campaigns of the Pacific war through the defeat of Japan.

HIST 3388. Public History. 3 Hours.

Students examine topics in the field of Public History, including architectural preservation and restoration, museum studies, and oral history. Topics vary from semester to semester, but each semester students analyze oral sources, primary textual materials, and historical artifacts of various types, including architectural dwellings, tools, and local and family records.

HIST 3389. Africa - Past & Present. 3 Hours.

Students examine the problems, potentials, and upheavals of Modern Africa. Topics may include the effect of the slave trade on African society, racial conflicts, apartheid, the emergence of African nationalism, the end of white colonial rule, and the difficulties of achieving economic and political stability in contemporary Africa.

HIST 3390. Conceptualizing History Education. 3 Hours.

Students examine conceptualization techniques in Texas, U.S., and World History. The course is designed to enable History students to organize a vast amount of material into a logical framework that will help them to better understand the interactions of individuals, communities, nations, and cultures across time and place. Special emphasis will be placed on subject areas included in the Texas Examination for Educator Standards.

HIST 3391. Colonial Latin America. 3 Hours.

Students examine the conquest and development of the colonial institutions of Spain and Portugal in the Americas, including the Spanish borderlands as the center of Spanish colonial activity and power in the Americas.

HIST 3392. Native American History. 3 Hours.

Students examine the history of Native Americans in the United States.

HIST 3393. African-American History. 3 Hours.

Students examine the African American experience in the United States. Topics may include the various forces shaping race relations in the United States.

HIST 3394. America in the 1960s. 3 Hours.

Students examine the decade of the 1960s in the United States, paying particular attention to the social, cultural, and political shifts that occurred during these years. Students develop a nuanced understanding of this pivotal decade in United States history and engage in contemporary debates about its multiple meanings.

HIST 3395. American Environmental History. 3 Hours.

Students examine how nature has affected the course of United States history, particularly the role of natural resources, the growth of the economy, responses to environmental crises and challenges, and transformations in the environment resulting from centuries of use.

HIST 3396. The American South. 3 Hours.

Students examine the dynamics and expansive nature of the U.S. South. Topics include the peoples and varied regions of the South; its economic and political development; literature, race and religion. Course Equivalents: HIST 4367 .

HIST 3397. Modern Mexico. 3 Hours.

Students examine the national history of Mexico from the era of independence (c.1810) to the present. Students explore the challenges that the Mexican people faced after gaining independence, their resilience during years of political and economic change, and the rich culture that has emerged in the wake of those struggles. Attention is also given to the US-Mexican border as a site of complex cultural interaction. Equivalent Courses: HSTY 3351 .

HIST 3398. Texas & the Southwest. 3 Hours.

Students examine the Greater Southwest, Spanish expansion and the Spanish-French rivalry in the lower Mississippi region and Texas. Topics include geographic factors and cultural developments.

HIST 3399. Special Topics in History. 3 Hours.

Students examine various specialized topics in history not normally covered in detail by other upper-level courses. Course Equivalents: HSTY 3399 .

HIST 4399. History Senior Seminar. 3 Hours.

Students examine specific topics and conduct historical research, producing an extensive research paper using primary and secondary sources.

Prerequisite: Senior standing in history or departmental approval.

History (HSTY)

HSTY 3335. Europe & the World 1618-1789. 3 Hours.

Students examine major developments in Europe and in its relations with the world between 1618 and 1789. Topics may include the rise of absolutism and constitutionalism, development of Baroque and Rococo art, global impact of mercantilist and capitalist systems, changes produced by scientific discovery and Enlightenment thought, and effects of tensions within a society of orders.

HSTY 3336. Nineteenth Century Europe. 3 Hours.

Students examine the history of principal European powers during the long nineteenth century. Topics may include the legacies of the French Revolution and Napoleonic era, the impact of the Congress of Vienna, early political ideologies, Romanticism, the First Industrial Revolution, the Revolutions of 1830 and 1848, urbanization, nationalism, mass politics, Realism, New Imperialism, and the origins of World War I.

HSTY 3344. Russian and Soviet Empires. 3 Hours.

Students track the complex development of the Russian Empire, its Soviet successor, and the Russian Federation. Topics may include imperialism, ideology, culture, economy, society, war, nationalism, gender, and decolonization.

HSTY 3345. History of Medicine. 3 Hours.

Students trace the history of western medicine from antiquity to the present. Topics may include humoral medicine, bacteriology, gender and race in medicine, public health, pandemics, medical ethics, and vaccines.

HSTY 3346. Medical Violence. 3 Hours.

Students probe the violent aspects of the history of medicine in this class. Medicine has historically demonstrated a great capacity to ease human suffering, but it has also perpetrated prodigious harms. Students analyze the historical contexts that gave rise to violent medical practices and how definitions of violence in medicine have changed over time. Topic may include biological weapons, human experimentation, eugenics, and colonial health policy.

HSTY 3354. Slavery & Freedom in Americas. 3 Hours.

Students examine slavery and other forms of unfree labor throughout the Americas and the Atlantic world from the fifteenth to the nineteenth centuries. Topics may include the transatlantic slave trade and Middle Passage; Native American enslavement; enslaved resistance and revolt; economics of slavery; abolitionist movements; the Haitian Revolution; and comparative processes emancipation.

HSTY 3360. Native America to 1840. 3 Hours.

Students examine Native American history from the peopling of the continent to the mid-nineteenth century. Students analyze Indigenous societies before 1500, investigate indigenous people's reactions to European colonization, and Native nations' perseverance as the U.S. grew.

HSTY 3361. Native America sn 1840. 3 Hours.

Students examine Native American history from the mid-nineteenth century to the present. Students analyze Native responses to nineteenth century U.S. military campaigns, allotment, and assimilation policies. Students then explore the struggles of twentieth century Native Americans to preserve Native culture, land, and sovereignty.

HSTY 3367. Incorporating America. 3 Hours.

Students examine United States history from 1877 to 1933. Topics may include the industrial revolution, Gilded Age, American expansion and imperialism, populist and progressive movements, World War I, Jazz Age, and the Great Depression.

HSTY 3368. The American Century. 3 Hours.

Students examine United States history from the New Deal to the rise of conservatism. Topics may include the New Deal, World War II, Cold War, civil rights movements, environmentalism, Vietnam War, immigration, and the role of federal government in American life.

HSTY 3369. Boomers to Zoomers. 3 Hours.

Students explore the history of the United States from the age of Ronald Reagan to the present, with an emphasis on the people and ideas that shaped this period and the experiences of various generations of young people who lived during it. Topics may include the decline of industry and the rise of finance, immigration and demographic diversity, technology, media and art, political realignment and division, the Cold War and the Global War on Terror, wars on crime and drugs, and social and political activism on issues ranging from LGBTQ+ rights to gun rights.

HSTY 3370. African American Hist to 1865. 3 Hours.

Students examine the formation and expansion of African American identity, slavery and freedom before Emancipation in British North America and the United States. Topics may include West and West Central Africa civilizations on the eve of the transatlantic slave trade, the Middle Passage, the Second Middle Passage, Free Black society and culture, abolitionism, resistance, community agency in slavery, Emancipation and Reconstruction, and the systemic impact of slavery on the enslaved and their descendants.

HSTY 3371. African America Hist sn 1865. 3 Hours.

Students examine the African American experience in the United States form 1865 to the present. Topics may include the various forces shaping race relations in the United States since 1865.

HSTY 3376. Mexican American Hist to 1848. 3 Hours.

Students examine the history of Mexican Americans throughout the United States prior to the US-Mexico War. Topics may include: empire, borderlands, the rise and fall of native and African slavery, early global economies, mission secularization, and Texas independence.

HSTY 3379. U.S. Women to 1900. 3 Hours.

Students examine U.S. women's history up to 1900. Topics may include work, marriage, family, sexuality, reproduction, education, and the social forces that have aided or blocked change in women's roles in American society. Particular attention is paid to differences in race, class, and ethnicity.

HSTY 3380. U.S. Women since 1900. 3 Hours.

Students examine U.S. women's history since 1900. Topics may include work, marriage, family, sexuality, reproduction, education, and the social forces that have aided or blocked change in women's roles in American society. Particular attention is paid to differences in race, class, and ethnicity.

HSTY 3381. U.S. South to 1865. 3 Hours.

Students examine the colonial roots of the U.S. South and its emergence during the early U.S. Republic. Topics may include the various peoples and subregions, politics, economic development, culture, society, and religion to the U.S. South in the period prior to 1865.

HSTY 3382. U.S. South sn 1865. 3 Hours.

Students examine the development of the Southern United States from the end of slavery to the present. Topics may include the various peoples and subregions, politics, economic development, culture, society, and religion unite to the U.S. South following the U.S. Civil War.

HSTY 3384. Texas History. 3 Hours.

Students examine the history of Texas from precontact era to the present. Topics may include the Native societies of Texas, Spanish exploration and colonization, Mexican independence, the Texas Revolution and the Republic of Texas, the Civil War and Reconstruction in Texas, slavery, immigration, oil and industrialization, political movements and leaders, and the Black and Mexican American civil rights movements.

HSTY 3385. Borderlands History. 3 Hours.

Students examine the history of borderlands, border-making, and border-crossing. Topics may include: legal regimes, labor, migration, human rights, sovereignty, nationalism, borderland typologies, comparative borderlands, territorial conflict, and the opening and closing of borders.

HSTY 3386. Rise of Conservatism. 3 Hours.

Students explore the history of American conservatism from the New Deal onward. Topics may include intellectual roots and traditions, conservative legal and constitutional theory, the demographics, geography, and strategy of conservative politics, conservative media, conservative religion and culture, the conservative relationship to other major political and social movements such as the Black freedom and women's rights movements, and conservative political leaders from the early 20th century to the present.

HSTY 3393. Environmental History. 3 Hours.

Students examine topic in environmental history including agricultural systems and foodways; the impact of weather and climate on human societies; diseases and natural medicines; the relationship between human societies and non-human animals; capitalism and the environment; and the emergence of conservationist and environmentalist movements.

HSTY 3394. History of Capitalism. 3 Hours.

Students examine economic, social, political, and cultural transformations associated with the emergence of capitalism from the early modern period to the present. Topics may include merchant communities and commercial network; the Industrial Revolution; slavery and capitalism; commodities and consumption; finance banking; labor and labor movements; poverty and inequality; and economic crises including the Great Depression.

HSTY 3395. Working Class History. 3 Hours.

Students explore the history of work and workers. Topics may include the free and unfree labor, the relationship between workers and capital, worker organizations such as guilds and labor unions, the legal and political institutions that shape labor, and the impact of technology, including artificial intelligence, on work.

HSTY 3398. History of Popular Culture. 3 Hours.

Students examine the creation and expansion of popular culture from the mid-19th century to the present. Topics may include the development of mass culture and the ways popular cultural forms such as music, film, television, comics, novels, fashion, and sports reflected, shaped, and promoted American values at home and abroad.

Honors (HONR)

HONR 3321. Honors Seminar in Fine Arts. 3 Hours.

This team-taught class is an investigation into the theories, meanings, purposes, and practical experience of the fine arts, including dance, music, the visual arts, and theater. Students will attend dance and music concerts, theater productions, and art exhibits. Spring semester only. Course Equivalents: HONR 2375 .

HONR 3322. Journeys. 3 Hours.

The Journeys seminar invites approximately ten of the most innovative and successful members of the Sam Houston State University community to give one lecture each. Each speaker has one class period to use however s/he feels is best. Chosen speakers generally detail the paths of their own lives while giving students advice on how to achieve successful and happy lives. Speakers are chosen from a variety of disciplines and backgrounds.

Prerequisite: Admission to the Honors College.

HONR 3331. Culture and Society. 3 Hours.

This course deals with contemporary social, economic, political, and international issues and provides important background information and perspectives on current debates and events. Course content varies.

HONR 3332. Honors Seminar in the Humanities. 3 Hours.

This course is a team-taught, cross-disciplinary concentration on ideas, developments, and subject matter in the humanities.

HONR 3342. The Word. 3 Hours.

This seminar changes topics (or "words") every semester, and several faculty with interests and specialties relevant to the theme from various colleges and departments lead discussions from different points of view. Sample topics include "The End," "Connections," "Sustainability," and "Drugs." All words reflect timely topics and student interests.

Prerequisite: Admission to the Honors College.

HONR 3343. Film and Society. 3 Hours.

This seminar invites students to explore the relationship between film and society from a broad range of perspectives. Several faculty from various colleges and departments choose films and lead discussions. Topics vary.

Prerequisite: Admission to the Honors College.

HONR 3365. Decision Making. 3 Hours.

This course introduces students to the fundamentals of decision making and problem solving. Students will (1) learn fundamental principles, generalizations, or theories of decision making, (2) learn how to apply course material to improve thinking, problem solving, and decisions, (3) gain skills for working as a team in presenting a problem for decisions, (4) understand how to analyze and critically evaluate ideas, arguments, and points of view concerned with decisions. Course Equivalents: HONR 2331 .

HONR 3375. Honors Dialogues Seminar. 3 Hours.

The Dialogues Seminar is an interdisciplinary course which examines selected controversial or provocative topics from various academic and intellectual perspectives. The course is team taught, with faculty from various disciplines engaged with one another and with the students in interactive discussions of the selected topic for the course.

Prerequisite: Membership in the Honors College.

HONR 4095. Independent Study. 1-4 Hours.

This independent study may be taken for any interdisciplinary topic or project for honors students. Variable credit (1-4).

Prerequisite: Admission to the Honors College.

HONR 4375. Special Topics For Honors. 3 Hours.

This course affords honors students the opportunity to do an honors thesis, a long-term research and writing project under the direct supervision of a faculty member. The course is open to honors students in all disciplines.

HONR 4398. Honors Thesis I. 3 Hours.

In this course, the student works under close faculty supervision on a sustained research project to produce a thesis prospectus.

Prerequisite: Admission to the Honors College.

HONR 4399. Honors Thesis II. 3 Hours.

In this course, the student works under close faculty supervision on a sustained research project to produce an honors thesis.

Prerequisite: Admission to the Honors College.

Horn (HORN)

HORN 1101. Secondary Performances-Horn. 1 Hour.

Students study techniques and musicality related to horn in weekly individualized private instruction. Students admitted as a Horn primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

HORN 1201. Individual Performances-French Horn. 2 Hours.

The course consists of individualized private instruction on the horn. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

HORN 3201. Individual Performances-French Horn. 2 Hours.

The course consists of advanced individualized private instruction on the horn. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

HORN 3202. Applied Horn with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the horn. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Human Sciences (HUSC)

HUSC 3335. Event Administration. 3 Hours.

This course prepares students to attain the operational skills involved in event administration. The course focuses on social and corporate events, target markets and market segments, budgeting and forecasting, theme and proposal writing, and logistics and planning for on- and off-premise events. The course also examines the benefits of networking, promoting sales and marketing, and the importance of human resource issues in event administration. Course Equivalents: FACS 3335

Prerequisite: Junior Standing.

HUSC 4068. Research Problems. 1-4 Hours.

Seminars provide adequate research experiences for students having special needs and requirements for the completion of work for a degree.

Registration is permitted only by approval of the department chair. Course may be repeated for credit. Variable Credit (1-4). Course Equivalents: FACS 4068, FACS 4368

Prerequisite: Junior standing.

HUSC 4369. Internship. 3 Hours.

Course consists of an off-campus work experience in an approved professional environment under the guidance of an internship supervisor. A minimum of two hundred (200) supervised clock hours are required for appropriate credit and enrollment in the course HUSC 4369 at the time the work is being completed. Offered spring semesters and summer only. Refer to the department internship handbook for specific major requirements. Refer to the department internship handbook for specific major requirements. Course Equivalents: FACS 4369

Prerequisite: Departmental Approval Required and 90 semester hours completed.

HUSC 4392. Independent Study in Human Science. 3 Hours.

A directed individual study of an approved problem related to one of the majors in Human Sciences. Course Equivalents: FACS 4392

Prerequisite: 9 advanced hours in declared major in Human Sciences and approval of department chair.

HUSC 4395. Special Topics in Human Science. 3 Hours.

This course will examine special topics in the field of Human Science. Course Equivalents: FACS 4395 .

Industrial Education (INED)

INED 4310. Occupational Human Relations in Career Technical Education. 3 Hours.

This course is designed to prepare the student to develop interpersonal skills and a better understanding of working relationships with people.

INED 4363. Preparation of Instructional Materials. 3 Hours.

This course is designed to prepare a student in the selection, development, organization, and effective use of instructional materials in Industrial Education classes. It involves the study of types, values, limitations and sources of instruction sheets and other teaching aids.

INED 4364. Teaching in Schools & Industry. 3 Hours.

A study of the objectives and the selection, organization and presentation of the subject matter of the various areas of Industrial Education including the organization of units of work, and demonstration teaching.

Prerequisite: Junior standing.

INED 4379. Occupational Analysis and Curriculum Development. 3 Hours.

This course is designed to enable a student to analyze trades, occupational pursuits and jobs for divisions, operations and information in order to develop a curriculum compatible to his/her teaching field.

INED 4391. Lab Management, Organization, and Control. 3 Hours.

This course is designed to prepare students to successfully manage laboratory activities, organize their labs in accordance with contemporary concepts, and to control materials/supplies within their laboratories.

Prerequisite: Junior Standing or consent of instructor.

Integrated Science (ISCI)

ISCI 1436. Foundations of Science. 4 Hours.

The course focuses on the nature of science as a reliable method of acquiring knowledge about the natural world. Students will learn how to apply key scientific facts, concepts, laws and theories to distinguish science from non-science, bad science, and pseudoscience by analyzing a variety of claims and case studies. By employing an innovative, interdisciplinary approach to science education, this course is designed to increase science literacy and critical thinking skills for introductory-level students. This course is designed for non-science majors to help them meet their General Education science requirement. Students must enroll concurrently in the corresponding lab for this course. Course Equivalents: BIOL 1436, GEOG 1436, GEOL 1436.

Integrated Reading and Writing (INRW)

INRW 0011. Tutorial for Integrated Reading and Writing. 3 Hours.

This course supports students' reading and writing skills, provides them with academic support resources, reinforces their reading strategies, and has aligned support for the co-requisite ENGL 1301. This course must be taken concurrently with ENGL 1301.

Prerequisite: Score less than or equal to 945 with a Diagnostic Score of 4-6 or 0 in the ELAR portion of the Texas Success Initiative Assessment Test 2.0.

INRW 0014. Tutorial for Integrated Reading and Writing. 3 Hours.

This is a reading and writing tutorial designed to integrate students' critical reading and academic writing skills. The goals of the course are to increase practice with SAE (Standard American English), reinforce reading strategies, and support students in the co-requisite ENGL 1301. Variable Credit (0 to 3). This course must be taken concurrently with ENGL 1301. Course Equivalents: INRW 0111

Prerequisite: Score less than or equal to 945 with a Diagnostic Score of 1-3 in the ELAR portion of the Texas Success Initiative Assessment Test 2.0.

INRW 0111. Tutorial for Integrated Reading and Writing. 1 Hour.

This is a one-hour reading and writing tutorial designed to integrate students' critical reading and academic writing skills. The goals of the course are to increase practice with SAE (Standard American English), reinforce reading strategies, and support students in the co-requisite ENGL 1301. Credit: 0.

Prerequisite: Score of 360-362 in writing and score of 348-350 for reading in the Texas Success Initiative Assessment Test.

INRW 0112. Tutorial for Reading. 1 Hour.

This is a one-hour reading tutorial designed to support students' critical reading skills. The goals of the course are to reinforce reading strategies and assist students in co-requisite reading-intensive courses. Credit in this course will not be allowed to count toward graduation or computation of grade point average or classification of students by hours completed. (Course does not fulfill University degree requirements.) Corequisite: HIST 1301 or SOCI 2319 or other reading-intensive course.

Prerequisite: Scores falling into NCBO range on TSIA, as determined by state guidelines and university-established policy.

INRW 0301. Integrated Reading and Writing. 3 Hours.

The course focuses on applying critical reading skills for organizing, analyzing, and retaining material and developing written work appropriate to the audience, purpose, situation, and length of the assignment. The course fulfills Texas State Initiative (TSI) requirements for reading and/or writing.

Prerequisite: Students scoring 342-347 on the Reading portion of the TSI Assessment Test and/or 350-359 on the Writing portion of the TSI Assessment Test.

Integrated Studies (INTG)

INTG 3301. Critical Approaches to Integrated Studies. 3 Hours.

Students research their chosen discipline minors to critically investigate and enhance their understanding of the fields associated with these minors. Emphasis is on students exploring links between their minors in preparation for coursework and employment or education beyond the interdisciplinary Bachelor's degree.

Prerequisite: Sophomore Standing.

INTG 4301. Integrated Studies Capstone. 3 Hours.

Students conduct career exploration activities as well as complete a capstone project linking the three minor areas of study that comprise the student's personalized Bachelor of Science in Integrated Studies degree. Students will research, review, and analyze the three academic minor areas and mold them into an innovative research report. Course Equivalents: LSTU 4301, UNIV 4301

Prerequisite: INTG 3301.

Interior Design (INDS)

INDS 1140. Introduction to Interior Design. 1 Hour.

Students explore the interior design profession including basic concepts and topics related to the knowledge, skills, theories, contemporary and societal issues of design practice, and career paths in interior design.

INDS 1360. Applied Design Theory. 3 Hours. [TCCN: ARTS 1311]

Specific attention is given to fundamental design theories, elements and principles of design as they function in the interior environment. Opportunities are provided for a variety of applied experiences with art and design media. Practical application in two-dimensional and three-dimensional projects is made through laboratory experiences. (2-2). Course Equivalents: FACS 1360 .

INDS 2361. History of Furnishings I. 3 Hours. [TCCN: ARCH 1301]

A study of history of interior furniture, furnishings, and architecture from the Egyptian period to the Renaissance. Emphasis is given to the social, economic, and political conditions that influenced furniture, interiors, and architectural design. (3-0). Offered spring semesters. Course Equivalents: FACS 2361 .

INDS 2364. Materials and Sources. 3 Hours.

A theoretical analysis of design is merged with understanding of interior materials and products which meet human needs. Assessment of quality and performance criteria is emphasized, along with the design process.(3-0). Offered fall semesters. Co-requisites: INDS 2386 and INDS 2387. Course Equivalents: FACS 2364 .

INDS 2365. Digital Drawing for Interior Design. 3 Hours. [TCCN: ARCH 1315]

This course addresses computer graphics for interior designers. It will focus on the implementation of computer-aided design processes and drafting techniques to produce construction and presentation drawings. Students will explore various digital drafting techniques to develop 2-dimensional and 3-dimensional drawings. Offered spring semesters. Course Equivalents: FACS 2365

Prerequisite: Grade of C or better in INDS 2364 and INDS 2387.

INDS 2386. Space Planning Fundamentals. 3 Hours.

This course provides the student with an introduction to complex process of planning residential and small commercial spaces for interior design. As part of the design process, space planning begins with a programmatic investigation of human needs, desired spatial quality, and building parameters. Students will explore space planning variations applied to a variety of interior spaces, stressing the importance of changing needs in design development and problem solving. Influencing factors such as the human element, barrier-free design and building systems are included. Offered spring semesters. Co-requisites: INDS 2364 and INDS 2387. Course Equivalents: FACS 2386

Prerequisite: INDS 1360.

INDS 2387. Architectural Graphics for Interiors. 3 Hours. [TCCN: ARCH 1307]

The course focuses on the development of two-dimensional graphic representations of architectural design. Practical application is achieved through development of drafting skills and representational sketching. (2-2). Co-requisites: INDS 2364 and INDS 2386. Offered spring semesters. Course Equivalents: FACS 2387

Prerequisite: MATH 1332, or MATH 1314, or MATH 1324, or MATH 1342.

INDS 2388. Building Systems for Interiors. 3 Hours. [TCCN: ARCH 2312]

This course focuses on helping students to develop an understanding of building systems as they apply to interior design. Student understanding of systems is communicated in drawing of construction, electrical, mechanical, ceiling and floor systems as part of design solutions. (2-2). Offered spring semesters. Course Equivalents: FACS 2388

Prerequisite: INDS 2387 with a grade of C or better.

INDS 3332. Lighting Design for Interiors. 3 Hours.

This course provides basic principles of light and color, measurement and control of light as applied to human needs in both residential and commercial interiors. Environmental systems for day lighting and solar design are studied. (3-0). Offered fall semesters. Concurrent enrollment in INDS 3338. Course Equivalents: FACS 3332

Prerequisite: INDS 2364, INDS 2387, and INDS 2388 with a grade of C or better.

INDS 3337. Design Process. 3 Hours.

The student in this course will implement the design process in residential and commercial spaces through drawings and model construction techniques. Students will explore various rendering media and develop three-dimensional drawings along with volumetric study of spaces (1-4).

Offered spring semesters. Course Equivalents: FACS 3337

Prerequisite: Grade of C or better in INDS 3332, INDS 3338, and INDS 3377.

INDS 3338. Residential Design. 3 Hours.

The student will apply the design process to residential spaces. It will include development of schematic and technical drawings, material selection, perspective representations of space, and specifications. (1-4). Offered fall semesters. Concurrent enrollment in INDS 3332. Course Equivalents: FACS 3338

Prerequisite: Grade of C or better in ARTS 1316, INDS 2365, INDS 2388, and ETCM 2363.

INDS 3360. Interior Design Profession Practice & Procedure. 3 Hours.

This course includes fundamentals of business procedures used in interior design residential and commercial establishments. Practical application is implemented through design project management. (3-0). Offered spring semesters. Co-requisite: INDS 3337. Course Equivalents: FACS 3360

Prerequisite: Grade of C or better in INDS 3338.

INDS 3361. History of Furnishings II. 3 Hours.

This course is focused on the study of history of interiors, architecture, and furnishings from the post-Renaissance era to the present. Emphasis is given to the social, economic, and political conditions that influenced furniture, interior, and architectural design. Offered fall semesters.(3-0). Course Equivalents: FACS 3361 .

INDS 3365. Digital Drawing for Interior Design II. 3 Hours.

Students in this course focus on computer applications through digital design, three-dimensional modeling, perspective drawing, problem identification, problem solving, and research techniques applied to interior environments. Offered spring semesters. Course Equivalents: FACS 3365

Prerequisite: ETCM 2363, INDS 2365, and INDS 2388.

INDS 3377. Interior Codes & Standards. 3 Hours.

A study of laws, codes, standards and regulations that are in effect to protect human health and safety for interiors. Included are the fire and life safety codes, barrier-free design, and ergonomics. (3-0). Offered fall semesters. Course Equivalents: FACS 3377

Prerequisite: Junior Standing.

INDS 4330. Commercial Design I. 3 Hours.

A study is made of design development of interiors through analysis of space and structure. Focus is on comprehensive design solutions implemented through multiphase projects including space planning, contract documents, specifications, finish selections, sustainability, and various presentation techniques. (1-4). Offered fall semesters. Course Equivalents: FACS 4330

Prerequisite: INDS 3332, INDS 3337, INDS 3338, INDS 3360, INDS 3365 and INDS 3377 with a grade of C or higher and senior standing.

INDS 4331. Commercial Design II. 3 Hours.

The capstone course for Interior Design majors, this course includes a semester-long project or a series of comprehensive projects preparing students for internship and professional office settings. Students are encouraged to demonstrate knowledge gained to-date to solve various design situations. Graphics presentations include hand and digital drawings and media. (1-4). Offered spring semesters. Course Equivalents: FACS 4331

Prerequisite: INDS 4330 and ETCM 3372 with a grade of C or higher, senior standing.

Jazz

JAZZ 1201. Applied Jazz Styles and Analysis. 2 Hours.

Students study jazz specific techniques, styles, and musicality on their applied instrument through private instruction. Credit: 2.

Prerequisite: Admission to the Undergraduate Certificate in Jazz Studies or by instructor permission.

JAZZ 3201. Applied Jazz Styles and Analysis. 2 Hours.

Students study jazz specific techniques, styles, and musicality on their applied instrument through private instruction. Credit: 2.

Prerequisite: Admission to the Undergraduate Certificate in Jazz Studies or by instructor permission and must have passed a sophomore proficiency jury.

Kinesiology (KINE)

KINE 1110. Racquet Sports. 1 Hour.

This course will include fundamental skill development, knowledge on rules, strategies, and techniques specific to two or more racquet-related activities that may include badminton, pickle ball, raquetball, and/or tennis. This course includes physical activity and demonstration of skill learning.

KINE 1113. Basketball and Soccer. 1 Hour.

This course will include fundamental skill development, knowledge on rules, strategies, and techniques specific to basketball and soccer, presented at either the beginning of intermediate level. This course includes physical activity and demonstration of skill learning.

KINE 1114. Rhythmic Activities & Dance. 1 Hour.

This course introduces students to the skills, concepts and knowledge necessary for teaching development and performance sequences in various rhythmic activities (creative rhythms, routines with small hand apparatus, and novelty dances) and dance forms (folk, social, square, contra, and line). This course includes physical activity and demonstration of skill learning. Required for BS in KINE and Education Double Majors. This course is offered in Spring only.

KINE 1115. Track & Field. 1 Hour.

The student will gain proficiency in fundamental skills in gymnastics and track and field events, as well as an understanding of basic terminology associated with judging and spotting. Enrollment limited to Kinesiology majors and minors.

KINE 1116. Student-Athlete Affairs. 1 Hour.

This course is based upon the National Collegiate Athletic Association CHAMPS/Life Skills Program and is designed to assist the student-athlete in developing skills in the areas of academics, personal growth, career choice, and commitment to service. Enrollment is limited to members of athletic teams. Substitution of this class for the University's activity requirement is not permitted. No more than four hours of KINE 1116 can be counted toward the degree. Approval for enrollment must be obtained from the student's coach prior to registration.

KINE 1117. Lifetime Physical Activities. 1 Hour.

Each class will have skills, knowledge and techniques presented at either the beginning or intermediate level in one or more of the lifetime and individual sports.

KINE 1120. Martial Arts. 1 Hour.

This course will introduce the student to basic martial arts concepts, principles, terminology, safe practices, and applied execution of skills and strategies. An emphasis will be placed on teaching the student basic self-defense techniques and their application in a variety of situations. The student will improve their general physical fitness and skill performance.

KINE 1331. Foundations of Kinesiology. 3 Hours.

This course serves as a base for all kinesiology courses. Units will include historical development, philosophical implications, physical fitness, scientific bases of movement, and educational values of kinesiology and career path exploration and identification.

KINE 2110. Scuba/Diving. 1 Hour.

This course will be offered for all levels of swimming (beginning through advanced), diving, synchronized swimming, or scuba diving. For advanced life saving and water safety instructors see KIN 232.

KINE 2111. Golf & Recreational Activities. 1 Hour.

This course presents rules, knowledge and skills in golf, archery and another leisure time activity selected on a rotational basis. Half a semester is devoted to golf, with equal time allotted to archery and the other named activity. This course includes physical activity and demonstration of skill learning.

KINE 2113. Softball and Volleyball. 1 Hour.

This course will include fundamental skill development, knowledge on rules and strategies, and techniques specific to softball and volleyball at the beginning level. This course includes physical activity and demonstration of skill learning.

KINE 2114. Weight Training and Physical Conditioning. 1 Hour.

Experiences in this course will include skills, knowledge, techniques, and safety procedures of weight training and physical conditioning at the beginning level. This course includes physical activity and demonstration of skill learning.

KINE 2115. Lifetime Health and Wellness. 1 Hour. [TCCN: PHED 1164]

Students will gain an understanding of physical conditioning and wellness pertaining to the five components of health-related fitness. Students will develop an understanding of lifestyle related diseases and behavior modification techniques. In addition, there will be opportunities to participate in a variety of movement experiences related to fitness.

KINE 2119. Kinesiology Activities. 1 Hour.

Activities can include special or unique areas as instructors are available. This will include those activities which are not offered on a regular basis including aerobic dance, aquatic exercise, etc.

KINE 2330. First Aid and CPR - American Red Cross. 3 Hours.

A course for those who wish to acquire a knowledge of Red Cross emergency and preventive measures. Successful completion leads to CPR and first aid certification. Students may become instructors through additional American Red Cross training. (Also listed as HLTH 2330.) Course Equivalents: HLTH 2330 .

KINE 2388. Officiating Sports. 3 Hours.

This course includes a study of the rules, interpretations, and the mechanics of officiating. The course is designed to develop the skills and knowledge required in the officiating of football, basketball, baseball, soccer, track and field, and other interscholastic sports.

KINE 3100. Fundamentals of Basketball Coaching. 1 Hour.

Students study the fundamental preparation, operation, expertise and management necessary to coach and conduct a basketball program. Students will learn about rules, techniques, tactics, season planning, strategy, and applications related to the coaching of basketball. This course is offered online only. Semester: 5A/5B/5C.

Prerequisite: 45 hours.

KINE 3101. Fundamentals of Volleyball Coaching. 1 Hour.

Students study the fundamental preparation, operation, expertise, and management necessary to coach and conduct a volleyball program. Students learn about rules, techniques, tactics, season planning, strategy, and applications related to the coaching of volleyball. This course is offered online only. Semester: 5A/5B/5C.

Prerequisite: 45 hours.

KINE 3102. Fundamentals of Football Coaching. 1 Hour.

Students study the fundamental preparation, operation, expertise, and management necessary to coach and conduct a football program. Students will learn about rules, techniques, tactics, season planning, strategy, and applications related to the coaching of football. This course is offered online only. Semester: 5A/5B/5C.

Prerequisite: 45 hours.

KINE 3103. Fundamentals of Track & Field/Cross Country Coaching. 1 Hour.

Students study the fundamental preparation, operation, expertise, and management necessary to coach and conduct a track field/cross country program. Students learn about rules, techniques, tactics, season planning, strategy, and applications related to the coaching of track field/cross country. This course is offered online only. Semester: 5A/5B/5C.

Prerequisite: 45 hours.

KINE 3104. Fundamentals of Baseball and Softball Coaching. 1 Hour.

Students study the fundamental preparation, operation, expertise, and management necessary to coach and conduct a baseball and softball program. Students will learn about rules, techniques, tactics, season planning, strategy, and applications related to the coaching of baseball and softball. This course is offered online only. Semester: 5A/5B/5C.

Prerequisite: 45 hours.

KINE 3105. Fundamentals of Soccer Coaching. 1 Hour.

Students study the fundamental preparation, operation, expertise, and management necessary to coach and conduct a soccer program. Students learn about rules, techniques, tactics, season planning, strategy, and applications related to the coaching of soccer. This course is offered online only. Semester: 5A/5B/5C.

Prerequisite: 45 hours.

KINE 3117. Competency in Motor Skills. 1 Hour.

This basic skills course is designed to equip prospective physical education teachers with the motor skill competencies necessary to teach physical education in EC-12 schools. Prospective physical education teachers will be assessed on skills in tennis, volleyball, soccer, and other sports. Enrollment limited to BS in KINE and Education Double Majors. This course is offered in the Fall only.

KINE 3173. Exercise Physiology Laboratory. 1 Hour.

Students apply content knowledge of exercise physiology through various lab-based assessments. Each of the components of health-related fitness (cardiovascular endurance, body composition, flexibility, muscle strength, and muscle endurance) will be addressed. Required for KINE-CES and HPWM majors.

Prerequisite: KINE 2115 Co-requisite: KINE 3373.

KINE 3320. Foundations of Sport Coaching. 3 Hours.

Students in this course focus on sport science principles associated with the coaching profession. Course material adheres to the objectives created by the National Standards for Athletic Coaches and the United States Council for Coaching Excellence.

Prerequisite: 45 credit hours.

KINE 3321. Applied Kinesiology. 3 Hours.

Students analyze human movement in order to understand and apply exercise and sport training principles for improved human performance. This course is designed for students preparing to be coaches, physical educators, or teachers of sport, exercise, or physical activity. Required for Sport Coaching Minors and BS in KINE and Education Double Majors. Advanced Elective for all other majors.

Prerequisite: 45 credit hours or instructor approval.

KINE 3362. Functional Kinesiology. 3 Hours.

A study of human motion in two broad areas: the neurological and mechanical aspects of human movement, as well as muscle structure and functions. Application of these two areas to motor skills analysis is emphasized.

Prerequisite: BIOL 2401 or BIOL 2403, (KINE 1331 or ATTR 2300 or HLTH 1360,) and 45 Credit Hours, or instructor approval.

KINE 3363. Assessment in Kinesiology. 3 Hours.

This course presents information on the construction and administration of tests evaluating fitness and motor skills used in sports. Issues in grading and evaluation are also addressed. This course is offered in the Fall and Summer semesters.

Prerequisite: 45 credit hours or instructor approval.

KINE 3364. Motor Learning. 3 Hours.

This course is designed for students who are preparing for a variety of professions in which the teaching, training, or rehabilitation of motor skills is involved. The goal of this course is to provide a theory-based foundation about the learning of motor skills to facilitate implementation of appropriate strategies and techniques for instructional, training, and rehabilitation applications.

Prerequisite: KINE 1331 or ATTR 2300 or HLTH 1360; and 45 credit hours.

KINE 3365. Sport Law. 3 Hours.

Students in this course develop a comprehensive and systematic overview of fundamental legal issues in sport. Topics in this course are intended to introduce students to the legal issues that are most critical to the management of sport including liability, gender equity, risk management, tort law, labor law, and collective bargaining. This course is offered in the Spring only.

Prerequisite: 45 credit hours.

KINE 3367. Lifespan Motor Development. 3 Hours.

This course explores the theories of motor development and the applications of these theories to identify continuous processes of motor behavior across the lifespan. The factors mediating human growth and development will be applied. The course focuses on the relationships among growth, gender, maturation, motor performance and the person's context. The critical developmental considerations, with respect to planning and directing movement experiences for individuals across the lifespan, will be emphasized in the course.

Prerequisite: KINE 1331 or ATTR 2300 or HLTH 1360, and 45 credit hours.

KINE 3368. Skill Themes and Movement Concepts. 3 Hours.

This course is designed to help the future teacher of physical education for elementary grade children, understand the "skill theme approach" to children's physical education curriculum, based on skill themes, movements concept and generic levels of skill proficiency. Required for BS in KINE and Education Double Majors. This course is offered in the Fall only.

Prerequisite: KINE 1331 or ATTR 2300, and 45 credit hours.

KINE 3372. Sport Skills Analysis. 3 Hours.

This course will introduce the instructional process of analyzing and sequencing skill components and performance techniques found within team and individual sports. The student will investigate the process of a task analysis and other skill sequencing experiences. Aspects of lesson progression and construction will be incorporated throughout the course while maintaining a focus on motor skill acquisition. Required for Sport Coaching Minors.

Prerequisite: 45 credit hours.

KINE 3373. Physiology of Exercise. 3 Hours.

This course is designed to develop an understanding of the manner in which the body reacts to the exacting requirements of activity and exercise. KINE-CES and HPWM majors must co-enroll in KINE 3173.

Prerequisite: 45 Credit Hours and BIOL 2401 and BIOL 2402 or BIOL 2403 and BIOL 2404, and KINE 1331 or ATTR 2300; or instructor approval.

KINE 3378. Administration of Kinesiology and Sport. 3 Hours.

The purpose of this course will be to examine management theory and practice related to the sport industry. In addition, a variety of specializations associated with the field of sport management will be examined to help the student garner a better understanding of available career opportunities in this sector of business. The application of concepts to scholastic programs will also be discussed. This course is offered in Fall only.

Prerequisite: 45 credit hours or instructor approval.

KINE 3388. Sports in Contemporary Society. 3 Hours.

The content of the course will provide students with an introduction to the sociology of sport. This course focuses on the study of sport and the impact on society, including gender, and race. The study of sport from a socio-cultural perspective will implore students to make connections from sport and its relationship to historical and contemporary events, social and cultural structures, as well as political climate. Topics for discussion will include current sports-related controversies. This course is offered in the Spring and Summer semesters only.

Prerequisite: 45 credit hours or instructor approval.

KINE 3389. Gender and Sport. 3 Hours.

This course offers an introduction to current scholarship and debates surrounding issues of gender in sport. The purpose of this course is to analyze the complex interactions of gender, race, sexuality, and class within sport. A critical perspective will be used to examine sport as a significant social institution and to explore its relationship to the cultural construction and interpretation of gender. This course is offered in the Fall only.

Prerequisite: 45 credit hours.

KINE 4117. Practicum. 1 Hour.

A course in which students serve as interns in a laboratory situation where emphasis is placed upon teaching skills. This provides a qualified student with an opportunity to gain teaching experience. Student must have a professor who has agreed to supervise the project. Course Equivalents:

HLTH 4117

Prerequisite: Permission of department chair.

KINE 4314. Advanced Strength Training. 3 Hours.

Students in this course focus on the fundamentals of strength and conditioning and are prepared for a career as a certified strength and conditioning specialist. This class prepares students to take the national strength and conditioning certification exam.

Prerequisite: KINE 2114, KINE 2115, KINE 3362, KINE 3373, and 75 credit hours.

KINE 4335. Sport and Exercise Psychology. 3 Hours.

This course deals with understanding of the psychological make-up of the athlete. It explores traditional myths, syndromes and stumbling blocks facing the modern day athlete and how these may be overcome. The course will focus on the dynamics of the coach/athlete relationship.

Prerequisite: 75 credit hours.

KINE 4361. Managing Health Promotion in the Workplace. 3 Hours.

A course designed to prepare the health educator to establish special programs, which promote health in corporate, occupational, or industrial settings. Course Equivalents: HLTH 4361

Prerequisite: 75 credit hours or instructor approval.

KINE 4362. Biomechanical Analysis. 3 Hours.

This course focuses on the quantitative biomechanical analysis of human movement and its relationship to activity, performance, and injury causation and prevention. Students will also explore research methods and investigations in biomechanics.

Prerequisite: KINE 3362 with a minimum grade of C, and (PHYS 1305 and PHYS 1105 or PHYS 1301 and PHYS 1101), and 75 credit hours.

KINE 4363. Elementary Physical Education. 3 Hours.

This course is concerned with a study of fine and gross-motor activities and developmental progressions of pre-school children. Opportunities are given for field-based experiences in teaching children motor skills. Required for BS in KINE and Education Double Majors. This course is offered in the Spring only.

Prerequisite: KINE 3368 with a minimum grade of C.

KINE 4364. Fitness Education. 3 Hours.

Students in this course are introduced to the foundations and components of health-related fitness, appropriate curriculum for children and adolescence (Pre-K through 12) programming, effective teaching principles, and assessment of physical activity and fitness. This course prepares students to sit for the Physical Best Health-Fitness Specialist Certification.

Prerequisite: KINE 3321 or KINE 3373.

KINE 4365. Directing Wellness Programs. 3 Hours.

Students address the general administrative and daily operational skills required to direct a wellness program in corporate, institutional, and community settings. Emphasis is placed on the collaborative and professional skills that are needed to manage wellness programs. Course Equivalents: HLTH 4364

Prerequisite: 75 credit hours or instructor approval.

KINE 4366. Teaching Secondary Physical Education. 3 Hours.

This course examines the designing of physical education programs, teaching of physical education programs, analysis of student performance in a physical education program, and implementation of a physical education program at the secondary level. Opportunities are provided to work with physical education students in the secondary setting. Course Equivalents: KINE 3375

Prerequisite: KINE 3368, KINE 4363, and 60 Credit Hours.

KINE 4369. Adapted Physical Activity. 3 Hours.

This course is designed to provide an introduction to adapted physical activity including sports and leisure for persons with disabilities across school, community, and clinical based programs. This course will provide information and knowledge on how to teach movement skills to persons with disabilities in various physical activity settings. Opportunities are provided to work with individuals with disabilities on-and off-campus.

Prerequisite: 60 credit hours.

KINE 4373. Advanced Topics in Physiology of Exercise. 3 Hours.

This course bridges the gap between basic undergraduate and graduate physiology of exercise. This course draws upon current research to build upon the basic principles of exercise physiology to develop a more advanced understanding of how exercise affects the body.

Prerequisite: KINE 3373 and 75 credit hours.

KINE 4375. Kinesiology Research Methods. 3 Hours.

Students in this course focus on basic, clinical, and applied research in kinesiology settings. Particular emphasis is given to understanding the body of work on a topic, experimental design, and the research process. Students participate in a research project related to kinesiology. Credit 3

Prerequisite: KINE 3362, KINE 3364, KINE 3173, KINE 3373, and 75 credit hours or instructor approval.

KINE 4377. Principles of Exercise Testing and Prescription. 3 Hours.

This course is designed to provide the student with the theoretical background and practical experience necessary for the safe and scientific evaluation of physical fitness, particularly as it relates to health and disease and the development of programs for remediation, maintenance and enhancement of motor and health-related qualities.

Prerequisite: KINE 3362 and KINE 3373 with a minimum grade of C; and 75 credit hours.

KINE 4392. Problems in Kinesiology. 3 Hours.

A directed individual study of an approved problem related to the field of kinesiology. Student must have a professor who has agreed to supervise the project.

Prerequisite: 9 advanced hours in Kinesiology and permission of the department chair.

KINE 4393. Adult Fitness Management. 3 Hours.

This course is designed to provide the student with the theoretical background and practical experience necessary for a successful internship experience.

Prerequisite: KINE 2114, KINE 2115, ATTR 3370, KINE 3373, and KINE 3173; and 75 Credit Hours.

KINE 4394. Internship. 3 Hours.

This course provides the student with opportunities to demonstrate competencies developed in previous courses by working in an agency under the supervision of a qualified practitioner. This course requires 200 contact hours at the approved internship site to be completed within a single semester. The course can be completed concurrently with KINE 4395.

Prerequisite: KINE 4393, KINE 4377 with a minimum grade of C and senior standing.

KINE 4395. Internship II. 3 Hours.

Students complete an additional 200 hours of an internship experience and serves as the second half of the 400-hour internship for undergraduate students. This course allows students to either gain experience in a new setting, or to delve deeper into the experiences gained in KINE 4394.

Prerequisite: KINE 4393 and KINE 4377.

Library Science for Sch Librns (LSSL)

LSSL 2363. Literature for Children and Teens. 3 Hours.

Students are acquainted with the selection, critical analysis, and historical development of literature for children and young adults. Emphasis is placed on selecting materials that meet the needs and interests of children and young adults, identifying techniques and strategies that will motivate all children and young adults to read and respond to literature, and developing critical abilities for evaluating literature and related materials. A strong multicultural element is also a part of this course. Course Equivalents: LSSL 3363

Prerequisite: Must have sophomore standing or above.

LSSL 3361. Literature and Related Materials for Children. 3 Hours.

Students study the historical development, critical analysis, and selection of materials for children. Identification and use of folklore, poetry, imaginative, realistic, and informational literature. Stresses developmental needs of children, including those of various ethnic groups. Emphasis is placed on motivational techniques.

Prerequisite: Must have junior standing or above.

LSSL 3362. Literature and Related Materials for Young Adults. 3 Hours.

Students study selection of literature, the approved selection tools, the preparation of bibliographies, oral and written reports, book talks, critical evaluations, annotations, and the sharing of reading experiences with a stress on the developmental needs of young adults. Emphasis is placed on motivational techniques.

Prerequisite: Must have junior standing or above.

LSSL 4010. Library Science Workshop. 1-3 Hours.

Students explore current topics in school libraries. One semester hour is earned, and the course may be repeated for a maximum of three hours. NOTE: Maximum of three hours workshop coursework allowed in a student's program.

LSSL 4375. Directed Independent Study in Library Science. 3 Hours.

Students engage in an arranged professional and developmental learning experiences incorporating a practical application of Library Science skills and practices to include internships, individual research, and studies.

Management (MGMT)

MGMT 3310. Principles Of Management. 3 Hours.

This course is concerned with the principles and methods used in managing and operating organizations, both domestically and abroad. Course coverage includes analysis of the organization's environment and the managerial functions of planning, organizing, leading, motivating, and controlling.

Prerequisite: 42 completed hours.

MGMT 3320. Organizational Behavior. 3 Hours.

Students learn about individual and group behavior in organizations and how it affects the achievement of organizational objectives.

Prerequisite: MGMT 3310 (can be taken concurrently).

MGMT 3325. New Product Commercialization. 3 Hours.

Students address the issues of formulation, financing and operations of bringing new products to market. The course will include a group term project designed to teach the students the process of commercializing new products. Topics may include environmental screening, developing and testing the concept of the product, funding, patents and copyrights.

Prerequisite: MGMT 3310.

MGMT 3327. Management of Innovation and Technology. 3 Hours.

Students address issues concerning the management of innovation and technology, such as developing creative potential in individual and organizations and the management of creative employee. Topics may include the importance of innovation and technology to business and society, forecasting for innovation and technology, the value of creation, types of innovation, and the role technology plays in innovation.

Prerequisite: MGMT 3310.

MGMT 3330. Human Resource Management. 3 Hours.

Students examine core human resource management practices, including job analysis, recruitment and selection, training and development, performance management, compensation and benefits, and employee and labor relations as well as explore legal requirements affecting human resource management decisions.

Prerequisite: MGMT 3310.

MGMT 3335. Diversity, Equity, & Inclusion in Organizational Management. 3 Hours.

Students learn to recognize the benefits of diversity, equity, and inclusion within the workplace. This includes surface-level diversity like gender, ethnicity, race, and age as well as deep-level diversity like education, personality, and values. The course addresses both the challenges and opportunities available with a diverse workforce in efforts to gain a competitive advantage.

Prerequisite: 42 hours.

MGMT 3348. Small Business Management. 3 Hours.

Students embark on a comprehensive study of all areas of operations and management of the small business enterprise. Topics covered may include: ownership form, site analysis, planning, organizing, staffing, financial control, inventory control, and marketing tactics. Course Equivalents: MGMT 4310 .

MGMT 3350. Services Marketing Management. 3 Hours.

Students examine the characteristics of the service domain. The planning, organization, production, and marketing of quality services is the focus of the course.

Prerequisite: MGMT 3310 and MKTG 3310.

MGMT 3370. Operations Management. 3 Hours.

Students address issues pertaining to the operations function within manufacturing and service firms competing in a global environment. The relationship of operations to other organizational functions are investigated. Topics may include decision making, project management, forecasting, capacity planning, facilities design and location, process and product design, inventory management, and quality assurance. Course Equivalents: MGMT 4370

Prerequisite: 42 credit hours, MGMT 3310, and BANA 2372 or MATH 1342.

MGMT 3372. Supply Chain Management. 3 Hours.

This course is a study of how different organizations can effectively coordinate to form the supply chain of a product or a service in order to deliver it to end consumers at the lowest cost possible while optimizing customer service levels. Students will learn the managerial principles and methods used to efficiently perform the sourcing, production, and distribution of products and services in a global environment. Topics include purchasing, supplier selection/development, materials handling, demand planning, risk management, transportation, warehousing, inventory management, and channel relationships. Course Equivalents: MGMT 4360

Prerequisite: 42 credit hours, MGMT 3370 (concurrent enrollment allowed), MKTG 3310.

MGMT 3374. Strategic Sourcing/Procurement. 3 Hours.

Students gain in-depth knowledge of the concepts, methods, and responsibilities of the purchasing function for manufacturing and service organizations. Topics may include the organizational role of strategic sourcing, procurement, contract and pricing practices, negotiation, quality assurance and reliability, inventory management, make-or-buy decisions, material management, and the acquisition of transportation and other services.

Prerequisite: 42 credit hours and MGMT 3370.

MGMT 3376. Global Supply Chain Logistics. 3 Hours.

Students focus on the basic concepts and techniques of domestic and international logistics in the context of supply chain management. Topics may include the efficient flow and storage of both raw materials and finished goods, and the associated managerial activities needed for effective control of materials from their initial point of origin to their final point of consumption. Emphasis is placed on the strategic importance and competitive advantage logistics provides in a global marketplace, providing students the tools and methods necessary to analyze business logistics problems.

Prerequisite: 42 credit hours and MGMT 3370.

MGMT 4080. Independent Study. 1-3 Hours.

The credit in this course varies according to the work performed. The student may pursue special studies for which a special course is not organized. Variable Credit (1 to 3). Course Equivalents: MGMT 4380

Prerequisite: 30 hours in Business and Economics and consent of the instructor.

MGMT 4085. Special Topic. 1-3 Hours.

This course of faculty-led study is designed to provide undergraduate students exposure to new Management topics and concepts in a course setting. Variable Credit (1 to 3). Course Equivalents: MGMT 4385 .

MGMT 4320. International Field Studies in Management. 3 Hours.

Students engage in directed studies of organizational behavior, managerial functions, entrepreneurship, and small business in a study abroad program.

Prerequisite: Permission of Instructor or Department Chair.

MGMT 4325. Family Business Management. 3 Hours.

Students are provided an overview of family business, including an exploration of factors contributing to economic success, family harmony, and business continuity, and they explore the challenges and opportunities facing individuals and families involved in family business relationships. Some of the specific topics may include the family system, culture, entrepreneurial influences, conflict and negotiation, career planning, ethics, governance, succession and strategic planning, professional support relationships, and survival skills as a son or daughter in a family business.

Prerequisite: Junior Standing.

MGMT 4327. Corporate Entrepreneurship. 3 Hours.

Students explore the concepts, key factors, and practices of entrepreneurial activity as a process inside corporations and examines ways entrepreneurial transformation can be achieved in larger organizations. Course topics emphasized include internal ventures and external collaborative approaches that include corporate venture capital investments, licensing, different types of alliances, and formal joint ventures.

Prerequisite: Junior Standing.

MGMT 4330. Compensation. 3 Hours.

Students examine the components of a compensation system, which include internal alignment, external competitiveness, recognizing employee contributions, and the management of the system, to promote effective pay determination decisions.

Prerequisite: MGMT 3330.

MGMT 4335. Management and Labor Relations. 3 Hours.

Students study the legal perimeter of management labor relations, the collective bargaining process, and problems of union contract compliance.

Prerequisite: MGMT 3330.

MGMT 4340. International Management. 3 Hours.

Students are challenged to consider how businesses operate in different global environments. Students have the opportunity to learn how businesses manage effectively across borders and cultural differences by expanding their insight regarding how international and multi-national companies operate in the global environment. As a result, students gain an appreciation for working and managing in a global environment.

Prerequisite: MGMT 3310.

MGMT 4345. Social Responsibility of Management. 3 Hours.

Students study the role business plays in our society and the obligations and responsibility that it has to society. Students examine the ethical, environmental, and cultural implications of industrial/technological societies and their history.

Prerequisite: MGMT 3310.

MGMT 4350. Project Management. 3 Hours.

Students focus on the planning, implementation, and control of projects. Coverage includes the project management knowledge areas and lifecycle of projects. The appropriate intellectual foundation is established so that students can work, individually and in teams to solve project related problems.

Prerequisite: 42 credit hours and BANA 2372 or MATH 1342.

MGMT 4355. Human Resource Development. 3 Hours.

Students are provided an overview and foundation of the human resource training and development (HRD) profession, they will identify current issues for HRD practitioners and researchers as well as highlight current work place changes and their impact on human resource training and development.

Prerequisite: MGMT 3330.

MGMT 4365. Service Operations Management. 3 Hours.

Students address issues pertaining to the operations function within service organizations competing in a global environment. The relationship of operations to other organizational functions are investigated. Topics may include understanding services, new service development, service quality, process improvement, location decisions, capacity planning, waiting lines, forecasting, inventory management, and service supply relationships.

Prerequisite: 42 credit hours, BANA 2372 or MATH 1342, and MGMT 3310.

MGMT 4375. Quality Management. 3 Hours.

Students study current topics in quality assurance management to include total quality control, statistical quality control, statistical process control, quality circles, and Deming's methods. An emphasis is placed on the systems approach to quality assurance.

Prerequisite: 42 credit hours and BANA 2372 or MATH 1342.

MGMT 4376. Management Science. 3 Hours.

In this course, students will learn quantitative methods used in the analysis of business problems. Topics include: decision theory, linear programming, transportation and inventory models, Bayesian probability, and queuing theory. Course Equivalents: BANA 3364

Prerequisite: 42 credit hours and BANA 2372 or MATH 1342.

MGMT 4378. Supply Chain ERP. 3 Hours.

Students examine the tactical and operational management of supply chains using enterprise resource planning (ERP) systems. Topics focus on issues related to the creation of end-user value through supply chain cost reductions and/or service improvements. Students gain hands-on experience with software used by organizations to manage and improve the efficiency of their supply chains.

Prerequisite: 42 credit hours and MGMT 3372 (formerly MGMT 4360)

MGMT 4389. Internship. 3 Hours.

Student are provided with an opportunity to apply academic skills in a practical work environment. (See Internship Coordinator prior to enrolling.) All internships must be approved in advance in order to receive credit.

Prerequisite: Department approval and minimum overall and COBA GPA of 2.5.

MGMT 4390. Strategic Management & Policy. 3 Hours.

Students learn to evaluate the external environmental factors and internal organizational characteristics and contexts for the purpose of formulating competitive strategies.

Prerequisite: Senior standing, MGMT 3310, MKTG 3310 and FINC 3320.

Management Information Systems (MGIS)

MGIS 1301. Introduction to Information Systems. 3 Hours.

Students are provided with the knowledge and skills necessary to succeed in today's computing society. Students make use of hardware and software to efficiently and effectively solve problems and make better decisions.

MGIS 1305. Business Computer Applications. 3 Hours. [TCCN: BCIS 1305]

This course is designed to develop student proficiency with business software. These skills include producing properly formatted business documents and reports, creating computerized spreadsheets for problem-solving and decision-making, and as a tool for preparing effective presentations. Course Equivalents: BUAD 1305 .

MGIS 3310. Principles of Management Information Systems (MIS). 3 Hours.

Students are introduced to the management and use of information systems in organizations. Material presented is selected to increase the student's literacy in this rapidly changing field, including commonly used acronyms and emerging technologies. Organizational applications of information systems are discussed for the functional areas of the firm.

Prerequisite: MGIS 1305 or MGIS 1301 or CSTE 1330 and 42 hours.

MGIS 3315. Programming for Business. 3 Hours.

Students are introduced to the implementation of common business applications using current visual application development platforms. Basic structured and object-oriented computer programming techniques are covered in the context of the creation of business-oriented systems. Course Equivalents: MGIS 2320

Prerequisite: CSTE 1330 or BUAD 1305 or MGIS 1301 and MATH 1324 or 1314 or MATH 1420.

MGIS 3320. E-Commerce Implementation. 3 Hours.

Students are introduced to the implementation of common business applications for e-commerce using Internet related technologies. Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), scripting language(s), and other current technologies are covered in the context of e-commerce. Course Equivalents: MGIS 4320

Prerequisite: MGIS 3310 and 42 credit hours.

MGIS 3330. Business Database Management. 3 Hours.

Students are introduced to databases. Design and implementation principles, including entity-relationship modeling and normalization are studied and applied in order to create an organizational database. Students become better computer users, who are more knowledgeable about the uses of databases in solving business problems, and learning a new way to think about business and its information needs.

Prerequisite: MGIS 3310.

MGIS 4080. Independent Study. 1-3 Hours.

The student may pursue studies for which a special course is not organized. The credit in this course varies according to the work performed. Variable Credit (1 to 3). Course Equivalents: MGIS 4380 .

MGIS 4085. Special Topic. 1-3 Hours.

Students study emerging information technologies. Class participants learn about the technical fundamentals and business applications associated with information technologies. Variable Credit (1 to 3). Course Equivalents: MGIS 4385

Prerequisite: MGIS 3310.

MGIS 4315. Decision Analysis & Analytics. 3 Hours.

Students apply topics related to business analytics. A major focus is placed on the importance of collecting and analyzing data by creating models for making better decisions and improving business practices and strategies. Topics covered include descriptive analytics, predictive analytics, and prescriptive analytics. Students learn to apply business analytic tools, and to communicate the results. Emphasis is placed on applications, concepts and interpretation of results.

Prerequisite: BANA 2372 or MATH 1342.

MGIS 4330. Business Database Management II. 3 Hours.

Students are provided knowledge and skills for database design, development, and implementation in a multi-user business environment, using a database management system (DBMS). Structured Query Language (SQL), a database procedural language, and other current technologies are covered in the context of DBMS.

Prerequisite: MGIS 3330.

MGIS 4340. Systems Analysis & Design. 3 Hours.

Students acquire knowledge and skills for analyzing an organization's information needs and designing, evaluating, and implementing computer-based information systems using a structured approach. Special attention is given to understanding the needs of an organization and translating those needs into a solution recommendation following project management best practices and a structured methodology. Course Equivalents: MGIS 3360

Prerequisite: MGIS 3310.

MGIS 4350. Business Network Management. 3 Hours.

Students learn the current and emerging telecommunications services and networking technologies with emphasis on their strengths, limitations, and business applications. In addition, students investigate aspects of installing and managing networks within business organizations. Covered topics may include commonly used network media, operating systems, LAN and WAN technologies, inter-networking approaches, and media.

Prerequisite: MGIS 3310.

MGIS 4360. Design and Implementation of Enterprise Resource Planning. 3 Hours.

Students study the types of issues that managers need to consider in implementing cross-functional integrated systems. Students learn the general nature of enterprise computing, re-engineering principles, and the technical foundations of client/server systems and enterprise information architectures. Topics may include the tools and methodology, modules, processes, industry initiatives, and different types of enterprise information systems, primarily SAP ERP.

Prerequisite: MGIS 3310.

MGIS 4365. Business Process Integration Using ERP System Configuration. 3 Hours.

Students gain an understanding and appreciation of the role that Enterprise Resource Planning (ERP) systems play in today's business environment. Students use an ERP system to gain an understanding of Business Process Implementation and how an entity's different functions are integrated and focused on accomplishing a common goal. Practical aspects of configuring an ERP system will also be explored.

Prerequisite: MGIS 3310 or ACCT 3324.

MGIS 4389. Internship. 3 Hours.

Students are provided with an opportunity to apply academic skills in a practical work environment. (See Internship Coordinator prior to enrolling.) All internships must be approved in advance in order to receive credit.

Prerequisite: Department approval and minimum overall and COBA GPA of 2.5.

Marketing (MKTG)

MKTG 3310. Principles Of Marketing. 3 Hours.

Students are provided general knowledge on the marketing of goods, services, and ideas. They focus on key marketing concepts and the role of marketing within organizations. Students learn how marketers deliver value in satisfying customer needs and wants in a dynamic global environment. Students learn to understand the elements of the marketing mix, market segmentation and targeting, marketing strategies, consumer behavior, marketing research, supply chain management, branding and product development, pricing strategies, professional selling, market planning, and promotion.

Prerequisite: 42 Credit Hours.

MKTG 3320. Consumer Behavior. 3 Hours.

Students study consumer decision-making processes in marketing and the factors that influence these processes.

Prerequisite: MKTG 3310.

MKTG 3328. Professional Selling. 3 Hours.

Students learn the principles of trust-based relationship selling used by businesses offering products or services to other businesses. Topics may include sales strategies and techniques to build trust, determine customers' needs, address their concerns, and close sales.

Prerequisite: MKTG 3310.

MKTG 3335. Retailing. 3 Hours.

Students study the evolution of retailing, the scope of retailing, store location, store layout, organization, the customer, buying markets, receiving and marketing merchandise, mark-up, stock control, merchandise plan, fashions, retail credit, accounting, insurance, and sales promotion.

Prerequisite: MKTG 3310.

MKTG 3350. Services Marketing Management. 3 Hours.

Students examine the characteristics of the service domain. The planning, organization, production, and marketing of quality services are the focus of the course.

Prerequisite: MKTG 3310.

MKTG 3360. Supply Chain Management. 3 Hours.

Students study the marketing channels of distribution and the management of the integrated supply chain for products and services. Students address both upstream (suppliers) and downstream (channels of distribution) organizational members. Topics may include purchasing, supplier selection/development, inter-organizational information systems, risk management, physical distribution, logistics, warehousing, channel relationships, and inventory management.

Prerequisite: MGMT 3310, MKTG 3310 and BANA 2372 or MATH 1342.

MKTG 3370. Integrated Marketing Communication and Promotional Strategy. 3 Hours.

Students study contemporary issues in marketing communications. An examination of how the elements of the promotional mix, with emphasis on advertising, are used to develop effective marketing strategies.

Prerequisite: MKTG 3310.

MKTG 4080. Independent Study. 1-3 Hours.

The student may pursue special studies for which a special course is not organized. The credit in this course varies according to the work performed. Variable Credit (1 to 3). Course Equivalents: MKTG 4380

Prerequisite: 30 hours in Business and Economics and consent of the instructor.

MKTG 4085. Special Topic. 1-3 Hours.

This course of faculty-led study is designed to provide undergraduate students exposure to new Marketing topics and concepts in a course setting. Variable Credit (1 to 3). Course Equivalents: MKTG 4385 .

MKTG 4330. Sales Management. 3 Hours.

Students study the selling process and the principles involved in the managing of the selling function. Students are provided an overview of the field of sales management and the role of the sales manager. Course Equivalents: MKTG 3330

Prerequisite: MKTG 3328.

MKTG 4340. International Marketing. 3 Hours.

Students engage in a survey of the economic, cultural, and political foundations of international marketing systems; the foreign consumer; product policies; and distributional structures as well as the promotional and marketing research phases of foreign operations.

Prerequisite: MKTG 3310.

MKTG 4350. Marketing Research. 3 Hours.

Students study the methods of collecting and analyzing information to be used in determining marketing strategy and making marketing decisions. The course is available to business majors only.

Prerequisite: MKTG 3310, BANA 3363.

MKTG 4360. Social Media Marketing. 3 Hours.

Students explore social media marketing principles and best practices for using social media for business. Students learn to construct social media marketing strategies that achieve desired business goals and create meaningful relationships with customers, clients, and colleagues. Topics include social media marketing strategy, influencer marketing, employee advocacy, corporate social media policies, social selling, and social media analytics for business.

Prerequisite: MKTG 3310.

MKTG 4389. Internship. 3 Hours.

Students are provided with an opportunity to apply academic skills in a practical work environment. (See Internship Coordinator prior to enrolling.) All internships must be approved in advance in order to receive credit.

Prerequisite: Department approval and minimum overall and COBA GPA of 2.5.

MKTG 4390. Strategic Marketing Management. 3 Hours.

Students learn the application of managerial principles in the development and execution of marketing strategy.

Prerequisite: MKTG 3310.

Mass Communication (MCOM)

MCOM 1130. Media Literacy. 1 Hour. [TCCN: COMM 2300]

Students critically examine a wide variety of news, media, and digital information. Through class discussions and diverse media experiences, this course helps students understand modern media environments and create healthy media consumption habits. Discussion topics include mainstream and partisan news media, social media, image and video manipulation, fact checking, search engine manipulation and so-called "fake news."

Prerequisite: None.

MCOM 1300. Mass Communication. 3 Hours.**MCOM 1307. Introduction to Digital Social Media. 3 Hours.**

Students explore digital communication campaigns, trends, and practices, and how they are currently used on social and emerging media platforms. Students evaluate message strategies and interpret data analytics to determine levels of audience engagement, as well as short- and long-term effects. Credit: 3.

MCOM 1330. Media, Culture and Society. 3 Hours. [TCCN: COMM 1335]

This course will survey the history and theory of mass media in American society with an emphasis on issues in broadcast television, cable television, and print journalism. Topics addressed include the impact of the printing press; evolution of print media, telegraph, film camera, and wireless technologies; structure of contemporary media industries; influence of advertisers, regulatory agencies, and ratings services; production, distribution, and syndication systems; social influence and personal use of mass media content.

MCOM 1332. Writing For Mass Media. 3 Hours. [TCCN: COMM 2311]

Designed to introduce writing for media across a wide spectrum of disciplines, this course will provide hands-on practice in basic writing skills for news, broadcast, the web, and public relations. Emphasis is placed on the enhancement of writing and grammar skills.

MCOM 1371. Audio Production & Performance. 3 Hours. [TCCN: COMM 2303]

This course surveys the mechanics of audio production and the operation of studio equipment. Students study and practice the use of microphone techniques, music, sound effects, and performance. They are introduced to digital audio production and appropriate audio software. Lecture and laboratory projects acquaint students with audio production requirements and responsibilities. Students receive practical hands-on experience with attention to mixing, recording, and editing. Students are expected to produce original content for broadcast on KSHU-FM.

MCOM 2366. Film Appreciation. 3 Hours. [TCCN: COMM 2366]

This course uses the film medium to integrate cinematic history and criticism. Production elements such as lighting, sound and character development, as well as genres, themes and narrative pattern will be analyzed. Emphasis is placed on writing critically about the film. Course Equivalents: MCOM 2351.

MCOM 2371. TV & Film Production. 3 Hours. [TCCN: COMM 1336]

This course introduces students to the basics of visual image production, focusing on graphic design, creative visualization, video editing, lighting, on-camera performance, and studio producing/directing. Students are expected to produce original content for broadcast on Cable Channel 7.

MCOM 3026. Media Practicum. 1-4 Hours.

Advanced instruction in practice and projects. Students perform assigned work with co-curricular activities (KSHU-FM, Cable Channel 7, The Houstonian, student news, and Priority One PR) in a laboratory environment. Variable Credit (1 to 3). Course Equivalents: MCOM 3226

Prerequisite: Either 12 hours of MCOM, plus score of 80 or higher on Grammar Module and Faculty Approval; or Faculty Approval.

MCOM 4022. Special Topic. 1-3 Hours.

This course will examine special topics/issues in the field of media. Different subject matter will be addressed each semester. This course may be repeated as topics change. Variable Credit (1 to 3). Course Equivalents: MCOM 4382

Prerequisite: Either 18 hours of MCFL or 18 hours of MCJR or 18 hours of MCPA or 18 hours of MCPD; and a score of 80 or higher on Grammar Module.

MCOM 4099. Independent Study. 1-3 Hours.

This course provides an opportunity to conduct supervised investigation in an area of special interest. This course is designed specifically for advanced students who are capable of independent research and/or creative activity. Variable Credit (1 to 3). Course Equivalents: MCOM 4399

Prerequisite: Either 18 hours of MCFL or 18 hours of MCJR or 18 hours of MCPA or 18 hours of MCPD and Permission of Dept.

MCOM 4371. Mass Media Law And Ethics. 3 Hours.

This course will examine legal and ethical concepts as they apply to broadcast and cable television, radio, print media, and Internet-based publishing. It will focus on the evolution of the American legal system with specific attention to state statutes, regulatory agencies, ethical issues, and precedent-setting cases as they relate to free speech, open records, privacy, libel, copyright, and obscenity laws.

Prerequisite: Either 18 hours of MCFL, or 18 hours of MCPA, or 18 hours of MCPD, and a score of 80 or higher on Grammar Module.

MCOM 4393. Global Media. 3 Hours.

This course studies world media systems in a variety of countries. Emphasis is placed on how history, politics, government, culture, and other social relations influence international media systems, international development projects, and the global flow of information.

Prerequisite: Either 18 hours of MCFL, or 18 hours of MCPD, or 18 hours of MCPA, plus, a score of 80 or higher on Grammar Module.

MCOM 4395. Professional Capstone in Film & Media. 3 Hours.

Students explore paths to employment in the film and media industries including building a professional portfolio, creating a social media presence, preparing for and conducting themselves during professional interviews, handling rejection and exploring nontraditional routes to successful careers in film and media industries.

Prerequisite: Senior standing.

MCOM 4398. Professional Internship. 3 Hours.

On-the-job application of skills and knowledge learned in the classroom for students who have completed their sophomore year, completed appropriate courses, and achieved an acceptable GPA. Internships may be with print media, electronic media, agencies, institutions, businesses, non-profit groups, or government agencies. MCOM and AGCO majors only.

Prerequisite: Either 18 hours of MCFL, or 18 hours of MCPD, or 18 hours of MCPA, and a score of 80 or higher on the Grammar Module.

Mass Communication: Film (MCFL)

MCFL 3351. Moving Image Aesthetics. 3 Hours.

This course is an in-depth look into pre-production process as it directly pertains to storyboard creation, character development and design, pre-visualization techniques and principles of concept design. Students will script, shoot and edit short films, identifying challenges to the form and discussing the success of these challenges. Course Equivalents: MCOM 3351

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCFL 3352. Cinematography. 3 Hours.

This course is designed to study emotional and visual qualities of light, and the application of varying strategies in lighting for characters, film composition, lenses, filtration, and manipulation of images in mood creation, and practical techniques, product and narrative style of lighting. Students will utilize their critical thinking skills in producing various original images. Course Equivalents: MCOM 3352

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCFL 3353. Advanced Editing for Film & TV. 3 Hours.

This course is a continuation of film editing with concentration on standards expected by industry professionals. Students will learn various editing software applications and techniques of fine tuning film and TV projects. Course Equivalents: MCOM 3353

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCFL 3354. Film History I. 3 Hours.

Students in this course trace the history of film as a mass medium, art form, and industry from 1895-1945. Film's 19th century origins in photographic technologies and popular theater situate understanding of its emergence as a new medium; it progresses to cover the global film history in the silent era, the transition to sound, and the golden age of sound cinema. Specific film concepts, critical historical contexts, and canonical works are analyzed in a discursive setting. Course Equivalents: MCOM 3354

Prerequisite: MCOM 2366 and a score of 80 or higher on the Grammar Module.

MCFL 3355. Film History II. 3 Hours.

Students in this course trace the history of film as a mass media, art form, and industry from 1945 to the present day. World War II and the advent of electronic media fundamentally changed the societal and technological nature of cinema. Students analyze the global film history in the postwar era and the age of new and emerging media; they also explore specific film concepts, historical contexts and canonical works in a discursive setting. Course Equivalents: MCOM 3355

Prerequisite: MCOM 2366 and a score of 80 or higher on the Grammar Module.

MCFL 3356. Select Film Genre. 3 Hours.

Students in this course examine the history, nature, and major works of a selected film genre. Emphasis is placed on story design, production techniques, and cultural meanings specific to the particular genre. Topics and instructors rotate every semester, and may include sports, horror, melodrama, science fiction, or western films. Course Equivalents: MCOM 3356

Prerequisite: MCOM 2366 and a score of 80 or higher on the Grammar Module.

MCFL 3357. Seminar in Hispanic Cinemas / Arte de cines hispanohablantes. 3 Hours.

Students in this bilingual course explore the art of Spanish-language film and television. Emphasis is placed on appreciation and critical analysis of film as art. Topics vary each semester may vary from national cinemas (Mexico, Argentina, Colombia, Spain, and so on) to ethnic groups (Mexican-American cinema) to transnational Hispanic directors (Luis Buñuel, Alfonso Cuarón). Students should have a conversational understanding of Spanish but can participate in English.

Prerequisite: MCOM 2366 and a score of 80 or higher on the Grammar module.

MCFL 3358. Screenwriting I: Narrative Writing for Film & Television. 3 Hours.

Students study the theory and techniques of screenwriting and become familiar with the principles and techniques used in writing fiction for film and television. Students develop original scripts and acquire an understanding of how to write a screenplay. Credit: 3

Prerequisite: MCOM 1332, MCOM 3375.

MCFL 3359. Directing for Film and TV. 3 Hours.

In this course students explore directorial techniques and methods of narrative films and narrative TV drama. Emphasis will be placed on directing a shoot, scene construction, coverage, staging, blocking, camera perspectives and directing actors. Course Equivalents: MCOM 3359

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCFL 3372. Single Camera and Non-Linear Editing I. 3 Hours.

This course teaches pre-production, field production, and post-production techniques. Elements include field camera setup and operation, remote lighting, remote sound, and basic continuity editing with an emphasis on underlying principles of video technology. Students are expected to produce original content for broadcast on Cable Channel 7. Course Equivalents: MCOM 3372

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCFL 3376. Field & Studio Audio Recording. 3 Hours.

Students in this course negotiate technical, aesthetic, production and recording differences between field and studio environments. Recording high-quality audio in diverse field settings is emphasized. Proper techniques for recording and reinforcing sound in live studio environments is also prioritized. Pre-production planning, equipment selection, and post-production editing will be studied.

Prerequisite: MCOM 1332, MCOM 1371, and a score of 80 or higher on the Grammar Module.

MCFL 4350. Film Theory. 3 Hours.

Students in this course confront interrelated philosophical and social questions of film's nature as an art form, instrument, and mass medium. Major thinkers from different eras will be studied in a humanistic, critical, and discursive fashion through writing and discussion. Comparison of different critical approaches empowers a comprehensive understanding of film's cultural roles and potential. Course Equivalents: MCOM 4350

Prerequisite: Either (9 hours of MCFL) or (MCOM 2366 and 6 additional hours of MCOM).

MCFL 4375. Screenwriting II. 3 Hours.

The student develops original ideas from initial concept through completion of a full-length screenplay in a workshop environment. Screenplay structure for feature-length screenplays will be analyzed for character development and plot points.

Prerequisite: MCPD 3375 and MCFL 3358.

Mass Communication: Journalism (MCJR)

MCJR 2362. News Reporting. 3 Hours.

This course covers theory and practice in covering news stories for mass media outlets, including those of public safety, government, education, health care, legal issues, and politics. Emphasis is placed on covering current events with written text, photos, audio and video. Course Equivalents: MCOM 2362

Prerequisite: MCOM 1332.

MCJR 3301. Podcasting. 3 Hours.

Students plan, create and launch journalistic podcasts with specific, non-fiction topics and high professional standards. High-quality audio will be recorded in on-campus recording facilities with hands-on instruction. The class also explores critical issues, practical effects and digital communities surrounding podcasting and audio journalism.

Prerequisite: a score of 80 or higher on the grammar module, MCOM 1332, MCOM 1371, MCOM 2371, and MCJR 2362.

MCJR 3360. Specialized Writing. 3 Hours.

This course will cover study and practice in writing for mass media in specialized areas. Emphasis is on developing a level of writing suitable for publication. Course may be repeated as topics vary. Course Equivalents: MCOM 3360

Prerequisite: A score of 80 or higher on the Grammar Module, MCOM 1332, and either (MCOM 1371, MCOM 2371, and MCJR 2362) or (9 additional hours of MCOM).

MCJR 3361. Broadcast Journalism. 3 Hours.

This class emphasizes the theory, techniques, and practice of television journalism. Emphasis is on writing and editing news copy and honing style and content skills appropriate for effective broadcast news writing. MCJR 3361 also requires production of broadcast news content and involves discussion of current issues facing broadcast journalists. Students are expected to produce original content for broadcast on Cable Channel 7. Course Equivalents: MCOM 3361, MCOM 3374

Prerequisite: A score of 80 or higher on the Grammar Module, MCOM 1332, and either (MCOM 1371, MCJR 2362, and MCOM 2371 or MCPD 3374) or (9 additional hours of MCOM).

MCJR 3362. Media Criticism. 3 Hours.

This course explores mass communication theory, focusing on social-behavioral and critical-cultural approaches. It emphasizes how the same issues (e.g. media violence) recur over time and how ideas about media have changed as new media technologies have emerged. Course Equivalents: MCOM 3362

Prerequisite: A score of 80 or higher on the Grammar Module, MCOM 1332, and either (MCOM 1371, MCJR 2362, and MCOM 2371 or MCPD 2374) or (9 additional hours of MCOM).

MCJR 3363. Spanish-Language Broadcasting. 3 Hours.

Students report and produce bilingual English and Spanish-language news content for the El Gato streaming radio station. Students will conduct interviews, field recordings, audio editing and other procedures both in English and in Spanish. Spanish-language media markets, differences and similarities between English and Spanish journalism practices, bilingual reporting techniques, and job-hunting strategies will also be covered. Course Equivalents: MCOM 3363

Prerequisite: Either MCOM 1332, MCOM 1371, MCJR 2362, (MCOM 2371 or MCPD 2374), and a score of 80 or higher on the Grammar Module; or MCOM 1332, MCOM 1371, and faculty approval.

MCJR 3364. Copyediting for News. 3 Hours.

This course focuses on the editor's functions in handling news copy from writing to production. Content includes copy editing and headline writing, picture cropping, caption writing, typography, graphics, source verification and leadership in the newsroom. MCOM 1332 and either (MCOM 1371, MCJR 2362, and MCOM 2371 or MCPD 2374 and a score of 80 or higher on the Grammar Module) or (MCOM 2362 and 6 additional hours of MCOM). Course Equivalents: MCOM 3364 .

MCJR 3365. Broadcast Performance. 3 Hours.

This course will prepare students for positions in announcing broadcast journalism for television, radio, and online. Students will examine techniques of voice and movement on television news, broadcast news announcing styles, interviewing techniques, and specialized announcing of events such as sports or cultural events. Course Equivalents: MCOM 3365

Prerequisite: MCOM 1332 and either (MCOM 1371, MCJR 2362, and MCOM 2371 or MCPD 2374, and a score of 80 or higher on the Grammar Module) or (9 additional hours of MCOM).

MCJR 3366. Photojournalism. 3 Hours.

This course will focus on reporting through the photo. The student will study the applications of news, feature, sports, weather, environmental portraiture and the photo essay. Fundamental principles of photojournalism such as history, freedom of press, ethics and the power of the image to convey the message. Course Equivalents: MCOM 3366

Prerequisite: MCOM 1332 and 9 additional hours of MCOM.

MCJR 3367. Public Affairs Reporting. 3 Hours.

Students cover news stories important to the public and community such as government, education, and criminal justice. Students explore best practices in community journalism and public affairs reporting in text and a variety of digital platforms with a particular focus on the connections between local, national and international news coverage.

Prerequisite: MCJR 2362.

MCJR 3369. Designing and Producing Scholastic Media. 3 Hours.

Students examine the principles of layout and design of school newspapers, magazines, and yearbooks. This course is designed for future educators preparing to teach journalism and may serve as advisors for student publications. Through in-depth examination of each publication's function, students will develop skills necessary to effectively communicate with readers through visual elements. Course Equivalents: MCOM 3369

Prerequisite: MCOM 1330, MCOM 1332, MCOM 1371, MCOM 2371 or MCPD 2374 and a score of 80 or higher on the Grammar Module.

MCJR 4361. TV News Producing. 3 Hours.

This course offers advanced instruction and practice in student-produced TV newscasts. Students are assigned duties for producing a newscast once a week, as well as gathering, shooting, writing, and editing TV news. Students are expected to produce original content for broadcast on Cable Channel 7. Course Equivalents: MCOM 4361, MCOM 4370

Prerequisite: Either (MCJR 3361, MCJR 3364, and MCPD 3373) or (MCOM 1332 and 12 additional hours of MCOM).

MCJR 4364. Investigative Reporting. 3 Hours.

This course examines strategies for gathering, analyzing and developing background information necessary for in-depth news writing and reporting. Students will be expected to use the research and analysis techniques to produce investigative journalism. Students are expected to produce original content for publication in The Houstonian. Course Equivalents: MCOM 4364

Prerequisite: Either (MCJR 3361, MCJR 3364, and 3 additional hours of MCJR) or (MCOM 1332 and 12 additional hours of MCOM).

MCJR 4365. Mobile & Social Reporting. 3 Hours.

Students use techniques drawn from various media and forms of writing to produce well-designed, effective communication packages for digital distribution. Students create and integrate written material, video, sound, and graphics into multimedia publications. Students are expected to produce original content for publication in The Houstonian. Course Equivalents: MCOM 4365

Prerequisite: Either (MCJR 3361, MCJR 3364, and 3 additional hours of MCJR) or (MCOM 1332 and 12 additional hours of MCOM).

MCJR 4366. Social Implications of Media. 3 Hours.

This course offers assessments of professional and industry trends, regulatory practices, socio-economic developments, and technological innovations that influence the institutions and traditions of the American mass media including news, entertainment and sports. Emphasis is placed on the changing roles of media and the impact of new communication technologies. Course Equivalents: MCOM 4366

Prerequisite: Either (MCJR 3361, MCJR 3362, and 3 additional hours of MCJR) or (MCOM 1332 and 12 additional hours of MCOM).

MCJR 4367. Reporting Sports Journalism. 3 Hours.

Students gain hands-on experience covering sports for the media, including game stories, features on players and coaches, hard news articles, and investigative and critical journalism on socio-political issues related to sports. Students are expected to produce original content for publication in The Houstonian. Course Equivalents: MCOM 4367

Prerequisite: Either (MCJR 2362 and 6 additional hours of MCJR or MCPD) or (MCOM 2362).

MCJR 4369. Leadership in the Scholastic Media Newsroom. 3 Hours.

Students examine leadership functions of scholastic media from coaching story development and advertising sales to budgeting and editorial decision making. This course focuses on the structures and procedures for effectively building and managing school newspaper and yearbook staffs, and is intended for future educators preparing to teach journalism, who will likely serve as an advisor for student publications. Course Equivalents: MCOM 4369

Prerequisite: Either (MCJR 3361, MCJR 3364, and 3 additional hours of MCJR) or (MCOM 1332 and 12 additional hours of MCOM).

Mass Communication: Production (MCPD)

MCPD 3370. Media Programming. 3 Hours.

Students in this course analyze programming techniques and strategies for broadcast and cable television, radio, and the internet. Special focus is given to exploration of emerging trends, including multiplatform strategies, new and emerging media, wireless media, and pay-per-view structures. Students consider how programs are selected or rejected, arranged, evaluated, promoted, and regulated. Course Equivalents: MCOM 3370

Prerequisite: MCOM 1332, MCOM 1371, and MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCPD 3373. Studio Production. 3 Hours.

This course covers fundamentals of video production in a studio environment, including pre-production, in-studio production, and in-studio direction. Students will become familiar with the functions and responsibilities of the production crew, studio environment, and studio equipment. Emphasis is given to multiple camera techniques in studio production. Students are expected to produce original content for broadcast on Cable Channel 7. Course Equivalents: MCOM 3373

Prerequisite: MCOM 1332, MCOM 1371, and MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCPD 3374. Sports Media Production I. 3 Hours.

Students learn the basics of live sports broadcast production. Students learn proper setup and operation of field equipment, roles and responsibilities necessary for a live production, troubleshooting equipment in the field, and working with broadcast crews and sports organizations. The class may include lectures on broadcast policies and politics along with hands-on field experience. Course Equivalents: MCPD 2374, MCOM 2374

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCPD 3375. Scriptwriting. 3 Hours.

This course emphasizes the study of style, format, principles, and techniques of writing for radio, TV, and feature film. The process of writing fiction and non-fiction will examine the development of the script from research to marketing. Students will learn techniques for writing promotional scripts, public service announcements, documentary scripts, film scripts, and television scripts. Course Equivalents: MCOM 3375

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCPD 3377. Multi-Camera Studio Production. 3 Hours.

Students will learn television studio procedures and address studio program preparation as well as presentation as it applies to multi-camera production. Students will produce content for Cable Channel 7 and other digital affiliates.

Prerequisite: MCPD 3373 Course Equivalents: MCOM 3377 .

MCPD 3378. Production Management. 3 Hours.

This course emphasizes the study of legal clearances, budgeting, funding, resource management, and scheduling as these activities relate to radio and television production. Course Equivalents: MCOM 3378

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCPD 3379. Multi-Camera Field Production. 3 Hours.

This course emphasizes the techniques and approaches to multi-camera directing and production. MCPD 3379 will train students in various remote production contexts, including sports, dance, music, and special events coverage. Students are expected to produce original content for broadcast on Cable Channel 7. Course Equivalents: MCOM 3379

Prerequisite: MCOM 1332, MCOM 1371, MCOM 2371, and a score of 80 or higher on the Grammar Module.

MCPD 4351. New Media Platforms. 3 Hours.

This course examines how ideas move from concepts and funding to distribution and profits in the new media frontiers. Students analyze case studies and apply entrepreneurial principles to create delivery models for new media content.

Prerequisite: MCPD 3370 or MCPD 3378 and 12 additional hours of MCPD, or MCFL, or MCJR.

MCPD 4373. Advanced Production. 3 Hours.

This course requires students to assume the primary responsibility, under faculty supervision, of creating and producing programming for Cable Channel 7. This course will also develop portfolio material for graduating students. Course Equivalents: MCOM 4373

Prerequisite: MCPD 3373, MCPD 3377, and MCPD 3379.

MCPD 4374. Sports Media Production II. 3 Hours.

Students learn advanced production techniques for live sports broadcast productions, as well as advanced broadcasting policies, ethics and standards. They learn crew management and organization, pre-production strategies, production techniques, and post-production skills; students will also get extensive field experience in directing live and recorded sports productions for a variety of distribution platforms. Course Equivalents: MCOM 4374

Prerequisite: MCPD 3374.

MCPD 4376. Advanced Audio Production. 3 Hours.

This course presents advanced concepts in audio and radio recording and editing. Students are expected to produce original content for broadcast on KSHU-FM. Course Equivalents: MCOM 3371, MCOM 4376

Prerequisite: MCOM 1371 and 12 additional hours of MCOM, or MCPD, or MCJR, or MCFL.

MCPD 4378. Multi-Camera Remotes. 3 Hours.

In this course students learn methods of multi-camera coverage of events, organizations, activities or people. Students are expected to produce content for Cable Channel 7 and other digital affiliates. Course Equivalents: MCOM 4378

Prerequisite: MCPD 3377 and MCPD 3379.

MCPD 4379. Directing Multicamera Productions. 3 Hours.

This course focuses on techniques students need to direct multi camera productions, including multiple camera operators, graphic packages, and video playback. Students are expected to produce content for Cable Channel 7 and other digital affiliates. Course Equivalents: MCOM 4379

Prerequisite: MCPD 3373, MCPD 3377, and MCPD 3379.

Mass Communication: Public Relations & Advertising (MCPA)

MCPA 2382. Design for Public Relations and Advertising. 3 Hours. [TCN: COMM 2330]

This course introduces students to the principles of design applicable to publications created using desktop publishing software and computer technology. Special attention is given to design principles, typography, layout, and production techniques. Course Equivalents: MCOM 2382 .

MCPA 3381. Principles Of Public Relations. 3 Hours.

This course examines principles of public relations, the problem-solving processes to analyze and resolve major problems, and practical applications of these tactics to real world situations. The traits of leadership, crisis management, and ethics will be explored. Course Equivalents: MCOM 3381

Prerequisite: MCOM 1332 and either (MCOM 1330, MCOM 2371, MCPA 2382 and a score of 80 or higher on the Grammar Module) or (9 additional hours of MCOM.

MCPA 3382. Principles of Advertising. 3 Hours.

This course explores the changes in today's world of advertising communication and the implications of these changes to traditional practice. Industry developments such as social media and the impact of globalization are included, as well as the increased focus on consumers and branding in today's advertising strategies. Course Equivalents: MCOM 3382

Prerequisite: MCOM 1332 and either (MCOM 1330, MCOM 2371, MCPA 2382, and a score of 80 or higher on the Grammar Module) or (9 additional hours of MCOM).

MCPA 3383. Writing for Public Relations and Advertising. 3 Hours.

This course examines the process of communicating to persuade and inform. Students learn the techniques of strategic thinking and practice writing for advertising and promotions, news media, and special audience materials, such as newsletters, brochures, and catalogues. Online communications for internal and external audiences will also be explored. Course Equivalents: MCOM 3383

Prerequisite: MCOM 1332 and either (MCOM 1330, MCOM 2371, and a score of 80 or higher on Grammar Module) or (9 additional hours of MCOM).

MCPA 3388. Sales and Marketing. 3 Hours.

This course provides students with an overview of marketing strategies used by mass media companies. MCPA 3388 examines media marketing, market surveys, advertising, content promotion, and public relations as efforts to create and support customer bases and maintain goodwill. Students have the opportunity to create model marketing strategies. Special attention is paid to industry changes and professional ethics. Course Equivalents: MCOM 3388

Prerequisite: MCOM 1332 and either (MCOM 1330, MCOM 2371, and a score of 80 or higher on the Grammar Module) or (9 additional hours of MCOM).

MCPA 4381. Social Marketing for Public Relations and Advertising. 3 Hours.

Students critically examine examples of social change initiatives that target deeply-held beliefs and entrenched personal behaviors. Students develop an understanding of social marketing principles, a proven behavior change discipline, and will learn techniques for conducting social marketing campaigns to improve a social good such as individual health, the environment, or the community. Course Equivalents: MCOM 4381

Prerequisite: Either (MCPA 3381, MCPA 3382, and MCPA 3383 or instructor approval) or (MCOM 2382 or instructor approval).

MCPA 4382. Advanced Writing for Public Relations and Advertising. 3 Hours.

This course emphasizes the strategic, goal-oriented mission of high-quality media writing. Using a multidisciplinary and multimedia approach, students will learn to write successful and strategically for public relations, advertising, sales, marketing, and business communications formats. Course Equivalents: MCOM 3385, MCPA 3385

Prerequisite: Either (MCPA 3383 and 6 additional hours of MCPA) or (MCOM 1332 and 9 additional hours of MCOM).

MCPA 4383. Audience Research & Analysis. 3 Hours.

This course introduces students to the history and application of research methods, both quantitative and qualitative, that are employed in commercial media markets and academic environments to assess media audiences, media content, and media use. Topics addressed include survey methods, content analysis, experimental research, ethnographic and critical research, research ethics, and statistical analysis. Special attention will be devoted to research in print and electronic media. Course Equivalents: MCOM 4383

Prerequisite: Either (MCPA 3383 and 9 additional hours of MCPA or instructor approval) or (MCOM 1332 and 12 additional hours of MCOM).

MCPA 4384. Advanced Design for Public Relations & Advertising. 3 Hours.

This course focuses on higher-level publishing formats and media used in today's persuasive communication environment. This course builds on basic print design and production skills introduced in MCPA 2382. Course Equivalents: MCOM 4384

Prerequisite: Either (MCPA 3381, MCPA 3382, and 6 additional hours of MCPA or instructor approval) or (MCOM 2382 or instructor approval).

MCPA 4385. Social Media for Public Relations and Advertising. 3 Hours.

Students develop a comprehensive understanding of the social media landscape and its impact on public relations and advertising campaign strategies. Students develop a strategic social media campaign plan to solve specific communication problems for a particular client; topics also include key social media terminology, techniques, design plans and implementation strategies. Course Equivalents: MCOM 4385

Prerequisite: Either (MCPA 3381 and MCPA 3383) or (MCOM 3381 or MCOM 3382) or (instructor approval).

MCPA 4390. Campaigns for Public Relations and Advertising. 3 Hours.

This course emphasizes integration of theory, research, and communication techniques for implementing and evaluating public relations campaigns. Focus on creative strategies and media planning, target analysis and buying tactics. Students research, develop, and present an integrated communication plan. Course Equivalents: MCOM 4380, MCOM 4390

Prerequisite: Either (MCPA 3381, MCPA 3382, and MCPA 3383 or instructor approval) or (MCOM 3381, MCOM 3383, and MCOM 4383 or instructor approval).

Mathematics (MATH)

MATH 0001. Math Intervention. 0 Hours.

NCBO Math Intervention. By department approval only.

MATH 0331. Developmental Mathematics. 3 Hours.

Students study the fundamental operations involving whole numbers, fractions, decimals and percents, ratio and proportion, interpretation of graphs, geometry, and introductory algebra, including axioms and properties of the real number system, fundamental operations involving algebraic expressions, and first and second degree equations and inequalities in one unknown. Credit in this course may not be applied toward graduation or classification of students by hours completed.

MATH 0333. Developmental Mathematics NCBO. 3 Hours.

Students in this course accelerate through the developmental mathematics sequence at Sam Houston State University in one term using innovative learning techniques and individualized programming. Topics include arithmetic operations, basic algebraic concepts and notation, geometry, and real and complex number systems, as well as study of relations and functions, inequalities, algebraic expressions and equations, with a special emphasis on linear and quadratic expressions and equations. This course is required for students who have not met readiness standards for math. Credit in this course will not be allowed to count toward graduation or computation of grade point average or classification of students by hours completed. (Course does not fulfill University degree requirements.)

MATH 1314. Pre Calculus Algebra. 3 Hours. [TCCN: MATH 1314]

Students engage in a brief review of introductory algebra, variation, elementary theory of equations, functions (including exponential and logarithmic), inequalities, systems of equations, and other related topics.

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1316. Plane Trigonometry. 3 Hours. [TCCN: MATH 1316]

Students study coordinate systems, circular functions, solutions of triangles, identities, trigonometric equations, and inverse functions.

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1324. Mathematics for Managerial Decision Making. 3 Hours. [TCCN: MATH 1324]

Students engage in a review of introductory algebra, equations, relations, functions, graphs, linear programming, systems of equations and matrices, and mathematics of finance.

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1332. College Mathematics. 3 Hours. [TCCN: MATH 1332]

This course is designed to meet the objectives of Component Area 2 of the Core curriculum for non-business and non-science related majors. Topics may include sets, counting principles, probability, logic, linear algebra, linear programming, and mathematics of finance, geometry, and calculus.

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1342. Elementary Statistics. 3 Hours. [TCCN: MATH 1342]

Students engage in a survey in elementary statistics in order to acquaint students with the role of statistics in society. Coverage may include graphical descriptive methods, measures of central tendency and variation, the basic concepts of statistical inference, the notion of estimators, confidence intervals, and tests of hypotheses. Course Equivalents: MATH 1369, STAT 1369

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1370. Introduction to Biomedical Statistics. 3 Hours.

This elementary statistics course is designed to foster critical thinking about data in healthcare-related settings. Coverage may include graphical and numerical descriptive methods; measures of central tendency and variation; the basic concepts of statistical inference; the notion of estimators, confidence intervals and tests of hypotheses. Data is analyzed with the help of software currently used in the profession, such as SPSS and/or Minitab.

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1384. Introduction to Foundations of Mathematics I. 3 Hours. [TCCN: MATH 1350]

Students study sets, systems of numeration, natural numbers, integers, number theory and rational numbers. Credit in this course is applicable only toward elementary/middle school certification.

Prerequisite: Passing score on the MATH TSI Assessment or equivalent.

MATH 1385. Introduction to Foundations of Mathematics II. 3 Hours. [TCCN: MATH 1351]

Students explore basic notions of Euclidean Geometry in two and three dimensions, ratio, proportions, concepts of congruence and similarity, transformational geometry and measurement. Credit in this course is applicable only toward elementary/middle school certification.

Prerequisite: MATH 1384 with a grade of C or better.

MATH 1410. Elementary Functions. 4 Hours. [TCCN: MATH 2412]

Elementary Functions and their applications, including topics from algebra, trigonometry and analytic geometry, are used to assist in the algebraic and graphical description of the following elementary functions: polynomial, rational, exponential, logarithmic, and trigonometric functions.

Prerequisite: C or better in MATH 1314, or a 540 on the new Math SAT, or a 21 on the Math ACT, or a 263 on the Next- Generation Advanced Algebra and Functions ACCUPLACER.

MATH 1420. Calculus I. 4 Hours. [TCCN: MATH 2413]

Students study limits and continuity, the derivative, techniques for differentiation of algebraic, logarithmic, exponential and trigonometric functions, applications of the derivative and anti-differentiation, definite integral, Fundamental Theorem of Calculus.

Prerequisite: C or better in MATH 1410, or an A or B in AP Calculus, or a 660 on the new Math SAT, or a 28 on the Math ACT, or a 276 on the Next- Generation Advanced Algebra and Functions ACCUPLACER.

MATH 1430. Calculus II. 4 Hours. [TCCN: MATH 2414]

Students study the definite integral and its applications, techniques of integration, improper integrals, Taylor's formula and infinite series.

Prerequisite: MATH 1420 with a grade of C or better.

MATH 2384. Functions and Graphs. 3 Hours.

The emphasis of this course is on functions and their multiple representations including linear, polynomial, logarithmic, exponential and logistic functions. This course may be applied only toward middle school teacher certification.

Prerequisite: MATH 1385 with grade of C or better.

MATH 2385. Fundamentals of Calculus. 3 Hours.

Students are introduced to the concepts and applications of calculus. This course may be applied only toward middle school teacher certification.

Normally offered in the Fall and Spring.

Prerequisite: C or better in MATH 2384.

MATH 2395. Discrete Mathematics. 3 Hours. [TCCN: MATH 2305]

This is an applied course in discrete mathematical structures. Topics may include sets, logic, mathematical proof, computational complexity, relations, graphs, trees, boolean algebra, number theory, combinatorics, probability, recurrence relations, and finite state machines. This course is designed for computer science majors, so programming applications are emphasized.

Prerequisite: MATH 1420 and COSC 1436 with a grade of C or better.

MATH 2399. Mathematics for Managerial Decision Making. 3 Hours.

Students explore differential and integral calculus with applications in areas such as business and economics.

Prerequisite: MATH 1324 or MATH 1314.

MATH 2440. Calculus III. 4 Hours. [TCCN: MATH 2415]

Students study the calculus functions of several variables and topics in vector calculus including line and surface integrals, Green's Theorem, Divergence Theorem, and Stoke's Theorem.

Prerequisite: MATH 1430 with a grade of C or better.

MATH 3300. Introduction to Mathematics Thought. 3 Hours.

Students are introduced to sets, logic, the axiomatic method and proof. Writing enhanced. Normally offered in the Fall and Spring.

Prerequisite: Grade of C or better in MATH 1430 or consent of instructor.

MATH 3350. Theory of Interest. 3 Hours.

Students derive the mathematical principles behind financial instruments involving interest. Topics may include amount functions, interest rates and yields, force of interest, special annuity types, bonds, yield curves, and interest rate sensitivity. Also included is a discussion of the mathematics of financial derivatives. This course covers the content on which the joint Society of Actuaries/Casualty Actuarial Society Exam FM/2 on mathematical interest theory is based.

Prerequisite: Grade of C or better in Math 1430.

MATH 3363. Euclidean Geometry. 3 Hours.

Students study the modern development of Euclidean geometry and are provided a limited introduction to non-Euclidean geometry. Writing enhanced.

Prerequisite: MATH 3300 or consent of instructor.

MATH 3376. Differential Equations. 3 Hours. [TCCN: MATH 2320]

This course, in conjunction with MATH 4375, is intended to develop a basic competence in areas of mathematics that are used in solving problems from the physical sciences. This first course emphasizes the general solution of ordinary differential equations, including the Laplace transform and infinite series methods.

Prerequisite: Grade of C or better in MATH 2440 or concurrent enrollment.

MATH 3377. Introduction to Linear Algebra and Matrices. 3 Hours. [TCCN: MATH 2318]

Students study solving systems of linear equations, fundamental matrix theory (invertibility theorems, determinants), eigenvectors, and properties of linear transformations. Remaining topics are chosen from: Properties of general vector spaces, inner product spaces, and/or diagonalization of symmetric matrices.

Prerequisite: Grade of C or better in MATH 1420.

MATH 3379. Statistical Methods in Practice. 3 Hours.

Students study the organization and presentation of data, measures of central tendency, dispersion, and position, probability distributions for discrete and continuous random variables, sampling techniques, parameter estimation, and hypothesis testing. Emphasis is given to the use of statistics packages. Normally offered in the Fall, Spring, Summer I. Also offered as STAT 3379. Course Equivalents: STAT 3379

Prerequisite: Three (3) semester hours of college mathematics.

MATH 3380. Historical Perspectives of Mathematics. 3 Hours.

(SH Prior Course ID: MTH 380); This course is designed to present mathematical topics from a historical perspective. The number systems and computational methods of past cultures and civilizations are discussed, along with the development of number theory and trigonometry. Credit in this course is applicable only toward elementary/middle school teacher certification.

Prerequisite: C or better in MATH 1385.

MATH 3381. Introduction to Foundations of Mathematics III. 3 Hours.

Students study topics in proportions, percents, probability, data analysis, algebraic reasoning, and problem solving. Credit in this course is applicable only toward elementary/middle school certification. Normally offered in the Fall, Spring, and Summer.

Prerequisite: C or better in MATH 1385.

MATH 3382. Foundations of Middle School Mathematics. 3 Hours.

Students study relations, functions, coordinate geometry, logic, and history of mathematics. Credit in this course is applicable only toward middle school certification.

Prerequisite: C or better in MATH 2384.

MATH 3383. Geometric Measurement/Transformation. 3 Hours.

Students study measurement in one, two, and three dimensions, the metric system, transformational geometry, congruencies, similarities, geometric constructions, and coordinate systems. This course may be applied only toward middle school certification.

Prerequisite: C or better in MATH 2385.

MATH 3384. Foundations of Mathematics. 3 Hours.

Students are introduced to logic, concepts of proof, proof techniques, induction, and sets. The course may be applied only toward middle school certification. Writing enhanced.

Prerequisite: C or better in MATH 2385 or equivalent.

MATH 3386. Fundamentals of Probability and Statistics. 3 Hours.

Students are introduced to probability, descriptive statistics, and inferential statistics, including regression, confidence intervals, and the construction and interpretation of tables, graphs, and charts. Technology related to the above topics are incorporated into the course. This course may be applied only toward middle school certification.

Prerequisite: C or better in MATH 2385.

MATH 3387. Problem Solving-Middle School Mathematics. 3 Hours.

Students study problem-solving strategies appropriate for middle school or junior high mathematics. The course may be applied only toward middle school certification.

Prerequisite: C or better in Math 2385.

MATH 3394. Numerical Methods. 3 Hours.

Students study interpolation, approximations, solutions of equations, and the solution of both linear and nonlinear systems of equations.

Prerequisite: COSC 1436 and MATH 1430 with a grade of C or higher.

MATH 3396. Operations Research I. 3 Hours.

Students explore techniques for the application of the scientific method to decision making in business and government, which are presented through the formulation and interpretation of mathematical models for various specific real life problems.

Prerequisite: MATH 1430 with a grade of C or higher.

MATH 4090. Independent Study. 1-3 Hours.

This course is designed for advanced students to engage in independent study of an area of interest in mathematics under the close guidance of a faculty mentor. Variable credit (1 to 3).

Prerequisite: Consent of instructor.

MATH 4332. Topology. 3 Hours.

Students explore properties of geometric spaces that are preserved under deformation-stretching or twisting, but not breaking. Topics may include topological spaces, connectedness, compactness, manifolds, cell complexes, knot theory, knot invariants, Euler characteristic, fundamental group, classification of surfaces, and covering spaces.

Prerequisite: C or better in Math 3300.

MATH 4361. Introductory Analysis. 3 Hours.

Students engage in a more thorough treatment of the material traditionally considered in elementary calculus. Topics may include sets, functions, properties of the real number system and sequences. Normally offered in the Fall.

Prerequisite: C or better in MATH 3300 or consent of the instructor.

MATH 4366. Elementary Analysis. 3 Hours.

Students study limits, continuity, differentiation, Riemann integration, infinite series and sequences, and series of functions. Normally offered in the Spring.

Prerequisite: MATH 4361 with a grade of C or better.

MATH 4367. The Evolution of Mathematics. 3 Hours.

Students are introduced to the historical development of fundamental mathematical ideas from antiquity to the present. Writing Enhanced. Normally offered in the Fall.

Prerequisite: Grade of C or better in MATH 1430.

MATH 4368. Introduction to Number Theory. 3 Hours.

Students explore the theory of integers in depth. Topics may include: the division algorithm and Euclidean Algorithm; primes and the Fundamental Theorem of Arithmetic; modular arithmetic; Euler's phi function; the ring of units of an integer; quadratic reciprocity; and arithmetic functions.

Prerequisite: C or Better in Math 3300.

MATH 4369. Foundations of Analysis. 3 Hours.

Students apply advanced concepts in the analysis of functions of real variables, building upon the required undergraduate sequence in analysis for mathematics majors and providing further study for students interested in pursuing graduate work. Topics may include multivariate calculus, normed linear spaces, measure theory, measurable functions, Lebesgue integration, and spaces of integrable functions.

Prerequisite: C or better in MATH 4366, or consent of instructor.

MATH 4370. Special Topics in Mathematics. 3 Hours.

Normally, this course consists of readings and individual research appropriate for the undergraduate level with subject matter for study selected by mutual agreement of student and supervisor. However, special classes may be organized when there is sufficient student interest in a particular project. Writing enhanced. This course may be taken for Academic Distinction Credit. See Academic Distinction Program in this catalog.

Prerequisite: Six (6) semester hours of advanced college math and instructor consent.

MATH 4371. Theory and Applications of Probability and Statistics I. 3 Hours.

Students explore basic concepts and properties of probability, random variables, statistical distributions, measures of central tendency, variance, covariance, correlation, functions of random variables, sampling distributions, and the Central Limit Theorem. Also offered as STAT 4371. Normally offered in the Fall. Course Equivalents: STAT 4371

Prerequisite: MATH 1430.

MATH 4372. Theory and Applications of Probability and Statistics II. 3 Hours.

Topics include multivariate, conditional and marginal distributions, point and interval estimation, theory of estimation, maximum likelihood estimates, hypothesis testing, likelihood ratio tests, contingency analysis, and nonparametric statistics. Also offered as STAT 4372. Normally offered in the Spring.

Prerequisite: MATH 4371.

MATH 4375. Partial Differential Equations. 3 Hours.

Students solve problems involving partial differential equations from the natural sciences. Topics may include derivation of the heat/diffusion and wave equations, the method of separation of variables to solve the heat, wave, and Laplace equations on finite domains, Fourier series, Sturm-Liouville eigenvalue problems, the Fourier transform method to solve equations on infinite domains, the method of characteristics, and D'Alembert's solution of the wave equation.

Prerequisite: C or better in Math 3376.

MATH 4377. Algebraic Structures. 3 Hours.

Student study basic structures of abstract algebra: groups, rings, and fields. Topics may include elementary number theory, equivalence relations, groups, homomorphisms, cosets, Cayley's Theorem, symmetric groups, rings, polynomial rings, quotient fields, principal ideal domains, and Euclidean domains. Writing enhanced.

Prerequisite: C or better in MATH 3300 and MATH 3377.

MATH 4378. Abstract Algebra. 3 Hours.

Students study advanced topics from group theory and ring theory. Other topics may include group actions, the Sylow theorems, modules, fields, field extensions, and an introduction to Galois theory.

Prerequisite: C or better in MATH 4377 and consent of instructor.

MATH 4379. Complex Variables. 3 Hours.

Students explore the foundation of complex variables and analytic functions on the complex plane. Topics may include basic properties of complex-valued functions, such as domain, range, branch cuts, limits, and continuity. These topics are followed by the central property of analyticity and the use of Cauchy's Theorem in evaluating contour integrals.

Prerequisite: C or better in Math 2440.

MATH 4384. Survey of Mathematical Ideas. 3 Hours.

This course is designed to bring together and supplement the technical material of other mathematics courses in the mathematics teacher-education program and relate it to the mathematics curriculum of the secondary school. This course may be applied only toward teacher certification.

Prerequisite: Grade of C or better in MATH 3300; Advanced standing in mathematics.

MATH 4385. Mathematical Problem Solving. 3 Hours.

Students focus on solving mathematical problems, including the use of proof as well as graphical and numerical methods. The course extends and connects concepts from algebra, geometry, and calculus, including functions, graphs, complex numbers and number systems. This course may be applied only toward teacher certification.

Prerequisite: Grade of C or better in MATH 3300; Advanced standing in mathematics.

MATH 4395. Undergraduate Research. 3 Hours.

Students engage in special projects or topics in theoretical or applied mathematics. Each student pursues an approved project of interest guided by a mathematics faculty member. Each student is expected to demonstrate individual initiative in planning and conducting the research program or topic. This course may be taken for Academic Distinction credit.

Prerequisite: C or better in MATH 3300 and department approval.

MATH 4397. Combinatorics. 3 Hours.

Students examine permutations, combinations, Stirling numbers, Bell numbers, Catalan numbers, combinatorial proofs, the principle of inclusion-exclusion, the binomial theorem, integer partitions, recurrence relations, and generating functions. Additional topics may include graph theory, poset theory, matroid theory, computational complexity, Burnside's lemma, Ramsey numbers, and error-correcting codes.

Prerequisite: C or better in Math 3300.

MATH N014. Support for Pre-Calculus Algebra. 2 Hours.

This course is an accelerated introduction to the concepts of relations and functions, inequalities, algebraic expressions, and equations. Particular attention is given to absolute value, polynomial, rational, and radical expressions. Special emphasis will be given to linear and quadratic expressions and equations. Credit in this course may not be applied toward graduation or classification of students by hours completed. Variable Credit (0 to 2).

Corequisite: This course must be taken concurrently with MATH 1314. Course Equivalents: MATH 0112

Prerequisite: A score of 310-349 on the TSI Assessment Test.

MATH N024. Support Math for Managerial Decision Making. 2 Hours.

This course is an accelerated introduction to the concepts of relations and functions, inequalities, algebraic expressions, and equations. Particular attention is given to absolute value, polynomial, rational, and radical expressions. Special emphasis will be given to linear and quadratic expressions and equations. Credit in this course may not be applied toward graduation or classification of students by hours completed. Variable Credit (0 to 2).

Corequisite: This course must be taken concurrently with MATH 1324. Course Equivalents: MATH 0112

Prerequisite: A score of 310-349 on the TSI Assessment Test.

MATH N032. Support for College Math. 2 Hours.

This course is an accelerated introduction to the concepts of relations and functions, inequalities, algebraic expressions, and equations. Particular attention is given to absolute value, polynomial, rational, and radical expressions. Special emphasis will be given to linear and quadratic expressions and equations. Credit in this course may not be applied toward graduation or classification of students by hours completed. Variable Credit (0 to 2).

Corequisite: This course must be taken concurrently with MATH 1332. Course Equivalents: MATH 0112

Prerequisite: A score of 310-349 on the TSI Assessment Test.

MATH N042. Support for Elementary Statistics. 2 Hours.

This course is an accelerated introduction designed to support students enrolled in MATH 1342. Students are expected to acquaint themselves with the role of statistics in society. Topics include graphical descriptive methods, measures of central tendency and variation, basic concepts of statistical inference, notion of estimators, confidence intervals, and tests of hypotheses. Credit in this course will not be applied toward graduation or classification of students by hours completed. Variable Credit (0 to 2). **Corequisite:** This course must be taken concurrently with MATH 1342. Course Equivalents: MATH 0112, MATH N069

Prerequisite: A score of 310-349 on the TSI Assessment Test.

MATH N084. Support for Intro Foundations of Math I. 2 Hours.

This course is an accelerated introduction designed to support students enrolled in MATH 1384. Students are expected to practice communication skills and participate in hands-on activities, including the use of mathematics manipulatives and technology. Topics will include problem solving, reasoning, communication, connections, and representation. Credit in this course may not be applied toward graduation or classification of students by hours completed. Variable Credit (0 to 2). **Corequisite:** This course must be taken concurrently with MATH 1384. Course Equivalents: MATH 0112

Prerequisite: A score of 310-349 on the TSI Assessment Test.

McNair (MCNR)

MCNR 4301. Introduction to Research and Graduate Study. 3 Hours.

This course is designed to provide students with a quick introduction to the methods, problems, and terminology of graduate research. Because the course is geared toward advanced undergraduate students and is interdisciplinary, we will only touch the surface of the research process and will provide students with a foundation on which to build during their graduate studies. Through the process of writing a research proposal and presenting preliminary research to the class, students will be exposed to the complex area of research.

Mechanical Engineering Technology (ETME)

ETME 2305. Engineering Analysis Methods. 3 Hours. [TCCN: MATH 2414]

Students learn modeling and analysis of engineering systems that contain mechanical, electrical, thermal, and fluid components. Both steady and dynamic state models involving applications of analysis tools such as integration, differentiation, matrices, and statistics will be introduced.

Prerequisite: ETEC 1010 and MATH 1420.

ETME 3376. Engineering Dynamics. 3 Hours.

Students learn engineering mechanics regarding the motion of bodies under the action of forces. Topics may include kinematics, force-momentum formulation for systems of particles and rigid bodies in planar motion, work-energy concepts, virtual displacements and virtual work, Lagrange's equations for systems of particles, linearization of equations of motion, and free and forced vibration in mechanical systems.

Prerequisite: ETEC 3375, MATH 1420, PHYS 1301, and PHYS 1101.

ETME 3378. Applied Fluid Mechanics. 3 Hours.

Students learn principles of fluid mechanics, including both statics and dynamics, and their application to engineering systems. Topics may include properties of fluids, viscosity of fluids, pressure measurement, forces due to static fluid, buoyancy and stability, the Bernoulli equation, Reynolds number, various pipeline systems, selection and application of pumps, and flow measurements.

Prerequisite: ETME 2305 and PHYS 1301 and PHYS 1101.

ETME 4376. Applied Thermodynamics. 3 Hours.

Students learn the fundamentals of gas concepts, gas measuring devices, and calibration of measuring instruments. Topics may include vapor and gas cycles, ideal gas mixtures, reading of psychrometric charts, determining fuel combustion efficiency of a steam generating system, and measuring or analyzing humid air and steam conditions including heat content. Concepts of Rankine cycle as the basis for steam and heat engine operations will also be discussed.

Prerequisite: ETME 2305, PHYS 1301, and PHYS 1101.

ETME 4378. HVAC Systems. 3 Hours.

Students study the concepts of heating, refrigeration, and air conditioning technology and associated systems. Topics may include heat transfer, controls, electric motors, refrigeration and air-conditioning, chilled-water systems, domestic and commercial Heating, Ventilation, and Air Conditioning (HVAC) systems. Hardware and equipment such as condensers, compressors, evaporators, and expansion devices, as well as safety, tools, equipment, and shop practices may also be discussed. Course Equivalents: ETEC 4378

Prerequisite: ETME 3378.

ETME 4385. Mechanical Design. 3 Hours.

Students learn principles of mechanical components design, theories of failure, fatigue and fracture design criteria, materials and their selection for engineering applications, and design of machine components such as fasteners, springs, and bolts.

Prerequisite: ETDD 4388, ETME 2305, and ETEC 4376.

Middle Level Education (CIME)

CIME 2313. Teaching as a Profession. 3 Hours.

In this course, candidates are introduced to teaching as a profession focusing on the examination of political, social, historical, theoretical, and philosophical issues related to making a commitment to education.

CIME 3327. Integrating Technology in the Middle Grades. 3 Hours.

Candidates in this course learn to plan, organize, deliver, assess, and evaluate instruction for all learners in middle grades, while integrating the effective use of technology at each level of the instructional cycle. In addition, implementation of appropriate media for communication with and among colleagues, mentors, and students is addressed.

Prerequisite: CIME 3374.

CIME 3374. Human Growth & Learning. 3 Hours.

Candidates examine human growth and learning with an emphasis in the middle grades environment. Major theories of the teaching-learning process are studied and human development related to middle level education is emphasized. Required for 4-8 certification.

Prerequisite: Junior status.

CIME 3375. The Middle Level Child. 3 Hours.

This course focuses on effective programs and practices at middle-level schools. Emphasis is placed on a historical perspective and philosophy, components of highly successful programs, and current trends and issues in middle-level education. Field experiences in public schools at appropriate levels included in this course.

Prerequisite: CIME 3374; Admission to Educator Preparation Program and Departmental approval.

CIME 3376. Curriculum and Assessment For Middle Grades. 3 Hours.

This course will prepare teacher candidates to become successful in teaching in the middle grades by using effective models of teaching and learning. Emphasis is placed on assessment strategies that reflect responsive instructional practices. Field experiences in public schools at appropriate levels included in this course.

Prerequisite: CIME 3374; Admission to Educator Preparation Program and Departmental Approval.

CIME 3385. The Middle Grades Classroom. 3 Hours.

This course provides a survey of classroom management and discipline approaches appropriate in a middle grades setting. Candidates will explore multiple components that produce a productive learning environment.

Prerequisite: Junior status.

CIME 4088. Special Topics in Middle Level Education. 1-3 Hours.

This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

CIME 4089. Independent Study in Middle Level Education. 1-3 Hours.**CIME 4116. Integrating Technology in the Middle Grades II. 1 Hour.**

Candidates in this course will learn to plan, organize, deliver, assess, and evaluate instruction for diverse learners in middle schools, while incorporating the effective use of technology at each level of the instructional cycle. It builds upon the knowledge and skills candidates acquired during methods block (in CIME 4227) in relation to using technology in classroom instruction. This course is taken as part of student teaching. For those seeking 4-8 certification only.

Prerequisite: Senior standing and admission to student teaching.

CIME 4227. Integrating Technology in the Middle Grades I. 2 Hours.

Candidates in this course will learn to plan, organize, deliver, assess and evaluate instruction for diverse learners in middle schools, while incorporating the effective use of technology at each level of the instructional cycle. This course, taken with the other middle school methods block courses, focuses on the implementation of technology instruction in the middle level grades. All candidates seeking 4-8 certification must make the connections between technology and instructional practice as they begin working with children of this age group. This course is taken as part of the Middle Level Methods Block for 4-8 certification.

Prerequisite: CIME 3374 and CIME 3385; Admission to Educator Preparation Program and Departmental approval.

CIME 4334. Teaching Math in Middle Grades. 3 Hours.

This course emphasizes mathematics lesson planning and the preparation of instructional materials appropriate for mathematics content and skills in middle level grades. This course is taken in semester 1 of Year Long Residency.

Prerequisite: CIME 3374 and CIME 3385; Admission to Educator Preparation Program and Departmental approval.

CIME 4335. Teaching Science in the Middle Grades. 3 Hours.

This course emphasizes science lesson planning and the preparation of instructional materials appropriate for science content and skills in middle level grades. This course is taken as part of the Middle Level Methods Block for 4-8 Mathematics/Science certification.

Prerequisite: CIME 3374 and CIME 3385; Admission to Educator Preparation Program and Departmental approval.

CIME 4336. Teaching Social Studies in the Middle Grades. 3 Hours.

This course emphasizes social studies lesson planning and the preparation of instructional materials appropriate for social studies content and skills in middle level grades. This course is taken as part of the Middle Level Methods Block for 4-8 English-Language Arts-Reading/Social Studies certification.

Prerequisite: CIME 3374 and CIME 3385; Admission to Educator Preparation Program and Departmental approval.

CIME 4337. Integrating Literacy and Social Studies. 3 Hours.

This course focuses on the study of methods used in the teaching of middle level language arts and social studies. Emphasis is placed on basic models, strategies, and skills necessary for teaching language arts and social studies in an integrated curriculum, and the application in middle-level grades.

CIME 4338. Integrating Math And Science. 3 Hours.

This course focuses on the integration of mathematics and science content and pedagogy for middle grades 4-8. Emphasis is placed on a historical perspective and philosophy of mathematics and science integration, problem-based approaches to teaching and learning science and mathematics, planning, teaching, and managing the integration of mathematics and science experiences for the middle school classroom.

CIME 4391. Student Teaching in the Middle Grades. 3 Hours.

The student is assigned to student teach in a middle grade classroom for approximately 14 – 15 weeks. This time is divided among observation, participation, teaching and conference activities in a classroom that spans the certification grades. This course is semester 1 of Year Long Residency.

Prerequisite: Senior status and admission to student teaching.

CIME 4392. Student Teaching in the Middle Grades. 3 Hours.

The student is assigned to student teach in a middle grades classroom for approximately fourteen to fifteen weeks. This time is divided among observation, participation, teaching and conference activities in a classroom that spans the certification grades. This course is in semester 2 of Year Long Residency.

Prerequisite: Senior status and admission to student teaching.

Military Science (MLSC)

MLSC 1101. Applied Leadership Lab I. 1 Hour.

A practical laboratory of applied leadership and skills that is required for each 1000-level Military Science Basic Course. Activities include rappelling, preliminary and advanced rifle marksmanship, first aid, field leadership reaction course and physical conditioning. Three hours per week.

MLSC 1211. Introduction to the United States Army. 2 Hours.

This course develops students who accept the Army as a values-based organization and embrace the scholar-athlete-warrior ethos. The course also familiarizes students with individual roles and responsibilities in support of team efforts and problem solving processes in military and non-military situations. The course introduces and reinforces the importance of effective oral and written communication skills, resilience, and student commitment to learning. Co-requisite: MLSC 1101.

MLSC 1212. Agile and Adaptive Leadership. 2 Hours.

Students learn to recognize and take responsibility for their own personal development through instruction in critical thinking, time management, goal setting, and communication. Students learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Co-requisite: MLSC 1101.

MLSC 2101. Applied Leadership Lab II. 1 Hour.

A practical laboratory of applied skills and leadership. Activities include rappelling, rifle marksmanship, basic land navigation, and fundamentals of tactics. Three hours per week.

MLSC 2211. Leadership and Decision Making. 2 Hours.

Students learn to apply critical thinking and problem solving skills using Troop Leading Procedures (TLP). Students also identify the importance of diversity and the officer's role in leading change. Upon completion of this course students demonstrate the fundamentals of the Army as a profession. Co-requisite: MLSC 2101.

MLSC 2212. Army Doctrine/Team Development. 2 Hours.

Students learn Army doctrine and team development. The course also reinforces the importance of Army Values, Teamwork, and Warrior Ethos while integrating the student's relationship to the Law of Land Warfare and philosophy of military service. Co-requisite: MLSC 2101.

MLSC 2401. Leader'S Training Course (Ltc). 4 Hours.

An optional four-week leadership intern program conducted during June and July at Fort Knox, Kentucky, consisting of basic leadership and adventure-type training. This course is for the student who is considering enrollment in the ROTC Advanced Course, but who does not have credit for the Basic Course. The Army provides transportation, room, board, and clothing. The student is paid approximately \$750.00 for the four-week period and is eligible to compete for a two-year Army ROTC scholarship. No service obligation is incurred. 750.00 for the four-week period and is eligible to compete for a two-year Army ROTC scholarship. No service obligation is incurred.

MLSC 3101. Applied Leadership Lab III/IV. 1 Hour.

A practical application laboratory, which is planned by the MSIV (senior) students, executed by the MSIV (senior) students, and supervised by department staff and faculty. Activities include: safety/first aid, drill and ceremony, land navigation, rappelling, rifle marksmanship, and tactics. This class is required for contracted cadets enrolled in the MLSC 3311, 3312, 4311, or 4312 classes. Three hours per week.

MLSC 3311. Training Management. 3 Hours.

Students enrolled in this course must progress from the Basic Course or Basic Camp at Fort Knox, KY. Cadets entering the Advanced Course contract (commit) to become officers before or during this semester. Cadets will study, practice, and apply the tenets of Army Leadership, Officership, Army Values and Ethics, Personal Development, and small unit tactics at the platoon level. Co-requisite: MLSC 3101.

Prerequisite: Basic Course (MLSC 1211, 1212, 2211, 2212) or Leader's Training Course (MLSC 2401).

MLSC 3312. Applied Leadership. 3 Hours.

This is the second course in the Military Science Advanced Course series and focuses on applied leadership in small unit operations. Students study, practice, and apply the fundamentals of direct level leadership and small unit tactics at the platoon level. Co-requisite: MLSC 3101.

Prerequisite: Basic Course (MLSC 1211, 1212, 2211, & 2212) or Leader's Training Course (MLSC 2401) followed by MLSC3311.

MLSC 3401. National Advanced Leadership Camp (NALC). 4 Hours.

A required four-week course during June and July of practical and theoretical instruction at an Army training center. Normally attended between the junior and senior years with transportation, room and board expenses paid by the Army. Advanced Camp cadets are paid approximately \$750 for the four-week period. \$750 for the four-week period.

MLSC 4303. Special Topics In Military Science. 3 Hours.

Independent concentrated study on an individual basis on current topics in Military Science. Performance will be based on oral presentation, written tests and research papers. Times to be arranged with PMS.

MLSC 4311. The Army Officer. 3 Hours.

This is the third course in the Military Science Advanced Course series. Students in this course begin their final preparation to assume the role of an Army Officer. Students learn the knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. Students also learn about Army programs, how to counsel and evaluate subordinate performance, values and ethics, career planning, and legal responsibilities. Students actively demonstrate the ability to prepare, execute, and continuously assess the conduct of training at the company grade level. Co-requisite: MLSC 3101.

Prerequisite: MLSC 3211 and MLSC 3212.

MLSC 4312. Company Grade Leadership. 3 Hours.

Students develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. Successful completion of this course assists in preparing students for basic Officer Leader Course and is a mandatory requirement for commissioning. Co-requisite: MLSC 3101.

Prerequisite: Basic Course (MLSC 1211, 1212, 2211 & 2212) or Leader's Training Course (MLSC 2401) followed by MLSC 3311, 3312, 4311.

Music (MUSI)

MUSI 1101. Class Piano - Non Music Majors. 1 Hour.

Students study basic techniques of piano playing as well as develop musical literacy with respect to the keyboard. Designed for the non-music major. Two hours lecture and practice.

Prerequisite: Non-music major.

MUSI 1115. Keyboard Harmony I. 1 Hour.

Students focus on the practical applications of interpreting simple notated music and basic harmony at the piano. Designed for the Musical Theatre major who has little familiarity with the keyboard.

MUSI 1116. Keyboard Harmony II. 1 Hour.

The course continues the practical application of interpreting simple notated music and basic harmony at the piano. Discussion of improvisation is included. Designed for the Musical Theatre major who has little familiarity with the keyboard.

MUSI 1160. Singer's Diction: English and Italian. 1 Hour. [TCCN: MUSI 1160]

This course is designed to familiarize singers with the pronunciation of each language as sung in choral music, recital literature, and opera.

MUSI 1166. Study Of Woodwinds. 1 Hour.

Students study basic techniques of teaching and playing clarinet, saxophone, oboe, bassoon, and flute. Three hours lecture and practice. NOTE: Woodwind students only take MUSI 1166 or MUSI 1167; Brass, string and percussion players must take BOTH MUSI 1166 and MUSI 1167.

Prerequisite: Woodwind students only take MUSI 1166 or MUSI 1167; Brass, string and percussion players must take BOTH MUSI 1166 and MUSI 1167.

MUSI 1167. Study Of Woodwinds. 1 Hour.

Students engage in a continuation of the study of basic techniques of teaching and playing clarinet, saxophone, oboe, bassoon, and flute. Three hours lecture and practice.

MUSI 1181. Class Piano, Level 1. 1 Hour. [TCCN: MUSI 1181]

Students study the basic techniques of piano playing and develop musical skills with respect to the keyboard. Designed for the music major who has little familiarity with the keyboard. Two hours lecture and practice.

MUSI 1182. Class Piano, Level 2. 1 Hour. [TCCN: MUSI 1182]

Students study basic techniques of piano playing and develop musical skills with respect to the keyboard.

Prerequisite: MUSI 1181 with a C or better; or by placement exam.

MUSI 1222. Theory Of Music I. 2 Hours. [TCCN: MUSI 1311]

Students are provided an intensive drill in the fundamentals of music theory followed by an introduction to tonal music of the Western tradition. After mastering basic concepts involving the visual recognition and written reproduction of key signatures, scales, intervals, rhythm, meter, triads, and seventh chords, students study figured bass, Roman Numeral analysis, and four-voice part writing of diatonic music using triads in all inversions. This course's content is coordinated with that of MUSICIANSHIP I (MUSI 1224).

MUSI 1223. Theory Of Music II. 2 Hours. [TCCN: MUSI 1312]

This course expands the study of the fundamentals of music theory to focus on diatonic elements of the Western tradition. In addition to the continuing focus on four-voice part writing and Roman numeral analysis, students are introduced to non-chord tones and basic studies of counterpoint and phrase structure. This course's content is coordinated with that of MUSICIANSHIP II (MUSI 1225).

Prerequisite: MUSI 1222 with a C or better; MUSI 1224 with a C or better; or by placement exam.

MUSI 1224. Musicianship I. 2 Hours. [TCCN: MUSI 1116]

This course provides intensive drill in identifying and reproducing the fundamental structures of music. The course content, which is coordinated with that of THEORY I (MUSI 1222), is divided into practical skills and aural skills. Practical skills develop students' ability to perform music. They may include activities, such as performing rhythmic patterns and sight-singing solfege patterns and written melodies. Aural skills improve your ability to hear music and interpret what you hear. These may include exercises such as interval identification, chord identification, scale identification, rhythmic dictation, melodic dictation, and harmonic dictation.

MUSI 1225. Musicianship II. 2 Hours. [TCCN: MUSI 1117]

This course provides intensive drill in identifying and reproducing the fundamental structures of music. The course content, which is coordinated with that of THEORY II (MUSI 1223), is divided into practical skills and aural skills. Practical skills develop students' ability to perform music. They may include activities such as performing rhythmic patterns and sight-singing solfege patterns and written melodies. Aural skills improve students' ability to hear music and interpret what is heard. These may include exercises, such as chord identification, rhythmic dictation, melodic dictation, and harmonic dictation.

Prerequisite: MUSI 1222 and MUSI 1224 with grade of C or better; or by placement exam.

MUSI 1226. Practical Theory I. 2 Hours.

Students focus on the fundamentals of music theory and aural skills for the Musical Theatre major. Interactive performance-based methods, such as sight-singing, are utilized as well as improvisation and composition.

MUSI 1227. Practical Theory II. 2 Hours.

This course continues the material presented in MUSI 1226 Practical Theory I. Interactive performance-based methods, such as sight-singing, are utilized as well as improvisation and composition.

MUSI 1301. Introduction To Study Of Music. 3 Hours. [TCCN: MUSI 1301]

Students are provided an intensive study of the fundamentals of music including key signatures, scales, intervals, chords, rhythm, and meter. In addition, musicianship skills are developed and tested by means of active listening, singing, sight-reading, and performance-based activities.

Prerequisite: Not open to music majors.

MUSI 1303. Fundamentals of Guitar. 3 Hours. [TCCN: MUSI 1192]

Basic guitar technique for the beginning student is combined with a study of the fundamentals of music notation. Required for music therapy majors. Required for music therapy majors.

Prerequisite: Not open to music majors.

MUSI 1304. Fundamentals Of Singing. 3 Hours. [TCCN: MUSI 1183]

Students study the physiology of vocal music production and the development of the singing voice with an emphasis on correct breathing, tone placement, vowel formations, stage presence and musical interpretation. Required for Music Therapy majors. Required for Music Therapy majors.

Prerequisite: Not open to students majoring in Music.

MUSI 1306. Music Appreciation. 3 Hours. [TCCN: MUSI 1306]

University Core area V course; Student engage in a general survey of music literature designed for the non-music major. Representative composers and their works are studied through recordings, lectures, reports, and live performances.

Prerequisite: For non-music majors.

MUSI 1310. History of Rock, Jazz, and Popular Music. 3 Hours. [TCCN: MUSI 1310]

University Core area V course; Students survey the history of jazz, rock, and popular music beginning with the common origins in African, European, and late 19th-century southern folk music and continuing through the latest trends and includes discussion of individual musicians as well as stylistic details. Course Equivalents: MUSI 2364

Prerequisite: For non-music majors.

MUSI 1379. Survey of World Music Cultures. 3 Hours.

University Core area IV course; Students engage in a survey of world music focusing on non-Western cultures of the 20th and 21st centuries. Students examine elements of representative music cultures, features of those societies that influence music, and the unique musical and artistic aesthetics of those cultural groups. Students explore the creation and function of music within a community's system of values and beliefs, fostering an appreciation for the human experience across diverse societies.

MUSI 2160. Singer's Diction: German. 1 Hour. [TCCN: MUSI 2160]

This course is designed to familiarize singers with the pronunciation of each language as sung in choral music, recital literature, and opera.

Prerequisite: MUSI 1160.

MUSI 2161. Singer's Diction: French. 1 Hour. [TCCN: MUSI 2161]

This course is designed to familiarize singers with the pronunciation of each language as sung in choral music, recital literature, and opera.

Prerequisite: MUSI 1160.

MUSI 2166. Study Of Brasses. 1 Hour.

Students study basic techniques of teaching and playing trumpet, trombone, French horn, baritone, and tuba. Three hours lecture and practice.

MUSI 2167. Study Of Brasses. 1 Hour.

Students continue the study of the basic techniques of teaching and playing trumpet, trombone, French horn, baritone, and tuba. Three hours lecture and practice.

MUSI 2181. Class Piano, Level 3. 1 Hour. [TCCN: MUSI 2181]

Students study the basic techniques of piano playing as well as further develop musical skills with respect to the keyboard.

Prerequisite: MUSI 1182 with C or better; or by placement exam.

MUSI 2182. Class Piano, Level 4. 1 Hour. [TCCN: MUSI 2182]

Student study basic techniques of piano playing as well as enhance musical skills to provide minimum competencies on keyboard necessary for completion of the music degree.

Prerequisite: MUS 113X with a C or better; or by placement exam.

MUSI 2222. Theory Of Music III. 2 Hours. [TCCN: MUSI 2311]

Students study diatonic Western musical elements to include chromatic conventions, including secondary functions, modal borrowing, Neapolitan and augmented sixth chords as well as are provided with a brief introduction to binary, ternary, and other formal designs expands on the study of phrase structure from THEORY II (MUSI 1223). This course's content is coordinated with that of MUSICIANSHIP III (MUSI 2224).

Prerequisite: MUSI 1223 and MUSI 1225 with a C or better; or by placement exam.

MUSI 2223. Theory Of Music IV. 2 Hours. [TCCN: MUSI 2312]

Students continue the study of the chromatic elements of Western music, followed by an introduction to Twentieth-Century music. Special emphasis is made on the analysis of tonal and post-tonal harmony and structures through score study, composition projects, and class performances.

Prerequisite: MUSI 2222 and MUSI 2224 with a C or better; or by placement exam.

MUSI 2224. Musicianship III. 2 Hours. [TCCN: MUSI 2116]

Students are provided intensive drill in identifying and reproducing the fundamental structures of music. The course content, which is coordinated with that of THEORY III (MUSI 2222), is divided into practical skills and aural skills. Practical skills develop the student's ability to perform music. They include activities, such as performing rhythmic patterns and sight-singing solfege patterns and written melodies. Aural skills improve the student's ability to hear music and interpret what he or she hears. These include exercises, such as chord identification, rhythmic dictation, melodic dictation, and harmonic dictation.

Prerequisite: MUSI 1223 and MUSI 1225 with a grade of C or better; or by placement exam.

MUSI 2226. Conducting I. 2 Hours.

Students are introduced to the basic techniques of conducting choral and instrumental music.

Prerequisite: Sophomore standing; MUSI 1223 Theory II with a C or better.

MUSI 2338. Introduction to Music Therapy. 3 Hours.

Students engage in a survey of the role of music as therapy in educational, psychiatric, medical, and rehabilitative settings.

Prerequisite: Required for Music Therapy majors.

MUSI 2339. Psychology Of Music. 3 Hours.

Students study the effect of music on the mind. Topics may include musical acoustics, music perception, and experimental research in music.

MUSI 2348. Survey of Music Literature. 3 Hours. [TCCN: MUSI 1308]

University Core area V course. Students study the fundamentals of music terminology, standard instrumental and vocal forms, and representative composers and compositions from secular and sacred music of most eras.

Prerequisite: MUSI 1222 and MUSI 1224 required for music majors and minors only; or instructor permission for non-majors.

MUSI 2362. Advanced Guitar. 3 Hours.

Students engage in the continuation of fundamentals of guitar with guitar techniques for advanced students combined with study of fundamentals of music notation.

MUSI 3110. Study Of Percussion. 1 Hour.

Students study the basic techniques of teaching and playing all percussion instruments. Three hours lecture and practice.

MUSI 3111. Vocal Techniques for Instrumentalists. 1 Hour.

Students study the basic techniques of teaching vocal music specifically for instrumentalists in the Music Education track. Three hours lecture and practice.

MUSI 3112. Instrumental Techniques for Vocalists. 1 Hour.

Students study the basic techniques of teaching woodwind, brass, string and percussion instruments specifically for vocalists in the Music Education track. Three hours lecture and practice. NOTE: vocalists are not required to take additional instrumental techniques courses.

MUSI 3117. Practicum In Music Therapy I. 1 Hour.

Students engage in a supervised pre-internship clinical experience in community settings. MUSI 3365 must be taken concurrently. Instructor approval required.

Prerequisite: Admission to the Music Therapy program.

MUSI 3118. Practicum In Music Therapy II. 1 Hour.

Students engage in a supervised pre-internship clinical experience in community settings. MUSI 3366 must be taken concurrently. Instructor approval required.

Prerequisite: MUSI 3117.

MUSI 3166. Study Of Strings. 1 Hour.

Students study the basic techniques of teaching and playing violin, viola, violoncello, and string bass. Three hours lecture and practice.

MUSI 3167. Study Of Strings. 1 Hour.

Students engage in a continuation of the study of the basic techniques of teaching and playing violin, viola, violoncello, and string bass. Three hours lecture and practice.

MUSI 3190. Jazz Keyboard Skills. 1 Hour.

Students engage in an in-depth study of standard jazz harmonies with an emphasis on developing the student's ability to perform jazz progressions at the keyboard.

Prerequisite: MUSI 1182 or instructor approval.

MUSI 3336. Instrumental Skills for the Musical Therapy Setting. 3 Hours.

Students study instrumental skills, as applied in the music therapy setting utilizing guitar, dulcimer, keyboard, percussion, and other instruments. Research findings in the music therapy literature are used in structuring therapeutic interventions for specific music therapy populations. Music therapy majors only.

Prerequisite: MUSI 1303, MUSI 2338, MUSI 1181, and MUSI 1182.

MUSI 3337. Instrumental Skills for the Musical Therapy Setting II. 3 Hours.

Students study instrumental skills applied in the music therapy setting, with emphasis on clinical improvisation, song writing, and popular music styles.

Prerequisite: MUSI 2181, MUSI 1303, music therapy major or music major/minor, or instructor permission.

MUSI 3362. Orchestration And Analysis. 3 Hours.

Students study basic techniques of instrumentation, including ranges, transpositions, and characteristics of band and orchestral instruments with practical application in the form of projects for various instrumental combinations.

Prerequisite: MUSI 2222 with a C or better.

MUSI 3363. Structure And Analysis. 3 Hours.

Students explore formal Western musical structures from the common practice period, including classroom discussions, daily/weekly assignments, and one large individual analysis project.

Prerequisite: MUSI 2223 with a C or better.

MUSI 3364. Improvisation. 3 Hours.

Students explore basic techniques and skills used in improvisation including standard chord changes, song structures and advanced scales and arpeggios.

Prerequisite: MUSI 2223 with a C or better is required for music majors only; or instructor permission for non-majors.

MUSI 3365. Observation and Measurement in Music Therapy. 3 Hours.

Students study the current assessment and evaluation procedures used in music therapy and the application of observational recording techniques in educational, social, and therapeutic settings. MUS 310X MUSI 3117 must be taken concurrently.

Prerequisite: Admission to music therapy program.

MUSI 3366. Music Therapy Techniques I. 3 Hours.

Students examine music therapy techniques used in the special education setting and current legislation related to education of students with disabilities and music/music therapy to be provided. MUSI 3118 must be taken concurrently.

Prerequisite: MUSI 3365.

MUSI 3367. Studies In Music For Children. 3 Hours.

Students are introduced to Kodaly philosophy and materials, Orff techniques and instruments, folk song analysis, solfege, Dalcroze concepts, and methods of other pedagogues in the field of elementary music. Several types of curricula for grades K-6 are presented.

Prerequisite: MUSI 1223.

MUSI 3372. Advanced Orchestration. 3 Hours.

Students exam orchestration styles of past and present composers, culminating in a final orchestration project and performance.

Prerequisite: MUSI 3362 Orchestration and Analysis, junior standing or permission of the instructor.

MUSI 3376. Music History: Antique through Baroque. 3 Hours.

Students are provided a chronological perspective of the development of Western music from ancient times to 1750, including representative composers, works, and genres as well as significant concepts and issues.

Prerequisite: MUSI 2348 with C grade or better; junior standing or instructor permission.

MUSI 3377. Music History: Classic to Present. 3 Hours.

Students are provided a chronological perspective of the changes in Western music beginning in 1750 and extending up to the present, including representative composers, works, and genres as well as significant concepts and issues.

Prerequisite: MUSI 2348 with C grade or better; junior standing or consent of instructor.

MUSI 3382. Survey Of Keyboard Literature. 3 Hours.

Students examine the standard piano repertoire from the Baroque era to the 20th Century. Piano majors are required to study, discuss, and perform music from the standard repertoire.

MUSI 3383. Advanced Keyboard Literature. 3 Hours.

Students continue the study begun in MUSI 3382 by delving into greater detail, which includes an introduction of methods for research in keyboard literature.

Prerequisite: Junior standing or permission of instructor.

MUSI 4068. Independent Study. 1-3 Hours.

A course in which the undergraduate student may pursue advanced specialized study under faculty supervision in the areas of composition, music literature, analysis, and research. May be repeated for hours. (This course may be taken for Academic Distinction Hours. See Academic Distinction Program in this catalog.) Variable Credit (1-3).

MUSI 4069. Special Topics. 3 Hours.

Courses offered on varied topics that are delivered in classroom format. Designed by faculty covering subject matter not currently offered in the curriculum.

MUSI 4110. Practicum In Music Therapy III. 1 Hour.

Students engage in a supervised pre-internship clinical experience in community settings. MUSI 4395 must be taken concurrently.

Prerequisite: MUSI 3117.

MUSI 4111. Practicum In Music Therapy IV. 1 Hour.

Students engage in a supervised pre-internship experience in community settings. MUSI 4396 must be taken concurrently.

Prerequisite: MUSI 3117.

MUSI 4117. Recital. 1 Hour.

Students present a public solo performance reflecting the work of one full semester of preparation at the upper division level under supervision of the applied music faculty. The student must be concurrently enrolled for applied music instruction and must have his/her program approved by his/her professor. A Recital Hearing must be passed at least two weeks prior to the scheduled performance.

MUSI 4224. Conducting II. 2 Hours.

Students study and apply advanced conducting technique as applied to instrumental and choral ensembles with emphasis on the development of analytical and interpretative skills. Three hours lecture.

Prerequisite: MUSI 2226; MUSI 2222 and MUSI 2224 with a C or better; or consent of instructor.

MUSI 4322. Keyboard Pedagogy I. 3 Hours.

Students focus on private/applied pedagogy, including the study, research, observation and application of various methodologies.

Prerequisite: Junior standing or permission of instructor.

MUSI 4340. Nonprofit Arts Administration. 3 Hours.

Students engage in a practical and in-depth study of financial, marketing, governance, and structures of nonprofit arts organizations.

Prerequisite: MUSI 2238 and 15 completed semester hours.

MUSI 4341. Music Industry. 3 Hours.

Students are presented an overview of the industry established to sell music as a commodity. Students examine the working relationship between the various entities that produce, market and sell music. Topics may include recording, career development, internet issues, publishing, artist management, and concert promotion.

Prerequisite: Completion of 15 semester hours.

MUSI 4361. Techniques for Wind and String Instruments. 3 Hours.

Students study the literature, methods, and teaching techniques of wind and string instruments. Performance majors may take this course by conference.

MUSI 4362. Vocal Pedagogy & Techniques. 3 Hours.

Students are introduced to the teaching of voice, in both the private and group settings. Students survey different schools of approach and study of the physiology of singing.

Prerequisite: Junior standing.

MUSI 4365. Counterpoint And Analysis. 3 Hours.

Students engage in a focused study of some of the forms and highly contrapuntal works of J.S. Bach with an emphasis on creative projects. The understanding of the contrapuntal devices examined in this course enhance the student's understanding of polyphony in Western music from all periods.

Prerequisite: MUSI 2223 with a C or better.

MUSI 4373. Electronic Music. 3 Hours.

Students are provided an understanding of the relationships between theory and composition. This may include original and imitative work in composition, experience with acoustic and electronic media and a basic understanding of the relationships among musical structures. Credits 3.

Prerequisite: MUSI 2223 with a C or better is required for music majors only; or permission of instructor for non-majors.

MUSI 4374. 20th Century Musical Styles. 3 Hours.

Students explore the trends, techniques, and the various styles of musical composition in the twentieth century, beginning with Impressionism, and studied both conceptually and aurally. Concepts are applied to exercises in composition.

Prerequisite: MUSI 2223 with a C or better.

MUSI 4375. Film Scoring. 3 Hours.

Students study traditional and computer based film scoring techniques as well as orchestration skills required for non-traditional instruments.

Prerequisite: MUSI 3362, junior standing or permission of instructor.

MUSI 4380. Opera Literature. 3 Hours.

Students critically examine the repertoire, performance practice, and historical perspectives of opera from the Baroque era to the present. Students evaluate and analyze differences among national trends in operatic literature. Course Equivalents: MUSI 3380

Prerequisite: MUSI 2348 with a C or better; Junior Standing or permission of instructor.

MUSI 4381. Song History and Literature. 3 Hours.

Students critically examine the repertoire, performance practice, and historical perspectives of classical art song from its initial creation to the present day. Differences among national styles and time periods will be assessed. Course Equivalents: MUSI 3381

Prerequisite: MUSI 2348; Junior Standing or permission of instructor.

MUSI 4384. Advanced Keyboard Sightreading. 3 Hours.

Students gain understanding in the multi-faceted aspects that sight-reading entails and are taught the ability to isolate these aspects. Exercises improve the individual's ability to sight-read.

Prerequisite: Junior standing or permission of instructor.

MUSI 4385. Advanced Keyboard Harmony. 3 Hours.

Piano majors and concentrates experience a broader keyboard harmony training, encounter new musical challenges and reach new heights of music making, training as artistic collaborators and soloists.

Prerequisite: Junior standing or permission of instructor.

MUSI 4395. Music Therapy Techniques II. 3 Hours.

Students study music therapy procedures used with adults in psychiatric and aging adult settings and an examine issues concerning the use of music therapy within these populations. MUSI 4110 must be taken concurrently. MUSI 4110 must be taken concurrently.

Prerequisite: MUSI 3365.

MUSI 4396. Music Therapy Techniques III. 3 Hours.

Students engage in a seminar presentation of contemporary issues in the field of music therapy. MUSI 4111 must be taken concurrently. MUSI 4111 must be taken concurrently.

Prerequisite: MUSI 3365.

MUSI 4397. Internship In Music Therapy. 3 Hours.

First three-month period of supervised clinical experience at site approved by the American Music Therapy Association (AMTA).

Prerequisite: Completion of all coursework.

MUSI 4398. Internship In Music Therapy. 3 Hours.

Second three-month period of supervised clinical experience.

Prerequisite: Completion of all coursework.

Music Ensemble (MUEN)

MUEN 1110. Keyboard Skills and Collaborative Techniques. 1 Hour.

(SH Prior Course ID: ENS 110); Students are provided the training necessary for pianists to work as collaborators with vocalists and instrumentalists. Emphasis is placed on efficient learning techniques, culminating in a live performance.

MUEN 1111. Choral Ensemble. 1 Hour.

(SH Prior Course ID: ENS 111); Students are provided excellent training in choral singing and experience in rehearsal techniques, understanding of choral repertoire and training in performance practices. The course deals with proper tone production, phrasing and musical performance.

MUEN 1115. Jazz Band. 1 Hour.

(SH Prior Course ID: ENS 115); Students focus on the musical and technical aspects of performing with a jazz ensemble. The course includes rehearsals and at least two live performances per semester.

MUEN 1116. Band. 1 Hour.

(SH Prior Course ID: ENS 116); The course is for students who have performed in marching bands in high school and want to continue that experience at the university level. Students perform intricate marching drills and play stunning, powerful music specifically writing for the BearKat Marching Band. The Band performs for football games and other major events.

MUEN 1117. Orchestra. 1 Hour.

(SH Prior Course ID: ENS 117); This course is a performance based experience for students playing string, woodwind, brass or percussion instruments. The course emphasizes music of the major periods of music written for the symphony orchestra.

MUEN 1118. Chamber Music. 1 Hour.

(SH Prior Course ID: ENS 118); Students develop and refine rehearsal skills, ensemble techniques, listening and interpretive skills through the preparation of chamber music. Student chamber groups work with a coach on a weekly basis and participate in a live performance.

MUEN 1119. Opera Workshop. 1 Hour.

(SH Prior Course ID: ENS 119); Students examine the technical and practical applications of participating and performing in an opera production. The main focus is on developing proper vocal technique and using proper vocal production skills to perform areas and scenes from operas.

MUEN 2116. Wind Ensemble. 1 Hour.

(SH Prior Course ID: ENS 216); This course is for advanced woodwind, brass and percussion player. The music is demanding and exciting. The ensemble plays a wide variety of music for the wind ensemble.

MUEN 2159. Production Workshop. 1 Hour.

(SH Prior Course ID: ENS 219); Students focus on production values (lighting, staging, costumes, make up) associated with producing concerts, recitals, shows and special events.

MUEN 3110. Keyboard Skills & Collaboration Technique. 1 Hour.

(SH Prior Course ID: ENS 310); This course offers training and experience for skilled piano players who need to learn the art of accompanying in the chamber music setting.

MUEN 3111. Choral Ensemble. 1 Hour.

(SH Prior Course ID: ENS 311); Students are provided excellent training in choral singing and experience in rehearsal techniques, understanding of choral repertoire, and training in performance practices. The course deals with proper tone production, phrasing, and musical performance.

MUEN 3112. Musical Theatre Ensemble. 1 Hour.

(Prior SH course id: ENS 312); Students focus on the musical and technical aspects of performing in a Broadway/Musical Theatre chorus. Score study is addressed. The course includes rehearsals and two live performances each semester.

MUEN 3115. Jazz Band. 1 Hour.

(SH Prior Course ID: ENS 315); Students focus on the musical and technical aspects of performing with a jazz ensemble. The course includes rehearsals and at least two live performances per semester.

MUEN 3116. Band. 1 Hour.

(SH Prior Course ID: ENS 316); The course is for students who have performed in marching bands in high school and want to continue that experience at the university level. Students perform intricate marching drills and play stunning, powerful music specifically writing for the BearKat Marching Band. The Band performs for football games and other major events.

MUEN 3117. Orchestra. 1 Hour.

(SH Prior Course ID: ENS 317); This course is a performance based experience for students playing string, woodwind, brass or percussion instruments. The course emphasizes music of the major periods of music written for the symphony orchestra.

MUEN 3118. Chamber Music. 1 Hour.

(SH Prior Course ID: ENS 318); Students develop and refine rehearsal skills, ensemble techniques, listening and interpretive skills through the preparation of chamber music. Student chamber groups work with a coach on a weekly basis and participate in a live performance.

Prerequisite: Junior standing or permission of the instructor.

MUEN 3119. Opera Workshop. 1 Hour.

(SH Prior Course ID: ENS 319); Students examine the technical and practical applications of participating and performing in an opera production. The course includes rehearsals and a live performance of opera scenes.

Prerequisite: Junior standing or permission of instructor.

MUEN 4116. Wind Ensemble. 1 Hour.

(SH Prior Course ID: ENS 416); This course is for advanced woodwind, brass and percussion player. The music is demanding and exciting. The ensemble plays a wide variety of music for the wind ensemble.

Musical Theatre Voice (MTVO)

MTVO 1201. Musical Theatre Applied Voice. 2 Hours.

This course consists of private one-on-one study of vocal techniques that are appropriate to healthy vocal performance. Study focuses on performance of musical theatre styles and repertoire. Course Equivalents: MTVO 1101 .

MTVO 3100. Platform Performances. 1 Hour.

This course has a performance based focus for junior and senior musical theatre majors. Students create performances of scenes from the musical theatre canon. Credit 1 Corequisite: MTVO 3201

Prerequisite: MTVO 1201 and junior or senior musical theatre major .

MTVO 3201. Musical Theatre Applied Voice. 2 Hours.

This course consists of private one-on-one study of vocal techniques that are appropriate to healthy vocal performance. Study focuses on performance of musical theatre styles and repertoire. Course Equivalents: MTVO 3301 .

Newton Gresham Library (NGLI)

NGLI 1101. Research in the Digital Age. 1 Hour.

New researchers are often overwhelmed by the sheer amount of information available on the Internet. This course teaches students to efficiently search online academic, popular, and professional resources and evaluate their credibility. The life-long skills learned from this class will prepare students to be more effective researchers.

Nursing (NURS)

NURS 2132. Foundations & Health Assessment Lab. 1 Hour.

Students review concepts and principles underlying the assessment of the health status of individuals across the lifespan and are introduced to a patient-centered approach for providing safe, effective nursing care in the clinical setting. Emphasis is placed on enhancing communication and assessment skills, which include improving interviewing techniques, health history taking, and the ability to review physiological systems and psychosocial findings, all while cultivating a trusting nurse-client relationship.

Prerequisite: Admission to the Nursing Program.

NURS 2133. Experiential Learning 1 - Concept Application. 1 Hour.

Students connect classroom theory with experiential learning and focus on the development of critical thinking skills, clinical judgment, ethical decision-making abilities, and overall competence in a safe and controlled simulated environment. Through a combination of hands-on practice, simulated scenarios, reflective debriefing, and collaborative learning, students will gain foundational knowledge and skills necessary for successful clinical practice. An emphasis will be placed on the nursing process, communication, safety, and patient assessment.

Prerequisite: Admission to the Nursing Program.

NURS 2231. Recitation and Wellness for Student Success 1. 2 Hours.

Students deepen their understanding of nursing concepts from the Sophomore 1 semester and apply them in real-world healthcare scenarios through interactive recitation sessions focused on competency. Students will also learn to promote individual academic success, clinical success, resilience, and well-being.

Prerequisite: Admission to the Nursing Program.

NURS 2321. Applied Pathophysiology/Pharmacology 1. 3 Hours.

Students are introduced to the foundation of pathophysiology and fundamental principles of pharmacological alterations in major regulatory mechanisms of the body. Special consideration is given to the nursing role in developing a comprehensive approach to the clinical application of pharmacologic concepts and principles to professional nursing practice. Students are provided a foundation for understanding general nursing practice, various diagnostic procedures, and basic drug classifications.

Prerequisite: Admission to the Nursing Program.

NURS 2531. Foundations of Nursing. 5 Hours.

Students are introduced to the scope of human needs, utilization of the nursing process as a systematic approach to meeting those needs, and the role of the professional nurse in assisting individuals toward optimal health. Clinical settings are used to apply fundamental concepts, principles of nursing, and communication skills to clinical practice in diverse adult populations.

Prerequisite: Admission to the Nursing Program.

NURS 3134. Experiential Learning 2 - Concept Application. 1 Hour.

Building on the foundational knowledge acquired, students bridge classroom theory with experiential learning and further develop critical thinking skills, clinical and ethical decision-making abilities, and overall competence in a safe and controlled simulated environment. Through a combination of hands-on practice, simulated scenarios, reflective debriefing, and collaborative learning, students will build on the foundational courses to gain the knowledge and skills necessary that will be built on in future courses. Emphasis will be placed on the Clinical Judgement Model within the nursing process, therapeutic communication, safety and prioritization.

Prerequisite: Admission to the Nursing Program.

NURS 3135. Experiential Learning 3 - Concept Application. 1 Hour.

Building on the knowledge previously acquired, students bridge classroom theory with experiential learning and develop critical thinking skills, clinical and ethical decision-making abilities, and overall competence in a safe and controlled simulated environment. Through a combination of hands-on practice, simulated scenarios, reflective debriefing, and collaborative learning, students gain the knowledge and skills necessary for competent clinical practice. Students examine evidence-based practice in the clinical setting and emphasis will be placed on using the Clinical Judgment Model within the nursing process, interprofessional communication, safety, delegation, and prioritization across diverse healthcare settings.

Prerequisite: Admission to the Nursing Program.

NURS 3141. Applied Pathophysiology/Pharmacology 3. 1 Hour.

Students enhance sequential critical thinking, prioritization, and effective decision-making for safe and effective patient care using the principles of pharmacology and pathophysiology as applied to clinical nursing practice. Special consideration is given to the nursing role in developing a comprehensive approach to the clinical application of pharmacologic concepts and principles to professional nursing practice.

Prerequisite: Admission to the Nursing Program.

NURS 3231. Applied Pathophysiology/Pharmacology 2. 2 Hours.

Students focus on foundations of pathophysiological and fundamental principles of pharmacological alterations in major regulatory mechanisms of the body. Special consideration of the nursing role in developing a comprehensive approach to the clinical application of pharmacologic concepts and principles to professional nursing practice is highlighted. Students are provided a foundation for understanding general nursing practice, various diagnostic procedures, basic drug classifications, and nursing implications relative to the use of drug therapy and selected therapeutic regimens. Students also develop critical thinking skills and apply effective decision-making for safe and effective care.

Prerequisite: Admission to the Nursing Program.

NURS 3232. Recitation and Wellness for Student Success 2. 2 Hours.

Students deepen their understanding of nursing concepts from the Junior 1 semester and apply them in real-world healthcare scenarios through interactive recitation sessions focused on competency. Students will also learn to promote individual academic success, clinical success, resilience, and well-being.

Prerequisite: Admission to the Nursing Program.

NURS 3233. Recitation and Wellness for Student Success 3. 2 Hours.

Students deepen their understanding of nursing concepts from the Junior 2 semester and apply them in real-world healthcare scenarios through interactive recitation sessions focused on competency. Students will also learn to promote individual academic success, clinical success, resilience, and well-being.

Prerequisite: Admission to the Nursing Program.

NURS 3263. Population Health Nursing. 2 Hours.

Students learn the skills to conduct community assessments by using the nursing process to address primary, secondary, and tertiary prevention within population health. The multiple determinants of health at the local, state, national, and global levels will be addressed. The role of the public health and community nurse, and the importance of interprofessional collaboration in various community settings will be emphasized to ensure the provision of safe nursing care while using clinical judgement. Students will participate in interprofessional learning opportunities in the course. NURS 3263 is a designated Academic Community Engagement course.

Prerequisite: Admission to the Nursing Program.

NURS 3310. Health Assessment. 3 Hours.

Students are presented the concepts and principles underlying assessment of the health status of individuals. An emphasis is placed on interviewing skills, health histories, and the physical and psychosocial findings in the well person, plus the development of communication in the nurse-client relationship and assessment skills. Students implement the nursing process by obtaining health histories, performing physical and psychosocial assessments, establishing a baseline database, and formulating initial nursing plans. Course Equivalents: NURS 3410

Prerequisite: Admission to the Nursing program.

NURS 3320. Pathophysiology for Nursing. 3 Hours.

Students are introduced to pathophysiological alterations in major regulatory mechanisms of the body. Special consideration is given to the clinical application of pathophysiologic concepts and principles in professional nursing practice. A foundation is provided for understanding general nursing practice, various diagnostic procedures, and selected therapeutic regimens. Critical thinking, correct use of related terminology and effective decision-making are incorporated to provide safe care.

Prerequisite: Admission to the Nursing program.

NURS 3321. Pharmacology for Nursing. 3 Hours.

Students are introduced to pharmacological implications and related alterations in major regulatory mechanisms of the body. Special consideration is given to the clinical application of pharmacological concepts and principles in professional nursing practice. A foundation is provided for understanding nursing implications, basic drug classifications, and selected pharmacological therapies. Critical thinking and effective decision-making are incorporated to provide safe care.

Prerequisite: Admission to the Nursing program.

NURS 3340. Older Adult Health Management. 3 Hours.

Students focus on nursing interventions used to promote, maintain, and restore health in older adult clients. Students are provided with opportunities to expand knowledge of the normal aging process; to identify variables that contribute to deviations in health; to discuss how formal and informal resources including evidence-based data contribute to older adults' health status; and to examine the implications of working collaboratively with individuals, families and communities to meet the health care needs of older adults. Course Equivalents: NURS 3040, NURS 3440

Prerequisite: Admission to the Nursing program.

NURS 3342. Behavioral Health Nursing Care. 3 Hours.

Students acquire conceptual understanding and application of evidence-based practice in care delivery for clients with behavioral (mental illness and substance abuse) dysfunction and their families. Students build upon development of critical judgment and thinking skills in patient-centered care through lecture, case studies, and classroom discussions. Emphasis is placed on fostering skills in therapeutic relationship building and communication, and knowledge of psychopharmacology.

Prerequisite: Admission to the Nursing program.

NURS 3351. Nursing Concepts I. 3 Hours.

A variety of formal and informal resources including evidence-based data are used to orient students to the roles that nurses assume and the settings in which nursing practice meets the diverse health needs of clients. Standards of professional nursing practice and nursing theorists are introduced along with the philosophy of the School of Nursing.

NURS 3360. Introduction to Research. 3 Hours.

Students focus on fundamental concepts and processes of nursing research and emphasizes nursing research as a basis for evidence-based practice. Students examine major steps in the research process, formulate research questions relevant to clinical nursing practice, and critique nursing research reports.

Prerequisite: STAT 3379 or MATH 1342 or MATH 1370 or PSYC 3402.

NURS 3370. RN-to-BSN Role Transition. 3 Hours.

This course is designed to meet the needs of a registered nurse (RN) with a 2-year associate's degree or diploma who desires to earn a bachelor of science in nursing (BSN) degree. In this course, students explore the role of the professional nurse as a provider of holistic, culturally sensitive, client-centered care. Other concepts explored include advocacy, evidence-based practice, care quality and safety, interdisciplinary communication and collaboration, genetics and genomics, and informatics. The significance of nursing theory as a basis for professional nursing practice and competency in applying nursing diagnoses is also explored.

Prerequisite: Admission to the Nursing program.

NURS 3521. Medical - Surgical Nursing1. 5 Hours.

Students focus on nursing care using critical thinking and problem-solving strategies to promote, maintain, and restore health in adults. The effects of illness are examined in relation to the individual development stage, culture, and gender. Students are introduced to the nursing process in the medical-surgical care of adults with chronic and/or non-complex illness by utilizing clinical judgment. This course includes a clinical component to allow the student the opportunity to apply theoretical concepts to medical-surgical clinical nursing practice in diverse adult populations.

Prerequisite: Admission to the nursing program.

NURS 3522. Medical - Surgical Nursing 2. 5 Hours.

Students focus on nursing care using critical thinking and problem-solving strategies to promote, maintain, and restore health in adults. The effects of illness are examined in relation to the individual development stage, culture, and gender. Students are introduced to the use of the nursing process in the care of adults with chronic and/or complex illness by utilizing clinical judgment. A clinical component is included to allow the student the opportunity to apply theoretical concepts to clinical practice in diverse adult populations.

Prerequisite: Admission to the Nursing Program.

NURS 3540. Mental Health and Illness. 5 Hours.

Students explore the relevance of psychosocial nursing concepts to all areas of professional practice with a conceptual integration of the nursing process, theories, and research from psychosocial sciences and humanities as these relate to the care of persons with mental disorders. Clinical experience provides an opportunity for application of psychosocial concepts and methods in using the nursing process to promote optimal levels of wellness for individuals, families, and target groups as well as provides students with the opportunity to develop clinical decision-making abilities when providing appropriate and culturally relevant psychiatric/mental health nursing care. Course Equivalents: NURS 3640

Prerequisite: Admission to the Nursing program.

NURS 3620. Adult Health I. 6 Hours.

Students are introduced to the use of the nursing process in the care of adults with chronic or non-complex illness, using a systems approach to discuss the effects of illness on the individual and family and to examine the disruption of growth and development patterns across the lifespan from young adult to senior years, emphasizing the nursing process to assist adults in reaching their optimal level of wellness. The course includes a clinical laboratory to allow the student the opportunity to apply theoretical concepts to clinical practice in diverse adult populations.

Prerequisite: Admission to the Nursing program.

NURS 3631. Nursing Fundamentals. 6 Hours.

Students are provided an introduction to the scope of human needs, use of the nursing process as a systematic approach to meeting those needs, and the role of the professional nurse in assisting individuals toward optimal health. Clinical settings are used in the application of fundamental concepts, principles of nursing, and communication skills that are employed in providing basic client care. Course Equivalents: NURS 3430, NURS 3530 .

NURS 3660. LVN-to-BSN Role Transition. 6 Hours.

This course meets the needs of a licensed vocational nurse (LVN) desiring to earn a bachelor's degree in nursing (BSN) and become a registered nurse (RN). Students explore the role of the professional nurse as a provider of holistic, culturally sensitive, client-centered care. Students apply critical thinking and the nursing process to clients experiencing non-complex common health problems. Other concepts include client advocacy, interdisciplinary collaboration, and professional nursing. Course Equivalents: NURS 3460, NURS 3560

Prerequisite: Admission to the Nursing program.

NURS 4030. Community Nursing. 6 Hours.

Students In this course will synthesize public health concepts within a preventive framework to promote and maintain the health of communities. The historical development and philosophy of public health will be examined, and the role of epidemiology in public health nursing will be discussed. Special focus areas include health promotion and health behaviors of individuals, families, and populations, disaster preparedness and response, cultural competence and nursing care of communities/populations. Social determinants of health affecting individuals, families, and populations and specifically to vulnerable populations will be studied. The use of the nursing process as it applies to populations and an examination and implementation of health literacy concepts will be addressed. This course may offer an optional Academic Community Engagement, interprofessional and/or study abroad component(s). Study abroad is for an additional fee. Variable Credit (1 to 6). Course Equivalents: NURS 4630

Prerequisite: Admission to the Nursing program.

NURS 4060. Leadership and Management. 6 Hours.

Students focus on the knowledge and skills related to the delivery of health services from a nursing management knowledge-base. Students are presented theories, concepts, and models of health care delivery. Students explore creative roles for managing and leading in nursing as well as gain theoretical knowledge and skills to understand organizations, understand leadership theories, and utilize critical thinking in making nursing management decisions. Variable Credit (1 to 6). Course Equivalents: NURS 4660

Prerequisite: Admission to the Nursing program.

NURS 4092. Independent Study Nursing. 1-3 Hours.

Independent Study. Students engage in an individual study in specialized areas of nursing. To be directed and approved by the nursing advisor. Variable credit (1 to 3). Course Equivalents: NURS 4392

Prerequisite: Admission to SHSU nursing program.

NURS 4095. Special Topics in Nursing. 1-3 Hours.

Special Topics. Students engage in a group study in specialized areas of nursing. To be directed and approved by the nursing advisor. This course is designed to be a multi-topic course. Therefore, the student can take the course under various special topics being offered. Variable Credit (1 to 3).

Course Equivalents: NURS 4395

Prerequisite: Admission to the Nursing program.

NURS 4137. Experiential Learning 5 - Concept Application. 1 Hour.

Building on the knowledge acquired in previous courses, students bridge classroom theory with experiential learning and aims to in this final comprehensive course to advance critical thinking skills, clinical and ethical decision-making abilities, and overall competence in a safe and controlled simulated environment. Students will immerse themselves in the complexities of critical care nursing and through a combination of hands-on practice, simulated scenarios, reflective debriefing, and collaborative learning. Students will encounter scenarios involving critically ill patients, emergency situations, and complex care management. Students will also learn advanced life support techniques, hemodynamic monitoring, professional communication, and interdisciplinary teamwork essential for success in critical care nursing practice.

Prerequisite: Admission to the Nursing Program.

NURS 4221. Child & Adolescent Nursing. 2 Hours.

Students focus on the effects of illness while exploring developmental, coping, grief, and systems theories in the care of newborn, child, and adolescent patient populations. Students also examine the conceptual impact of family, culture, and diversity on the health promotion and problems of the pediatric population and also integrate evidence-based practice and clinical reasoning through a systematic approach. The student will demonstrate developing nursing skill and knowledge through directed learning experiences. In this Academic Community Engagement (ACE) course, students collaborate with an organization and an interprofessional team as part of their field experience/clinical placement.

Prerequisite: Admission to the Nursing Program.

NURS 4230. Maternal Newborn/Child Nursing Clinical. 2 Hours.

Students describe and distinguish their nursing knowledge, application of nurse theory, demonstrate evidence-based practice, and employ clinical reasoning while delivering competent quality patient-centered care of mothers, newborn, children and their families. There are a total of 90 clinical hours as a part of the course.

Prerequisite: Admission to the Nursing Program.

NURS 4235. Recitation and Wellness for Student Success 4. 2 Hours.

Students deepen their understanding of nursing concepts from the Senior 1 semester, apply them in real-world healthcare scenarios, strengthen their competency and skills in nursing practice, and foster individual academic success, clinical success, resilience, and well-being.

Prerequisite: Admission to the Nursing Program.

NURS 4236. Experiential Learning 4 - Concept Application. 2 Hours.

Building on the knowledge previously acquired, students bridge classroom theory with experiential learning and build critical thinking skills, clinical and ethical decision-making abilities, and overall competence in a safe and controlled simulated environment. Through a combination of hands-on practice, simulated scenarios, reflective debriefing, and collaborative learning, students continue to build on knowledge from previous courses to gain the competencies necessary to safely provide holistic care to individuals and families, with an emphasis on maternal/newborn, family, and pediatric populations across various healthcare settings.

Prerequisite: Admission to the Nursing Program.

NURS 4237. Recitation and Wellness for Student Success 5. 2 Hours.

Through interactive recitation sessions, students prepare for practice, show competency in their understanding of nursing concepts from the Senior 2 semester, apply them in real-world healthcare scenarios, and foster individual academic success, clinical success, resilience, and well-being. Students are provided opportunities to design success strategies that will promote professional development.

Prerequisite: Admission to the Nursing Program.

NURS 4241. Maternal Newborn Nursing & Women's Health. 2 Hours.

Students examine childbearing families and women's health in normal and high-risk situations and the role of the nurse in meeting health needs of women, families, and their newborns. Students will employ clinical judgment to meet health needs, promote, and provide holistic patient-centered care for women, families, and newborns. In this Academic Community Engagement (ACE) course, students collaborate with an organization, interprofessional team as part of the field experience/clinical placement and explore a variety of ways to interact with different populations.

Prerequisite: Admission to the Nursing Program.

NURS 4250. Nursing Concepts II. 2 Hours.

Students are provided the opportunity to synthesize issues, such as career development, health policy, and workplace advocacy, into their working method. Other issues including information technology, ethics, and cultural awareness (which have been previously introduced) are explored more thoroughly to assist the graduate's entry into practice.

Prerequisite: Admission to the Nursing program.

NURS 4264. Applied Population Health Nursing. 2 Hours.

Students bridge classroom theory with experiential learning to develop critical thinking skills, clinical judgement and ethical decision-making abilities, and overall competence in public health and community health nursing. Through a combination of hands-on practice, simulated scenarios, reflective debriefing, collaborative learning, and interprofessional education, students further develop existing knowledge and skills necessary for successful clinical practice with individuals, families, and communities at the local, state, national, and global level. Emphasis is placed on the nursing process, communication, cultural humility, community assessment, and health education. #Credit 2

Prerequisite: Admission to the Nursing Program.

NURS 4331. Leadership & Transition to Practice. 3 Hours.

Students are introduced to the concepts of leadership and management for application in practice settings. Theories relating to nursing, culture, models of care, culture, evidence-based practice, process change, and concepts of health care delivery are explored and support transition from student to the professional nurse role.

Prerequisite: Admission to the Nursing Program.

NURS 4372. RN-to-BSN Capstone. 3 Hours.

Students integrate the knowledge, theories, and concepts RN-to-BSN learned throughout the program. Students assimilate knowledge from nursing and related disciplines for analysis of a current health issue and the professional nurse's role in impacting change.

Prerequisite: Admission to the Nursing program, NURS 4060, and Department Approval.

NURS 4381. Legal and Ethical Issues in Nursing. 3 Hours.

Students will explore legal and ethical issues related to the nursing profession. Students learn about various theories and tools that can be used to assist them in resolving ethical dilemmas.

Prerequisite: Admission to SHSU nursing program.

NURS 4382. Informatics. 3 Hours.

Students learn to integrate nursing science and computer technology in order to identify, collect, process, and manage information. Course emphasis is placed on health applications that support clinical, administrative, research, and educational decision making as well as enhance the efficacy of nursing processes. Course Equivalents: NURS 4282

Prerequisite: Admission to the Nursing program.

NURS 4383. Rural Health Nursing. 3 Hours.

Students explore the various unique healthcare needs, trends, and issues faced by rural settings. Students have an opportunity to explore possible solutions to healthcare problems as they examine evidence-based data in the literature. Rural nursing theories are applied to standards of professional nursing practice.

Prerequisite: Admission to the Nursing program.

NURS 4384. Nursing Genetics and Genomics. 3 Hours.

Students study health promotion and maintenance for individuals and families within the context of human diversity and the implications for best practices associated with genomic information, including ethics and genetic counseling. Students learn about the genomic determinants of health.

Prerequisite: Admission to the Nursing program.

NURS 4520. Child & Adolescent Nursing. 5 Hours.

Students use the nursing process to promote, protect, and maintain the health of infants, children, and adolescents, providing students with the knowledge and skills needed to develop the cognitive, psychomotor, and affective skills necessary for therapeutic interventions of these populations. Students examine the biological and psychosocial parameters; legal and ethical dimensions; resources; and cultural influences affecting nursing care strategies for infants, children, and adolescents. Course Equivalents: NURS 4420

Prerequisite: Admission to the Nursing program.

NURS 4540. Women's Health and Maternal Newborn Nursing. 5 Hours.

Students examine childbearing families and women's health in normal and high-risk situations and the role of the nurse in meeting health needs of women, families, and their newborns. Supervised clinical experiences and/or simulation experiences in the application of the nursing process in meeting these health needs are offered and promotes the acquisition of skills in caring for women, families, and newborns during uncomplicated and/or complicated health experiences in a variety of settings. Course Equivalents: NURS 4440

Prerequisite: Admission to the Nursing program.

NURS 4620. Adult Health II. 6 Hours.

Senior students are presented critical thinking and problem-solving strategies for care of adults with acute or complex illness and injuries. The effects of acute illness are examined in relation to the injury as well as in relation to the individual's developmental stage, culture, and gender. Building on the Nursing Care of Adults Health I, a systems approach is used to analyze and intervene in alterations to the health of the individual and family and to help them reach their optimal level of wellness. The course includes clinical laboratory to allow the student the opportunity to integrate theoretical concepts into clinical practice in diverse populations.

Prerequisite: Admission to SHSU nursing program.

NURS 4631. Medical - Surgical Nursing 3 (Critical Care). 6 Hours.

Students focus on nursing care using critical thinking and problem-solving strategies to promote, maintain, and restore health in adults. The effects of illness are examined in relation to the individual development stage, culture, and gender. Students progress in the use of the nursing process in the care of critically-ill adults with acute and/or complex illness(es) by utilizing clinical judgment. This course includes a clinical component to allow the student the opportunity to apply theoretical concepts to clinical practice in diverse adult populations.

Prerequisite: Admission to the Nursing Program.

Oboe (OBOE)

OBOE 1101. Secondary Performances-Oboe. 1 Hour.

Students study techniques and musicality related to oboe in weekly individualized private instruction. Students admitted as an Oboe primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

OBOE 1201. Individual Performances-Oboe. 2 Hours.

The course consists of individualized private instruction on the oboe. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

OBOE 3201. Individual Performances-Oboe. 2 Hours.

The course consists of advanced individualized private instruction on the oboe. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

OBOE 3202. Applied Oboe with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the oboe. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2.

Organ (ORGN)

ORGN 1201. Individual Performances-Organ. 2 Hours.

The course consists of individualized private instruction on the organ. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

ORGN 3201. Individual Performances-Organ I. 2 Hours.

The course consists of advanced individualized private instruction on the organ. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore barrier jury.

ORGN 3202. Applied Organ with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the organ. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Percussion (PERC)

PERC 1101. Secondary Performances-Percussion. 1 Hour.

Students study techniques and musicality related to percussion in weekly individualized private instruction. Students admitted as a Percussion primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

PERC 1201. Individual Performances-Percussion. 2 Hours.

The course consists of individualized private instruction in percussion. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

PERC 3201. Individual Performances-Percussion. 2 Hours.

The course consists of advanced individualized private instruction in percussion. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

PERC 3202. Applied Percussion w/ Jr Recital. 2 Hours.

The course consists of advanced individualized private instruction in percussion. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Philosophy (PHIL)

PHIL 1301. Introduction to Philosophy. 3 Hours. [TCCN: PHIL 1301]

Students examine the fields and issues of philosophy as discussed by both classical and modern philosophers. Philosophical problems discussed may include the existence of God, the nature of knowledge and truth, the issue of human free will, and theories of moral judgement. Course Equivalents: PHIL 2361 .

PHIL 2303. Critical Thinking. 3 Hours. [TCCN: PHIL 2303]

Students examine the fundamentals of deductive reasoning, the identification of common fallacies, and an introduction to inductive reasoning. Further, students investigate some of the ways information is distorted, e.g., by advertising and news management. This course is designed to improve students' ability to think critically.

PHIL 2306. Contemporary Moral Issues. 3 Hours. [TCCN: PHIL 2306]

Students study major moral issues in contemporary society. Topics may include abortion, euthanasia, censorship, capital punishment, and other issues that confront today's society.

PHIL 2352. Introduction to Contemporary Logic. 3 Hours.

Students explore the principles of ordered thought and the terminology and rules of symbolic logic. Further, students examine the logic of statements and the logic of predicates, qualifiers, and identity.

PHIL 3364. Ancient & Medieval Philosophy. 3 Hours.

Students survey philosophical thought from the time of the pre-Socratics to about 1500, which may include the thought of Socrates, Plato, Aristotle, the Hellenistic schools, and medieval philosophy through the late scholastic period. Students also explore the artistic, scientific, ethical, political and general cultural ramifications of the major systems of thought.

PHIL 3365. Modern Philosophy. 3 Hours.

Students survey philosophical thought from about 1500 through the twentieth century via an examination of topics that may include the philosophical significance of the rise of modern science, the classical philosophies of rationalism, empiricism, the philosophy of Kant, and the development of these philosophies through the nineteenth and twentieth centuries.

PHIL 3366. Aesthetics. 3 Hours.

Students examine the nature and meaning of art and aesthetic theories concerning representation, form, and expression. Further, students engage in analyses of aesthetic experience and the relation of art to value. This course satisfies 3 semester hours of the fine arts requirement for the BA degree program.

PHIL 3367. Philosophy of Religion. 3 Hours.

Students examine the nature and meaning of religion and religious expression with consideration of philosophical and scientific critiques of religious faith and experience. Topics may include the nature of faith and reason, the question of the existence and nature of God, and the relation of religion and value.

PHIL 3371. Existentialism and Self-Awareness. 3 Hours.

Students examine the major themes of existentialism and its impact on contemporary society via existential works in a variety of forms, which may include philosophy, literature, psychology, psychoanalysis, and religion. Further, students examine existential concepts, which may include anxiety, fear, guilt, meaninglessness, death, and authentic and inauthentic existence. Taught with PSYC 3371.

PHIL 3372. Philosophy of Science. 3 Hours.

Students survey topics in philosophy of science, which may include the logic of explanations in the physical and social sciences, the relationship between science and society, and metaphysical or sociological critiques of science. Course content includes attention to historically prominent examples from social and natural sciences that demonstrate the applicability of important concepts from the philosophy of science.

PHIL 3373. American Philosophy. 3 Hours.

Students survey key figures and ideas of the American intellectual tradition. Themes may include democracy, freedom, cultural and racial identity, ethical and religious pluralism, and interpretations of nature from various perspectives, including current developing traditions such as African American, Native American, and Feminist movements.

PHIL 4306. Philosophy of Biology. 3 Hours.

Students investigate philosophical questions concerning the development and application of evolutionary theory. Students will also develop an understanding of key concepts, which may include adaptation, speciation, the comparative method, levels of selection, and phylogenetic reconstruction. This course is offered in the Spring semester of even years.

PHIL 4333. Bioethics. 3 Hours.

Students survey bioethics using various ethical theories and moral principles to analyze and critically evaluate moral dilemmas in medicine. Students will investigate and discuss topics that may include the patient-physician relationship, bias in medicine, health care delivery systems, and the ethics of research. To enhance critical thinking skills and decision-making skills, students will develop and defend views on given bioethical issues. Credit: 3.

Prerequisite: Sophomore standing.

PHIL 4334. Environmental Ethics. 3 Hours.

Students examine philosophical theories about the principles and values that govern humanity's moral relationship to nature and the animal world. Topics covered may include theories of animal rights, the intrinsic value of nature, the ethics of global climate change, the moral implications of mass extinctions, and our moral responsibility to future generations.

PHIL 4336. Philosophy of Law. 3 Hours.

Students consider the philosophical nature of law, legal reasoning, and legal rights within a discussion of justice and equality under the law. Applying these theories to practice, students engage in a series of case studies examining major Supreme Court opinions. Students learn to answer these questions via reflection and argumentation that integrates and extends major jurisprudential theories.

PHIL 4361. Philosophy of Psychology and Mind. 3 Hours.

Students examine a range of contemporary theories of mind and the primary objections they face. Topics may include mind/brain identity theory and reductionism, the nature and function of consciousness, the nature of rationality and its relation to consciousness, the possibility of machine intelligence, and the nature of mental representation.

PHIL 4363. Ethical Theories. 3 Hours.

Students examine classical views about the foundation of ethics, which may include divine command, cultural relativism, subjectivism, egoism, utilitarianism, Kantianism, and virtue ethics. Students will also devote significant attention to a variety of contemporary approaches to understanding ethics.

PHIL 4371. Death and Dying. 3 Hours.

Students examine philosophical reflections on death and dying in a variety of forms, which may include literature, philosophy, psychology, theology, medicine, and other contemporary sources. Topics may include the nature of grief, sorrow, anxiety, fear, and suicide as related to death, and the social implications of death for the individual, family, friends, and community.

PHIL 4372. Theories of Knowledge and Reality. 3 Hours.

Students examine issues concerning the basic categories of reality, which may include individuals and universals, time and change, and mind and body. Further, students explore issues in the theory of knowledge, which may include the distinction between knowledge and belief, the criteria of knowledge, and the justification of knowledge claims.

Prerequisite: 6 hours of philosophy and sophomore standing.

PHIL 4373. Philosophy in Film and Literature. 3 Hours.

Students establish and develop philosophical literacy by highlighting the ways in which canonical philosophical works have informed the content and structure of works of film and literature. Carefully selected pairings of philosophical texts and films are used throughout.

Prerequisite: 3 hours of philosophy and at least sophomore standing.

PHIL 4374. Philosophy of Crime & Justice. 3 Hours.

Students examine foundations of the American criminal justice system, considering questions such as: is there a moral justification of punishment; what basic principles guide law enforcement in practice; how did these principles come to be in place; and how do they connect to the moral and political ideals on which the country was founded? Students critically engage with philosophical, legal, sociological, and historical resources.

PHIL 4375. Feminist Philosophies. 3 Hours.

Students examine competing feminist theories that take a distinctively philosophical approach to social hierarchies and the systems that ground, promote, or conceal them. Questions explored may include how feminist philosophers distinguish between sex and gender; what role sexuality plays in both personal and social identities; how sex, gender, and sexuality intersect with race and class; how feminist theories help us to make sense of pop culture; and how best to affirm the differences in women's lived experiences both locally and globally.

PHIL 4377. Philosophy of Race. 3 Hours.

Students investigate the philosophical foundations of the concept of race, by analyzing distinctions among human beings according to race founded on anthropological, biological, and philosophical principles. Additionally, students consider whether racial hierarchies are morally and politically justifiable, and if not, students explore how these racial hierarchies can be eradicated through individual or collective social action. Accordingly, students analyze themes in critical race theory and the philosophy of race with the intent of appraising their capacity to help generate social justice.

PHIL 4380. Seminar in Philosophy. 3 Hours.

Students engage in an in-depth study, conducted on a seminar basis, of a particular topic or area in philosophy not covered fully in the other course offerings. As the topics vary, the course may be repeated for credit.

PHIL 4385. Readings in Philosophy. 3 Hours.

Advanced students capable of independent study will develop a program of study in conjunction with an instructor.

Prerequisite: Admission to the course requires permission of the instructor.

Physics (PHYS)

PHYS 1101. General Physics Laboratory I. 1 Hour. [TCCN: PHYS 1101]

Laboratory taken in conjunction with PHYS 1301.

Prerequisite: MATH 1410 or MATH 1316 or MATH 1420 .

PHYS 1102. General Physics Laboratory II. 1 Hour. [TCCN: PHYS 1102]

Laboratory taken in conjunction with PHYS 1302.

PHYS 1105. Classical Physics and Thermodynamics Lab. 1 Hour. [TCCN: PHYS 1105]

Laboratory taken in conjunction with PHYS 1305.

PHYS 1301. General Physics-Mechanics and Heat. 3 Hours. [TCCN: PHYS 1301]

A modern treatment is made of the laws and principles of motion, force, momentum, energy, and rotation. This course is intended for science majors whose degree plan does not require a calculus-based treatment. The PHYS 1101 experimental laboratory course should be taken concurrently.

Prerequisite: MATH 1410 or MATH 1316 or MATH 1420.

PHYS 1302. General Physics-Sound, Light, Electricity, and Magnetism. 3 Hours. [TCCN: PHYS 1302]

The course is a continuation of PHYS 1301, covering the subjects of electricity and magnetism, including circuits applications. The course is intended for science majors whose degree plan does not require a calculus-based treatment. The PHYS 1102 experimental laboratory course should be taken concurrently.

Prerequisite: PHYS 1301 and MATH 1316 or MATH 1410 or MATH 1420.

PHYS 1305. Classical Physics and Thermodynamics. 3 Hours. [TCCN: PHYS 1305]

Students study the fundamentals of motion, forces, energy, and heat at a conceptual level. The course is intended for students who are not science majors, including those on primary and middle school education tracks.

PHYS 1401. Physics Boot Camp. 4 Hours.

Students engage in a review of the essential mathematical and problem solving skills required for the first two years of the physics, pre-engineering, and certain engineering-technology degree plans. Applications focus on the context of physics and engineering examples, starting from first principles. All students considering a physics or pre-engineering major should enroll in the Bootcamp during their first semester on campus. A weekly group problem solving practice session is integrated.

PHYS 1403. Stars & Galaxies. 4 Hours. [TCCN: PHYS 1403]

Students study the universe beyond the solar system. Topics may include the nature of stars, stellar evolution, galaxies, quasars, cosmology, the universe as a whole, and theories about the origin and fate of the universe. Students are introduced to tools astronomers use to determine such properties as temperatures, compositions, motions, masses, and evolution of astronomical objects. Note: PHYS 1403 and PHYS 1404 may be taken in either order. Course Equivalents: PHYS 1312 .

PHYS 1404. Solar System Astronomy. 4 Hours. [TCCN: PHYS 1404]

Students study the solar system as well as other planetary systems. Topics may include the nature of science, apparent motions in the sky, the historical development of the laws governing the solar system, the structure and membership of solar system objects, the formation of the solar system, and extrasolar planets and our understanding of other solar systems. Note: PHYS 1403 and PHYS 1404 may be taken in either order. Course Equivalents: PHYS 1311 .

PHYS 1411. Introduction To Physics I. 4 Hours. [TCCN: PHYS 2425]

Students are introduced to the topics of classical mechanics, including linear motion, forces, rotation, and conservation laws. Considerable attention is given to the solution of problems with the emphasis placed on fundamental concepts. Students must register concurrently for the integrated weekly laboratory problem-solving session. Calculus I (MATH 1420) may be taken concurrently by students who have completed Physics Bootcamp (PHYS 1401).

Prerequisite: MATH 1420.

PHYS 1422. Introduction To Physics II. 4 Hours. [TCCN: PHYS 2426]

Students are introduced to the topics of electricity and magnetism, including Maxwell's equations, the Lorentz force, and basic electrical circuits.

Considerable attention is given to the solution of problems with the emphasis placed on fundamental concepts. Students must register for the integrated weekly laboratory problem-solving session. Completion of Calculus II (MATH 1430) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 1411 and MATH 1430.

PHYS 2426. Heat, Waves & Modern Physics. 4 Hours.

An introduction to topics in heat and wave motion including sound and light. The quantitative description of phenomena is emphasized. The laboratory continues as an integral part of the course.

Prerequisite: PHYS 1411 and MATH 1420.

PHYS 3111. Modern Physics Laboratory I. 1 Hour.

Laboratory taken in conjunction with PHYS 3391. Students reproduce key experimental outcomes underlying 20th century physics.

Prerequisite: PHYS 1422.

PHYS 3115. Electronics and Circuit Analysis Lab. 1 Hour.

Laboratory taken in conjunction with PHYS 3395. Students construct and analyze advanced circuits including both classical and semiconductor-based components.

Prerequisite: PHYS 1422 .

PHYS 3117. Astronomy Laboratory. 1 Hour.

Laboratory taken in conjunction with PHYS 3397. 1 Credit.

PHYS 3360. Statics And Dynamics. 3 Hours.

Students study equilibrium, using concepts of force and torque. Vectors, calculus and differential equations are used. Completion of Calculus II (MATH 1430) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 1411 and MATH 2440.

PHYS 3370. Introduction to Theoretical Physics. 3 Hours.

Students study the essential techniques of mathematical analysis required for the latter two years of the physics degree plan. The course focuses on physics applications of series (Taylor, Fourier, Laurent), vector calculus, generalized coordinates, differential equations, special functions, and complex analysis. Students register concurrently for the PHYS 4110 laboratory. Completion of Calculus III (MATH 2440) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 1422 and MATH 2440.

PHYS 3391. Modern Physics I. 3 Hours.

Students explore the historical breakdown of classical physics that occurred at the beginning of the 20th century, presaging the introduction of Relativity Theory and Quantum Mechanics. Significant treatment of probability and statistics is integral to the understanding of these topics. Completion of Calculus III (MATH 2440) is recommended, though it may be taken concurrently. PHYS 3111 must be taken concurrently.

Prerequisite: MATH 2440 and PHYS 1422.

PHYS 3395. Electronics & Circuit Analysis. 3 Hours.

Students study advanced circuit analysis, including analog filters, digital integrated circuits such as op-amps, selected discrete components such as diodes and transistors, and applications to various digital and analog systems. The PHYS 3115 laboratory must be taken concurrently. Completion of Calculus III (MATH 2440) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 1422 .

PHYS 3397. Astronomy. 3 Hours.

Students continue their study of the solar system, sun, stars, and stellar systems, their motions, structure, energy sources and evolution, star clusters, interstellar matter, galaxies, and cosmology. The PHYS 3117 laboratory must be taken concurrently.

Prerequisite: PHYS 3117 must be taken concurrently.

PHYS 3398. Astronomy-Honors. 3 Hours.**PHYS 4110. Advanced Undergraduate Laboratory I. 1 Hour.**

Laboratory taken in conjunction with PHYS 3370. Students are introduced to methods of analysis (e.g. statistical distributions, likelihoods, and error propagation) and technologies (e.g. programming with Python, symbolic algebra and visualization with Mathematica, typesetting with LaTeX, and the Linux operating system) commonly used in graduate study and research applications.

PHYS 4113. Light And Optics. 1 Hour.

Laboratory taken in conjunction with PHYS 4333. Students reproduce key experimental outcomes with lensing, reflection, interference and diffraction. Credit 1.

PHYS 4331. Physics For Forensic Sciences. 3 Hours.

Forensic science makes use of a number of physical techniques. Students are provided with an understanding of the physics used in forensic science that enhances the standard introductory physics course. Topics covered may include interior and exterior ballistics, optics, stress and strain, elementary fluid mechanics.

PHYS 4333. Light And Optics. 3 Hours.

The wave theory of light is emphasized. Phenomena such as interference, diffraction, reflection, transmission, and polarization are treated with quantitative detail. The PHYS 4113 laboratory must be taken concurrently. Completion of Calculus III (MATH 2440) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 1422 .

PHYS 4366. Introduction to Quantum Mechanics. 3 Hours.

The subject of quantum mechanics describes the wave nature of matter, which is relevant at atomic scales. Topics may include the harmonic oscillator, potentials, symmetries, rotation and spin, the hydrogen atom, and atomic spectra. Completion of Differential Equations (MATH 3376) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 3391 and MATH 3376 with a grade of C or better.

PHYS 4367. Introduction to Solid State Physics. 3 Hours.

Students are introduced to the concepts of crystal structure, diffraction, reciprocal lattices, binding, phonons, the free electron Fermi gas, semi-conductors, energy bands, Fermi surfaces, point defects, and optical properties of crystals. Completion of Differential Equations (MATH 3376) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 3391.

PHYS 4368. Electricity And Magnetism. 3 Hours.

Students engage in a more advanced treatment of the classical theory of Electricity and Magnetism which extends the material covered in PHYS 1422. Maxwell's equations are studied in integral and differential form. Topics may include electro- and magneto-statics and dynamics, potentials, fields, waves, and applications to materials. Completion of Differential Equations (MATH 3376) is recommended, though it may be taken concurrently.

Prerequisite: MATH 3376 and PHYS 1422.

PHYS 4370. Classical Mechanics. 3 Hours.

Students engage in a more advanced treatment of the classical theory of Mechanics which extends the material covered in PHYS 1411. Newton's second law is treated as a differential equation to study kinematics, oscillations, and conservation laws. Lagrangian dynamics are introduced, along with generalized coordinates. Additional topics may include orbital motion, rigid bodies, coupled systems, and effective potentials. Completion of Calculus III (MATH 2440) is recommended, though it may be taken concurrently.

Prerequisite: MATH 3376.

PHYS 4371. Thermodynamics and Statistical Mechanics. 3 Hours.

Students study foundational concepts of classical thermodynamics, including the first and second laws, properties of gases, entropy, and thermodynamic functions. These concepts are formally connected to and derived from their origins in statistical mechanics. Completion of Differential Equations (MATH 3376) is recommended, though it may be taken concurrently.

Prerequisite: PHYS 3391 and MATH 3376.

PHYS 4395. Undergraduate Research. 3 Hours.

Students conduct original research under the direct supervision of a faculty member. Projects may be supervised by non-physics faculty with departmental approval. Each student is expected to demonstrate initiative in planning, performing, and reporting work done on the selected topic. The course may be repeated for up to a total of 6 credit hours with departmental approval.

Prerequisite: Consent of Department Chair.

PHYS 4396. Selected Topics In Physics. 3 Hours.

Students study various advanced topics of contemporary interest in physics. The course is offered upon demand, and content is dependent upon faculty availability and student interest. May be repeated for additional credit with distinct course content.

Prerequisite: Consent of the instructor.

PHYS 4398. Senior Thesis. 3 Hours.

This is a directed elective for upper-division students majoring in Physics and/or minoring in Astronomy who seek to couple original research or guided independent study with an exercise in technical writing. Research activities in the fundamental or applied sciences, including science education, and/or a topically similar literature review, are supervised by a member of the Physics and Astronomy faculty. Findings are presented in an organized written form of suitable length with appropriate attention to scholarly norms, e.g. in the handling of data and citation of prior works.

Prerequisite: Approval of the Supervising Faculty Member.

Piano (PIAN)

PIAN 1101. Secondary Performances-Piano. 1 Hour.

Students study techniques and musicality related to piano in weekly individualized private instruction. Students admitted as a Piano primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

PIAN 1201. Individual Performances-Piano. 2 Hours.

The course consists of individualized private instruction on the piano. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

PIAN 3201. Individual Performances-Piano. 2 Hours.

The course consists of advanced individualized private instruction on the piano. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

PIAN 3202. Applied Piano with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the piano. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Plant & Soil Sciences (PLSC)

PLSC 1107. Plant Science Laboratory. 1 Hour. [TCCN: AGRI 1107]

Laboratory for PLSC 1307. Course Equivalents: AGRI 1107.

Prerequisite: Concurrent enrollment in PLSC 1307.

PLSC 1307. Plant Science. 3 Hours. [TCCN: AGRI 1307]

Students study basic plant morphology, classification, propagation, and crop improvement along with growth and development of crop plants. Students are introduced to soils, climate, and plant protection follow with a final overview of the major groups of cultivated plants.

PLSC 2375. Turfgrass Science. 3 Hours.

Students study the major turfgrass species grown in the U.S. and throughout much of the world. Students explore differences in management, culture, and varietal selection for athletic, ornamental, and utility turfs. Credit 3 Course Equivalents: AGRI 2375

Prerequisite: None.

PLSC 2395. Ornamental Plant Identification. 3 Hours.

Students explore identification, growth characteristics, culture, and use of common landscape and greenhouse plants. Materials include trees, shrubs, vines, groundcovers, and turf grasses. Emphasis is placed on temperate region plants. Course Equivalents: AGRI 2395

Prerequisite: PLSC 1307.

PLSC 2396. Special Topics in Plant and Soil Science. 3 Hours.

Students examine special topics/issues in Plant and Soil Science at an introductory level. This course may be repeated up to three times as topics and subject matter change.

PLSC 2399. Floral Design. 3 Hours.

Students explore principles and elements of design illustrated with the use of floral materials; techniques involved in design and construction of floral arrangements; and history of and utilization of floral art in society. Course Equivalents: AGRI 2399 .

PLSC 3300. Applied Plant Physiology. 3 Hours.

Students examine core plant processes of photosynthesis, respiration, transpiration, and their effects on the growth quality of agricultural crops. Topics include stress response, hormones, abiotic and biotic factors, and their effects on metabolic processes in agricultural crops.

Prerequisite: PLSC 1307.

PLSC 3320. Landscape Plant Materials. 3 Hours.

Students identify common annual and perennial herbaceous landscape plants and examine their climatic adaptation and use. Emphasis is placed on tropical and subtropical landscaping plants, including various trees, shrubs, groundcovers, and vines.

Prerequisite: PLSC 1307.

PLSC 3374. Controlled Environment Agriculture. 3 Hours.

This course is designed to cover the principles and techniques involved in the production and management of nurseries and greenhouse crops including ornamental trees, shrubs, annuals, and perennials. Course Equivalents: AGRI 3374

Prerequisite: PLSC 1307 and Sophomore standing.

PLSC 3379. Turfgrass Culture. 3 Hours.

Student explore the principles of sexual and asexual propagation of major turf species, soils and rooting media, nutrient management, irrigation, pest control, and selection of appropriate cultivars are covered in this course. Course Equivalents: AGRI 3379

Prerequisite: PLSC 1307 and Sophomore standing.

PLSC 3395. Plant Propagation Techniques. 3 Hours.

Students explore in detail the principles and practices involved in propagation of plants. Emphasis is placed on sexual and asexual methods of propagation and the biochemical/hormonal factors involved. Propagation techniques of several horticultural crops are covered and practiced. Course Equivalents: AGRI 3395

Prerequisite: PLSC 1307/1107 and Sophomore standing.

PLSC 3398. Landscape Design I. 3 Hours.

Students explore the principles, elements, and factors to be considered in preparation, planning, and design of a residential landscape. Emphasis is placed on the incorporation of plant materials into basic landscape design. Course Equivalents: AGRI 3398

Prerequisite: PLSC 1307 and Sophomore standing.

PLSC 3440. Soil Science. 4 Hours.

Students are introduced to the physical, biological, and chemical properties of soils and their relationships to soil formation, soil fertility, soil temperature, soil-plant-water relations, pH and liming, and conservation of soils. Environmental issues are also discussed. Sophomore Standing. Course Equivalents: AGRI 3440

Prerequisite: CHEM 1406, CHEM 1407, CHEM 1411, or CHEM 1412.

PLSC 4320. Fruit & Vegetable Production. 3 Hours.

Students engage in a comprehensive study of the fruit and vegetable industry in the United States. Topics of study may include climatic requirements, growth characteristics, cultural practices, and pest control strategies. Course Equivalents: AGRI 4320

Prerequisite: PLSC 1307.

PLSC 4330. Soil Fertility Management and Fertilizers. 3 Hours.

Students study the principles of soil fertility, water, nutritional, and climatic relationships. Emphasis is placed on sources of soil nutrients, including commercial fertilizers and biological resources. Course Equivalents: AGRI 4330

Prerequisite: PLSC 3440 and Junior standing.

PLSC 4358. Landscape Operations. 3 Hours.

Students examine the principles and techniques of constructing and managing amenity landscapes. Emphasis is placed on contract documents, specifications of work, plant establishment, management plans, pruning, soil modification, and building materials.

Prerequisite: PLSC 1307.

PLSC 4368. Landscape Design II. 3 Hours.

This course is a continuation of PLSC 3398. Design skills will be refined as students experience more variety in design opportunities. Both small residential and larger public spaces are the subjects of student designs. Effective graphic presentations are stressed. In addition, installation, maintenance, and management of residential landscapes are discussed. Course Equivalents: AGRI 4368

Prerequisite: PLSC 1307 and Junior standing.

PLSC 4369. Special Topic. 3 Hours.

Students examine special topics/issues in Plant Soil Science at an advanced level. This course may be repeated up to three times as topics and subject matter change.

Prerequisite: PLSC 1307 and Junior standing.

PLSC 4370. Forage Crops and Pasture Management. 3 Hours.

Student study quality evaluation, adaptation, selection, culture, and management of the more important plants used for pasture, hay, and silage. Particular attention is given to those species grown commonly throughout the southeastern US. Course Equivalents: AGRI 4370

Prerequisite: Junior standing.

PLSC 4372. Sports Turf Management. 3 Hours.

Facility design and construction, water management, soil modification, and unique management practices commonly applied to golf courses and other sports turfs are covered. Management of budgets, personnel, equipment maintenance and irrigation scheduling are also covered. Junior standing. Course Equivalents: AGRI 4372

Prerequisite: PLSC 1307 and PLSC 3440.

PLSC 4383. Range Management. 3 Hours.

With rangelands comprising the majority of lands in the western US, students explore forage-animal management topics common to the semi-arid and arid regions of the US. Students address the unique management requirements of rangelands, the use of government-owned lands, and the competing uses of rangelands for livestock production, wildlife habitat, and recreational areas for humans. Junior standing. Course Equivalents: AGRI 4383

Prerequisite: PLSC 1307 or BIOL 1411.

PLSC 4397. Integrated Pest Management. 3 Hours.

Students engage in a comprehensive review of current cultural, biological, mechanical, and chemical techniques used in managing or controlling agricultural and residential pests. Attention is given to environmental hazards, application methods, and safety precautions in handling and storage of pesticides. Course Equivalents: AGRI 4397

Prerequisite: AGRI 1307 and Sophomore standing.

Political Science (POLS)

POLS 2304. Introduction to Political Science. 3 Hours.

Students explore the discipline of political science, including the discipline's subfields, literature, major theories, research methodology, and major debates. Students apply the tools of the discipline to analyze contemporary issues in governing, policy, and political behavior.

POLS 2305. American Government. 3 Hours. [TCCN: GOVT 2305]

Students examine American government at the national level and develop the knowledge to engage in political and civic life. Topics may include the origin and evolution of the U.S. Constitution, political behavior and attitudes, political parties, interest groups, the media, and the three branches of government - Congress, the Executive Branch, and the Judiciary. Course Equivalents: POLS 2301 .

POLS 2306. Texas Government. 3 Hours. [TCCN: GOVT 2306]

Students examine Texas government and politics. Topics may include the Texas Constitution; Texas' role in the federal system; political culture; individuals' political values and participation; interest groups; parties; elections and campaigns; the legislative, executive, and judicial branches; and fiscal, social, and economic policies.

POLS 3302. Introduction to Public Policy. 3 Hours.

Students explore how governmental entities in the U.S. make public policy. Using various policy models, students analyze the effect of policy environments, actors, processes, policy characteristics, and politics on the nature of policy outputs. Students learn to evaluate policies using a variety of program evaluation methodologies.

Prerequisite: 6 hours of POLS.

POLS 3330. American Politics. 3 Hours.

Students learn the terminology, concepts, theoretical perspectives, and methods used in the study of American politics. Students examine theories of collective action and individual behavior to answer key questions in the study of political institutions and mass behavior in the United States. Credit: 3.

Prerequisite: 6 hours of POLS.

POLS 3331. Local Political Systems. 3 Hours.

Students examine the structure, process, and politics of local governments in Texas and the nation. Local governments may include metropolitan governments, special districts, county governments, rural and small town polities, and urban and suburban political structures. At each level, topics may include home rule, leadership recruitment and behavior, local elections, budgeting, services, and intergovernmental relations. Course Equivalents: POLS 2331

Prerequisite: 6 hours of POLS.

POLS 3332. State Political Systems. 3 Hours.

Students compare state-level politics in Texas with others in the U.S. Topics may include the legislative, executive, and judicial branches; the states' roles in the federal system; political culture; individuals' political values and participation; interest groups; parties; elections and campaigns; and fiscal, social, and economic policies. Course Equivalents: POLS 2332

Prerequisite: 6 hours of POLS.

POLS 3334. Judicial Systems. 3 Hours.

Students examine the development of judicial systems and the policy making role of courts. This course is an orientation course for pre-law students and others interested in the legal aspects of government.

Prerequisite: 6 hours of POLS.

POLS 3335. Political Ethnic Minorities and Gender. 3 Hours.

Students examine the ways in which political theory, behavior, beliefs, and public policy relate to race, ethnicity, and gender in the U.S. Course Equivalents: POLS 2335

Prerequisite: 6 hours of POLS.

POLS 3336. The Presidency and Executives. 3 Hours.

Students examine the executive offices of the President, state governors and the heads of local governing bodies in the United States. Topics may include comparative institutional development, roles, structures, processes, and functions.

Prerequisite: 6 hours of POLS.

POLS 3337. The Congress and Legislatures. 3 Hours.

Students examine the powers, organization, procedures, and operations of legislative bodies in the United States. Topics may include selection of legislators, legislative leadership, influence of lobbyists, political parties, legislative committees, executives, and legislative roles and norms.

Prerequisite: 6 hours of POLS.

POLS 3338. Victims' Rights, Politics, and Policy. 3 Hours.

Students examine the politics and policies of victims' rights, exploring the emergence of victims' rights as a political issue and as a social movement. Students study victims' rights policies and programs at the local, state, national, and international level and analyze their development, their implementation, and their impact.

Prerequisite: 6 hours of POLS.

POLS 3339. Nonprofit Organizations. 3 Hours.

Students gain an overview of the development of nonprofit organizations, examining their history, roles, and types. Topics may include nonprofit and government relations, nonprofit and business relations, nonprofit and policymaking, nonprofits in an international context, and organizational issues.

Prerequisite: 6 hours of POLS.

POLS 3360. Political Parties and Interest Groups. 3 Hours.

Students examine political parties and interest groups in U.S. politics, exploring their development and evolution, their organization and functions, and their role in politics. More specific topics may include the influence of parties and interest groups on political values, participation, voting, campaigns and elections, governing, and effects on policy.

Prerequisite: 6 hours of POLS.

POLS 3361. Central and Eastern European Politics. 3 Hours.

Students compare the political systems of Central and Eastern European states, including the European portions of the former Soviet Union, with emphasis on the problems of transition from communism to democracy and market economy.

Prerequisite: 6 hours of POLS.

POLS 3364. Politics and The Media. 3 Hours.

Students examine the role and impact of the media (the Internet, radio, television, and the various forms of print media) on U.S. politics. Topics may include the impact of the media on campaigns and election outcomes, the media as a source of political information, the agenda setting power of the media, the role of the free press in a democracy, and citizens' relationship to the media. The course may also consider the relationship between the media and politics in other nations. The course makes use of textbooks but also relies heavily on contemporary media.

Prerequisite: 6 hours of POLS.

POLS 3365. Introduction to Comparative Politics. 3 Hours.

Students examine important issues and trends in world political systems that places American government and politics in a comparative context. Students learn the terminology, concepts, and methods of comparative politics. Topics may include institutions, behavior, constitutional processes, political parties and interest groups, public policy, political development, transitions from authoritarianism to democracy and from statist to market economies, sources of domestic violence, and other major concerns of the field. Course Equivalents: POLS 2365

Prerequisite: 6 hours of POLS.

POLS 3366. Public Administration. 3 Hours.

Students explore national public administration with emphasis on the political processes within the surrounding administrative agencies. Topics may include development of the administrative function, policy formulation and budgeting, the relations of administrators to Congress, interest groups, courts, and the public. The course may include coverage of state and local topics related to public administration. Course Equivalents: POLS 2366

Prerequisite: 6 hours of POLS.

POLS 3368. Asian Politics. 3 Hours.

Students compare contemporary politics and governments in Asia. Students examine the history and culture of each country as well as the dynamics of change in the region. The course encompasses most of the countries of East Asia and Southeast Asia, including China, Japan, the Koreans, Indonesia, Malaysia, Singapore, the Philippines, Vietnam, and Cambodia. Time permitting, the course may include India and South Asia.

Prerequisite: 6 hours of POLS.

POLS 3369. Religion and Politics. 3 Hours.

Students examine the historical and contemporary relationship between religion and politics. Topics may include politics and religion in the United States, the proper role of religion in American public life, the relationship between religion and state in the Islamic world, religion and conflict situations, and the role of religion in conflict resolution.

Prerequisite: 6 hours of POLS.

POLS 3370. Western European Politics. 3 Hours.

Students compare contemporary politics and governments in Western Europe. The course typically concentrates on Britain, France, Germany, and Italy but usually includes other important and interesting countries, such as Belgium, the Netherlands, Spain, Portugal, and the Scandinavian countries. The course also covers the European Union - its policies, institutions, and expansion.

Prerequisite: 6 hours of POLS.

POLS 3372. Contemporary Political Theory. 3 Hours.

Students examine political, moral, and legal ideas from the 20th century to the present. They analyze the connection between moral theories such as utilitarianism, deontology, and pluralism and political/legal theories concerning justice, human rights, and the rule of law. Students also differentiate between historical, theoretical, and normative discourses.

Prerequisite: 6 hours of Political Science.

POLS 3373. Ideologies and Democracy. 3 Hours.

Students investigate the meaning of the term 'ideology' and the various ideologies that have informed political life in the modern world. Students examine liberalism, conservatism, socialism, communism, feminism, environmentalism, and radical Islam. Students study democracy in its various modern conceptions along with the question: Is democracy an ideology?

Prerequisite: 6 hours in POLS.

POLS 3374. Quantitative Methods for Political Science. 3 Hours.

Students study research design and the quantitative methods used in contemporary political science research. Students apply the tools of social science inquiry in a series of projects designed to examine phenomena such as political attitudes and behavior. The course emphasizes descriptive statistics, tabular and graphic presentation of data, measures of association and correlations, and multivariate analysis in political research.

Prerequisite: POLS major, 6 hours POLS, and permission of the department.

POLS 3375. Politics of The Middle East. 3 Hours.

Students examine contemporary patterns of government and politics in the Middle East. The course encompasses most of the countries of the Middle East, including Egypt, Israel, Lebanon, Jordan, Saudi Arabia, the Gulf States, Iraq, Iran, and Turkey. North Africa may also be included. Students study the historical legacies and continuing impact of colonialism and nationalism, political Islam and secularism, challenges of authority, and legitimacy. Students also explore the ways in which the Israeli-Palestinian conflict and regime change in the region impact U.S. foreign policy and the region more broadly.

Prerequisite: 6 hours of POLS.

POLS 3377. Survey of Political Theory. 3 Hours.

Students examine the political ideas, philosophers, and relevant historical events in Western Europe over the past two thousand years. Students study the representative political writings from the time of Plato to Nietzsche, addressing political values and ideas in their original historical context as well as independently of any particular historical or cultural limitations.

Prerequisite: 6 hours of POLS.

POLS 3378. American Political Thought. 3 Hours.

Students study American political ideas and movements from colonial times to the present.

Prerequisite: 6 hours of POLS.

POLS 3379. Research and Writing in Political Science. 3 Hours.

Students gain knowledge of basic research methods and design in the social sciences, with particular attention to survey research. Students develop research and writing skills including how to locate, evaluate, and cite electronic and printed sources; how to conduct a literature review; how to write proposals, reports, and research papers; and how to edit proposals, reports, and papers.

Prerequisite: POLS major, 6 hours POLS, and permission of the department.

POLS 3380. Introduction to International Relations. 3 Hours.

Students examine the relations between nation-states in the international system and the factors influencing their behavior. Topics may include the changing nature of the international system; the political and economic sources of tension, war and diplomacy; international law and organization; and the bases of power.

Prerequisite: 6 hours of POLS.

POLS 3381. American Foreign Policy. 3 Hours.

Students examine the domestic and international forces which influence the development of American foreign policy. The course emphasizes the post-World War II era and may include discussion of U.S. foreign policy at the settlement of World War II, the politics and crises of the Cold War, and America's role in the post-Cold War world order. Course Equivalents: POLS 2381

Prerequisite: 6 hours of POLS.

POLS 3385. International Law and Organizations. 3 Hours.

Students examine the role of international organizations and law. Topics may include the evolution of the United Nations (UN) and its precursors, UN structure and governance, the UN's role in international peace and security, emerging human rights law, laws governing war, and issues related to economic development and the global environment.

Prerequisite: 6 hours of POLS.

POLS 3386. International Political Economy. 3 Hours.

Students examine the interplay between states and markets and the interaction of the world economy and international politics. Students study the nature of political economy, the major ideologies and approaches, and specific topics that may include the political ramifications of international trade, investment, debt and financial markets and the impact of globalization on the human condition and the environment.

Prerequisite: 6 hours of POLS.

POLS 3387. Latin American Politics. 3 Hours. [TCCN: GOVT 2311]

Students examine contemporary patterns of government and politics in Latin America with emphasis on institutions, processes, behavior. Students study the historical, social, and economic background factors affecting the region, along with major issues of U.S.-Latin American relations. For selected nations, topics may include problems of democracy, authoritarianism, and political development.

Prerequisite: 6 hours of POLS.

POLS 3391. Government Organization and Management. 3 Hours.

Students compare governmental organizations within society and analyze their impacts upon practices of administration in public agencies. Students explore the management tools available to governmental agencies and their capabilities and limitations.

Prerequisite: 6 hours of POLS.

POLS 3392. Economic Policy. 3 Hours.

Students examine the roles of modern government in the economy and society, including regulating and promoting business activity.

Prerequisite: 6 hours of POLS.

POLS 3393. Social Policy. 3 Hours.

Students examine of the roles, actions, and problems of modern governments in dealing with social issues such as education, health, housing, transportation, and welfare services.

Prerequisite: 6 hours of POLS.

POLS 3395. Environmental Policy. 3 Hours.

Students examine major environmental issues and policies affecting the United States and the rest of the world. Topics may include clean air and water, endangered species, invasive alien species, public land management, ecosystem management, the conservation of biodiversity, nuclear power, waste disposal and energy production and use.

Prerequisite: 6 hours of POLS.

POLS 4081. Problems in Political Science. 1-3 Hours.

Students examine a single special topic which cuts across the usual subfields of political science. Topics may include political socialization, ethnic politics, crises in political systems, research techniques, and other subjects. Students may repeat this course when the topic varies. They may earn between 1 and 3 hours credit. Variable Credit (1-3). Course Equivalents: POLS 4381

Prerequisite: 6 hours of POLS.

POLS 4094. Political Science Internship. 1-6 Hours.

Students gain professional field experience through department-approved internships in public sector organizations. Students work under the supervision of an on-site coordinator and a political science faculty member. They may earn up to 6 hours of internship credit. Variable Credit (1 to 6).

Prerequisite: 6 hours of POLS and the permission of the department.

POLS 4095. Independent Studies. 1-3 Hours.

Advanced students in Political Science, who are capable of independent study, engage in advanced readings and directed research. Registration is upon the approval of the Chair of the Department of Political Science and the instructor directing the course. This course may be taken for Academic Distinction Credit. Variable Credit (1-3). Course Equivalents: POLS 4395

Prerequisite: 6 hours of Political Science and departmental permission.

POLS 4334. Constitutional Law I: Civil Rights and Liberties. 3 Hours.

Students study the opinions of the U.S. Supreme Court and examine the development of rights and liberties through the Court's interpretation of the Bill of Rights.

Prerequisite: 6 hours of POLS.

POLS 4335. Constitutional Law II: Gov Powers & State-Federal Relations. 3 Hours.

Students study the opinions of the U.S. Supreme Court and examine the development of government powers at the state and federal level through the Court's interpretation of the Constitution.

Prerequisite: 6 hours of POLS.

POLS 4372. Political Attitudes & Behavior. 3 Hours.

Students examine political attitudes and behavior by exploring the sources of political knowledge; how political attitudes are formed and changed; how public opinion is measured; and why people vote the way they do.

Prerequisite: 6 hours of POLS.

POLS 4383. International Human Rights. 3 Hours.

Students examine the theory and practical meaning of human rights. Issues covered may include the definition of human rights; the relationship between civil and political rights and economic, social and cultural rights; the meaning and impact of humanitarian and international human rights law; the impact of cultural relativism in the definition and assessment of the promotion and protection of human rights; the significance of different religious perspectives; the question of the legitimacy of humanitarian interventions; and the effects of globalization on human rights perceptions and practices.

Prerequisite: 6 hours of POLS.

POLS 4384. Conflict Studies. 3 Hours.

Students examine the causes of international conflict and the path to international peace. Topics may include changes in the nature of war, theories of the onset of interstate war, and the various methods of achieving peace.

Prerequisite: 6 hours of POLS.

POLS 4385. Political Violence & Terrorism. 3 Hours.

Students examine political violence that occurs within states, including violence perpetrated by the state against its own citizens and violence that accompanies anti-government movements. Students study cases and theories of political violence, as well as methods of their resolution. Specific topics may include state repression, domestic and transnational terrorism, guerilla warfare, civil wars, and revolution.

Prerequisite: 6 hours of POLS.

Psychology (PSYC)

PSYC 1301. Introduction To Psychology. 3 Hours. [TCCN: PSYC 2301]

(SH Prior Course ID: PSY 131); This course is designed to be a broad survey of the field of psychology covering such topics as learning, perception, personality, development, psychopathology, etc. It covers both the theoretical basis and the empirical content of these areas.

PSYC 2315. Psychology Of Adjustment. 3 Hours. [TCCN: PSYC 2315]

(SH Prior Course ID: PSY 289); A study is made of the dynamics of human behavior applying psychological theory to the development of the wholesome well-adjusted personality. Techniques for managing stress, reducing anxiety, coping with anger, increasing assertiveness, and achieving self-control are considered.

PSYC 3331. Abnormal Psychology. 3 Hours. [TCCN: PSYC 2320]

(SH Prior Course ID: PSY 331); This course includes an introduction to behavioral disorders. Biological and social factors in the development, diagnosis, and treatment of psychopathology are studied. .

Prerequisite: 3 semester hours of Psychology.

PSYC 3332. History Of Psychology. 3 Hours.

(SH Prior Course ID: PSY 332); This course includes an historical survey of the scientific and philosophic antecedents of modern psychology. .

Prerequisite: 3 semester hours of Psychology.

PSYC 3333. Physiological Psychology. 3 Hours.

This course is designed to acquaint the student with the biological substrates of behavior. A study is made of the genetic, neuroanatomical, neurochemical and neurophysiological mechanisms of such psychological processes as sensation, movement, learning, memory, motivation and emotion. This course is offered primarily for psychology majors and minors but may serve as an elective for majors in biology, chemistry, and public health. Cannot be taken concurrently. .

Prerequisite: 3 hours in Psychology or 4 hours in Biology.

PSYC 3334. Human Sexuality. 3 Hours.

(SH Prior Course ID: PSY 334); A study is made of the biological, social, emotional, cognitive, and spiritual elements of our human sexuality. Topics such as sexual health, sexual dysfunction, sexuality education, and intimate relationships are covered.

PSYC 3336. Sensation/Perception. 3 Hours.

(SH Prior Course ID: PSY 336); A study is made of the sensory processes, the relationship between physical stimuli and sensory/perceptual experience, and perceptual phenomena. Topics such as pain, constancies, illusions, and psychophysics are covered.

PSYC 3337. Cognition. 3 Hours.

(SH Prior Course ID: PSY 337); This course is intended to provide a broad survey of the field of cognitive psychology covering such topics as attention, memory, forgetting, consciousness, and organization/structure. It covers both the theoretical basis and empirical content of the area.

PSYC 3365. Close Relationships. 3 Hours.

(SH Prior Course ID: PSY 365); This course examines the processes of close relationships, employing psychological theory and research. Topics include the nature of intimacy, attraction, communication, interdependency, love, jealousy, conflict, and loneliness.

PSYC 3374. Development Psychology. 3 Hours.

A study is made of the physical, mental, emotional, and social growth and development of the person across the entire life span.

PSYC 3375. Psychopathology and Family Dynamics. 3 Hours.

(Prior SH course id: PSY 375); This course examines the interactions of psychopathology and family dynamics. Topics include parenting, chronic physical illness, mood and anxiety disorders, physical and sexual abuse, and chemical dependence.

Prerequisite: Junior standing and either PSYC 3331, FACS 3369, SOCI 3331, or COMS 4386.

PSYC 3381. Social Psychology. 3 Hours. [TCCN: PSYC 2319]

(SH Prior Course ID: PSY 381); This course examines individual human behavior as it is influenced by cultural and social stimuli. Topics studied include interpersonal attraction, aggression, prejudice and sexism, conformity, altruism, and group behavior.

PSYC 3382. Comparative Psychology. 3 Hours.

This course deals with physical and behavioral differences in animals and how these differences can be adaptive. Specific topics include habitat selection, territoriality, predator and anti-predator behavior, reproductive behavior, and social behavior.

Prerequisite: PSYC 2302 and PSYC 3301.

PSYC 3383. Psychology And The Law. 3 Hours.

(SH Prior Course ID: PSY 383); This course is designed to examine the application of scientific and professional principles of psychology in the legal system, the use of social science methods to study the legal system, and the impact of law on the practice of psychology. Content areas include legal competencies, the insanity defense, jury consultation, psychologists and the death penalty, the accuracy of eyewitness testimony, prediction of violence, the psychology of victims, family law, and ethical dilemmas. .

Prerequisite: 6 hours of PSYC and Sophomore standing.

PSYC 3385. Health Psychology. 3 Hours.

(SH Prior Course ID: PSY 385); This course examines how biological, psychological, and social factors interact and contribute to health promotion, illness prevention, coping with stress, pain, or other acute or chronic diseases, and recovery from and adjustment to serious health problems. .

Prerequisite: 6 hours of PSYC.

PSYC 3391. Psychopharmacology. 3 Hours.

(SH Prior Course ID: PSY 391); This course includes a study of the field of behavioral pharmacology: the systematic study of the effects of drugs on behavior and the way in which behavioral principles can help in understanding how drugs work. The course focuses on the neurophysiological mechanisms of action of various psychoactive drugs. Cannot be taken concurrently.

Prerequisite: 3 hours of PSYC or 4 hours of BIOL.

PSYC 3401. Research Methods. 4 Hours.

This course is designed to introduce the student to the scientific method in general and research methodology in psychology in particular through laboratory and field experiments. Laboratory period required.

PSYC 3402. Psychological Statistics. 4 Hours.

This course is a study of statistics as applied to problems in psychology and education, to include frequency functions, correlation and regression, and statistical tests of significance. Lecture and lab component. Course Equivalents: PSYC 3101, PSYC 3301 .

PSYC 4075. Problems. 1-3 Hours.

(SH Prior Course ID: PSY 475); Designed for advanced students in psychology who are capable of independent study. Variable Credit (1-3). Course Equivalents: PSYC 4375

Prerequisite: Approval of Program Coordinator and the instructor directing the study.

PSYC 4331. Personality. 3 Hours.

(SH Prior Course ID: PSY 431); A study is made of the major theories of personality; the biological and social factors in the development and functioning of personality are considered.

Prerequisite: 6 semester hours of Psychology.

PSYC 4332. Learning. 3 Hours.

(SH Prior Course ID: PSY 432); This course includes a study of the major theories of learning and their historical backgrounds; experimental procedures in the study of learning are discussed.

Prerequisite: 6 semester hours of Psychology.

PSYC 4333. Seminar In Psychology. 3 Hours.

(SH Prior Course ID: PSY 433); This course includes discussions of selected topics in psychology.

PSYC 4334. Applied Social Psychology. 3 Hours.

(SH Prior Course ID: PSY 434); This course examines the use of social psychological theory and method to explain and solve real world problems. Topics include physical and mental health, the environment, law, consumerism, and processes of conflict and social influence.

Prerequisite: PSYC 3381.

PSYC 4374. Psychology of the Elderly. 3 Hours.

This course examines the field of developmental psychology of the elderly addressing such topics as learning, perception, personality, development, mental health issues, etc. It addresses both the theoretical basis and the empirical content of these areas.

Prerequisite: PSYC 1301.

PSYC 4391. Divorce: Psychological Impact. 3 Hours.

(SH Prior Course ID: PSY 491); A comprehensive investigation is made of psychological, legal, moral, religious, and cultural variables related to cause, process, and adjustment to divorce is made. Emphasis is placed on the impact of divorce on the individual.

Prerequisite: Consent of instructor.

PSYC 4392. Industrial/Organizational Psychology. 3 Hours.

(SH Prior Course ID: PSY 492); This course provides an integration of psychological principles as applied to industrial/organizational milieu. The focus is on the application of research methodology, psychological assessment, personality, and organizational theories to the work environment. Specifically, research related to the application of psychological theory related to personnel, work environment, organizational, and pertinent legal issues will be considered.

Prerequisite: PSYC 1301 or PSYC 2315.

Reading (READ)

READ 0101. Reading Enrichment. 1 Hour.

This course will build strategies and skills necessary to read and think critically at the college level. This course will be paired with a credit-bearing course which has been determined to include intensive reading. Credit in this course does not count towards graduation and computation of grade point averages and classification of students by hours completed. Co-requisite: Intensive Reading Course.

READ 1301. Strategies for College Reading and Thinking. 3 Hours.

Students will learn and practice strategies and skills necessary to read and think critically at the college level. Course focus is on reading in all academic disciplines, especially those with heavy reading content. Two hour class and one hour computerized tutorial.

READ 2305. Literacy Process of Culturally & Linguistically Diverse Pops. 3 Hours.

The fundamental concepts, principles, and conflicts of second language learning and teaching. Effective instructional approaches for students of diverse cultural and linguistic backgrounds are learned and applied. The use of multiethnic literature in the classroom is a special focus of this course.

READ 2306. Literacy as a Foundation for Learning. 3 Hours.

Students examine their personal literacy development and their philosophical assumptions underlying literacy instruction in order to build a basis for the theories and practices provided in the advanced reading courses.

READ 3315. Teaching Multiple Literacies. 3 Hours.

In this course, candidates focus on the teaching of multiple literacies across content areas in both traditional and digital formats in grades EC-6. Students apply content specific literacy skills and strategies designed to enhance children's reading, writing, listening, speaking, viewing, and thinking.

READ 3370. The Teaching Of Reading. 3 Hours.

The fundamental concepts and principles of reading instruction and focus on the developmental stages of reading. Word attack, comprehension, study strategies and other aspects of a balanced literacy program are learned and applied. Concurrent enrollment in TESL 3101 is required for EC6 students. Field experiences in PK-12 public schools required. Advance departmental approval and BESL 3301 required. Admission to educator preparation program required.

Prerequisite: Must be taken concurrently with READ 3371 and READ 3372.

READ 3371. Literacy Assessment and Instruction. 3 Hours.

Students will administer and interpret varied assessment tools as well as select and implement appropriate instructional techniques to plan and conduct effective classroom literacy instruction. Field experiences in PK-12 public schools required. Must be taken concurrently with READ 3370 and READ 3372. Concurrent enrollment in TESL 3101 is required for EC6 students. Advance departmental approval and BESL 3301 required. Admission to educator preparation program required.

Prerequisite: Field experiences in PK-12 public schools required.

READ 3372. The Teaching Of Language Arts. 3 Hours.

Focus on the developmental stages of writing and the interrelated language processes of listening, speaking and reading and writing. Pre-service teachers will explore theories and instructional practices in the elementary school language arts program. Concurrent enrollment in TESL 3101 is required for EC6 students. Field experiences in PK-12 public schools required. Advance departmental approval and BESL 3301 required. Admission to educator preparation program required.

Prerequisite: Must be taken concurrently with READ 3370 and READ 3371.

READ 3373. Content Area Reading in the Middle Grades. 3 Hours.

This course focuses on using reading and writing as tools for learning in all academic areas, i.e. math, science, social studies, in grades 4-8.

Prerequisite: Junior or senior classification and grade of C or better in SPED 2301; Admission to Educator Prep Prg (TCHR)

READ 3374. Vocabulary and Word Study in the Middle Grades. 3 Hours.

Students will explore phonemic awareness, decoding skills, and vocabulary. Specifically included in the study are phonic generalizations, structural analysis, word derivations and etymology, and strategies for technical and other specialized vocabularies. Concurrent enrollment in READ 3373.

Admission to Educator Prep Prg (TCHR)

Prerequisite: Junior or senior classification and grade of C or better in SPED 2301.

READ 3380. Emergent & Beginning Literacy. 3 Hours.

Language and cognitive development, listening, speaking, reading, and writing theories and instructional practices with children from birth to grade 3.

READ 3383. Reading Methods and Assessment - Elementary. 3 Hours.

In this course, candidates focus on fundamental concepts and principles of reading instruction and assessment. Students study and apply word attack skills, comprehension strategies, and other aspects of a balanced literacy program. Twenty hours of field experience is required as part of this course. Co-requisite: READ 3384. Admission to Educator Prep Prg (TCHR)

Prerequisite: READ 3380 or READ 3315.

READ 3384. Language Arts Methods and Assessment - Elementary. 3 Hours.

In this course, candidates learn the fundamental concepts and principles of language arts instruction and assessment are emphasized. The focus of this course is on the developmental stages and interrelated language processes of reading, writing, listening, speaking, viewing, and thinking. Twenty hours of field experience is required as part of this course. Co-requisite: READ 3383. Admission to Educator Prep Prg (TCHR)

Prerequisite: READ 3380 or READ 3315.

READ 3388. Reading Methods and Assessment - Middle Level. 3 Hours.

In this course, candidates learn the fundamental concepts and principles of reading instruction and assessment in the middle grades 4-8. Students study and apply word attack skills, comprehension strategies, and other aspects of a balanced literacy program. Twenty hours of field experience is required as part of this course. Co-requisite: READ 3389.

Prerequisite: READ 3373 and READ 3374.

READ 3389. Language Arts and Assessment - Middle Level. 3 Hours.

In this course, candidates learn the fundamental concepts and principles of language arts instruction and assessment in grades 4-8 are emphasized. The focus of this course is on the developmental levels and interrelated language processes of reading, writing, listening, speaking, viewing, and thinking. Twenty hours of field experience in a 4-8 language arts classroom are included in this course. Co-requisite: READ 3388.

Prerequisite: READ 3373 and 3374.

READ 4088. Special Topics in Reading. 3 Hours.**READ 4089. Independent Study in Reading. 1-3 Hours.**

Designed for students interested in extending conceptual knowledge in literacy issues. This course addresses special topics and independent study related to methodologies, curriculum, assessment, and language processes. Advance Departmental Approval Required. Course Equivalents: READ 4315 .

READ 4215. Multidisciplinary Literacies. 2 Hours.

This course emphasizes analysis, synthesis, and evaluation for the teaching of multidisciplinary literacies in grades EC-6. Preservice teachers apply content specific literacy skills and strategies designed to enhance students' reading, writing, listening, speaking, and thinking. A variety of materials is used to develop the process of teaching inquiry and research.

Prerequisite: READ 3370, 3371, 3372.

READ 4310. Reading and Language Arts in the Middle Grades. 3 Hours.

This course focuses on the uniqueness of middle grade students, middle school structures and explore literacy theories and activities that meet these needs and structures.

Prerequisite: Junior or senior classification.

READ 4311. Critical Inquiry & Thinking in Middle Grades. 3 Hours.

Students learn to apply the processes and pedagogy of critical inquiry and critical thinking theories and applications appropriate for children in grades 4-8. Attention is given to advanced literacy instruction embedded within the content areas of social studies and English language arts and reading.

Prerequisite: Admission to Educator Preparation Program, READ 3373 and READ 3374.

READ 4320. Content Area Reading & Writing. 3 Hours.

Students will learn to determine pupils' needs and abilities in content area reading and writing through the use of assessment instruments and will plan instructional strategies appropriate to their needs within specific secondary teaching fields. Field experiences in PK-12 public schools required.

Prerequisite: Junior or senior classification.

READ 4325. Integration of Multiliteracies. 3 Hours.

This course is a culminating companion course for student teaching in the middle grades. In this course, candidates learn the application of theory in content area pedagogy appropriate for grades 4-8 is explored through field experiences. Attention is given to the development of successful middle school students through advanced literacy instruction embedded within content-area classes, such as mathematics, science, social studies, and English.

Prerequisite: Admission to student teaching.

READ 4326. Critical Literacy & Genre-based Strategies in Middle Grades. 3 Hours.

Students apply the processes and pedagogy of critical literacy theories as appropriate for children in grades 4-8. Attention is given to advanced literacy instruction in English language arts and reading through genre-based strategy instruction.

Prerequisite: Admission to Educator Preparation Program, READ 3388 and READ 3389.

READ 4378. Multiple Literacies in Secondary Education. 3 Hours.

In this course, candidates learn to integrate content-specific literacy skills into their teaching. Course Equivalents: CISE 4378

Prerequisite: CISE 3384.

Real Estate (REAL)

REAL 3310. Real Estate Principles. 3 Hours.

Students explore an introduction to the nature of real estate, its value, and related decision analysis. Students are tasked with performing real estate appraisal, investment analysis, applying location theory, calculating financing, researching legal characteristics, and charting the process of development activities.

REAL 3365. Real Estate Law. 3 Hours.

Students examine the legal aspects of real estate, including the legal principles and legal instruments used in real estate transactions. Course Equivalents: BUAD 3365

Prerequisite: 42 credit hours.

REAL 4350. Real Estate Debt. 3 Hours.

Students apply concepts, techniques, and instruments integral to the financing of real estate. Students perform the application of discounted cash flow, net present value, internal rate of return, and amortization fundamentals to real estate analysis. Mortgage debt structures and calculations involving loan origination costs, servicing fees, and prepayment penalties are explored.

REAL 4351. Real Estate Equity. 3 Hours.

Students perform calculations related to real estate investment analysis. Students use a framework for making real estate investment decisions based on key financial returns/metrics and risk assessment. Students focus on mastering cash flow and proforma forecasting to inform real estate investment decisions involving acquisitions, development, and dispositions.

REAL 4352. Real Estate Market and Development Feasibility Analysis. 3 Hours.

Students examine the component parts of the real estate development process from idea inception; through project site selection, design, regulatory framework, market analysis, and financial feasibility analysis.

Safety Management (ETSM)

ETSM 2310. Introduction to Occupational Safety. 3 Hours.

Students study safety and health issues and practices at work. Topics may include how and why accidents happen, what the total costs of accidents are, and how to use the risk management approach to achieve safety. Students are introduced to the concepts of reactive versus proactive practices and their role in creating sustainable businesses that protect both people and the environment. Safety-related governmental standards and various careers in safety are also examined.

ETSM 2396. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new safety management topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010.

ETSM 3323. Construction Safety. 3 Hours.

Students learn to manage the safety and compliance responsibilities of construction projects. Students examine the most current Occupational Safety and Health Administration (OSHA) standards for construction and essential safety topics beyond general standards, such as accident-causation theories and ethics of construction safety.

Prerequisite: Junior standing or Instructor approval.

ETSM 3363. Safety Program Management. 3 Hours.

This course presents an in-depth examination of the concepts, methods, and techniques involved in safety program management. Emphasis will be placed on the development of safety management programs for the industrial and construction industries. The strengths and weaknesses of existing safety programs, performance management techniques, behavior-based safety, design safety, legal aspects of safety and health management, and emerging trends in safety and health management will be covered. Course Equivalents: ETSM 4363, ITEC 4363

Prerequisite: Junior standing.

ETSM 3371. Systems Safety & Risk Assessment. 3 Hours.

Students examine concepts, methods, and techniques involved in safety risk management. Emphasis is placed on the development of safety programs for the industrial and construction industries. Topics may include an overview of risk management processes, attributes, and disciplines; identification tools; analysis and evaluation; communication; risk analysis approach; and assessment framework.

Prerequisite: Junior Standing and MATH 3379 and ETEC 1010 and MATH 1314 or MATH 1410 or MATH 1420.

ETSM 3372. Occupational Safety Standards. 3 Hours.

Students examine the Occupational Safety and Health Act (OSHA), its rules, and the legal duty to comply with them. Topics may include record keeping, employers' and employees' rights, hazard communication, inspection and investigation, and criminal enforcement of violations. Contesting citations, judicial review of enforcement actions, and ethics in safety at the workplace may also be reviewed.

Prerequisite: ETEC 1010 and ETSM 3386 or ETSM 2310.

ETSM 3380. Accident Investigation & Analysis. 3 Hours.

Students explore aspects of safety analysis needed for accident investigation. Activities include examining theory of accident investigation; gathering, analyzing, and reporting data; and developing safety recommendations and corrective actions to prevent future accidents. Students apply analytical techniques of accident investigation to understand the strengths and limitations of these techniques.

Prerequisite: ETSM 3371 or MATH 3379.

ETSM 3386. Industrial Safety. 3 Hours.

This course is a study of the problems involved in developing an integrated safety program for an industrial or commercial establishment. It involves safety education, safe worker practices, recognition and elimination of health hazards, machinery guards, in-plant traffic, material handling and emergency treatment for industrial accidents. Course Equivalents: ETSM 4382, ITEC 4382

Prerequisite: ETEC 1010 and Junior standing.

ETSM 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of safety management skills and practices. To include internships, individual research and industry studies. Variable Credit (1-6).

Prerequisite: Sophomore standing.

ETSM 4313. Industrial Hygiene. 3 Hours.

Students explore the field of industrial hygiene, including the chemical, physical, and biological agents that affect the health and safety of employees. Students learn procedures for measuring and controlling various agents, threshold limit values for these agents, and concepts regarding occupational health toxicology.

Prerequisite: CHEM 1411 and MATH 1410 or MATH 1314 or MATH 1324 or consent of instructor.

ETSM 4335. Human Factors & Ergonomics. 3 Hours.

Students learn the foundations of human-centric engineering to design products, processes, and systems to optimize human well-being and overall system performance. Students apply principles of anthropometrics, the musculoskeletal system, biomechanics, psychophysics, work physiology, and engineering safety to common problems faced by safety professionals in work and systems design. Emphasis is on design and analysis of occupational systems and consumer products.

Prerequisite: MATH 1314 or MATH 1316 and Junior standing.

ETSM 4345. Industrial Fire Safety. 3 Hours.

Students learn to incorporate fire hazard awareness and protection into safety management plans. Topics may include fire prevention methods, extinguishment, detection, hazards, fire behavior, fire causes, types of building materials, structural features, flame spread, room/building occupancy, fire load, and inspection techniques.

Prerequisite: CHEM 1411 and PHYS 1301.

ETSM 4369. Special Topic. 3 Hours.

This course of faculty-led study is designed to provide exposure of undergraduate students to new safety management topics and concepts in a course setting. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: ETEC 1010 and Junior Standing.

ETSM 4375. Safety Hazard Mitigation. 3 Hours.

Students learn concepts, methods, and techniques involved in creating industrial and manufacturing facilities more resilient to the impacts of hazards. The students are provided with the tools to develop safety programs emergency managers can use to reduce the impact of different types of hazards. Emphasis is placed on mitigation, preparedness, resilience, measurement, and vulnerability. Topics may include risk management and communication, practical approaches, and assessment frameworks.

Prerequisite: ETSM 3371.

ETSM 4377. Environmental Safety Management. 3 Hours.

Students examine the principles of effective environmental safety management systems. Laws and regulations that protect our environment and human health are studied. Topics may include hazard communication (HAZCOM) and hazardous waste operations (HAZWOPER). Students may also examine the roles of the Occupational Safety and Health Administration (OSHA), the U.S. Department of Transportation (DOT), and the Environmental Protection Agency (EPA).

Prerequisite: ETSM 3372.

ETSM 4379. Emergency Management & Planning. 3 Hours.

Students learn a hands-on approach to emergency management and contingency planning in different work environments. Emphasis will be placed on key partnerships among all levels of government as well as those among the public and private industrial sectors. The topics may include physical and chemical hazards and biohazards, personal training, holistic planning, medical surveillance, personal protective clothing and equipment, hazard and risk reduction strategies, decontamination, related scientific data and information management.

Prerequisite: ETSM 3371.

Saxophone (SAXO)

SAXO 1101. Secondary Performances-Saxophone. 1 Hour.

Students study techniques and musicality related to saxophone in weekly individualized private instruction. Students admitted as a Saxophone primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

SAXO 1201. Individual Performances-Saxophone. 2 Hours.

The course consists of individualized private instruction on the saxophone. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

SAXO 3201. Individual Performances-Saxophone. 2 Hours.

The course consists of advanced individualized private instruction on the saxophone. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

SAXO 3202. Applied Saxophone with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the saxophone. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Supply Chain Management (SCMG) Secondary Education (CISE)

CISE 3383. Planning Instruction With Technology Integration. 3 Hours.

This course is designed to provide teachers who seek certification at the secondary level (grades 7-12) with an introductory overview of the teacher education program, with an introduction into instructional issues and teaching models, and with an introduction into how technology impacts education both in terms of increasing teacher productivity and in terms of integrating technology into instruction.

Prerequisite: Junior status.

CISE 3384. The Teaching Profession. 3 Hours.

This course is for those seeking 7-12 certification and is an introduction to the concept of teaching as a professional career that makes a difference in the lives of children, youth, and their families. The course will introduce students to lesson planning, writing clear learning objectives, instructional strategies, formative and summative assessment methods, classroom management, professional ethics, and the use of technology as an instructional tool.

Prerequisite: 32 Hours.

CISE 4088. Special Topics in Secondary Education. 3 Hours.

This course will examine special topics in the field of Secondary Education. Variable Credit (1-3.)

CISE 4089. Independent Study in Secondary Education. 1-3 Hours.

This course is designed to permit individual students to study specific areas of interest and need. Course Equivalents: CISE 4375

Prerequisite: Departmental approval.

CISE 4364. Methods of Teaching in Secondary Schools. 3 Hours.

This course focuses on developing strategies that are effective in secondary schools. Candidates use the TEKS to develop objectives and plan effective instruction. Extensive field experience required. Co-requisite: CISE 4379 Admission to Methods.

Prerequisite: CISE 4380 and READ 4378.

CISE 4374. Human Growth and Learning. 3 Hours.

This course examines growth and learning primarily in secondary environments. Major theories of teaching-learning processes are studied. Human development related to education is emphasized. Special attention is paid to diversity in the public school environment. Required field experience in 8-12 public schools. This course is taken as part of the Secondary Methods Block for 7-12 certification. Course Equivalents: CISE 3374

Prerequisite: Admission to Educator Preparation Program and Departmental Approval.

CISE 4376. Developing a Professional Teacher Portfolio. 3 Hours.

The purpose of this course is to provide the prospective secondary teacher the opportunity to organize artifacts on the development, exploration, integration, application, and teaching of content knowledge, pedagogical knowledge and skill development in the development of a professional teacher portfolio.

Prerequisite: Concurrent enrollment in student teaching and departmental approval.

CISE 4377. Assessment of Student Learning In Secondary Grades. 3 Hours.

This course is designed to provide the prospective secondary teacher the opportunity to construct and use teacher made tests and performance assessments that support the alignment process. Students will study various facets and strategies relating to assessment. Co-requisite: CISE 4364 Admission to Educator Prep Prg (TCHR).

Prerequisite: READ 4378.

CISE 4379. Differentiated Pedagogy. 3 Hours.

In this course, teacher candidates focus on differentiation of curriculum and pedagogy that addresses student differences in order to promote academic rigor for all learners. Co-requisite CISE 4364; Admission to Educator Prep Prg (TCHR)

Prerequisite: CISE 3384 and READ 4378.

CISE 4380. Responsibilities of the Professional Educator. 3 Hours.

This course is designed to assist future teachers in understanding the structure, organization, and management of public schools at the national, state, and local levels. Course content will include a study of the needs of the special learner and students from various cultures.

Prerequisite: 3384.

CISE 4394. Creating an Environment For Learning-Secondary Education. 3 Hours.

(The Companion Course for Secondary and All-Level Student Teaching) This course provides a survey of classroom management and discipline approaches appropriate in a public school setting. Candidates will explore multiple components that produce a well managed classroom. Candidates will create a classroom management plan that will be a functional model for their classrooms. ; Admission to Educator Preparation Program.

Prerequisite: CISE 3384.

CISE 4396. Student Teaching - Secondary Classroom. 3 Hours.

The student is assigned to teach in secondary classrooms (grades 8-12) for a placement totally approximately twelve to fourteen weeks. This time is divided among observation, participation, teaching and conference activities in two classrooms that span the certification grades. This course corresponds to one of those placements. As an example, a student will have one placement in a lower grade such as 7th grade and the second placement in a higher level such as high school.

Prerequisite: Senior status and admission to student teaching.

CISE 4397. Student Teaching - Secondary Classroom. 3 Hours.

The student is assigned to teach in secondary classrooms (grades 8-12) for a placement totally approximately twelve to fourteen weeks. This time is divided among observation, participation, teaching and conference activities in two classrooms that span the certification grades. This course corresponds to one of those placements.

Prerequisite: Senior status and admission to student teaching.

Security Studies (SCST)

SCST 2363. Introduction to Homeland Security. 3 Hours.

This introductory course is designed to familiarize students with the field of security studies. Topics include Surveys, threats, and challenges from terrorist attacks, to pandemics to climate change.

SCST 2364. Homeland Security Research Methods. 3 Hours.

Students gain knowledge about research design and methodology. Students develop the ability to analyze and critically evaluate data, ideas, arguments, and policy. Students also hone critical thinking skills and enhance their ability to be effective consumers of data.

SCST 2365. Introduction to Emergency Management. 3 Hours.

Students study the evolution of emergency management in the United States from early community-based response practices to the current robust national system focused on risk analysis, communications, risk prevention and mitigation, and social and economic recovery. Students examine benchmark policies, regulations, and directives that form the basis of the emergency management field. Students engage in case study research and gain exposure to current and emerging trends in emergency management domestically and internationally.

SCST 2366. Introduction to Cybersecurity. 3 Hours.

Students examine the problem of cybersecurity from a homeland security perspective. Students explore the diversity of threats and security measures in cyberspace from a non-technical perspective and with a focus on laws, strategies, and policies. Security issues, from crime to espionage to cyberwar, will be considered on both the micro and macro-level.

SCST 2368. Transportation Security. 3 Hours.

Students examine a wide range of facets that comprise the field of transportation security. As part of this course students assess the capabilities and vulnerabilities of the transportation network as well as explore the agencies and governance issues impacting transportation security. Students gain an understanding of the various transportation systems (road, rail, maritime, and aviation). Students also explore the layers of security and understanding the role of government and the private sector in securing the transportation system.

SCST 3380. Law and Ethics in Homeland Security. 3 Hours.

Students examine key legal and ethical challenges facing the homeland security enterprise. Constitutional questions relating to the separation of powers at the federal level, questions of federalism, the balance between security and civil liberties, and the impact of technology (drones, cameras, facial recognition, etc.) on homeland security law and ethics are also analyzed.

SCST 3381. Climate and Security. 3 Hours.

Students explore national security and homeland security challenges associated with global climate change. Students critically examine the role of governments, the media, the scientific community, and other institutions in the conceptualization and mitigation of the multiple consequences of climate-based risks. Topics covered include the impact of mass urbanization, water conflicts, and the effects of climate change. Students also explore the impact of climate change on water security, emerging diseases, and natural disasters.

SCST 3383. Energy Security. 3 Hours.

Students study the architecture of the energy sector, one of the Department of Homeland Security's sixteen designated critical infrastructure sectors. Students examine the main energy sector nodes and their interdependencies with other sectors, evaluate insider and outsider threats and hazards, and apply proper risk assessment models to reduce the energy sector's vulnerability. Students become acquainted with alternative energy sources, renewable technologies, and best management practices of energy resources for a sustainable future. Credits 3.

SCST 3384. Water Security. 3 Hours.

Students explore water as a national security and homeland security issue. Topics covered include: mass migrations and civil wars caused by climate change and droughts, floods, extreme weather events, transboundary water issues, water's interdependencies with other critical infrastructure sectors, water governance systems including criminal governance in ungoverned spaces, centralized state and local non-governmental organization (NGO) network governance systems, sustainable water development, and the security implications of an aging water infrastructure. Credits 3.

SCST 3385. Bioterrorism and Biowarfare Preparedness and Response. 3 Hours.

Students investigate the threat posed to the United States by bioterrorism. Issues include analysis of top pathogens of concern, principles of disease weaponization, and dual-use technology, and other bioterrorism related topics.

SCST 3386. Health Access and Homeland Security. 3 Hours.

Students examine the connection between health access and US homeland security. Topics include how physical and financial barriers to health access reduce overall health security and pandemic preparedness, the impacts of state and federal-level healthcare policy on American health security, and the relationship between healthcare infrastructure preparedness and resilience to pandemic response.

SCST 3393. Public Health in Homeland Security. 3 Hours.

Students explore those aspects of the public health discipline and profession that fall under the homeland security umbrella. Students examine the nature of communicable diseases and pandemics, the role of syndromic surveillance, quarantine laws and policies, and the role of international, federal, state, and local agencies in coping with pandemics. Students also explore cases of major pandemics and the lessons learned from these events and their respective outcomes.

SCST 3394. Global Terrorism & Homeland Security. 3 Hours.

This course provides an overview of the threat of terrorism as it relates to U.S. homeland security. Using a multi-dimensional approach that draws from international relations, law, and police strategies, the course emphasizes research and analysis. Students also examine international strategies aimed at reducing terrorist incidents.

Prerequisite: SCST 2363 recommended.

SCST 4076. Independent Studies in Security Studies. 1-3 Hours.

This course is designed to give students flexibility to pursue study of a topic under the supervision of a faculty member where the topic will be studied more deeply than in a traditional course or where there are no available courses on the topic. Variable Credit (1-3).

Prerequisite: Approval of the Department Chair and the instructor directing the readings.

SCST 4301. Chemical and Energy Sector Resilience. 3 Hours.

This course will focus on specific operational issues pertaining to the chemical and energy critical infrastructure sectors, including specific vulnerabilities and unique features and stakeholders that have an impact on maintaining resilient systems and the maintenance of continuity of operations. The course will provide security professionals in the chemical and energy sectors, and those planning careers in these areas, with the tools to understand threats, conduct assessments, engage in planning and manage crises.

SCST 4302. Healthcare Sector Resilience. 3 Hours.

This course focuses on specific operational issues pertaining to the healthcare critical infrastructure sector, including specific vulnerabilities and unique features and stakeholders that have an impact on maintaining resilient healthcare systems that can provide an appropriate level of care for patients. The course provides security professionals in the healthcare sector, and those planning careers in this area, with the tools to understand threats, conduct assessments, engage in planning and manage crises.

SCST 4303. Transportation Sector Resilience. 3 Hours.

Students will explore operational issues pertaining to the transportation critical infrastructure sector. This includes identifying specific vulnerabilities and unique features and stakeholders that have an impact on maintaining resilient transportation networks and continuity of operations. Students will learn the tools to understand threats, conduct assessments, engage in planning and manage crises to develop careers as security professionals in the transportation sector.

SCST 4304. Global Health Security. 3 Hours.

Students analyze the challenges of infectious disease control globally, as well as key elements of global health security. Topics include types of diseases and disease threats, disease transmission, social and economic consequences of disease, and the homeland security implications of pandemics.

SCST 4305. Binational Health Challenges. 3 Hours.

Students examine critical binational health challenges with an emphasis on the United States-Mexico border. Issues include analysis of binational disease surveillance and prevention programs, balancing state sovereignty with disease prevention, and binational health collaborations between the United States and Mexico.

SCST 4362. United States Security Post 9/11. 3 Hours.

This course provides an overview of the evolution of issues, processes, and policies related to U.S. security and safety that evolved after the cold war era. Specifically, the course will address the spectrum of security threats and safety hazards that have emerged post 9/11 and that continue to emerge, such as Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE), pandemic, environmental, and cybersecurity as well as the policies and processes instituted to address them. Credit 3.

SCST 4363. Homeland Security Intelligence. 3 Hours.

This course examines the development of U.S. intelligence studies and explores the role of intelligence in supporting the formulation of homeland security policies. It positions intelligence within specific homeland security missions of Protect, Respond, and Recover, and among actors who support the Homeland Security Enterprise (HSE) under those missions. It exposes learners to complex government-private sector policies, plans, partnerships, processes, procedures, systems, and technologies for intelligence gathering as well as information sharing.

Prerequisite: Junior Standing.

SCST 4364. Homeland Security and Emergency Management. 3 Hours.

This course familiarizes students with processes, agencies, and individuals involved in the national preparedness and response to high consequence events. Students examine homeland security strategies, emergency and disaster management principles, and human, physical, and operational resilience concepts. Students are exposed to approaches to collaboration, communication, and coordination when planning for, mitigating against, responding to, and recovering from the complex safety and security problems of the twenty-first century (e.g., extreme weather, environmental incidents, health pandemics, terrorism).

Prerequisite: Junior Standing.

SCST 4365. Border Security. 3 Hours.

This course covers security issues related to U.S. air, land, subterranean, and maritime borders. The course covers an interdisciplinary range of topics including immigration, drug trafficking, contraband smuggling (tariff evasion), potential for terror plots involving the border, the political realities of border fence construction, state surveillance in the border region, concepts of borderlands, civil liberties, and issues related to the border. The course introduces students to the various agencies that cooperate to provide border security and to the foreign relations issues that arise around nation-state borders.

Prerequisite: Junior Standing.

SCST 4366. Drug Policy and Security. 3 Hours.

This course examines the problem of illegal drugs from a security perspective. Because drug profits have been identified as a major funding source of violent criminal actors and terrorist networks, students in this course explore the vertical integration of the drug trade and examine its relationship to homeland security.

Prerequisite: Junior Standing.

SCST 4367. Critical Infrastructure Security. 3 Hours.

Globalization has made society increasingly reliant on technology for every facet of human endeavors. As a result of the reliance on interdependent technology society has become more vulnerable to major disruptions. This course familiarizes students with the concept of Critical Infrastructure (CI), the risks it faces, and how to protect against them. Students explore opportunities associated with infrastructure-related public-private partnerships, information sharing, risk analysis and prioritization, risk mitigation, performance metrics, program management, incident management, and investing for the future.

Prerequisite: Junior Standing.

SCST 4368. Technology and Homeland Security. 3 Hours.

Students explore the impact of a range of technologies on homeland security decision-making. Students analyze technologies designed to provide greater security (such as CCTV - closed circuit television - and facial recognition technologies and sensors, security technologies, and computer networks). Students also examine technologically-based threats including artificial intelligence, 3D and 4D printing, nanotechnology, and synthetic biology.

SCST 4370. Intelligence Analysis. 3 Hours.

Students explore intelligence analysis and apply structured analytic techniques to eliminate cognitive biases in their writing and analysis. Topics covered include: post-mortem analysis, devil's advocacy, target-centric and network analysis, visualization techniques, avoiding politicization of intelligence, Delphi method, and Red Hat analysis. Students will apply these techniques to the analyses of real world national and homeland security case studies both individually and collaboratively.

Prerequisite: SCST 4363 Homeland Security Intelligence.

SCST 4373. Homeland Defense and Civil Support. 3 Hours.

Students examine the role of the U.S. military in homeland security and homeland defense. Students gain knowledge of the role of the federal military and National Guard forces in countering terrorism as well as particular consideration of the Coast Guard, North American Aerospace Command and U.S. Northern Command in defense support to civil authorities and in the provision of homeland defense.

SCST 4376. Security Studies Internship. 3 Hours.

Students are placed in an approved homeland security or emergency management setting to apply academic learning in practical situations. See the College's Internship Coordinator for details about this program.

Prerequisite: Department approval.

SCST 4377. Special Topics in Security Studies. 3 Hours.

This course offers students the opportunities for structured coursework on emergent issues or other topics for which courses do not exist in the course catalog.

SCST 4379. Comparative Homeland Security. 3 Hours.

Students explore homeland security strategies and policies pursued by other countries. Students study other countries' experiences in coping with homeland security-related issues (such as counterterrorism, public health, and emergency management). Students also gain an understanding of the framework, approaches, restrictions, and powers under which other countries operate, as well as an understanding of the international dimension of homeland security threats.

SCST 4386. Interagency and Public Communications in HS. 3 Hours.

Students explore the role of strategic communications in homeland security with a focus on crisis communications. Students will study theories of crises, principles of crisis communications, reputation management, ethical considerations, and other topics. Students will analyze the successes and failures of various crisis communication strategies in the context of case studies of selected disasters.

SCST 4387. Strategic Planning for Homeland Sec. 3 Hours.

Students examine characteristics of strategic planning within the Homeland Security enterprise in order to understand planning challenges and opportunities within it. Students will learn how to engage in environmental scanning evaluate and measure Homeland Security plans and programs, and gain experience in Homeland Security policy planning.

Sociology (SOCI)

SOCI 1301. Introduction to Sociology. 3 Hours. [TCCN: SOCI 1301]

Students are introduced to the discipline with a focus on the concepts and principles used in the study of group life, social institutions and social processes. This course is a prerequisite to many other courses taught in the department.

SOCI 2319. Introduction To Ethnic Studies. 3 Hours. [TCCN: SOCI 2319]

Students investigate the field and problems of ethnic studies from an interdisciplinary perspective. Major considerations of the entire Ethnic Studies field will be defined and analyzed, including the topics of prejudice and discrimination. Students are strongly urged to take this course before attempting other ethnic studies courses. Course Equivalents: SOCI 2320 .

SOCI 2320. Introduction to Ethnic Studies-Honors. 3 Hours.

HONORS COURSE Students investigate the field and problems of Ethnic Studies from an interdisciplinary perspective. Major considerations of the entire Ethnic Studies field will be defined and analyzed, including the topics of prejudice and discrimination. Students are strongly urged to take this course before attempting other Ethnic Studies courses. Course Equivalents: SOCI 3219 .

SOCI 2366. Sociology Of Sport. 3 Hours.

Students apply the social science mode of inquiry to study the sociocultural characteristics of sport. Topics may include the examination of the cultural, economic, political and structural factors (i.e., gender, race, etc.), which form salient aspects of today's sport activities at various levels. Focus is placed on the characteristics of sports and how these characteristics both reflect and have impact upon the social climate of a given society.

SOCI 2399. Writing in Sociology. 3 Hours.

Students learn the writing skills needed for advanced courses in Sociology. Topics may include: the structure and style in writing; citations and American Sociological Association stylebook; how to conduct library and internet research as a basis for research writing; and specialized techniques for quantitative research papers, qualitative research papers, book reviews, compare and contrast papers and essay exams.

Prerequisite: SOCI 1301.

SOCI 3305. Introduction to Community Leadership. 3 Hours.

Students learn the definitions, types, and theories of community. Topics may include how to conduct basic community needs assessment, strengthen communication skills, and explore resource mobilization strategies through applied community experiences. Community leaders facilitate conversations about leadership techniques and challenges. Course Equivalents: SOCI 2350 .

SOCI 3324. Social Inequality. 3 Hours.

Students learn the three primary resources of social inequality: class, status and power. Topics may include the way birth-ascribed statuses such as age, sex and race interact with class, status and power stratification systems. Special attention is also given to the popular and scientific explanations of inequality, especially with respect to the high and low ends of the distribution of income and wealth.

SOCI 3325. Gender And Inequality. 3 Hours.

Students learn about the influence of gender on socialization and placement in class, status and power stratification systems. Topics may include the analysis of institutional discrimination against women in major social institutions such as religion, education, family, health care and work, and an examination of the feminization of poverty.

Prerequisite: SOCI 1301 or SOCI 2319 .

SOCI 3327. Sociology of Popular Culture. 3 Hours.

Students engage in a critical analysis of popular culture in its cross-cultural and historical perspectives with the main focus on the role and character of popular culture in American society. Topic may include the different forms and aspects of popular culture in their dynamic relation to the cultural "mainstream", to everyday life of Americans, and to the core values of American society.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3335. Food and Society. 3 Hours.

Students examine food from a sociological perspective. Topics may include the production, distribution, and consumption of food in today's globalized society.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3341. Marriage And The Family. 3 Hours. [TCCN: SOCI 2301]

Students engage in a sociological examination of marriage and family life. Topics may include the problems of courtship, mate selection, and marriage adjustment in modern American society.

SOCI 3344. Sociology of Education. 3 Hours.

Students examine the relationship between the educational system and society. Topics may include education and inequality, the relationship between education and different social institutions, educational experiences and the life course, and schooling experiences. Credits 3.

SOCI 3345. Social Statistics. 3 Hours.

Students examine the basic concepts, techniques and data necessary for an adequate understanding of social structure and change. Topics may include observational, experimental, sample survey, and demographic analysis. Course Equivalents: SOCI 3443

Prerequisite: SOCI 1301.

SOCI 3354. Sociology of the Life Course. 3 Hours.

Students examine the sociological dimensions of aging. Topics may include the various sociological theories and methods used in the study of aging, discrimination against the young and the old, the relationship between life-cycle changes and changes in placement in class and status, and the impact of population aging on retirement patterns, income security, health care, and long-term care.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3355. Racial and Ethnic Inequality. 3 Hours.

Students examine racial and ethnic stratification in its various dimensions. Topics may include the placement in the class, status and power stratification systems on the basis of birth ascribed and socially defined race/ethnicity, and the ideologies which serve to rationalize these inequalities. Other topics may address the study of institutional discrimination and racial/ethnic stratification in major social institutions such as education, health care, religion and work.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3365. Sociology Of Health & Illness. 3 Hours.

Students investigate the processes by which persons assume, act, and relinquish the sick role. Topics may include the interrelationships between patient and family, doctors, and hospital; the quality and quantity of health services distributed by class and race; and the problems posed by mental illness, such as diagnosis, treatment, and involuntary commitment.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3370. Research Methods in Sociology. 3 Hours.

Students learn the logic and character of scientific and alternative means of social inquiry. Topics may include the function of observation, concept formation, proposition arrangement and testing of theory as components of the scientific process in sociology. Course Equivalents: SOCI 4340

Prerequisite: SOCI 1301.

SOCI 3371. Qualitative Methods. 3 Hours.

Students examine the principles and practices of qualitative research. Topics include qualitative techniques of design, data collection and organization, analyses, and interpretation. Students gain experience conducting and assessing qualitative research on social issues.

Prerequisite: SOCI 1301 or SOCI 2319; and SOCI 2399.

SOCI 3372. Demographic Techniques. 3 Hours.

Students examine demography concepts like population composition and change, mortality, fertility, migration, population distribution, population policy, and the relationship between population and environment. Students develop and apply the techniques of demographic analysis including data management, analysis, and visualization including the development of population pyramids, population projections and life tables.

Prerequisite: SOCI 1301 or SOCI 2319; and SOCI 2399.

SOCI 3373. Social Program Evaluation. 3 Hours.

Students will evaluate social programs in a variety of agencies, institutions, and settings. Students gain an overview of the field of program evaluation and will be exposed to hands-on experience through practical case study. Specific topics may include core knowledge, theories, and approaches to program evaluation. Students will also learn technical skills related to conducting program evaluation.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3376. Rural And Urban Sociology. 3 Hours.

Students examines the human community in its ecological, cultural, and associational aspects. Topics may include the folk, rural, and urban community considered from the standpoint of various sociological perspectives. Special attention is given to social change, including decision-making as it affects local life.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3377. Community Planning and Development. 3 Hours.

Students examine the practice of community planning and development from a variety of theoretical and methodological perspectives. Topics may include sociological theories used to examine communities, approaches used by federal and state agency personnel, municipal leaders, community, and economic practitioners to facilitate community planning and development, and the social, political and economic forces shaping communities. Students gain experience using community development frameworks and tools.

Prerequisite: SOCI 1301 or SOCI 2319; and SOCI 2399.

SOCI 3381. Cultural Anthropology. 3 Hours.

Students investigate the cultural and social organization of preliterate societies. Topics may include marriage, property, religion, magic, and tribal control.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3383. Sociology of Latin America. 3 Hours.

Students apply sociological concepts in order to analyze contemporary social issues in the context of Latin America. Topics may include social inequality, political repression, borderlands, socio-environmental struggles, indigenous politics, and social movements in Latin America.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3384. Economy And Society. 3 Hours.

Students investigate the relationship between economy and society. Topics may include employment opportunities for college graduates; blue collar, white collar, and professional lifestyles; origins of industrial society and effects on social stratification, minorities, and the family. Students may learn about workers' control of industry, relationships between industry and government, the sociology of labor relations and personnel management.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 3392. Social Movements. 3 Hours.

Students examines the characteristics of social movements useful to the sociological study and interpretations of major social trends involving both social and cultural change in community and society. The theoretical frameworks for understanding the causes, types, and theories of social change in contemporary society are given special attention.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 4075. Readings in Sociology. 1-3 Hours.

Advanced students engage in independent study on a special topic approved by the chair of the department and the instructor directing the course. Variable Credit (1-3). Course Equivalents: SOCI 4375 .

SOCI 4330. Sociology of Immigration. 3 Hours.

Students develop an in-depth understanding of the theoretical tools that sociologists use for studying international migration. Topics may include the sociohistorical context of modern-day migration and the institutional forces that drive it; the social and political processes by which legality and illegality are constructed; and the consequences for immigrants and communities. Consideration is also given as to how inequalities based on race, class, and gender shape immigrants' experiences and ability to integrate into their receiving communities and the implications of these processes for social change.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 4334. Sociology Of Disaster. 3 Hours.

Students investigate how culture, inequality, and social structure and processes shape how people face disasters, how they respond and the ways in which they recover or fail to do so. Topics may include how disasters may lead to rapid social change and the foundations of sociology of disaster theory.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 4337. Environment And Society. 3 Hours.

Students examine the environment as a social and cultural issue. Topics may include an overview of the field of environmental sociology, traditional sociological perspectives on environmental issues, paradigmatic implications of environmental sociology, the development of environmental movement, the rise of environmental deterioration, public attitudes toward environmental issues, national environmental policies, and social impact assessment.

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 4338. Social Gerontology. 3 Hours.

Students examine the current controversies in the field of Social Gerontology. Topics may include the various sociological theories and methods employed in the study of social gerontology, along with the biological and physiological changes related to aging. This course also explores the trends in the discipline of social gerontology, the impact of population aging on retirement patterns, income security, health care, long term care, and the politics of aging. Credit 3

Prerequisite: SOCI 1301 or SOCI 2319.

SOCI 4339. Development & Sustainability. 3 Hours.

Students examine development, globalization, and sustainability. Topics may include the form, objectives and ramifications of development and globalization, socio-economic relations between countries, and the effects of development and globalization on people, communities, and the environment. Course Equivalents: SOCI 3336

Prerequisite: SOCI 1301 or SOCI 2319 and Junior Standing.

SOCI 4344. Sociological Theory. 3 Hours.

Students engage in a historical survey of the development of sociological thought. Emphasis is placed upon the growth of Sociology as a discipline, major areas of interest and major contributors.

Prerequisite: SOCI 1301.

SOCI 4379. Internship In Applied Sociology. 3 Hours.

Students engage in an in-depth exploration of sociological issues in an applied setting. Students are required to complete a minimum of 120 hours in an approved host organization, plus complete appropriate academic requirements. Internships are unpaid. Internships are unpaid. Fall and Spring only.

Prerequisite: Junior or senior Sociology majors, minimum GPA 3.0 or through special petition.

SOCI 4399. Senior Seminar In Sociology. 3 Hours.

Students engage in a capstone project which addresses special areas or issues in Sociology. Topics may include the career needs of Sociology majors and/or prospective teachers of Sociology.

Prerequisite: Advanced standing in Sociology and SOCI 1301 and SOCI 2399.

Spanish (SPAN)

SPAN 1411. Elementary Spanish I. 4 Hours. [TCCN: SPAN 1411]

Students who have had no previous instruction in Spanish develop Spanish pronunciation, vocabulary, and basic language codes stressing an oral approach to the language with special emphasis on conversation and oral drill. A weekly one-hour language laboratory period is required. Competent speakers of Spanish or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in Spanish. Native Spanish speakers should take the CLEP for placement. Grade of C or better required in SPAN 1411 in order to continue to SPAN 1412. Native Spanish speakers should take the CLEP or register for SPAN 2312.

Prerequisite: For non-native speakers of Spanish.

SPAN 1412. Elementary Spanish II. 4 Hours. [TCCN: SPAN 1412]

This course is a continuation of SPAN 1411. Students discuss and drill language codes with more complexity. Stress is placed on listening and speaking skills. A weekly one-hour language laboratory period is required. Competent speakers of Spanish or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in Spanish. For non-native speakers of Spanish. Native Spanish speakers should take the CLEP for placement.

Prerequisite: Grade of C or better in SPAN 1411 or equivalent.

SPAN 2311. Intermediate Spanish I. 3 Hours. [TCCN: SPAN 2311]

Students use materials of medium difficulty as a basis for reading, listening comprehension, and oral communication. Competent speakers of Spanish or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411 and SPAN 1412 or equivalent.

SPAN 2312. Intermediate Spanish II. 3 Hours. [TCCN: SPAN 2312]

Continuation of SPAN 2311. Students focus on practical needs for communication. Competent speakers of Spanish or those with considerable knowledge of the language should take the CLEP prior to registering. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, and SPAN 2311 or equivalent.

SPAN 2350. Spanish for Heritage Speakers. 3 Hours.

Designed for students with a Spanish language and/or cultural background, the course builds on existing Spanish language skills to develop literacy through intensive formal and academic reading and writing which emphasizes the Latinx experience in the U.S. and throughout the Spanish-speaking world. Topics include spelling, verb tenses, registers, and transfers from English. This course is taught predominantly in Spanish.

Prerequisite: Permission of Department Chair.

SPAN 3330. Principles of Health Care Interpretation. 3 Hours.

Students apply linguistic and cultural knowledge to accurately interpret Spanish and English oral communication. Students learn essential skills and demonstrate professional standards for effective interpreting in health care settings. This course is taught predominantly in Spanish.

Prerequisite: Permission of Department Chair.

SPAN 3340. Principles of Health Care Translation. 3 Hours.

Students apply linguistic and cultural knowledge to translate Spanish and English written communication products that are common in a variety of health care settings. Students develop reading and writing techniques for accurate and appropriate written translations. This course is taught predominantly in Spanish.

Prerequisite: Permission of Department Chair.

SPAN 3361. Spanish Grammar & Composition. 3 Hours.

Students study the grammatical characteristics of the Spanish language with emphasis on developing the ability to write in Spanish. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3362. Survey Of Spanish Literature I. 3 Hours.

Students study the development of the literature of Spain from the Middle Ages to the 18th century. Topics include various eras, genres, and authors. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, SPAN 2312 or equivalent.

SPAN 3363. Survey of Spanish Literature II. 3 Hours.

Students examine the literature of Spain beginning with the eighteenth century to the present. Selections from drama, poetry, and narrative will be read, discussed in Spanish, and analyzed in written reports. Instruction is in Spanish.

Prerequisite: SPAN 1411, SPAN 1412, SPAN 2311, SPAN 2312 with a grade of C or higher.

SPAN 3367. Principles Of Spanish Linguistics. 3 Hours.

Students study descriptive, applied, and contrastive linguistics. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3368. Conversational Spanish I. 3 Hours.

Students focus on extemporaneous speaking and conversation. Topics may include reading materials from Spanish speaking countries as a basis for conversation and composition. Competent speakers of Spanish or those with considerable knowledge of the language should seek instructor permission to take the course. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3369. Conversational Spanish II. 3 Hours.

Students focus on extemporaneous speaking and conversation. Topics may include reading materials from Spanish speaking countries as a basis for conversation and composition. Competent speakers of Spanish or those with considerable knowledge of the language should seek instructor permission to take the course. Instruction is in Spanish. Offered only during Study Abroad or Study Away programs.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3374. Introduction to Literatures of Spanish America. 3 Hours.

Students study the texts of Spanish-American writers from the European colonization of the Americas to the present with emphasis given to the historical, cultural, and political factors which influenced their writing. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3375. Genres in Spanish American Literature. 3 Hours.

Students study themes and techniques of outstanding Spanish-American poets, dramatists or novelists. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3380. Spanish Culture & Civilization. 3 Hours.

Students overview the culture and civilization of Spain. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3381. Spanish Literature for Children. 3 Hours.

Students discuss ways to teach Spanish and Spanish-American literature for children, its rhetorical and narrative characteristics, its development, and its symbolism in relation to the needs of the child and the culture. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 3385. Spanish American Culture and Civilization. 3 Hours.

Students study the culture and civilization of the Spanish-speaking areas of the Americas. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4051. Applied Health Care Interpretation and Translation. 1-3 Hours.

Students practice hands-on interpretation and translation to prepare for certification exams. Students test their knowledge of standards of practice and ethics, regulations, and other discipline-specific information. Students prepare a plan for certification and future professional development. This course is taught predominantly in Spanish. The course may be repeated for credit as content varies. Variable Credit (1 to 3).

Prerequisite: SPAN 3330 and SPAN 3340, or equivalent.

SPAN 4075. Individual Readings in Spanish. 1-6 Hours.

Individual students take this course if they need to study a particular era, genre, or author. Enrollment in this course is restricted and must be granted by department chair. The course may be repeated for credit as content varies. Variable Credit (1 to 6). Course Equivalents: SPAN 4375

Prerequisite: Consent of instructor and department chair.

SPAN 4361. Advanced Spanish Grammar. 3 Hours.

Students conduct an in-depth study of the usage of the Spanish language as it relates to creative writing and scholarly reports. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4362. History of Spanish Language. 3 Hours.

Students outline the history of the Spanish language over the last two millennia, focusing on the formal development of its phonology, morphology, syntax, and semantics. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, SPAN 2312 and SPAN 3367 or equivalent.

SPAN 4364. Spanish American Prose. 3 Hours.

Students study selected authors, short stories, essays, or novels. Emphasis on themes, techniques, and current literary themes. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4365. Pablo Picasso & Spanish Art. 3 Hours.

Students examine the interplay between Spanish culture and Spanish art using Pablo Picasso as a central unifying figure in order to relate past, present, and future aspects of Spanish heritage. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4366. Spanish Phonetics. 3 Hours.

Students discuss the scientific study of the sounds of Spanish. The two essential goals of the course are to discuss the ways in which English and Spanish sounds differ, and to help improve pronunciation of the Spanish language. This course is intended for student with advanced Standing in Spanish. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, SPAN 2312 and SPAN 3367 or equivalent.

SPAN 4370. Seminar in Selected Topics Literacy, Language, and Civilization. 3 Hours.

Students conduct an in-depth study of a selected topic. The topic to be explored will change from year to year. This course may be repeated for credit as the content varies. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4371. Spanish for Criminal Justice. 3 Hours.

Students study Spanish and Spanish-related issues and topics for Criminal Justice, criminology, law enforcement, and Sociology. Instruction is in Spanish. Course Equivalents: SPAN 3371

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4372. Spanish for Business. 3 Hours.

Students study business terminology in Spanish related to banking, accounting, international trade, marketing, management, and finance and of cultural aspects of Latin America and Spain, with practice in speaking, reading, and translating business Spanish. Instruction is in Spanish. Course Equivalents: SPAN 3370

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent.

SPAN 4373. Spanish for Mass Communication. 3 Hours.

Students examine the Spanish language as it relates to radio, television, newspaper, and other media sources in the context of Hispanic culture. Students survey the history of journalistic genres in Spain, Latin America, and the United States. Students build language proficiency using a contextualized, content-based approach. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, SPAN 2312, and SPAN 3361 or equivalent.

SPAN 4374. Spanish for Health Professions. 3 Hours.

Students develop Spanish-language ability for professionals in the health care industry. The close relationship between language and culture will also foster the heightened awareness of ethnic, gender, and multicultural consciousness. Instruction is in Spanish.

Prerequisite: Grade of C or better in SPAN 1411, SPAN 1412, SPAN 2311, and SPAN 2312 or equivalent, or instructor's approval.

Special Education (SPED)

SPED 2301. Introduction to Exceptionality. 3 Hours.

Issues and trends in special education are examined. An overview of the characteristics of persons with disabilities is also presented. This course consists of essential issues and theories relating to special education. Special emphasis is placed upon multi-cultural and legal issues in the field of special education.

SPED 3301. Learning and Instruction for Children with Disabilities. 3 Hours.

This course provides pre-service teachers with instructional strategies for working with students who are at risk or identified with a disability. Pre-service teachers will demonstrate their knowledge of best practices by analyzing and critiquing various texts (including multimedia) and creating appropriate learning tasks for students at risk or with disabilities. The course will also provide opportunities for pre-service teachers to generate modifications or accommodations to curriculum and instruction to meet the individual needs of learners.

SPED 3302. Emotional/Behavioral Disorders. 3 Hours.

This course provides a study of the defining characteristics, systems of assessment and classification, theories of causality, and interventions for students with Emotional and Behavioral Disorders.

Prerequisite: Sophomore, junior or senior classification and SPED 2301.

SPED 3303. Supporting Social Success. 3 Hours.

This course addresses a variety of instructional techniques that can be utilized to change, maintain, increase, or decrease individual and group behaviors. Proactive behavioral intervention techniques from a variety of theoretical models are examined. Behavioral change strategies emphasize functional assessment principles, positive behavioral supports, and self-management. The basic principles, tools, and techniques of communicating with parents of children with disabilities and implementing parent education programs also are addressed.

Prerequisite: SPED 2301.

SPED 3304. Study of Learning and Learning Disabilities. 3 Hours.

Learning disabilities are examined with a focus on history, definition, causation, teaching methods and inclusive practices. Emphasis is placed on the appropriate selection of assessment and teaching strategies, lesson planning, and use of technology for students with special needs.

Prerequisite: SPED 2301.

SPED 3305. Assessment Practices in Special Education. 3 Hours.

An overview of formal and informal assessment for special education is provided. This course includes basic concepts of measurement, assessment of academic achievement, screening tools, diagnostic testing, review of individual and group intelligence tests, perceptual skills, sensory acuity and adaptive behavior.

Prerequisite: SPED 2301.

SPED 3306. Behavioral Principles. 3 Hours.

This course examines basic behavioral principles including reinforcement, punishment, stimulus control, and measurement of behavior. Specific procedures are presented for establishing new behavior, increasing desirable behavior, and decreasing undesirable behavior for individuals with disabilities. Ethical considerations also are addressed.

SPED 3307. Behavioral Assessment, Intervention, and Evaluation. 3 Hours.

This course provides the interventionist with the techniques for designing, implementing, and evaluating behavioral interventions appropriate for individuals with Autism and related disabilities. Ethics of behavioral interventions will also be discussed.

Prerequisite: SPED 3306.

SPED 3308. Behavioral Intervention and Research Methods. 3 Hours.

All of the elements of single-subject research design are examined, providing practical information for assessing, designing, implementing, and evaluating behavior analytic techniques and curriculum for educating children with autism and related disorders. Ethics for practicing Behavior Analysts will also be examined.

Prerequisite: SPED 3306.

SPED 3309. Ethics in Behavior Analysis. 3 Hours.

Students are introduced to ethics, standards and guidelines in the area of applied behavior analysis. Ethical standards and guidelines of professional organizations are presented along with an analysis of how they affect service delivery. Students are provided with an overview of various strategies for personnel supervision and management.

Prerequisite: SPED 3306.

SPED 3310. Advanced Behavior Analysis. 3 Hours.

Students are introduced to the advanced study of human behavior from a behavior-analytic perspective. Emphasis is placed on theory, knowledge of current issues, and techniques for evaluating and teaching verbal behavior to individuals with autism or related disorders. Prerequisite:

Prerequisite: SPED 3306, 3307, 3308.

SPED 3312. Family and Diversity Issues in Special Education. 3 Hours.

In this course, candidates learn about variations in family structure and the functions that contribute to diversity issues in special education. Students analyze and discuss various perspectives related to challenges and strengths of families of students with exceptionalities.

Prerequisite: SPED 2301.

SPED 4088. Special Topics in Special Education. 3 Hours.**SPED 4089. Independent Study in Special Education. 1-3 Hours.**

Designed to permit individual students to study specific areas of interest and need. Course Equivalents: SPED 4303

Prerequisite: Approval of Department Chair.

SPED 4301. Study of Cognitive and Low Incidence Disabilities. 3 Hours.

This course includes a study of the characteristics and needs of students with intellectual disabilities. Topics include appropriate curriculum methods and instructional needs for all ages, life span issues, vocational, and transition issues. Twenty (20) hours of field placement required. This course must be taken concurrently with SPED 4302.

Prerequisite: SPED 2301, SPED 3302, SPED 3303 and SPED 3304.

SPED 4302. Collaborative Partners Across Lifespans. 3 Hours.

This course is designed to equip the prospective teacher with the collaborative skills needed in inclusive school and community environments. Areas that are emphasized include adaptations for instruction, transition planning, vocational/career education, and assistive technology. Twenty (20) hours of field placement required. This course must be taken concurrently with SPED 4301.

Prerequisite: SPED 2301, SPED 3302, SPED 3303 and SPED 3304.

SPED 4304. Transition Planning in Special Education. 3 Hours.

In this course, students examine the intersection between ethics, collaboration, and transition planning for students with exceptionalities. Special emphasis is placed on creating a transition plan for adolescents with exceptionalities as they move from school to post-school activities. Fifteen hours of field experience in settings that serve individuals with severe and profound disabilities is required as part of this course.

Prerequisite: 60 hours of course credit and SPED 2301, SPED 3303, SPED 3312, and SPED 4314.

SPED 4305. Student Teaching in Special Education. 3 Hours.

(SH Prior Course ID: SPD 484); The candidate is assigned a student teaching placement in a special education classroom for a period of 7 weeks. This time is divided among classroom assistance, instructional planning, classroom and individual instruction, and conference activities. The candidate will create a Teacher Work Sample during this placement, a project demonstrating master of the components of effective instruction and student learning. Successful completion of the Teacher Work Sample is required for program completion.

Prerequisite: Senior status and admission to student teaching.

SPED 4311. Content Learning in Special Education. 3 Hours.

In this course, candidates focus on learning characteristics and teaching methods in academic content areas for students with exceptionalities. Emphasis is placed on the selection and implementation of assessment, instructional strategies, lesson planning, and inclusive practices for students with high incidence disabilities. Fifteen hours of field experience is required as part of this course.

Prerequisite: 60 hours of course credit and SPED 2301, SPED 3303, SPED 3312, and SPED 4314.

SPED 4314. Literacy-Students with Exceptionalities. 3 Hours.

Candidates focus on methods of assessment and instruction related to teaching multiliteracies to students with exceptionalities. Students in this course gain competency in using formative assessments to identify students with severe and persistent literacy difficulties, and gain expertise in and knowledge of teaching approaches and curricula for improving childrens' literacy. Ten hours of field experience is required as part of this course.

Prerequisite: SPED 2301.

Sport Management (SPMT)

SPMT 3301. Professional Development in Sports. 3 Hours.

Students engage in an applied study of professional career development in the sport industry. Students will prepare for their chosen careers within the sport industry by developing decision-making strategies, interviewing skills, networking opportunities, and effective leadership behaviors.

Prerequisite: 45 hours.

SPMT 3302. Introduction to Sport Marketing. 3 Hours.

Students acquire a fundamental understanding of the marketing of sport events, products, and services to professional, collegiate, and community sport consumers. Planning and organization of appropriate marketing strategies to meet sport consumers' needs are addressed. Elementary electronic and social media marketing methods and their role in sport organization marketing strategy development are also discussed.

Prerequisite: 45 hours.

SPMT 4300. Leadership in Sport Management. 3 Hours.

Students examine leadership theory and its application to the sport industry. Students will study leadership theory and practice within the context of administering athletic departments or programs, directing sport-related businesses, and managing community sport environments. Students employ the tools necessary to handle the challenges and complexities of leadership, including data-informed problem solving, creating and implementing a shared vision, and responsive strategic thinking.

Prerequisite: 75 hours.

SPMT 4302. Principles of Sport Finance. 3 Hours.

Students analyze the financial tools that sport managers employ within the sport industry. Financial planning and forecast processing with sport organizations will be explored. Strategy development will also be examined within the context of both traditional and innovative financial methods that examine dynamic financial structure changes in the sport industry.

Prerequisite: 75 hours.

SPMT 4303. Principles of Sport Analytics. 3 Hours.

Students are introduced to the role of data analytics and its application within the sport industry. Students collect, sort, assess, and analyze data for the purposes of improving decision-making, increasing productivity, and maximizing profits.

Prerequisite: 75 hours.

Statistics (STAT)

STAT 3379. Statistical Methods in Practice. 3 Hours.

Students study organization and presentation of data; measures of central tendency, dispersion, and position; probability distributions for discrete and continuous random variables, sampling techniques, parameter estimation, and hypothesis testing. Emphasis is given to the use of statistical packages. Also offered as MATH 3379. Course Equivalents: MATH 3379

Prerequisite: Three (3) semester hours of college mathematics.

STAT 3380. Statistical Design and Analysis of Experiments. 3 Hours.

Students study sampling designs and hypothesis testing in analysis of variance, analysis of covariance, and regression analysis. Design characteristics, model diagnostics, and hypothesis testing are emphasized and work is required on real data. The MINITAB and SAS statistics packages are applied. Normally offered in the Spring semester.

Prerequisite: STAT 3379 or MATH 3379.

STAT 3381. Sample Survey Methods. 3 Hours.

Students study the principles needed in planning and conducting sample surveys. Topics may include random, stratified, systematic, and cluster sampling methods as well as sub sampling techniques.

Prerequisite: STAT 3379 or MATH 3379.

STAT 3382. Introduction to Statistical Computing. 3 Hours.

Students examine introductory topics in statistical computing and learn to use various software products related to statistical computing, such as the SAS, SPSS, and R statistical packages. Students also write code to perform calculations.

Prerequisite: STAT 3379.

STAT 3385. Statistical Methods for Data Science. 3 Hours.

Students examine data science methods, techniques, and applications. Topics include data cleansing and manipulation, visualization, and summarization. Additionally, students will explore programming and computing software such as Python and R.

Prerequisite: MATH/STAT 3379.

STAT 3390. Probability and Statistics for Sciences. 3 Hours.

Students study the fundamentals of probability, random variables and their probability distributions, and expected values. Topics include Student t-, F-, and Chi-Square distributions, the confidence interval; hypothesis testing; regression analysis, and ANOVA.

Prerequisite: MATH 1420.

STAT 4090. Independent Study. 1-3 Hours.

This course is designed for advanced students to engage in independent study of an area of interest in statistics under the close guidance of a faculty mentor. **Prerequisite:** Consent of instructor. Variable credit (1 to 3).

Prerequisite: Consent of instructor.

STAT 4370. Special Topics in Statistics. 3 Hours.

This course is designed to accommodate independent study and research with content determined by mutual agreement of student and supervisor. However, it may also be taught as a special organized class when there is sufficient student interest in a particular project. Such topics as survival analysis, modeling and analysis, categorical data analysis, biostatistics, Monte-Carlo techniques, and bootstrapping may be included. This course may be taken for Academic Distinction credit. (See Academic Distinction Program in this catalog.) May be repeated for credit.

Prerequisite: MATH 3379 or STAT 3379, and consent of instructor.

STAT 4371. Theory and Applications of Probability and Statistics I. 3 Hours.

Students explore basic concepts and properties of probability, random variables, statistical distributions, measures of central tendency, variance, covariance, correlation, functions of random variables, sampling distributions, and the Central Limit Theorem. Also offered as MATH 4371. Normally offered in the Fall semester. Course Equivalents: MATH 4371

Prerequisite: MATH 1430.

STAT 4372. Theory and Applications of Probability and Statistics II. 3 Hours.

Topics include multivariate, conditional and marginal distributions, point and interval estimation, theory of estimation, maximum likelihood estimates, hypothesis testing, likelihood ratio tests, contingency analysis, and nonparametric statistics. Also offered as MATH 4372. Normally offered in the Spring.

Prerequisite: STAT 4371.

STAT 4373. Nonparametric Statistics. 3 Hours.

Students study chi-square goodness-of-fit testing and inferences concerning location and scale. Specific tests include the sign test, Wilcoxon signed-rank test, the Kruskal-Wallis test, tests for randomness and trends, and contingency analyses.

Prerequisite: STAT 3379 or MATH 3379.

STAT 4374. Regression Modeling & Analysis. 3 Hours.

Students study model estimation and testing, model diagnostics, residual analysis, variables selection, and multicollinearity. Work is required on real data with the use of the MINITAB and SAS statistics packages.

Prerequisite: STAT 3379 or MATH 3379.

STAT 4375. Quality Control & Reliability. 3 Hours.

Students examine topics, such as attribute and variables control charts, process capability, acceptance sampling, probabilistic foundations of reliability, hazard functions, failure laws, and system reliability.

Prerequisite: MATH 3379 or STAT 3379.

STAT 4376. Time Series and Forecasting. 3 Hours.

Students examine topics, such as types and classification of time series, methods of forecasting, errors in forecasting, regression analysis for time series, decomposition methods, exponential smoothing, Box-Jenkins methods, nonseasonal and seasonal modeling, and transfer function and intervention models.

Prerequisite: MATH 3379 or STAT 3379.

STAT 4377. Introduction to Applied Bayesian Analysis. 3 Hours.

Students employ statistical methods and their applications using the Bayesian paradigm. Topics may include conditional probability, Bayes' Rule, likelihood ratios, hypothesis testing and credible intervals for population means and population proportions, and simple linear regression using Bayesian estimators. Software such as R, JAGS, WinBugs, and SAS may be used for data analysis.

Prerequisite: MATH 1430.

STAT 4390. Introduction to Statistical Learning. 3 Hours.

Students apply the tools needed for modeling and understanding complex data sets. Topics may include regression, logistic regression, Ridge Regression, Lasso Regression, classification and regression techniques, decision trees, and model selection techniques.

Prerequisite: STAT 3379.

String Bass (STBS)

STBS 1101. Secondary Performances-String Bass. 1 Hour.

Students study techniques and musicality related to string bass in weekly individualized private instruction. Students admitted as a String Bass primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

STBS 1201. Individual Performances-String Bass. 2 Hours.

The course consists of individualized private instruction on the string bass. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

STBS 3201. Individual Performances-String Bass. 2 Hours.

The course consists of advanced individualized private instruction on the string bass. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

STBS 3202. Applied String Bass w/ Jr Recital. 2 Hours.

The course consists of advanced individualized private instruction on the string bass. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Teach English as Second Lang (TESL)

TESL 3303. Literacy Strategy for English Language Learners. 3 Hours.

This course emphasizes linguistic and cultural principles, lesson planning, practical methods, curricula and materials for teaching English to speakers of other languages in pre-kindergarten to sixth grade classrooms. Students will gain first-hand experience working with linguistically and culturally diverse students in Texas schools.

Prerequisite: BESL 2301, BESL 3301.

TESL 3313. English Second Language Methodology I. 3 Hours.

In this course, candidates will study linguistic and cultural principles in language teaching and learning. Emphasis is placed on research-based English as a Second Language (ESL) methodology in the classroom. Students observe ESL classroom practices and create lesson plans and materials for English language learners. Ten hours of field experience is required as part of the course.

Prerequisite: BESL 3301 with a grade of C or higher.

TESL 4303. Teaching English As A Second Language. 3 Hours.

The course identifies current instructional methods and approaches to teaching English as a second language to nonnative speakers of English beginning at the early childhood level through adult. Principles and concepts of second language learning, linguistic contrasts between English and other languages, and the instructional processes are emphasized. Field experience in PK-12 schools required.

Prerequisite: Junior standing.

TESL 4314. English Second Language Methodology II. 3 Hours.

In this course, candidates apply research based methods in planning and implementing instruction for English language learners in the content areas. Students develop curricular materials and assessments for English language learners at all levels of English language proficiency. Fifteen hours of field experience is required as part of the course.

Prerequisite: TESL 3313 .

TESL 4330. Teaching Second Language Online. 3 Hours.

Students explore theory, design, and research related to meaningful online instruction in second/foreign language learning. Current teaching practices and research in Computer Assisted Language Learning (CALL) are examined. Credit 3 .

Theatre (THEA)

THEA 1100. Singing for Actors. 1 Hour.

This specialized voice class is designed to introduce singing technique in a group setting to Theatre majors with an acting/directing emphasis.

THEA 1115. Technical Build Crew. 1 Hour. [TCCN: DRAM 1120]

Tech Build Crew focuses on practical work that deals with construction aspects of theatrical productions. Those aspects include carpentry, theatrical rigging, lighting, sound, scenery, props, scenic painting, special effects, welding, the basics of running a show, and general theater maintenance.

THEA 1116. Costume Crew. 1 Hour. [TCCN: DRAM 1120]

Students are prepared to work with costumes for a production, dress actors and help with hair and make-up during the run of the show. Additional duties include maintaining garments, stock, and the costume and make-up areas throughout the run.

THEA 1117. Management Crew. 1 Hour. [TCCN: DRAM 1120]

Students are introduced to the logistics of theatre management. Topics may include box office training, patron service training, promotional designs, and advertisement/public relations. This is a practical crew course consisting of actual work on departmental productions.

THEA 1330. Introduction to Scenic Technology. 3 Hours. [TCCN: DRAM 1330]

Students are introduced to theatrical production. Students are provided an overview of the elements of production to include an introduction to the basic components of theatre technology, stage scenery, stage lighting, theatrical costuming, stage management, theatre management, and script analysis. This course is designed to introduce the student to all areas of theatrical production.

THEA 1331. Introduction to Lighting Technology. 3 Hours. [TCCN: DRAM 2331]

Students are introduced to theatre technology with a focus on the techniques and methods in set construction, lighting and sound technology, property construction, and theatrical production techniques.

THEA 1332. Introduction to Costume Technology. 3 Hours. [TCCN: DRAM 1342]

Students study the basic techniques of costuming, sewing, dyeing, and distressing fabrics.

THEA 1364. Beginning Acting. 3 Hours. [TCCN: DRAM 1351]

Students study basic techniques in body, voice, characterization, and play analysis as they are applied to the performance of stage tasks by the actor.

THEA 1366. Theatre Appreciation. 3 Hours. [TCCN: DRAM 1310]

Students analyze the theatrical experience for the audience with an examination of theatre's relation to the broad contemporary scene as well as its relation to past eras. In addition, students examine the production elements necessary to provide the theatrical experience.

THEA 2330. Stage Make Up. 3 Hours. [TCCN: DRAM 1341]

Students engage in a survey of the reasons for stage make-up and the types of make-up available. Principles of designing make-up for characters in a play. Intensive practical application.

THEA 2336. Voice I for the Actor. 3 Hours. [TCCN: DRAM 2336]

Students engage in beginning training in the release of the voice for effective communication with work on breathing, projection, placement, articulation, resonance, and quality.

THEA 2337. Voice II for the Actor. 3 Hours.

Students engage in advanced training in application of appropriate vocal techniques to produce optimum control of quality, projection, and precision in diction. Ultimately the application is in fusing technique with the actor's interpretation of roles.

Prerequisite: THEA 2336, THEA 1364, or consent of the instructor.

THEA 2359. Hand Drafting in Theatre. 3 Hours.

Students study hand drafting techniques for the design and construction of theatrical scenery. Students learn how to utilize hand drafting tools and how to read and create design drafting packages for the theatre.

THEA 2360. Beginning Design. 3 Hours. [TCCN: DRAM 2335]

Students are introduced to the methods, concepts and materials of designing for theatre, including the basic elements of set design, properties design, lighting design, and sound design for the stage. Students are introduced to the methods of developing a design from script analysis to presentation of the completed design. Restricted to Theatre or Musical Theatre major.

THEA 2361. Computer Drafting in Theatre. 3 Hours.

Students are introduced to computer aided drafting and design for theatrical applications with a practical approach to computer drafting of floor plans, elevations, sections, light plots, and organizational diagrams using popular CAD software developed specifically for theatrical applications as well as programs like AutoCAD and Project Manager.

Prerequisite: THEA 1331 or permission of instructor.

THEA 2367. Play Analysis. 3 Hours. [TCCN: DRAM 2355]

Students examine the methodology for analyzing dramatic masterworks primarily as tools for the theatre craftsman and emphasizes the importance of this practical skill for actors, directors, designers, and playwrights. While focusing on the dramatic structure of a script in various plays, students concurrently examine the playwright's social and cultural milieu.

THEA 2368. Intermediate Acting. 3 Hours. [TCCN: DRAM 1352]

Students explore the techniques of freeing the body, body language, and movement in the development of characterization and actor technique.

Prerequisite: THEA 1364 or consent of instructor.

THEA 3114. Theatre Workshop. 1 Hour.

One semester hour of credit may be received per semester for work done in this practical workshop consisting of actual work on productions. May be repeated for credit.

Prerequisite: Junior or higher standing or by audition.

THEA 3115. Advance Technical Build Crew. 1 Hour.

Students focus on practical work dealing with advanced construction skills of theatrical productions. Those skills include carpentry, theatrical rigging, lighting, sound, scenery, props, scenic painting, special effects, welding, the basics of running a show, and general theater maintenance. Focus is placed on advanced logistics of being on a backstage crew to run theatrical productions.

Prerequisite: THEA 1115.

THEA 3116. Advanced Costume Crew. 1 Hour.

Students study advanced costume construction techniques. Students prepare the costumes for a production. Students learn to supervise a run crew during a show and help with hair and stage make-up with additional duties to include maintaining garments, stock, and the costume and make-up areas throughout the run.

Prerequisite: THEA 1116.

THEA 3117. Musical Theatre Workshop. 1 Hour.

This course aims to synthesize musical theatre majors' work in music and dance. May be repeated for credit. Required of all musical theatre majors every semester.

Prerequisite: Musical Theatre Majors.

THEA 3127. Advanced Theatre Management Crew. 1 Hour.

Students are introduced to advanced concepts and logistics of theatre management. Topics may include advanced box office training, patron service training, ushering, learning new formats and software for poster and program designs, advertisement, and public relations. Additionally, students mentor students who are participating in THEA 1117. This is a practical crew consisting of advanced work on departmental productions.

Prerequisite: THEA 1117.

THEA 3331. Advanced Stage Make Up. 3 Hours.

Students engage in an investigation of and experimentation with three-dimensional makeup constructions to provide drastic alteration of the actor's face for stage, film, and television.

Prerequisite: THEA 2330 or consent of the instructor.

THEA 3332. Computer Rendering for Theatre. 3 Hours.

This is a skills-based course that gives students experience in using the computer to create visual documentation in the design process. Subject areas include set renderings, costume renderings, painters elevations, and scenic models.

THEA 3334. Stage Costume Design. 3 Hours.

Students engage in a survey of historical costume; contrast of general clothing with stage costume; and consideration of all elements involved in designing costumes for an entire production.

Prerequisite: Sophomore standing.

THEA 3335. Costume Construction. 3 Hours.

Students explore pattern drafting, draping, and construction techniques for period and modern costumes. Knowledge of machine sewing is required. Projects may include bodices, skirts, pants, corsets, and 18th and 19th-century men's coats.

Prerequisite: THEA 1332 and/or consent of the instructor.

THEA 3336. Scenic Design. 3 Hours.

Students study how to both design and communicate a theatrical space. The process is based on script analysis and research through model making, ground plans, and hand sketches.

Prerequisite: THEA 1330 or instructor approval.

THEA 3337. History Of Costume. 3 Hours.

Students engage in a survey of historical costumes and accessories by periods from ancient Egypt to the present day, with a contrast of general clothing with stage costumes.

Prerequisite: Sophomore standing or consent of instructor.

THEA 3360. History Of The Theatre I. 3 Hours.

Students engage in a survey of the origins of the theatre, with major concentration centered upon the development of the western theatre from the Greeks to the Neoclassic.

Prerequisite: ENGL 1301 and ENGL 1302.

THEA 3362. Lighting and Sound Design. 3 Hours.

Students investigate the use of light and sound in a theatre space. They design for the performer and the action of the play and develop lighting effects, sound effects, and special effects. Additionally, the student begins to explore the use of microphone technology.

Prerequisite: THEA 2360 and THEA 2361.

THEA 3363. Property Design for Theatre. 3 Hours.

Students concentrate on the tools and techniques used by professional designers in the design and construction of properties for theatre. Topics covered may include transforming found objects, period research, texturing, molding, casting, computer generated properties, and painting.

THEA 3364. Dramaturgy. 3 Hours.

Students study production dramaturgy: an exploration and application of the processes, research, and resources used by academic and professional theatres, combining knowledge with creativity in order to make informed production choices. ENGL 1301 and ENGL 1302. ENGL 1301 and ENGL 1302.

Prerequisite: Junior standing or consent of instructor.

THEA 3365. Stage & Theatre Management. 3 Hours.

Students engage in an advanced study of theatre management with an emphasis on the organizational, technical and management responsibilities of a stage manager as well as the public relations and marketing skills needed to run a house and box office with a focus on the establishment of a collaborative atmosphere within a production team or within a theatre company.

THEA 3369. Advanced Acting: Modern Theatre. 3 Hours.

Students engage in a detailed study of action and characterization through scene study, research, and self-use, utilizing interior and exterior methods to develop a working method for each actor.

Prerequisite: THEA 1364, THEA 2368 or consent of instructor.

THEA 3370. Advanced Acting: Classical Theatre. 3 Hours.

Students engage in advanced scene study with concentration on textual analysis, structure, diction, and rhythm of the script.

Prerequisite: 9 hours of acting courses or consent of instructor.

THEA 3372. Improvisational Techniques. 3 Hours.

Students develop their use of improvisations, games, and ritual to enhance creative thinking, problem solving skills, characterization, and trust within the rehearsal process.

Prerequisite: THEA 1364 or consent of instructor.

THEA 3373. Stage Movement I for the Actor. 3 Hours.

Students learn to increase awareness and command of the body as an expressive instrument. Through specialized in-class exercises, actors increase their dynamic stage presence; develop a supple, responsive physicality; and increase awareness of kinesthetic ensemble response.

THEA 3374. The Actor & Commedia dell'Arte. 3 Hours.

This course trains actors using stock characters of commedia dell'arte, an Italian theatrical form. Specialized in-class exercises, exploration of mask work and clowning lead students to find an awareness of their own habits in characterizations. Students broaden their physical expressiveness leading to a heightened and vibrant stage presence.

Prerequisite: Sophomore standing.

THEA 3380. Meisner Technique. 3 Hours.

Students learn the skills and tools necessary for advanced scene work using the Sanford Meisner Technique. Students are led through Meisner-based exercises, activities and scenework. Through the Meisner approach, advanced work on using personal experiences for character work, listening on-stage and making strong, creative choices are examined. These activities lead to the understanding of advanced concepts and techniques as they apply to a personalized acting process.

Prerequisite: THEA 1364, THEA 2368, and THEA 3369.

THEA 3395. Acting In Major Roles. 3 Hours.

This course allows credit for performing a major role in Theatre Program productions, involving research, rehearsal and performance during the nine-month academic year. May be repeated for credit.

Prerequisite: Junior or higher standing or by audition.

THEA 3396. Realized Performance or Production. 3 Hours.

Students prepare and significantly contribute to a Theatre and Musical Theatre Departmental production in ways that may include designing, directing, stage managing, performing a significant role, or contributing to a major aspect of the production process. Students demonstrate proficiency through research, rehearsal, and the performance or presentation of this work.

Prerequisite: By audition or assignment.

THEA 4092. Independent Study. 1-3 Hours.**THEA 4093. Theatre Internship. 3 Hours.**

This course is a practical application of skills and knowledge learned in the classroom for students who have completed appropriate courses and achieved an acceptable GPA. Internships may be arranged with an approved theatre. Entrance into this course requires permission of the department chair. Variable Credit (1-3).

Prerequisite: Theatre or Musical Theatre majors only.

THEA 4094. Special Topics. 1-3 Hours.**THEA 4190. Senior Showcase. 1 Hour.**

An extension of THEA 3117 Musical Theatre Workshop, the Senior Showcase is a research, collaboration, and preparation class for participating senior musical theatre majors.

Prerequisite: Departmental approval.

THEA 4325. Stage Movement II for the Actor. 3 Hours.

This course is designed to lead the student toward an advanced awareness of the body as an expressive instrument. Students employ advanced kinesthetic ensemble responses as they begin to foster original work, coalescing all facets of advanced theatre movement to form the beginning of new work.

Prerequisite: THEA 3373.

THEA 4326. Stage Combat. 3 Hours.

This course focuses on specific stage combat disciplines with compulsory techniques. Students learn hand-to-hand combat, rapier and dagger, and other forms of violence found on stage and film. Each stage combat technique is taught for safety, theatrical commitment, and believability within a dramatic context.

Prerequisite: Junior standing or permission from the instructor.

THEA 4330. Advanced Scenic Design. 3 Hours.

Advanced design. Students are involved in creating scenic, lighting, and sound design projects. The course may include extensive sketching, rendering, computer drafting, and model building.

Prerequisite: THEA 1330, junior standing or consent of the instructor.

THEA 4331. Acting For The Camera. 3 Hours.

Students engage in an intensive and practical study of the special techniques of acting for film and television with the goal of work in those industries with extensive scene work in front of the camera. Must be a theatre or musical theatre major. Must be a Theatre or Musical Theatre major.

Prerequisite: THEA 1364, THEA 2368, THEA 3369 and consent of the instructor.

THEA 4332. Auditioning For Community Theatre. 3 Hours.

Students are prepared with appropriate audition materials and the knowledge to meet the variety of demands in the commercial world of theatre, musical theatre, cinema, and television.

Prerequisite: Consent of the instructor.

THEA 4360. History Of The Theatre II. 3 Hours.

Students engage in a survey of changing styles in theatre, from the Romantic revolution through the Realistic movement to the innovations of the twentieth-century theatre.

Prerequisite: ENGL 1301 and ENGL 1302.

THEA 4361. Stage Lighting. 3 Hours.

Students study lighting design as an art: the history of stage lighting and a study of contemporary stage lighting techniques, practices, and equipment. Students design lighting for a show of their own choosing.

Prerequisite: THEA 1331, THEA 3362 and basic computer literacy or consent of instructor.

THEA 4362. Playwriting. 3 Hours.

Students study the elements of playwriting through writing exercises designed to enhance the understanding of structure, style, character, and dialogue.

Prerequisite: Junior standing or consent of instructor.

THEA 4363. Dramatic Theory & Criticism. 3 Hours.

Students study the principles of various styles and periods of dramaturgy, involving a history of criticism from Aristotle to the present. Representative plays are analyzed for theme, structure, characterization, and dialogue with a view to their influences on contemporary theatre. Emphasis is placed on written student criticism and evaluation of plays.

Prerequisite: ENGL 1301 and ENGL 1302.

THEA 4365. Portfolio Development. 3 Hours.

Students develop individualized projects in scenery, costume, lighting, sound, or technical production. Credit 3 Prerequisite two of the following design courses: THEA 3334, THEA 4330, OR THEA 4361; consent of instructor.

THEA 4366. Directing I. 3 Hours.

Students engage in basic director preparation in script analysis, communication skills, creating ground plans, and scene study through a wide variety of exercises and direction of scenes.

Prerequisite: THEA 1364, THEA 2367 junior standing and/or consent of the instructor.

THEA 4367. Directing II. 3 Hours.

Student engage in basic director preparation in script analysis, communication skills, creating ground plans, and scene study through a wide variety of theatrical styles and direction of scenes.

Prerequisite: THEA 4366, junior standing and/ or consent of the instructor.

THEA 4368. Experimental Theatre Production. 3 Hours.

Students analyze plays that depart from the realistic genre and examination of new production possibilities arising out of developments in theatre technology that complement the experiments of the playwrights. Application of theory in laboratory productions.

THEA 4371. The American Musical Theatre. 3 Hours.

Students study the history of the development of musical theatre (excluding opera) in America with emphasis placed on written student criticism and evaluation of musical theatre.

THEA 4376. Scene Painting. 3 Hours.

Students focus on advanced theatre scenic painting techniques. Theatre scenery encompasses large-scale painting, faux finishes, drops, and textures. By using a variety of painting tools and materials, students produce professional-quality projects that meet theatre industry standards.

Prerequisite: THEA 1330.

THEA 4387. Workshop Childrens Creative Drama. 3 Hours.

Students study fundamental theories and elements of creative drama, with emphasis in developing and guiding creative drama activities such as storytelling, improvisation, rhythmic and interpretative movement, puppetry, theatre in education techniques, and pantomime. The course is designed for prospective teachers grades K-12.

THEA 4388. Theatre Production for Youth. 3 Hours.

Students study and practice creating and performing theatre for youth. The focus on techniques for creating professional theatre for young audiences includes performances in the community. Students are taught lesson plan development following Texas Essential Knowledge and Skills (TEKS) standards.

THEA 4389. Repertory Theatre. 3 Hours.

Students engage in a unified approach to theatre, contrasted with the compartmentalized division of labor used more frequently, allowing the self-contained group to do all of the production work as well as the acting. May be repeated for credit. Offered in summer terms.

THEA 4392. Undergraduate Seminar in Theatre. 3 Hours.

A course for the undergraduate student which allows a student to pursue particular areas beyond the limits of current course offerings. The particular study, however, will be within the student's areas of specialization. May be repeated for credit. May be repeated for credit.

Prerequisite: Permission of the Program Coordinator.

Trombone (TRMB)

TRMB 1101. Secondary Performances-Trombone. 1 Hour.

Students study techniques and musicality related to trombone in weekly individualized private instruction. Students admitted as a Trombone primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

TRMB 1201. Individual Performances-Trombone. 2 Hours.

The course consists of individualized private instruction on the Trombone Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

TRMB 3201. Individual Performances-Trombone. 2 Hours.

The course consists of advanced individualized private instruction on the Trombone. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

TRMB 3202. Applied Trombone with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the Trombone. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Trumpet (TRMT)

TRMT 1101. Secondary Performances-Trumpet. 1 Hour.

Students study techniques and musicality related to trumpet in weekly individualized private instruction. Students admitted as a Trumpet primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

TRMT 1201. Individual Performances-Trumpet. 2 Hours.

The course consists of individualized private instruction on the trumpet Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

TRMT 3201. Individual Performances-Trumpet. 2 Hours.

The course consists of advanced individualized private instruction on the trumpet. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

TRMT 3202. Applied Trumpet with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the trumpet. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Tuba (TUBA)

TUBA 1101. Secondary Performances-Tuba. 1 Hour.

Students study techniques and musicality related to tuba in weekly individualized private instruction. Students admitted as a Tuba primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

TUBA 1201. Individual Performances-Tuba. 2 Hours.

The course consists of individualized private instruction on the tuba. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

TUBA 3201. Individual Performances-Tuba. 2 Hours.

The course consists of advanced individualized private instruction on the tuba. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

TUBA 3202. Applied Tuba with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the tuba. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

University-Wide (UNIV)

UNIV 1101. Bearkat U. 1 Hour.

Students explore the science of learning, cognition, and motivation to develop and apply self-directed learning skills to their own academic programs and career development.

UNIV 1301. Introduction to Collegiate Studies. 3 Hours.

UNIV 1301 is a seminar designed to enhance the first-year experience for beginning college students and to increase student success in college. The varied content of the course will facilitate a smoother transition into the college culture. Content areas include: goal setting and time management skills, writing skills, test preparation and taking skills, critical thinking skills, major and career exploration, locating and utilizing campus resources, diversity awareness, wellness strategies, money management, and leadership/civic service awareness. Students with junior and senior status will need to contact the First-Year Experience Office for approval.

Prerequisite: Open to all first year students (first-time and transfer) with less than 60 hours of college credit.

UNIV 2001. Academic Recovery I: Activating Academic Success. 0 Hours.

This course supports students on academic probation with the goal of restoring academic good standing. The course focuses on academic recovery strategies and methods related to university policies, academic and campus resources, communication techniques, studying strategies, and goal setting. It is designed to supplement the academic course load of students.

Prerequisite: Academic Probation Status.

UNIV 2112. Career Education and Development. 1 Hour.

Students explore career-specific skills and dispositions to develop and apply professional skills to early workforce experiences.

Prerequisite: 30 hours.

UNIV 3001. Academic Recovery II: Promoting Academic Resilience. 0 Hours.

This course supports students on academic suspension with the goal of restoring academic good standing. Students develop an understanding of SHSU's academic policies, identify academic goals, explore personal strengths, and identify solutions for academic challenges. It is designed to supplement the academic course load of students.

Prerequisite: Academic Suspension Status.

Victim Studies (VCST)

VCST 3341. Aging, Crime and Victimization. 3 Hours.

Students explore general knowledge about aging in the United States as it applies to information about senior adults' experiences with victimization, offending, and incarceration. Future directions for public policy related to crime and aging are evaluated. Course Equivalents: CRIJ 3341

Prerequisite: CRIJ 2361, CRIJ 2362.

VCST 3350. Victimology. 3 Hours.

Students engage in a survey of the literature, research, and current trends concerning the victim in the criminal justice system. Particular attention is given to victims' rights and compensation, fear of crime, measuring victimization, and the impact of victimization on individuals. Course Equivalents: CRIJ 3350, CRIJ 4380 .

VCST 3351. Victim Service Delivery. 3 Hours.

Students analyze the provision of social and criminal justice services to victims of crime. This is accomplished by examining community and individual services that are afforded to crime victims. The material covered also includes how victim advocacy is positioned within the formal systems of criminal justice and addresses the social and legal issues that impose upon victim service delivery and the theories that explain these impediments to service provision. Course Equivalents: CRIJ 3351

Prerequisite: VCST 3350.

VCST 4338. Child Abuse And Neglect. 3 Hours.

Students develop knowledge concerning key concepts and terminology related to child abuse and neglect, including related laws, and court procedures, investigative techniques, and intervention and prevention programs. In addition, this course provides a foundation for students who may enter professional careers that place them in a position to address and/or investigate suspected cases of child abuse and neglect. Course Equivalents: CRIJ 4338 .

VCST 4351. Trauma and Crisis Intervention. 3 Hours.

Students focus on understanding and effectively assisting victims of traumatic events. Students learn how the context in which trauma occurs can affect the cognitive, affective, behavioral, and neurological functioning of an individual. Multicultural aspects that either impair or facilitate recovery are assessed. Crisis intervention models and the pertinent legal and ethical issues for service provision are evaluated. Prerequisite Junior standing and VCST 3350. Course Equivalents: CRIJ 4351 .

VCST 4370. Interviewing & Counseling. 3 Hours.

Students explore counseling psychology as applied to counseling and interviewing victims of crime. Particular emphasis is placed on principals and procedures; the theoretical foundations of therapeutic psychology; and the therapeutic process and its techniques. Course Equivalents: CRIJ 4370 .

VCST 4376. Independent Study in Victim Studies. 3 Hours.

Students examine a topic related to victim studies. Under the direct supervision of a faculty member, the faculty and student formulate a course of study which could include reviewing relevant literature, engaging in research, exploring professional practice, or conducting other forms of inquiry appropriate to the course of study. The course may be repeated for credit.

Prerequisite: Department Approval.

VCST 4377. Special Topics in Victim Studies. 3 Hours.

Students examine special topics in the field of victimology and victim services. This course is designed to give advanced undergraduate students academic flexibility. Students may repeat this course for credit when topics differ.

VCST 4383. Family Violence. 3 Hours.

Students explore theoretical and sociological issues, both past and present, associated with family violence victimization in society. Specific attention is given to the impact family violence has on the victim and society, legal aspects of family violence, key factors associated with recognition of family violence, and pertinent research on sub-types of family violence. Course Equivalents: CRIJ 4383 .

VCST 4390. Violence Against Women. 3 Hours.

Students analyze the deeper social context in which violence against women occurs. Topics to be covered may include intimate partner violence, rape and sexual assault, sexual harassment, and media depictions of violence against women. Attention is given to the ways in which violence against women affects women, men, and children. In addition, the ways that the criminal justice system responds to these types of crimes, including how the criminal justice system and social service agencies may better address the needs of victims and offenders. Course Equivalents: CRIJ 4390

Prerequisite: VCST 3350.

VCST 4398. Problem Analysis in Victim Studies. 3 Hours.

This course serves as a capstone for Victim Studies undergraduate students. Students use skills and knowledge from prior victim studies courses to address victimization issues. The course consists of the application of research skills and analytic techniques to address facets of victimization including intimate partner violence, family violence, violence against women, elder abuse, and child abuse and neglect, stalking, and human trafficking. Attention is also given to victim service delivery and evaluation. Course Equivalents: CRIJ 4398

Prerequisite: Senior standing and VCST 3350.

Vinlncello (VNCL)

VNCL 1101. Secondary Performances-Violncello. 1 Hour.

Students study techniques and musicality related to violncello in weekly individualized private instruction. Students admitted as a Violncello primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

VNCL 1201. Individual Performances-Violncello. 2 Hours.

The course consists of individualized private instruction on the cello. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

VNCL 3201. Individual Performances-Violncello. 2 Hours.

The course consists of advanced individualized private instruction on the cello. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

VNCL 3202. Applied Cello with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the cello. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Viola (VIOL)

VIOL 1101. Secondary Performances-Viola. 1 Hour.

Students study techniques and musicality related to viola in weekly individualized private instruction. Students admitted as a Viola primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

VIOL 1201. Individual Performances-Viola. 2 Hours.

The course consists of individualized private instruction on the viola. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

VIOL 3201. Individual Performances-Viola. 2 Hours.

The course consists of advanced individualized private instruction on the viola. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

VIOL 3202. Applied Viola with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the viola. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Violin (VILN)

VILN 1101. Secondary Performances-Violin. 1 Hour.

Students study techniques and musicality related to violin in weekly individualized private instruction. Students admitted as a Violin primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

VILN 1201. Individual Performances-Violin. 2 Hours.

The course consists of individualized private instruction on the violin. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

VILN 3201. Individual Performances-Violin. 2 Hours.

The course consists of advanced individualized private instruction on the violin. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

VILN 3202. Applied Violin with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction on the violin. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Voice (VOIC)

VOIC 1101. Secondary Performances-Voice. 1 Hour.

Students study techniques and musicality related to voice in weekly individualized private instruction. Students admitted as a Voice primary are not permitted to take this course.

Prerequisite: Must be a music major with a different applied instrument concentration, or by instructor permission.

VOIC 1201. Individual Performances-Voice. 2 Hours.

The course consists of individualized private instruction in voice. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have instructor permission.

VOIC 3201. Individual Performances-Voice. 2 Hours.

The course consists of advanced individualized private instruction in voice. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students. Credit 2

Prerequisite: Students must have passed a sophomore proficiency jury.

VOIC 3202. Applied Voice with Junior Recital. 2 Hours.

The course consists of advanced individualized private instruction in voice. Instruction focuses on technique and musicality. Students also attend a weekly studio class, where there are opportunities to perform for fellow students, and perform a culminating recital. Credit 2

Prerequisite: Students must have instructor permission.

Wildlife Management (WMGT)

WMGT 2301. Principles of Wildlife Management. 3 Hours. [TCCN: AGRI 2330]

Students engage in a survey of sustainable and profitable wildlife management techniques, habitats, and resources. Topics may include alternative wildlife practices, animal and plant identification, ethical and economic considerations of wildlife and fisheries management, conservation, habitat alteration and renewal, and economic impact of the wildlife industry.

WMGT 2396. Special Topic. 3 Hours.

Students examine special topics/issues in Wildlife Management at an introductory level. This course may be repeated up to three times as topics and subject matter changes. Credits 3.

WMGT 3301. Wildlife Ranch Management. 3 Hours.

Students evaluate establishing, managing, and maintaining wildlife enterprises. The focus of this course is designing a profitable and sustainable ranch using both scientific and economic perspectives regarding livestock, as well as native and non-native wildlife species.

Prerequisite: WMGT 2301 with a grade of C or better.

WMGT 3350. Cervid Fawn Care. 3 Hours.

Students examine the care of young cervid species from parturition to weaning with a main focus on white-tailed deer. Topics may include diagnosing and treating sick fawns, active and passive antibody transfer, fawn handling, immobilization, health, and birthing and weaning protocols.

Prerequisite: WMGT 2301.

WMGT 3381. Game Animal Production. 3 Hours.

Students study the principles and practices of game animal production. Game animals commonly used for economic diversification of agricultural enterprises are the central focus of the course. Topics may include animal identification, population dynamics, nutrition, habitat preservation and modification, reproduction, game laws, and economic integration in traditional agricultural enterprises. Course Equivalents: AGRI 3381

Prerequisite: WMGT 2301 with a grade of C or better and Sophomore standing.

WMGT 3382. Habitat & Pond Management. 3 Hours.

Students study wildlife habitat and riparian zone management, food plots for upland game birds and white-tailed deer, and pond management for largemouth bass, sunfish, and catfish production.

Prerequisite: WMGT 2301 with a grade of C or better and Sophomore standing.

WMGT 4096. Directed Study. 1-6 Hours.

Arranged professional and developmental learning experiences incorporating a practical application of wildlife management skills and practices. This course may include internships, individual research, and industry studies.

Prerequisite: Sophomore standing.

WMGT 4301. Cervid Breeding and Production. 3 Hours.

Students examine production of the cervid species with a focus on white-tailed deer. Reproductive management practices pertaining to preferred, selective genetics and breeding cycles are emphasized, with production based on an effective confinement management system. The primary topics may include general industry cycles, reproductive techniques and cycles, weaning of offspring and vaccination protocols, immobilization, and interstate/intrastate movement of cervid species.

Prerequisite: WMGT 2301 with a grade of C or better and Junior standing.

WMGT 4302. Cervid Management. 3 Hours.

Students examine the cervid industry from breeding to parturition. Cervid management is based on a confinement setting and focuses on anatomy and physiology, cervid nutrition during this stage of production, and feed types and feeding programs, cost of production, state and federal regulations, diseases and treatments, and fawn care.

Prerequisite: WMGT 2301 with a grade of C or better and ANSC 3373.

WMGT 4320. Wildlife Management Techniques. 3 Hours.

Students explore techniques and tools commonly used in the wildlife industry for management of captive and non-captive wild game animals. Topics include humane methods of trapping/capturing, managed wild game species and predator species, animal population assessment of mammals, birds and fish, establishment of food plots for wild game species, prescribed burns to manage wildlife habitat, and general animal management to ensure the well-being of the animal.

Prerequisite: WMGT 2301; C or better.

WMGT 4340. Exotic Animal Production. 3 Hours.

Students examine the multi-faceted exotic species industry in the state of Texas. Topics may include identification of species, habitat and nutritional needs, holding facility design, regulation and transportation requirements, marketing, cost of production, genetics, and determining market value.

Prerequisite: WMGT 2301 with a grade of C or better.

WMGT 4341. Upland Game Bird Management. 3 Hours.

Students conduct an in-depth investigation of upland game birds common in Texas. Topics may include identification, life cycles, plant and habitat identification, plant community succession, and the tools used to manage succession for successful upland game bird management.

Prerequisite: WMGT 2301 with a grade of C or better.

WMGT 4369. Special Topic. 3 Hours.

Individual study in specialized areas of Wildlife Management. To be directed and approved by the Animal Science advisor. This course is designed to be a multi-topic course. The student can take the course under various special topics being offered.

Prerequisite: Junior standing.

World Language and Cultures (WOLC)

WOLC 1411. Beginning Foreign Language I. 4 Hours.

Students study the first half of an elementary course focused on spoken and written language designed for beginning students. Grade of C or better required in WOLC 1411 in order to continue to WOLC 1412. Course Equivalents: FOLG 1411 .

WOLC 1412. Beginning Foreign Language II. 4 Hours.

Students study an elementary course on spoken and written language designed for students that have some basic language knowledge, but want to improve their level in speaking, listening, writing and reading. Topics may include cultural knowledge. Course Equivalents: FOLG 1412

Prerequisite: Grade of C or better in WOLC 1411 or the equivalent.

WOLC 2311. Intermediate Foreign Language. 3 Hours.

Students focus on oral, listening, writing and reading skills. Topics may include oral drills on pronunciation, as well as listening comprehension exercises. Additional activities will consist of reading exercises to improve intonation, pronunciation with the objective of making students comfortable and confident in speaking and writing correctly. Course Equivalents: FOLG 2311

Prerequisite: Grade of C or better in WOLC 1411 and WOLC 1412 or equivalent.

WOLC 2312. Intermediate Foreign Language II. 3 Hours.

Students undertake a middle course on spoken and written language designed for students that have some basic language knowledge, but want to improve their level in speaking, listening, writing and reading. Topics include cultural knowledge. Course Equivalents: FOLG 2312

Prerequisite: Grade of C or better in WOLC 1411, WOLC 1412, and WOLC 2311 or the equivalent.

WOLC 3010. Applied Language Practicum. 1-3 Hours.

Students apply practical language skills as they observe and practice language in a professional context related to their field of study. Practicum topics and activities will vary based on student needs. This course may be repeated for credit as content varies. Variable Credit (1 to 3).

Prerequisite: Permission of Department Chair.

WOLC 3061. Individual Readings. 1-3 Hours.

An advanced-level student may undertake this course for individual study of a particular topic. Enrollment in this course is restricted and approval of such must be obtained from the department chair. The course may be repeated for credit as content varies. Variable Credit (1 to 3). Course Equivalents: FOLG 3061, FOLG 3361

Prerequisite: Consent of Instructor and Department Chair.

WOLC 4363. Language Learning: Concepts & Methods. 3 Hours.

Students develop working knowledge of foreign language teaching methods. Topics may include theories of language acquisition; comparisons between first and second language (L2) acquisition; individual differences in SLA (age, aptitude, motivation, etc.); the nature of learner grammars; the development of L2 fluency, and contextual factors influencing the quality and quantity of the input available to language learners. Course Equivalents: FOLG 4363 .

Abbas Aboohamidi, PHD (axa432@shsu.edu), *Assistant Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas Tech University; MA, Texas Tech University; BBA, Texas A&M-Corpus Christi

Dallin Russell Adams, PHD (dra041@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Univ of Utah; MA, Brigham Young University; BA, Brigham Young University

Ira R Adams, PHD (eng_ira@shsu.edu), *Professor of English, Department of English*, PHD, University of Virginia - SFS; MA, University of Virginia - SFS; BA, Washington & Lee University

Randy L Adams, MM (mus_rla@shsu.edu), *Professor of Music, School of Music*, MM, Northwestern University; BA, Univ of Houston-Main

Samuel Adu-Prah, PHD (sxa054@shsu.edu), *Associate Professor of Geography, Department of Environmental & Geosciences*, PHD, Southern Illinois U-Carbondale; MSED, Alcorn State University; MPHIL, University of Cambridge; BA, University of Ghana

Aisha Saratu Ahmadu, PHD (asa059@shsu.edu), *Assistant Professor of Political Science, Department of Political Science*, PHD, Mississippi State University; MBA, New Mexico State University; BA, Midwestern State University

Irfan Ahmed, PHD (mgt_ixa@shsu.edu), Associate Professor of Marketing, Department of Mgmt, Mktg, & Info Systems, PHD, Texas A&M University; MBA, The Indian Institute of Mgmt; BA, Osmania University

Bina Ajay, PHD (binaajay@shsu.edu), Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems, PHD, Univ of Cincinnati; BC, University of Mumbai

Ouadie Akaaboune, PHD (oxa021@shsu.edu), Associate Professor of Accounting, Department of Accounting, PHD, Southern Illinois U-Carbondale; MACCY, Southern Illinois U-Carbondale; BA, Univ of Hawaii At Manoa

Sinem Akay-Sullivan, PHD (sxa055@shsu.edu), Associate Professor of Counselor Education, Department of Counselor Education, PHD, Univ of North Texas; MED, Univ of North Texas; MS, Middle East Technical Univ; BS, Hacettepe University

Miriam Ama Bima Akoto, PHD (maa126@shsu.edu), Assistant Professor of French, Department of World Languages & Cultures, PHD, Texas A&M - Commerce; MA, Univ of Arizona; BA, Kwame Nkrumah University

Donald P. Albert, PHD (geo_dpa@shsu.edu), Professor of Geography, Department of Environmental & Geosciences, PHD, Univ of N Carolina-Chapel Hill; MA, Appalachian State University; BS, Salem State College

John G Alford, PHD (jga001@shsu.edu), Professor of Mathematics, Department of Mathematics & Statistics, PHD, Univ of Houston-Main; MS, Univ of Houston-Main; BS, Univ of Calif-Los Angeles

Derli Dias Do Amaral Junior, PHD (dda030@shsu.edu), Assistant Professor of Engineering Technology, Department of Engineering Technology, PHD, Southern Methodist University

Min Kyung An, PHD (an@shsu.edu), Associate Professor of Computer Science, Department of Computer Science, PHD, Univ of Texas At Dallas; MS, Univ of Texas-Arlington; BS, Jeju National University

Jeffrey S Anastasi, PHD (jsa001@shsu.edu), Professor of Psychology, Department of Psychology & Philosophy, PHD, Suny At Binghamton; MA, Suny At Binghamton; BA, Suny At Binghamton

Jaime Lynn Anderson, PHD (jla068@shsu.edu), Associate Professor of Psychology, Department of Psychology & Philosophy, PHD, Univ of Alabama-Tuscaloosa; MS, Eastern Kentucky University; BA, Univ of Dayton; BA, Univ of Dayton

Mark J Anderson, PHD (mjanderson@shsu.edu), Associate Professor of Agricultural Sciences, Department of Agricultural Sciences, PHD, Iowa State University; MS, Texas Tech University; BS, Texas Tech University

Rebecca Kirstin Andrews Dickert, MD (rebecca.andrewsdickert@shsu.edu), Assistant Professor of Physiology, Department of Physiology & Pharmacology, MD, Michigan State University; BA, Univ of Chicago

Benny E Arney, PHD (chm_bea@shsu.edu), Professor of Chemistry, Department of Chemistry, PHD, Rice University; BA, Univ of St Thomas

Michael I Arrington, PHD (mia016@shsu.edu), Associate Professor of Communication Studies, Department of Communication Studies, PHD, Univ of South Florida; MA, Univ of South Florida; BA, Univ of Southern Mississippi

Jeremiah Ogonda Asaka, PHD (joa012@shsu.edu), Assistant Professor of Security Studies, Department of Security Studies, PHD, Univ of Massachusetts-Boston; MA, Univ of Massachusetts-Boston; MS, Ohio University; BSC, Maseno University

Mario Aschauer, PHD (mxa072@shsu.edu), Associate Professor of Music, School of Music, PHD, University of Vienna; MA, Univ of Music & Perform Arts; MPHIL, University of Vienna

Burcu Ates, PHD (bxa013@shsu.edu), Professor of Education, Department of Teaching & Learning, PHD, Texas A&M University; MA, Michigan State University; BA, Middle East Technical Univ

Mardelle Renee Atkins, PHD (mra043@shsu.edu), Roland Black Endowed Assistant Professor of Biological Sciences, Department of Biological Sciences, PHD, Baylor College of Medicine; BS, Texas A&M University

Traci Leigh Austin, PHD (tla016@shsu.edu), Associate Professor of Business Administration, Department of Business Admin & Entrep, PHD, Univ of Nebraska-Lincoln; MED, Sam Houston State University; MA, University of Tulsa; BA, Univ of Nebraska-Lincoln; BA, Univ of Nebraska-Lincoln

Andia B Azimi, PHD (axa205@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Georgia State University; MS, Georgia State University; BS, Georgia State University

B

Nancy E Baker, PHD (neb001@shsu.edu), Associate Professor of History, Department of History, PHD, Harvard University; AM, Harvard University; MA, George Washington University; BA, Rutgers University

Maria Hasler Barker, PHD (mhb015@shsu.edu), Associate Professor of Spanish, Chair of World Languages & Cultures, Department of World Languages & Cultures, PHD, Indiana University; MA, Indiana University; BA, Brigham Young University

Timothy Barnum, PHD (txb073@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Univ of Nebraska-Omaha; MA, Saint Ambrose; BA, Valparaiso University

Iftekhar Ibne Basith, PHD (iib002@shsu.edu), Associate Professor of Engineering Technology, Department of Engineering Technology, PHD, Univ of Windsor; MASC, Univ of Windsor; BSEE, Shah Jalal Univ of Sci & Tech

Janella Kay Baxter, PHD (jxb211@shsu.edu), Assistant Professor of Philosophy, Department of Psychology & Philosophy, PHD, Univ of Illinois-Chicago; MA, Univ of Colorado; BA, Seattle University

Andrea Lynne Beerwinkle, PHD (alb086@shsu.edu), Assistant Professor of Education, Department of Teaching & Learning, PHD, Texas A&M University; MED, Texas Tech University; BA, Texas A&M University

Kimberly K Bell, PHD (eng_kkb@shsu.edu), Professor of English and Dean of Honors College, Department of English, PHD, Georgia State University; MA, Clark University; BA, The American College of Greece

Helen Berg, PHD (hberg@shsu.edu), Professor of Education and Associate Dean of COED, Department of Teaching & Learning, PHD, Univ of Colorado; MED, Lesley College; BS, Univ of N Carolina-Greensboro

Milo D. Berg, PHD (eco_mdb@shsu.edu), Associate Professor of Business Analysis, Department of Economics & Intl Business, PHD, Texas A&M University; BSB, Univ of Minnesota-Twin Cities

Devon Michael Berry, PHD (dmb116@shsu.edu), Associate Professor and Director of Nursing, School of Nursing, PHD, Univ of Washington; MBA, Western Governors University; MSN, Case Western Reserve Univ; BSN, Cedarville University

Marcy Miller Beverly, PHD (agr_mmb@shsu.edu), Professor of Agricultural Sciences, Department of Agricultural Sciences, PHD, Texas A&M University; MS, Sam Houston State University; BS, Texas A&M University

Dana Elaine Bible, EDD (deb013@shsu.edu), Assistant Professor of Business Administration, Department of Business Admin & Entrep, EDD, Sam Houston State University; MBA, Sam Houston State University; BBA, Sam Houston State University

Tracy E. Bilsing, PHD (eng_teb@shsu.edu), Associate Professor of English, Associate Dean of Honors College, Department of English, PHD, Texas A&M University; MA, Sam Houston State University; BA, Sam Houston State University

Jadwiga M Biskupska, PHD (jxb074@shsu.edu), Associate Professor of History, Department of History, PHD, Yale University; MA, Yale University; MA, Yale University; BA, Cornell University

Robin M Bittick, PHD (rmb004@shsu.edu), Associate Professor of Political Science, Department of Political Science, PHD, Claremont Grad Sch; MPA, California St Un-Dominguez Hil; BS, California St Un-Dominguez Hil

William Hollis Blackwell, EDD (whb004@shsu.edu), Associate Professor of Education, Department of Teaching & Learning, EDD, Boston University; EDM, Harvard University; BA, Colgate University

Jacob Damon Blevins, PHD (jblevins@shsu.edu), Professor and Chair of English, Department of English, PHD, Texas Tech University; MFA, McNeese State University; MA, McNeese State University; BA, McNeese State University

Leslie H Blix, PHD (lhb010@shsu.edu), Associate Professor of Accounting, Department of Accounting, PHD, Southern Illinois U-Carbondale; MS, Cuny Queens College; BS, Hodges University; BA, Univ of Connecticut

Tonya J Blocker, PHD (tjb094@shsu.edu), Assistant Professor of Accounting, Department of Accounting, PHD, Florida-Atlantic U; MS, Florida State University; BS, Florida State University

Marcus T Boccaccini, PHD (psy_mtb@shsu.edu), Professor of Psychology, Department of Psychology & Philosophy, PHD, Univ of Alabama-Tuscaloosa; MA, Univ of Alabama-Tuscaloosa; BS, Univ of Santa Clara

Danielle Lynne Boisvert, PHD (dxb014@shsu.edu), Professor of Criminal Justice and Criminology; Associate Dean, COCJ, Department of Criminal Justice & Criminology, PHD, Univ of Cincinnati; MFS, George Washington University; BS, University of Western Ontario

Aaron Weston-Lloyd Bonnett, PHD (awb023@shsu.edu), Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems, PHD, Texas A&M University; MBA, Texas Woman's University; MHA, Texas Woman's University; BS, Texas A&M University

Mary K Borcharding, MFA (art_mkb@shsu.edu), Professor of Art, Department of Art, MFA, Indiana University-Bloomington; BS, Univ of Wisconsin-Madison

Maria Del Pi Botero Jaramillo, PHD (mdb037@shsu.edu), *Professor of Philosophy, Department of Psychology & Philosophy*, PHD, York University; MA, York University; BA, Universidad Javeriana

Tony Lane Boutte, DMA (txb023@shsu.edu), *Professor of Music, School of Music*, DMA, Univ of Maryland-College Park; MM, Eastman School of Music; BFA, Louisiana Tech University

Tershundrea Branch, PHD (txb035@shsu.edu), *Assistant Professor of Counselor Education, Department of Counselor Education*, PHD, Sam Houston State University; MA, Prairie View A&M University; BS, Lamar University

Frances Elizabeth Brandau, PHD (scm_feb@shsu.edu), *Professor and Chair of Communication Studies, Department of Communication Studies*, PHD, LSU & A&M College; MA, Univ of Southern Mississippi; BS, Univ of Southern Mississippi

Jonathan P Breazeale, PHD (jpb005@shsu.edu), *Associate Professor of Finance, Department of Finance & Banking*, PHD, Texas A&M University; MBA, Millsaps College; BS, United States Military Academy

Emma Renee Breslauer, MFA (erb053@shsu.edu), *Assistant Professor of Art, Department of Art*, MFA, Univ of Texas-Arlington; BFA, Univ of Texas-Arlington

Rosemarie M Brock, PHD (rmb043@shsu.edu), *Associate Professor of Library Science and Technology, Department of Library Sci & Technology*, PHD, Texas Woman's University; MLS, Texas Woman's University; BA, Oklahoma State University

Joshua Martin Bronfman, PHD (jxb102@shsu.edu), *Associate Professor of Music, School of Music*, PHD, Florida State University; MA, Oregon State University; BME, Florida State University

Ryan M Broussard, PHD (rxb055@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Univ of Alabama-Tuscaloosa; MS, Univ of Louisiana-Lafayette; BA, Univ of Louisiana-Lafayette

Diana Michelle Brown, JD (dxb029@shsu.edu), *Associate Professor of Business Administration, Department of Business Admin & Entrep*, JD, South Texas College of Law; BA, Rice University

Jonathan Nathan Brown, PHD (jnb047@shsu.edu), *Associate Professor of Political Science, Department of Political Science*, PHD, Univ of Maryland-College Park; MA, Univ of Maryland-College Park; BA, Indiana University

Lisa Ogle Brown, EDD (lob002@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, EDD, Oklahoma State University; MED, Univ of Houston-Main; BS, Texas A&M University

Stephen L Brown, PHD (sbrown@shsu.edu), *Professor of Public Health, Department of Public Health*, PHD, Univ of Maryland-College Park; MS, Arizona State University; BS, Brigham Young University

Gina Nicole Brynildsen, PHD (gnb009@shsu.edu), *Assistant Professor of Marketing, Department of Mgmt, Mktg, & Info Systems*, PHD, Florida-Atlantic U; MA, Florida-Atlantic U; BA, Ramapo College; BA, Ramapo College

Jonathan Ronald Bryson, MFA (jrb132@shsu.edu), *Assistant Professor of Art, Department of Art*, MFA, Ball State University; BFA, Clemson University

Sibyl Rae Bucheli, PHD (srb009@shsu.edu), *Professor of Biological Sciences, Department of Biological Sciences*, PHD, Ohio State University; MS, Ohio State University; BA, Hiram College

Harsh Harish Buddhadev, PHD (hhb005@shsu.edu), *Professor of Kinesiology, Department of Kinesiology*, PHD, Iowa State University; MS, Univ of North Texas; BPHIL, Gujarat University

Scottie H Buehler, PHD (scottiecpm@shsu.edu), *Assistant Professor of History, Department of History*, PHD, Univ of Calif-Los Angeles; MA, Univ of Calif-Los Angeles; BA, Univ of Texas At Austin

Emma Kathleen Price Bullock, PHD (exb051@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Utah State University; MMATH, Utah State University; BS, Brigham Young University

Ferry Butar Butar, PHD (mth_fbb@shsu.edu), *Professor of Statistics, Department of Mathematics & Statistics*, PHD, Univ of Nebraska-Lincoln; MA, Univ of Nebraska-Lincoln; MS, Univ of Nebraska-Lincoln; BS, Academy of Statistics; DRS, University of Indonesia

Sandra Vanesa Buzon Vargas, PHD (svb015@shsu.edu), *Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Texas A&M University; MBA, National University of Colombia; BS, University of the North, Colombia

Patrick Buzzini, PHD (patrick.buzzini@shsu.edu), *Professor of Forensic Science, Department of Forensic Science*, PHD, University of Lausanne; MS, University of Lausanne

C

Emily R Cabaniss, PHD (erc016@shsu.edu), *Associate Professor of Sociology, Department of Sociology*, PHD, North Carolina State Univ; MA, Univ of N Carolina-Greensboro; BA, Univ of N Carolina-Greensboro

William John Calderhead, PHD (wjc011@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Univ of Oregon; MED, Univ of Maryland-College Park; MA, University of Virginia - SFS; BS, Univ of Maryland-College Park; BA, The Johns Hopkins University

Rhonda L Callaway, PHD (rlc005@shsu.edu), *Professor of Political Science, Department of Political Science*, PHD, Univ of North Texas; MA, Univ of North Texas; BA, Univ of Texas At Austin

Kiana Ellen Cano, PHD (kec112@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Houston-Main; MA, Univ of Houston-Main; BA, Univ of Houston-Main

Patricia Card, DMA (mus_ppc@shsu.edu), *Professor of Music, School of Music*, DMA, Univ of North Texas; MMUS, Univ of Michigan; BM, Univ of North Texas

Linda G Carrington, PHD (carrington@shsu.edu), *Associate Professor of Accounting, Department of Accounting*, PHD, Univ of Maryland-College Park; MBA, Univ of Kentucky; BBA, Eastern Kentucky University

Christopher Frank Cascio, MFA (cfc005@shsu.edu), *Assistant Professor of Art, Department of Art*, MFA, Univ of Houston-Main; BFA, San Francisco Art Inst

Daniella Kelleigh Cash, PHD (dkc025@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, LSU & A&M College; MA, Univ of Alabama-Huntsville; BS, Florida Southern College

Christopher M Cassidy, PHD (cassidy@shsu.edu), *Associate Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Texas A&M University; MBA, Gonzaga University; BS, U.S.Air Force Academy

Scott Thomas Chapman, PHD (stc008@shsu.edu), *Distinguished Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of North Texas; MS, Univ of N Carolina-Chapel Hill; BS, Wake Forest University; BS, Wake Forest University

Leila Dolce Character, PHD (leilacharacter@shsu.edu), *Assistant Professor of Environmental and Geosciences, Department of Environmental & Geosciences*, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BS, Univ of The South

Danhong Chen, PHD (dxc062@shsu.edu), *Associate Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Penn State Un-Univ Park; PHD, Penn State Un-Univ Park; MA, Southeast University; BA, Nanjing Agricultural University

Yixin Chen, PHD (cindychen@shsu.edu), *Associate Professor of Communication Studies, Department of Communication Studies*, PHD, University at Buffalo, Suny; MA, Univ of Texas-El Paso; ME, Huaqiao University; BE, Huaqiao University

Rebekah Melanie Chiasson, MA (rmc080@shsu.edu), *Assistant Professor of Communication Studies, Department of Communication Studies*, MA, Northern Illinois Un; BA, Keene State College

Paul W Child, PHD (pchild@shsu.edu), *Professor of English, Department of English*, PHD, Univ of Notre Dame; AM, The Johns Hopkins University; MA, James Madison University; BA, Saint John'S University

Hyuk Cho, PHD (hxc005@shsu.edu), *Professor of Computing Science, Department of Computer Science*, PHD, Univ of Texas At Austin; MS, Univ of Texas At Austin; MA, Korea University; BE, Chonbuk National University

Jin Young Choi, PHD (jyc002@shsu.edu), *Professor of Sociology, Department of Sociology*, PHD, Univ of Hawaii At Manoa; MA, Univ of Hawaii At Manoa; MPH, Univ of Hawaii At Manoa; MS, Ewha Women's University; BS, Ewha Women's University

Madhusudan Choudhary, PHD (mxc017@shsu.edu), *Professor of Biological Sciences, Department of Biological Sciences*, PHD, McMaster University; BSC, Patna University

Lindsay Camille Clark, PHD (lclark@shsu.edu), *Associate Professor of Business Administration, Department of Business Admin & Entrep*, PHD, Oklahoma State University; MA, Midwestern State University; BA, Midwestern State University

Kristina Elizabeth Claunch, MLS (kclaunch@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MLS, Texas Woman's University; MS, Southwestern Assembly of God; BS, Sam Houston State University

Judith Alane Clemens-Smucker, PHD (jac300@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Bowling Green State University; BA, Goshen College

Shelly Lynn Clevenger, PHD (sxc167@shsu.edu), *Associate Professor and Chair of Victim Studies, Department of Victim Studies*, PHD, Indiana University of Pennsylv; MA, Indiana University of Pennsylv; BA, Indiana University of Pennsylv

Kevin Mark Clifton, PHD (kmc053@shsu.edu), *Associate Professor of Music, School of Music*, PHD, Univ of Texas At Austin; MM, Univ of Texas At Austin; BA, Austin College

Mona C Cockerham, PHD (mcc053@shsu.edu), *Assistant Professor of Nursing, School of Nursing*, PHD, Univ of Texas HSC-Houston; MSN, Univ of Texas HSC-Houston; BS, Louisiana College

Corinna O Cole, PHD (lls_cvc@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Sam Houston State University; BA, Sam Houston State University

Julie P Combs, EDD (jpc002@shsu.edu), *Distinguished Professor of Educational Leadership, Department of Educational Leadership*, EDD, Texas A&M - Commerce; MED, Texas A&M - Commerce; BS, Texas A&M University

Eric J Connolly, PHD (ejc025@shsu.edu), *Associate Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Florida State University; MS, Univ of North Alabama; BA, West Virginia University

Lisa Ann Connor, MS (lconnor@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MS, Drexel University; BS, Penn State Un-Univ Park

Mary A. Conroy, PHD (psy_mac@shsu.edu), *Distinguished Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Houston-Main; MA, Colorado State University; BA, Michigan State University

Douglas H Constance, PHD (soc_dhc@shsu.edu), *Professor of Sociology, Department of Sociology*, PHD, Univ of Missouri-Columbia; MS, Univ of Missouri-Columbia; BS, Univ of Missouri-Columbia

Fabrice Philippe Conte Williamson, PHD (fcw005@shsu.edu), *Associate Professor of Theatre and Musical Theatre, Department of Theatre & Musical Theatre*, PHD, Univ of Oklahoma-Norman; MFA, Univ of Oklahoma-Norman

Alma Linda Contreras-Vanegas, PHD (alc058@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Texas A&M University; BA, Texas A&M University

Jerry L. Cook, PHD (bio_jlc@shsu.edu), *Professor of Biological Sciences, Department of Biological Sciences*, PHD, Texas A&M University; MS, Colorado State Univ-Pueblo; BS, Colorado State Univ-Pueblo

Tamara J. Cook, PHD (bio_tjc@shsu.edu), *Professor of Biological Sciences, Department of Biological Sciences*, PHD, Texas A&M University; MS, Univ of Nebraska-Lincoln; BS, Univ of Nebraska-Lincoln

Brian Jay Cooper, PHD (bio_bjc@shsu.edu), *Associate Professor of Geology, Department of Environmental & Geosciences*, PHD, Virginia Polytechnic&State U; MS, Virginia Polytechnic&State U; BA, Univ of Calif-Santa Barbara

Beth L Cory, PHD (blc006@shsu.edu), *Associate Professor of Mathematics Education, Department of Mathematics & Statistics*, PHD, University of Virginia - SFS; MS, Florida State University; BS, Liberty University

Thomas H Cox, PHD (thc001@shsu.edu), *Associate Professor of History, Department of History*, PHD, University at Buffalo, Suny; MA, University at Buffalo, Suny; BA, Birmingham-Southern College; BS, Birmingham-Southern College; BS, Birmingham-Southern College

Jaime Leigh Coyne, PHD (jlb110@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Stephen F Austin University; BS, Sam Houston State University

Miltonette Olivia Craig, PHD (moc006@shsu.edu), *Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Florida State University; JD, Georgia State University; MS, Florida Int'L Univ; BA, Spelman College; BA, Spelman College

Kyle Ann Craig-Bogard, MFA (kac118@shsu.edu), *Associate Professor of Theatre and Musical Theatre, Department of Theatre & Musical Theatre*, MFA, Univ of Washington; BA, Baldwin-Wallace College

Nicholas Crawford, PHD (nxc082@shsu.edu), *Assistant Professor of History, Department of History*, PHD, Harvard University; MA, Harvard University; BA, New York University

James William Crosby, PHD (jwc014@shsu.edu), *Professor of Psychology and Associate Dean CHSS, Department of Psychology & Philosophy*, PHD, Oklahoma State University; MS, Abilene Christian University; BS, Abilene Christian University

Kevin Grant Crouch, MFA (kevincrouch@shsu.edu), *Associate Professor of Theatre, Department of Theatre & Musical Theatre*, MFA, New York University; BFA, Sam Houston State University

Dixuan Cui, PHD (dxc164@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Purdue University; MS, Purdue University; BS, Purdue University; BS, Purdue University

George E Curry, MFA (gcurry@shsu.edu), *Assistant Professor of Theatre and Musical Theatre, Department of Theatre & Musical Theatre*, MFA, Boston University; BFA, Sam Houston State University

D

Lisa Joanne Dahlgren, PHD (lxv024@shsu.edu), *Associate Professor of Communication Studies, Department of Communication Studies*, PHD, Arizona State University; MA, Univ of Hawaii At Manoa; BA, Univ of Hawaii At Manoa

Ronald Jude Daigle, PHD (rjd005@shsu.edu), *Professor of Accounting, Department of Accounting*, PHD, Texas Tech University; MS, Texas Tech University; BS, Univ of South Alabama

Michael Ulan Genialovich Dakeev, MS (dakeev@shsu.edu), *Associate Professor of Engineering Technology, Department of Engineering Technology*, MS, Univ of Northern Iowa; BS, Intl Black Sea University; DTECH, Univ of Northern Iowa

Jane C Daquin, PHD (jxd161@shsu.edu), *Associate Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Georgia State University; MS, Georgia State University; BA, University of Albany, Suny; BA, University of Albany, Suny

Jay Tyler Davidson, PHD (jxd115@shsu.edu), *Assistant Professor of Forensic Science, Department of Forensic Science*, PHD, West Virginia University; MS, West Virginia University; BS, Shippensburg University

Patrick Rhodes Davis, PHD (davis@shsu.edu), *Associate Professor of Osteopathic Principles and Practice, Department of Osteopath Principles & Pract*, PHD, East Carolina Univ; BS, Brigham Young University

Juan D Daza Vaca, PHD (jdd054@shsu.edu), *Associate Professor of Biological Sciences, Department of Biological Sciences*, PHD, Univ of Puerto Rico-Rio Piedra; MS, Univ of Puerto Rico-Rio Piedra; BS, Universidad del Valle

Fatih Demiroz, PHD (fxd009@shsu.edu), *Associate Professor of Political Science, Department of Political Science*, PHD, Univ of Central Florida; MPA, Univ of Central Florida; BA, Yeditepe University

Michael T Demson, PHD (mtd007@shsu.edu), *Professor of English, Department of English*, PHD, Grad Sch & Univ Center; MA, Grad Sch & Univ Center; BA, Reed College

Furjen Deng, PHD (soc_fjd@shsu.edu), *Professor of Sociology, Department of Sociology*, PHD, Purdue University; MS, Purdue University; BA, National Taiwan University

James Blackman Dent, PHD (jxd087@shsu.edu), *Associate Professor of Physics, Department of Physics & Astronomy*, PHD, Texas A&M University; BS, Missouri Univ of Sci and Tech

Cosmas B Domonaamwin Dery, PHD (cdery@shsu.edu), *Assistant Professor of Economics, Department of Economics & Intl Business*, PHD, Univ of Calgary; MA, Univ of Lethbridge; BA, University of Ghana

Jennifer Johnson Didier, PHD (jennifer.didier@shsu.edu), *Professor of Kinesiology; Chair of Kinesiology, Department of Kinesiology*, PHD, LSU & A&M College; MS, Texas A&M University; BS, Texas A&M University

Brandy Guntel Doleshal, PHD (bdoleshal@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Texas At Austin; BA, Indiana University; BS, Indiana University

John C Domino, PHD (pol_jcd@shsu.edu), *Professor of Political Science, Department of Political Science*, PHD, Miami University; MA, Eastern Kentucky University; BA, Florida-Atlantic U

Robert E. Donahoo, PHD (eng_rxd@shsu.edu), *Professor of English, Department of English*, PHD, Duke University; MA, Duke University; BA, Baylor University; BA, Baylor University

Melissa Paige Donham, PHD (mpd028@shsu.edu), *Assistant Professor of Education, Department of Teaching & Learning*, PHD, Baylor University; MA, Baylor University; BA, Univ of Mary Hardin Baylor

Karen M Douglas, PHD (kmd007@shsu.edu), *Associate Professor of Sociology, Department of Sociology*, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BBA, Univ of Texas At Austin

Diane Dowdey, PHD (eng_dxd@shsu.edu), *Professor of English, Department of English*, PHD, Univ of Wisconsin-Madison; MA, Univ of Missouri-Columbia; BA, Texas Christian University; BA, Texas Christian University

Charlotte M. Drumm, MFA (art_cmd@shsu.edu), *Professor of Art, Department of Art*, MFA, Florida State University; BA, Louisiana College

Lei Duan, PHD (lxd042@shsu.edu), *Assistant Professor of History, Department of History*, PHD, Syracuse University; MPHIL, Syracuse University; MA, Univ of Massachusetts-Amherst; BA, Nankai University

Xiaoman Duan, PHD (xxd002@shsu.edu), *Assistant Professor of Finance, Department of Finance & Banking*, PHD, Univ of Oklahoma-Norman; MA, Univ of Oklahoma-Norman; BS, Nankai University

Patricia Marie Durham, PHD (pmd006@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M-Corpus Christi; MS, Texas A&M-Corpus Christi; BS, Texas Tech University

E

Paul William Eaton, PHD (pwe003@shsu.edu), *Associate Professor of Educational Leadership, Department of Educational Leadership*, PHD, LSU & A&M College; MED, LSU & A&M College; MED, Univ of Maryland-College Park; BA, Univ of Minnesota-Twin Cities

Thomas S Edelberg, PHD (edelberg@shsu.edu), *Assistant Professor of Library Science and Technology, Department of Library Sci & Technology*, PHD, Indiana University; MA, California St Un-Northridge; BA, Univ of Calif-Los Angeles

William D. Edgington, EDD (wedgington@shsu.edu), *Professor of Education, Department of Teaching & Learning*, EDD, Oklahoma State University; MED, Midwestern State University; BSED, Texas Christian University

Jessica S Elkayam, PHD (jse018@shsu.edu), *Assistant Professor of Philosophy, Department of Psychology & Philosophy*, PHD, Villanova University; MA, Villanova University; BA, Depaul University

Susan G Elkins, MLIS (sge004@shsu.edu), *Associate Professor, Newton Gresham Library, Department of Library Technical Services*, MLIS, Univ of S Carolina-Columbia; BA, Brigham Young University

William A Ellegood, PHD (wxe002@shsu.edu), *Associate Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Univ of Missouri-St Louis; MBA, Ball State University; BS, Kettering University

Hatem Abdelrahman Omar Elshabrawy, PHD (hxe007@shsu.edu), *Assistant Professor of Microbiology, Immunology and Pathology, Department of Molecular & Cellular Biology*, PHD, Univ of Illinois-Chicago; BPHARM, Cairo University

Mevhibe Pinar Emiralioğlu, PHD (mpe005@shsu.edu), *Associate Professor of History, Department of History*, PHD, Univ of Chicago; MA, Univ of Chicago; MA, Bilkent University; BA, Bogazici University

Trevor Kendrick England, PHD (txe008@shsu.edu), *Assistant Professor of Accounting, Department of Accounting*, PHD, Kennesaw State University; JD, Nashville School of Law; MS, Univ of Connecticut; LLM, Univ of Alabama-Tuscaloosa; BS, Tennessee Tech University; BS, Tennessee Tech University

Jason S Enia, PHD (jason.enia@shsu.edu), *Professor and Chair of Political Science, Department of Political Science*, PHD, Univ of Southern California; MA, Fordham University; BA, Univ of Dayton; BA, Univ of Dayton

Gulden Esat, PHD (gxe020@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Houston-Main; MED, Univ of Massachusetts-Amherst; BA, Bogazici University

Bryan Scott Stevens Espinosa, PHD (bse013@shsu.edu), *Assistant Professor of Music, School of Music*, PHD, Univ of North Texas; MA, Univ of North Texas; BM, Univ of North Texas

Charlotte Rebekah Esplin, PHD (cre032@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Brigham Young University; MS, Brigham Young University; BS, Brigham Young University

Brent Cullen Estes, PHD (bce001@shsu.edu), *Associate Professor of Kinesiology, Department of Kinesiology*, PHD, Florida State University; MSS, U.S. Sports Academy; BS, Faulkner University

F

Hui Fang, PHD (hfang@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Houston-Main; ME, Univ of Houston-Main; MS, Zhejiang University; BS, Zhejiang University

Syed Hasib Akhter Faruqi, PHD (shf006@shsu.edu), *Assistant Professor of Engineering Technology, Department of Engineering Technology*, PHD, Univ of Texas-San Antonio; MSC, Univ of Texas-San Antonio; BS, Khulna University of Engineering & Technology Bangladesh

Wen Feng, PHD (wxf008@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Kansas; MA, Univ of Kansas

Linda Gail Fergus, PHD (lgf011@shsu.edu), *Assistant Professor of Food Science and Nutrition, Department of Human Sciences*, PHD, LSU & A&M College; MS, Texas Woman's University; BS, LSU & A&M College

Maria M Feu Lopez, PHD (mmf017@shsu.edu), *Associate Professor of Spanish, Department of World Languages & Cultures*, PHD, Univ of Houston-Main; MA, Hood College; BA, Universidad de Barcelona

Rebecca L Finley, MFA (rlf001@shsu.edu), *Professor of Photography and Acting Chair of Art, Department of Art, MFA, San Francisco Art Inst; MFA, San Francisco Art Inst; BA, Univ of Tennessee-Knoxville; BA, Univ of Tennessee-Knoxville*

Jessica Caitlin Fleming, MA (jcc063@shsu.edu), *Assistant Professor of Victim Studies, Department of Criminal Justice & Criminology, MA, Sam Houston State University; BS, Sam Houston State University*

Jamile Marmitt Forcelini, PHD (forcelini@shsu.edu), *Assistant Professor of Spanish, Department of World Languages & Cultures, PHD, Florida State University; MA, Florida State University; BA, University of Passo Fundo*

Andrea S Foster, PHD (asf004@shsu.edu), *Professor of Education, Department of Teaching & Learning, PHD, Texas A&M University; MED, Texas A&M University; BS, Texas A&M University*

Mark W. Frank, PHD (eco_mwf@shsu.edu), *Professor of Economics, Department of Economics & Intl Business, PHD, Univ of Texas At Dallas; MS, Univ of Texas At Dallas; BS, Texas A&M University*

Barry Friedman, PHD (phy_baf@shsu.edu), *Professor of Physics, Department of Physics & Astronomy, PHD, Univ of Illinois-Urbana; MS, Univ of Illinois-Urbana; BA, Rice University*

Tiffany Nicole Fruge Jones, PHD (tfjones@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics, PHD, Baylor University; MS, McNeese State University; BS, McNeese State University*

Matthew Bryan Fuller, PHD (mbf005@shsu.edu), *Professor of Educational Leadership, Department of Educational Leadership, PHD, Illinois State University; MS, Texas A&M University; BA, Texas A&M University*

Mary C Funck, PHD (mcf012@shsu.edu), *Associate Professor of Finance, Department of Finance & Banking, PHD, Univ of Mississippi; MBA, Western Illinois University; MS, Western Illinois University; BS, Western Illinois University*

Marcus James Funk, PHD (mjf023@shsu.edu), *Associate Professor of Mass Communication, Department of Mass Communication, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BA, Trinity University*

G

Di Gao, PHD (dxg085@shsu.edu), *Assistant Professor of Statistics, Department of Mathematics & Statistics, PHD, North Dakota State University; MA, Univ of Missouri-Columbia; BEC, Tianjin University; BBA, Tianjin University*

Lesley Ann Gardiner, MD (lesley.gardiner@shsu.edu), *Assistant Professor of Pediatrics, Department of Primary Care & Clinical Medi, MD, Texas A&M University; BS, Texas A&M-Corpus Christi*

Jeffrey A Gardner, PHD (jag175@shsu.edu), *Assistant Professor of Sociology, Department of Sociology, PHD, Univ of Georgia; MA, Univ of Georgia; BA, Brigham Young University-Idaho*

Hope Knight Garner, JD (hlk016@shsu.edu), *Assistant Professor of General Business and Finance, Department of Business Admin & Entrep, JD, South Texas College of Law; BBA, Baylor University*

Randall L Garner, PHD (rgarner@shsu.edu), *Professor of Criminal Justice and Criminology and Associate Dean, COCJ, Department of Criminal Justice & Criminology, PHD, Univ of Houston-Main; MA, Univ of Houston-Clear Lake; BS, Univ of Houston-Clear Lake*

Marcos Esteban Garza Madrid, PHD (marcos.garza@shsu.edu), *Associate Professor of Physiology, Department of Physiology & Pharmacology, PHD, Instituto Tecnológico de Monterrey; MD, Instituto Tecnológico de Monterrey*

Yvonne Garza-Chaves, PHD (yxg002@shsu.edu), *Professor of Counselor Education, Department of Counselor Education, PHD, Univ of North Texas; MSW, Our Lady of Lake University; BSW, Univ of Texas-Pan American*

Melissa Dawn Gatlin, PHD (mdg089@shsu.edu), *Assistant Professor of Education, Department of Teaching & Learning, PHD, Capella University; MED, Stephen F Austin University; MBA, Univ of St Thomas; BBA, Stephen F Austin University*

Eduardo Geraldo de Campos, PHD (exg248@shsu.edu), *Assistant Professor of Forensic Science, Department of Forensic Science, PHD, University of Sao Paulo; MS, University of Sao Paulo; BS, University of Sao Paulo*

Hannah R Gerber, PHD (hrg004@shsu.edu), *Professor of Education, Department of Teaching & Learning, PHD, Univ of Alabama-Tuscaloosa; MS, Florida State University; BA, Florida State University*

Jurg Gerber, PHD (icc_jxg@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Washington State University; MA, Washington State University; BA, Eastern Washington University*

Brian K Gibbs, PHD (bxg012@shsu.edu), *Professor of Music, School of Music, PHD, Walden University; MS, Amberton University; BM, Southern Methodist University*

Joshua M Gilliland, PHD (jmg177@shsu.edu), *Assistant Professor Environmental and Geosciences, Department of Environmental & Geosciences*, PHD, LSU & A&M College; MS, Western Kentucky University; BS, University of Tulsa

Melissa Catharine Glasscock, MFA (mxg102@shsu.edu), *Associate Professor of Art, Department of Art*, MFA, Savannah College of Art & Design; BFA, Univ of Central Florida

Amber Joyce Godwin, PHD (ajg007@shsu.edu), *Assistant Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Sam Houston State University; BA, Univ of West Florida

Fidel Gonzalez, PHD (fxg001@shsu.edu), *Professor of Economics, Department of Economics & Intl Business*, PHD, Univ of Texas At Austin; MS, Univ of Texas At Austin

Darren P Grant, PHD (dgrant@shsu.edu), *Associate Professor of Economics, Department of Economics & Intl Business*, PHD, Florida State University; BS, Florida State University

Nicholas Alexander Graves, MFA (nag023@shsu.edu), *Associate Professor of Theatre and Chair, Theatre & Musical Theatre, Department of Theatre & Musical Theatre*, MFA, Indiana University-Bloomington; BFA, Abilene Christian University

Adele Renee Gravois, PHD (rgl003@shsu.edu), *Associate Professor of Marketing, Department of Mgmt, Mktg, & Info Systems*, PHD, Virginia Polytechnic&State U; MBA, Univ of Houston-Main; BA, Southeastern Louisiana Univ.; BA, Southeastern Louisiana Univ.

Salandra Deshawn Grice-Johnson, EDM (sxxg247@shsu.edu), *Assistant Professor of Education, Department of Teaching & Learning*, EDM, Texas A&M University

Allan David Grogan, PHD (stdadg27@shsu.edu), *Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Concordia University-Canada; MS, Concordia University-Canada; MBA, Sam Houston State University; BS, Sam Houston State University

Dustin E Gross, PHD (deg013@shsu.edu), *Associate Professor of Chemistry, Department of Chemistry*, PHD, Univ of Texas At Austin; BS, Univ of Arizona

Elizabeth A Gross, PHD (eag041@shsu.edu), *Associate Professor of Library Science and Technology, Department of Library Sci & Technology*, PHD, Wayne State University; MLIS, Wayne State University; BA, Northern Michigan University

Ross Joseph Guida, PHD (ross.guida@shsu.edu), *Associate Professor of Geography, Department of Environmental & Geosciences*, PHD, Southern Illinois U-Carbondale; MS, Univ of Nevada-Las Vegas; BA, Univ of Wisconsin-Eau Claire

Christina Marie Gushanas, PHD (cgushanas@shsu.edu), *Eleanor and Charles Garrett Endowed Assistant Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Texas A&M University; BS, Lamar University

Jose Antonio Gutierrez, PHD (jag063@shsu.edu), *Associate Professor of Finance, Department of Finance & Banking*, PHD, Univ of Texas-San Antonio; MS, Univ of Texas-San Antonio; BBA, Univ of Texas-San Antonio

H

Lory E Haas, EDD (leh015@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, EDD, Sam Houston State University; MED, Sam Houston State University; BAT, Sam Houston State University

Donovan C Haines, PHD (dch009@shsu.edu), *Professor and Chair of Chemistry, Department of Chemistry*, PHD, Wichita State University; BS, Wichita State University

Mark S Hainline, PHD (msh004@shsu.edu), *Assistant Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas Tech University; MS, Texas Tech University; BS, Sam Houston State University

Julie E Hall, PHD (eng_jeh@shsu.edu), *Professor of English, Department of English*, PHD, Univ of N Carolina-Chapel Hill; MA, Univ of N Carolina-Chapel Hill; BA, Univ of The South

Sirkka Helena Halmari, PHD (eng_shh@shsu.edu), *Professor of English, Department of English*, PHD, Univ of Southern California; MA, Univ of Southern California; MA, California St Un-San Bernardino; MSS, University of Tampere; MA, University of Tampere; BA, University of Tampere

Michael John Hanson, MLS (hansonm@shsu.edu), *Associate Professor, Newton Gresham Library, Department of Library Technical Services*, MLS, Indiana University; BA, Univ of Utah

James Michael Harper, PHD (jmharper@shsu.edu), *Associate Professor of Biology, Department of Biological Sciences*, PHD, Univ of Idaho; BS, SUNY College At Geneseo

John P Harris, PHD (jph020@shsu.edu), *Associate Professor of Geology of Environmental and Geosciences, Department of Environmental & Geosciences*, PHD, Texas A&M University; MS, Univ of Arkansas-Fayetteville; BS, Univ of Arkansas-Fayetteville

Katie Lee Ann Harris, MS (stdkld13@shsu.edu), *Assistant Professor of Accounting, Department of Accounting*, MS, Sam Houston State University; BBA, Sam Houston State University

Elizabeth Noel Hartsell, PHD (enh033@shsu.edu), *Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Florida; MA, Univ of Florida; BA, North Carolina State Univ

Oscar J Harvin, PHD (ojh002@shsu.edu), *Associate Professor of Accounting, Department of Accounting*, PHD, Florida-Atlantic U; MBA, Univ of N Florida; BS, Bethune-Cookman University

Sharmin Hasan, PHD (sxh130@shsu.edu), *Assistant Professor of Biological Sciences, Department of Biological Sciences*, PHD, Univ of Tokyo; MS, Univ of Tokyo; BSC, Univ of Rajshahi

Cherine Hatem, PHD (cxh164@shsu.edu), *Visiting Assistant Professor of Food Science and Nutrition, Department of Human Sciences*, PHD, Univ of Houston-Main; MS, Case Western Reserve Univ; BS, John Carroll University

Deborah A. Hatton, MA (hatton@shsu.edu), *Instructor of Mass Communication; Acting Associate Chair, MCOM, Department of Mass Communication*, MA, Univ of Texas At Tyler; BS, Texas A&M - Commerce

Damon Martin Hay, PHD (dhay@shsu.edu), *Associate Professor and Chair of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Univ of Houston-Main; MS, Univ of Houston-Main; BS, Univ of Texas At Austin

Joshua S Haynes, PHD (jsh064@shsu.edu), *Assistant Professor of History, Department of History*, PHD, Univ of Georgia; MA, Univ of Mississippi; BA, Tulane University

Charles Victor Heath, PHD (cvh003@shsu.edu), *Associate Professor of History, Department of History*, PHD, Tulane University; MA, Tulane University; BA, Tulane University

Emily Catherine Howes Heilman, DM (ech035@shsu.edu), *Assistant Professor of Music, School of Music*, DM, Florida State University; MM, Univ of Louisville; BM, Univ of Louisville

Cassy Daniels Henderson, PHD (cdh045@shsu.edu), *Associate Professor of Accounting, Department of Accounting*, PHD, Univ of Texas-El Paso; BBA, Univ of Texas-El Paso

Craig E Henderson, PHD (ceh003@shsu.edu), *Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of North Texas; MA, Hardin Simmons University; BS, Howard Payne University; BS, Howard Payne University

Susan Elizabeth Henderson, PHD (shenderson@shsu.edu), *Assistant Professor of Counselor Education, Department of Counselor Education*, PHD, Sam Houston State University; MS, Sam Houston State University; MA, Hardin Simmons University; BS, Stephen F Austin University

Shaina Marie Herman, PHD (sxh169@shsu.edu), *Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, University of Albany, Suny; MA, University of Albany, Suny; BA, Indiana Univ of Pa

Mayrena Isamar Hernandez, PHD (mih012@shsu.edu), *Assistant Professor of Kinesiology, Department of Kinesiology*, PHD, Univ of Wisconsin-Madison; MPH, Kansas State University; BS, Univ of Texas-Arlington

Desiree Gretchen Hickman, EDD (dgh029@shsu.edu), *Assistant Professor of Education, Department of Teaching & Learning*, EDD, Jackson State University; MS, Jackson State University; BS, Alcorn State University

Darci N Hill, PHD (eng_dnh@shsu.edu), *Professor of English, Department of English*, PHD, Texas Woman's University; MA, Texas State Univ-San Marcos; BA, Texas State Univ-San Marcos; BA, Texas State Univ-San Marcos

Joseph C Hill, PHD (jch031@shsu.edu), *Associate Professor and Chair of Environmental and Geosciences, Department of Environmental & Geosciences*, PHD, Univ of Missouri-Columbia; PHD, Univ of Missouri-Columbia; MS, Univ of Tennessee-Knoxville; MS, Univ of Tennessee-Knoxville; BS, Univ of Tennessee-Knoxville; BS, Univ of Tennessee-Knoxville

Sandy Purdum Hinkley, PHD (sxh080@shsu.edu), *Associate Professor of Music, School of Music*, PHD, Florida State University; MED, Univ of Central Florida; BMED, Florida State University

Jamie H Hinojosa, MD (jaime.hinojosa@shsu.edu), *Assistant Professor of Anatomy and Histology, Department of Clinical Anatomy*, MD, Univ of Texas HSC-Houston; MS, Lincoln Memorial University; BS, Univ of Texas-Brownsville

Meagan Elizabeth Hinze, PHD (meh066@shsu.edu), *Assistant Professor of Chemistry, Department of Chemistry*, PHD, Cornell University; MS, Cornell University; BS, Butler University

Sarah Anne Hirsch, PHD (sah110@shsu.edu), *Assistant Professor of Nursing, School of Nursing*, PHD, Capella University; MSN, Univ of Texas-Arlington; BSN, Texas Tech Univ-Hlth Sci Cntr

Christopher Eugene Hobbs, PHD (ceh079@shsu.edu), Associate Professor of Chemistry, Department of Chemistry, PHD, Texas A&M University; BS, Angelo State University

Tracey Samantha Hodges, PHD (traceyhodges@shsu.edu), Associate Professor of Curriculum and Instruction, Department of Teaching & Learning, PHD, Texas A&M University; MED, Texas A&M University; BA, Texas A&M University

Victoria Smith Hollas, PHD (torihollas@shsu.edu), Associate Professor of Education, Department of Teaching & Learning, PHD, Texas A&M University; BA, Houston Christian University

Melinda Ann Holt, PHD (mxm014@shsu.edu), Professor of Statistics and Dean, COSET, Department of Mathematics & Statistics, PHD, Baylor University; MA, Baylor University; BA, Baylor University

Peggy Philpot Holzweiss, PHD (pholzweiss@shsu.edu), Associate Professor of Educational Leadership, Department of Educational Leadership, PHD, Texas A&M University; MS, Texas A&M University; BS, Texas A&M University

Kaitlin Ann Hopkins, PHD (kah147@shsu.edu), Assistant Professor of Agricultural Sciences, Department of Agricultural Sciences, PHD, Texas A&M University; MS, Stephen F Austin University; BS, Stephen F Austin University

Rachel Michelle Houston, PHD (rmh034@shsu.edu), Assistant Professor of Forensic Science, Department of Forensic Science, PHD, Sam Houston State University; BS, Univ of Texas At Dallas

Henry E. Howey, DMA (mus_heh@shsu.edu), Professor of Music, School of Music, DMA, University of Iowa; MMUS, Univ of Illinois-Urbana; BMUS, Univ of Illinois-Urbana

TzeLi Hsu, PHD (thsu@shsu.edu), Associate Professor of Sociology, Department of Sociology, PHD, Florida State University; MS, Mississippi State University; BA, National Taiwan University

Yao Huang, PHD (yxh051@shsu.edu), Assistant Professor of Library Science and Technology, Department of Library Sci & Technology, PHD, Florida State University; MS, The University of Memphis; BA, University of Electronic Science & Tech of China

Caleb George Hubbard, PHD (cgh034@shsu.edu), Assistant Professor of Communication Studies, Department of Communication Studies, PHD, Univ of Oklahoma-Norman; MA, West Texas A&M State Univ; BS, West Texas A&M State Univ

Adam L Hubrig, PHD (axh151@shsu.edu), Assistant Professor of English, Department of English, PHD, Univ of Nebraska-Lincoln; MA, Univ of Nebraska-Lincoln; BA, Concordia University

Lesley L Hughes, PHD (llh036@shsu.edu), Assistant Professor of Music, School of Music, PHD, Univ of Wisconsin-Madison; DMA, Univ of Wisconsin-Madison; MA, Univ of Wisconsin-Madison; BM, Univ of Kansas

Sheree Robyn Hughes, PHD (sxh039@shsu.edu), Associate Professor and Chair of Forensic Science, Department of Forensic Science, PHD, Bond University; BS, University of Queensland (The)

I

Laura Theresa Issue, PHD (liti002@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Univ of Miami; BS, Ohio State University

Jason R Ingram, PHD (jri004@shsu.edu), Professor and Chair of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Michigan State University; MA, Southern Illinois U-Carbondale; BA, Southern Illinois U-Carbondale

ABM Rezbaul Islam, PHD (ari014@shsu.edu), Assistant Professor of Computer Science, Department of Computer Science, PHD, Univ of North Texas; MS, Ajou University; BSC, Skakjalal Univ of Sci & Techno

J

Farid Jahantab, PHD (fxj007@shsu.edu), Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems, PHD, Univ of Texas-El Paso; MA, London Metropolitan University; BE, Khaje Nasir Toosi University of Technology

Carol Renee James, PHD (phy_crj@shsu.edu), Professor of Physics, Department of Physics & Astronomy, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BA, Rice University

William A. Jasper, PHD (mth_waj@shsu.edu), Professor of Mathematics Education, Department of Mathematics & Statistics, PHD, Texas A&M University; MS, Univ of Southern California; BS, Lafayette College

Kurt R Jesswein, PHD (jesswein@shsu.edu), Associate Professor of Finance and Chair, Finance and Banking, Department of Finance & Banking, PHD, Univ of S Carolina-Columbia; MIB, Univ of S Carolina-Columbia; BBA, Univ of Wisconsin-Whitewater

Haodi Jiang, PHD (hxj024@shsu.edu), *Assistant Professor of Computer Science, Department of Computer Science*, PHD, New Jersey Institute of Techn; MS, Florida Int'L Univ; BE, Southwest University

Daphne Diane Johnson, PHD (edu_dxe@shsu.edu), *Professor of Education, Department of Teaching & Learning*, PHD, Univ of Houston-Main; MS, Univ of Houston-Clear Lake; BSED, Univ of Houston-Main

Jonathan Johnson, PHD (jcj055@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Texas At Austin; MS, Univ of Texas-Arlington; BS, Univ of Texas At Dallas

Robyn MacKenzie Johnson, PHD (rmj036@shsu.edu), *Assistant Professor of English, Department of English*, PHD, Univ of Calif-Riverside; AM, Univ of Tennessee-Chattanooga; BA, Depaul University

Stacy Horany Johnson, MS (shjohnson@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MS, Univ of North Texas; BS, Tulane University

Steve J Johnson, PHD (sji008@shsu.edu), *Associate Professor of Finance, Department of Finance & Banking*, PHD, Univ of Utah; MS, Univ of Nebraska-Lincoln; BA, Union College

Carla D Jones, PHD (cdj033@shsu.edu), *Associate Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Arizona State University; MBA, Northwestern University; BS, California St Un-Northridge

Nathan P Jones, PHD (nxj008@shsu.edu), *Associate Professor of Security Studies, Department of Security Studies*, PHD, Univ of Calif-Irvine; MA, Univ of Calif-Irvine; BA, Univ of Calif-Berkeley

Brian Matthew Jordan, PHD (bmj018@shsu.edu), *Associate Professor and Chair of History, Department of History*, PHD, Yale University; MA, Yale University; MPHIL, Yale University; BA, Gettysburg College

Maribeth Frances Jorgensen, PHD (mxj040@shsu.edu), *Associate Professor of Counselor Education and Assistant Dean, COED, Department of Counselor Education*, PHD, The University of South Dakota; MSED, Univ of Nebraska-Kearney; BS, Univ of Nebraska-Kearney

Praphul Joshi, PHD (pxj015@shsu.edu), *Professor of Public Health, Department of Public Health*, PHD, Univ of S Carolina-Columbia; MPH, Univ of S Carolina-Columbia; BDS, Bangalore University

K

Ram Chandra Kafle, PHD (rckafle@shsu.edu), *Associate Professor of Statistics, Department of Mathematics & Statistics*, PHD, Univ of South Florida; MS, Univ of Akron; MS, Tribhuvan University; BS, Tribhuvan University

Timothy S. Kalafut, PHD (tim.kalafut@shsu.edu), *Associate Professor of Forensic Science, Department of Forensic Science*, PHD, Texas A&M University; BA, Whitworth College

Barbara Alicja Kaminska, PHD (bak018@shsu.edu), *Associate Professor of Art, Department of Art*, PHD, Univ of Calif-Santa Barbara; MA, University of Warsaw

Ebrahim Parvaresh Karan, PHD (epk008@shsu.edu), *Quanta Endowed Associate Professor of Engineering Technology, Department of Engineering Technology*, PHD, Georgia Inst of Tech; MSC, Tehran Polytechnic; BSC, Tehran Polytechnic

Anand Bahadur Karki, PHD (abk019@shsu.edu), *Assistant Professor of Biological Sciences, Department of Biological Sciences*, PHD, University of Tulsa; MS, Tribhuvan University; BS, Tribhuvan University

Scott Aaron Kaukonen, PHD (kaukonen@shsu.edu), *Associate Professor of English, Department of English*, PHD, Univ of Missouri-Columbia; MFA, Univ of Arizona; BA, Hope College

Masoud Kazemzadeh, PHD (mxk002@shsu.edu), *Associate Professor of Political Science, Department of Political Science*, PHD, Univ of Southern California; MA, Univ of Southern California; BA, Univ of Minnesota-Twin Cities

Rosanne S Keathley, PHD (hpe_rsk@shsu.edu), *Professor of Public Health, Department of Public Health*, PHD, Texas A&M University; MA, Sam Houston State University; BAT, Sam Houston State University

Stanley F. Kelley, PHD (sfkelley@shsu.edu), *Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Texas A&M University; BS, Texas A&M University

Owen Joseph Kelly, PHD (ojk003@shsu.edu), *Assistant Professor of Nutrition, Department of Molecular & Cellular Biology*, PHD, University College Cork; BSC, University College Cork

Sarah Kerrigan, PHD (sxk003@shsu.edu), *Professor of Forensic Science, Department of Forensic Science*, PHD, University of British Columbia; BSC, University of Hull

Khalid Mahmood Khan, DPH (kxk051@shsu.edu), Associate Professor of Public Health, Department of Public Health, DPH, Columbia University; MSC, University of Dhaka; BSC, University of Dhaka

Parichehr Kianian, PHD (pkianian@shsu.edu), Assistant Professor of Marketing, Department of Mgmt, Mktg, & Info Systems, PHD, Univ of Houston-Main; MBA, Univ of Tehran-Iran; BSC, Sharif Univ of Technology

Bit Na Kim, PHD (bitna.kim@shsu.edu), Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Sam Houston State University; BA, Chungbuk National University

Dianna Lynn Kim, JD (dlk011@shsu.edu), Associate Professor, Newton Gresham Library, Department of Library Public Services, JD, Mitchell Hamline Sch of Law; MS, Univ of North Texas; BS, Illinois State University

Doo Young Kim, PHD (dkim@shsu.edu), Associate Professor of Statistics, Department of Mathematics & Statistics, PHD, Univ of South Florida; MA, Ball State University; BS, Gachon University

Emily Taehee Kim, MFA (thkim@shsu.edu), Professor of Art, Department of Art, MFA, LSU & A&M College; BFA, Hanyang University

Min Hyun Kim, PHD (mxk056@shsu.edu), Associate Professor of Kinesiology, Department of Kinesiology, PHD, Univ of New Mexico; MA, California St Un-San Bernardino; BPED, Kyung Hee Univ Seoul; BPED, Kyung Hee Univ Seoul

Nam Young Kim, PHD (nyk001@shsu.edu), Associate Professor and Chair of Mass Communication, Department of Mass Communication, PHD, LSU & A&M College; MA, Penn State Un-Univ Park; MAC, Sookmyung Women's University; BA, Sookmyung Women's University

Youn Oh Kim, PHD (younoh@shsu.edu), Associate Professor of Economics, Department of Economics & Intl Business, PHD, Univ of Southern California; MA, Univ of Southern California; BA, Ewha Womans Univ.

Kyle Douglas Kindred, DMA (kdk001@shsu.edu), Professor of Music, School of Music, DMA, Univ of Texas At Austin; MM, Univ of Texas At Austin; BM, Wichita State University

Kimberly Campbell Kinnaid, PHD (kck017@shsu.edu), Assistant Professor of Library Science, Department of Library Sci & Technology, PHD, Texas Woman's University; MLS, Texas Woman's University; BS, Texas A&M University

Alexander Boone Kinney, PHD (akinney@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Univ of Arizona; MA, Univ of Arizona; BA, Penn State University

Tracy Rouly Knight, EDD (trk033@shsu.edu), Associate Professor of American Sign Language, Department of World Languages & Cultures, EDD, Lamar University; MS, Lamar University; BA, Gallaudet University

Ginger Y Ko, PHD (gingerko@shsu.edu), Assistant Professor of English, Department of English, PHD, Univ of Georgia; MFA, Univ of Wyoming; BS, Indiana University-Bloomington; BA, Univ of Calif-Los Angeles

Steven David Koether, PHD (stevenkoether@shsu.edu), Assistant Professor of Biological Sciences, Department of Biological Sciences, PHD, Texas A&M University; MS, Sam Houston State University; BS, Texas A&M University

Gerald Kohers, PHD (kohers@shsu.edu), Professor of Management Information Systems and Chair, Dept of Mgmt and Mktg, Department of Mgmt, Mktg, & Info Systems, PHD, Virginia Polytechnic&State U; MBA, Virginia Polytechnic&State U; BS, Mississippi State University

Stuti Subbaiah Kokkalera, PHD (sxk078@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Northeastern University; LLM, Georgetown University; LLB, Gujarat University

Andrey Vitalyevich Koptelov, PHD (axk022@shsu.edu), Associate Professor of Education, Department of Teaching & Learning, PHD, Academy of Pedagogical Science; BED, Kirov State Pedagogical Inst

Colton Ellis Krawietz, PHD (cek043@shsu.edu), Assistant Professor of Communication Studies, Department of Communication Studies, PHD, Univ of Texas At Austin; MED, Univ of Texas At Austin; MA, Univ of Texas At Austin; BA, LSU & A&M College

Naomi Lynne Krawzik, PHD (stdnlv11@shsu.edu), Assistant Professor of Mathematics, Department of Mathematics & Statistics, PHD, Univ of North Texas; MS, Sam Houston State University; BS, Alma College

Eroll Kuhn, PHD (exk026@shsu.edu), Assistant Professor of Security Studies, Department of Security Studies, PHD, Univ of N Carolina-Chapel Hill; MA, Univ of N Carolina-Chapel Hill; BA, Vassar College; BA, Vassar College

Lana Kuscer, DMA (lxx025@shsu.edu), Assistant Professor of Music, School of Music, DMA, Univ of North Texas; MM, Hochschule fur Musik und Theat; BM, Royal College of Music

L

Kimberly N LaPrairie, PHD (knl007@shsu.edu), Associate Professor of Library Science and Technology, Department of Library Sci & Technology, PHD, LSU & A&M College; MED, Univ of Louisiana-Lafayette; BBA, Henderson State University

Leena Jo Landmark, PHD (landmark@shsu.edu), Professor of Education, Department of Teaching & Learning, PHD, Texas A&M University; MED, Texas A&M University; BA, Texas A&M University

John W Lane, DMA (jwl002@shsu.edu), Professor of Music, School of Music, DMA, Univ of Cincinnati; MM, Univ of North Texas; BM, Stephen F Austin University

Mae Ann Lane, EDD (mal024@shsu.edu), Associate Professor of Education, Department of Teaching & Learning, EDD, Sam Houston State University; MED, Texas A&M - Commerce; BA, Abilene Christian University

Hillary Anne Langley, PHD (hlangley@shsu.edu), Associate Professor of Psychology, Department of Psychology & Philosophy, PHD, Univ of N Carolina-Chapel Hill; BA, Univ of N Carolina-Chapel Hill

Nicolas J Lantz, MFA (nick.lantz@shsu.edu), Associate Professor of English, Department of English, MFA, Univ of Wisconsin-Madison; BA, Lewis & Clark College

Victoria Pettersen Lantz, PHD (vplantz@shsu.edu), Associate Professor and Acting Associate Chair of Theatre, Department of Theatre & Musical Theatre, PHD, Univ of Wisconsin-Madison; MA, Univ of Wisconsin-Madison; BA, Lewis & Clark College

Wanda Edelis Leal, PHD (wel004@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Florida State University; MS, Florida State University; BS, Florida State University

Heejin Lee, PHD (heejin.lee@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Univ of Cincinnati; MS, Univ of Cincinnati; LLB, Korean National Police University

Peter Scott Lehmann, PHD (psl003@shsu.edu), Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, PHD, Florida State University; MS, Florida State University; BA, Furman University

Mark R Leipnik, PHD (geo_mrl@shsu.edu), Professor of Geography and Geology, Department of Environmental & Geosciences, PHD, Univ of Calif-Santa Barbara; MBA, Rice University; BA, Univ of Calif-Santa Barbara; BA, Univ of Calif-Santa Barbara

Patrick J Lewis, PHD (pjl001@shsu.edu), Professor of Biology, Associate Dean of Honors College, Department of Biological Sciences, PHD, Duke University; MS, Texas Tech University; BA, Texas Tech University

Chi-Sing Li, PHD (dcl001@shsu.edu), Professor of Counselor Education, Department of Counselor Education, PHD, Texas A&M - Commerce; MED, Univ of Louisiana-Monroe; MED, Univ of Louisiana-Monroe; BA, Univ of Texas At Austin

Peiyao Li, PHD (pxl043@shsu.edu), Assistant Professor of Political Science, Department of Political Science, PHD, Arizona State University; MPA, Wuhan University

Fan Liang, MS (fxl027@shsu.edu), Assistant Professor of Computer Science, Department of Computer Science, MS, Univ of Massachusetts-Dartmouth; BS, Northwestern Polytechnic Univ; DSC, Towson State University

Gan Liang, PHD (phy_gnl@shsu.edu), Professor of Physics, Department of Physics & Astronomy, PHD, Rutgers University; BS, Beijing University

Sungdae Lim, PHD (slim@shsu.edu), Assistant Professor of Political Science, Department of Political Science, PHD, Florida State University; MPA, Florida State University; BPA, Soongsil University

Jeffrey L Littlejohn, PHD (jll004@shsu.edu), Professor of History, Department of History, PHD, Univ of Arkansas-Fayetteville; MA, Univ of Arkansas-Fayetteville; BA, Belmont University

Qingzhong Liu, PHD (qxl005@shsu.edu), Professor of Computer Science, Department of Computer Science, PHD, New Mexico Inst/Mining/Tech; ME, Sichuan University; BE, Northwestern Polytechnic Univ

Xing Liu, MS (xxl020@shsu.edu), Assistant Professor of Computer Science, Department of Computer Science, MS, Lawrence Inst. of Tc; BE, Shanghai Univ of Engr Science; DSC, Towson State University

Yu Liu, PHD (yxl068@shsu.edu), Assistant Professor of Public Health, Department of Public Health, PHD, Emory University; MPH, Yale University; BBA, Nankai University

Mario G Loomis, MD (mxl107@shsu.edu), Associate Professor of Anatomy and Chair, Clinical Anatomy, Department of Clinical Anatomy, MD, Univ of Vermont&State Agr Col; AB, Cornell University

Tabbatha Dawn Lopez, PHD (tdl030@shsu.edu), Assistant Professor of Food Science & Nutrition and Dietetics Director, Department of Human Sciences, PHD, Univ of Houston-Main; MS, Texas Tech University; BS, Univ of Houston-Main; BS, Univ of Houston-Main

Wojciech Lorenc, MFA (wlorenc@shsu.edu), Professor of Mass Communication, Department of Mass Communication, MFA, Depaul University; BA, Columbia College-Chicago

Anna Hommadova Lu, PHD (anyalu@shsu.edu), Assistant Professor of Communication Studies, Department of Communication Studies, PHD, Arizona State University; PHD, University of Tsukuba; MA, University of Tsukuba; BA, Minnesota State Un-Moorhead

Connor James Lubojacky, PHD (cjl076@shsu.edu), Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems, PHD, Univ of Houston-Main; MSC, Univ of Edinburgh; BS, Univ of Texas At Dallas; BS, Univ of Texas At Dallas; BS, Univ of Texas At Dallas

Russell P Lundberg, PHD (rxl027@shsu.edu), Associate Professor of Security Studies, Department of Security Studies, PHD, Pardee Rand Graduate School; MPHIL, Pardee Rand Graduate School; MPP, Univ of Maryland-College Park; BA, Hope College

William I Lutterschmidt, PHD (bio_wil@shsu.edu), Professor of Biology, Department of Biological Sciences, PHD, Univ of Oklahoma-Norman; MS, Southeastern Louisiana Univ.; BS, De Sales University

Aaron Matthew Lynne, PHD (aml027@shsu.edu), Professor and Chair of Biological Sciences, Department of Biological Sciences, PHD, North Dakota State University; BS, North Dakota State University

M

Junkun Ma, PHD (jxm158@shsu.edu), Professor of Engineering Technology, Department of Engineering Technology, PHD, Univ of Calif-San Diego; MS, N China Electric Power Univ; BE, Tsinghua University

Martin E Malandro, PHD (mem037@shsu.edu), Associate Professor of Mathematics, Department of Mathematics & Statistics, PHD, Dartmouth College; AM, Dartmouth College; BS, Texas Tech University

Tiffany Robin Nicole Maldonado, PHD (tmaldonado@shsu.edu), Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems, PHD, Univ of Houston-Main; BA, Rice University; BA, Rice University

Enrique Mallen, PHD (edm012@shsu.edu), Professor of Spanish, Department of World Languages & Cultures, PHD, Cornell University; MA, Cornell University; MA, Universidad de Sevilla

Ananda Bandulasiri Manage, PHD (amanage@shsu.edu), Professor of Statistics, Department of Mathematics & Statistics, PHD, Texas Tech University; MS, Texas Tech University; MS, Sam Houston State University; BS, University of Kelaniya

Balasundram Maniam, PHD (gba_bxm@shsu.edu), Distinguished Professor of Finance, Department of Finance & Banking, PHD, Univ of Mississippi; MBA, Arkansas State University; BS, Arkansas State University

Robert Maninger, EDD (rmm023@shsu.edu), Professor of Education, Department of Teaching & Learning, EDD, Univ of North Texas; MED, Tarleton State University; BSED, Lubbock Christian University

Ryan J Marek, PHD (rxm147@shsu.edu), Assistant Professor of Psychology, Department of Psychology & Philosophy, PHD, Kent State University; MA, Kent State University; BS, John Carroll University

Eric L Marsh, MFA (elm008@shsu.edu), Professor of Theatre, Department of Theatre & Musical Theatre, MFA, Western Illinois University; BA, California St Un-Chico

Taylor Elizabeth Martin, PHD (taylor.martin@shsu.edu), Associate Professor of Mathematics, Department of Mathematics & Statistics, PHD, Rice University; MA, Rice University; BA, Univ of Rochester; BS, Univ of Rochester

Cynthia Martinez-Garcia, EDD (cmg021@shsu.edu), Professor of Educational Leadership, Department of Educational Leadership, EDD, Texas A&M-Kingsville; MS, Texas A&M-Corpus Christi; BS, Texas A&M-Corpus Christi

Nara Martirosyan, EDD (nmx021@shsu.edu), Associate Professor of Educational Leadership, Department of Educational Leadership, EDD, Grambling State Univ; MS, Grambling State Univ; BA, Tatev Pedagogical University

Giuseppe Martone, PHD (gxm120@shsu.edu), Assistant Professor of Mathematics, Department of Mathematics & Statistics, PHD, Univ of Southern California; MS, University of Rome, Sapienza; BS, University of Rome, Sapienza

Huda Masood, PHD (hxm040@shsu.edu), Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems, PHD, York University; MA, Adler University, Chicago; BSC, York University

David C Mayes, PHD (his_dcm@shsu.edu), Professor of History, Department of History, PHD, Univ of Wisconsin-Madison; MA, Univ of Richmond; BA, Univ of Richmond

Mayra Alexandra Mayr-Eduardoff, PHD (mayra.eduardoff@shsu.edu), *Assistant Professor of Forensic Science, Department of Forensic Science*, PHD, Medical University of Innsbruck; MSC, University of Innsbruck; BA, University of Sussex (UK)

William Matthew Mc Inturf, DMA (mus_wmm@shsu.edu), *Professor of Music, School of Music*, DMA, Univ of Cincinnati; MM, Univ of Houston-Main; BMUS, Univ of North Texas

Joyce Kay McCauley, PHD (edu_jkm@shsu.edu), *Distinguished Professor of Education, Department of Teaching & Learning*, PHD, Texas Woman's University; MED, Univ of Guam; BA, Univ of South Florida

Laura M McCrary, MS (lmm154@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Technical Services*, MS, Univ of North Texas; BA, Univ of Houston-Clear Lake

Zoe Nicole McDonald, PHD (znm004@shsu.edu), *Assistant Professor of English, Department of English*, PHD, Univ of Nebraska-Lincoln; MA, Univ of Vermont&State Agr Col; BA, Univ of Wyoming

Kenneth Bruce McIntyre, PHD (kbm014@shsu.edu), *Professor of Political Science, Department of Political Science*, PHD, Tulane University; MS, University of Wales; MA, Tulane University; BA, Princeton University

Jessica Ann McQueston, PHD (jam391@shsu.edu), *Assistant Professor of Education, Department of Teaching & Learning*, PHD, Univ of Wisconsin-Madison; MA, Univ of New Mexico; BS, Univ of New Mexico

Ali Mchiri, PHD (amchiri@shsu.edu), *Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, New Mexico State University; MBA, New Mexico State University; BBA, Univ of Texas-El Paso

Thomas James Meagher, PHD (tjm101@shsu.edu), *Assistant Professor of Philosophy, Department of Psychology & Philosophy*, PHD, Univ of Connecticut; MA, Univ of Connecticut; BA, Univ of Calif-Berkeley

Melissa L Mednicov, PHD (mmednicov@shsu.edu), *Associate Professor of Art, Department of Art*, PHD, Penn State Un-Univ Park; MA, Penn State Un-Univ Park; BA, Smith College

Sanjay S. Mehta, PHD (mkt_ssm@shsu.edu), *Professor of Marketing, Department of Mgmt, Mktg, & Info Systems*, PHD, Univ of North Texas; MS, Univ of North Texas; MBA, Angelo State University; BS, Angelo State University

Hannah Beth Menendez, MSI (hmenendez@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MSI, Florida State University; MA, Florida State University; BA, Palm Beach Atlantic

Chris C. Michel, MM (mus_ccm@shsu.edu), *Associate Professor of Music, School of Music*, MM, Ohio State University; BM, Baylor University

Holly A Miller, PHD (psy_ham@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Florida State University; MA, Morehead State University; BA, Bethel College

Lee Mary Miller, PHD (lee.miller@shsu.edu), *Professor of Sociology, Department of Sociology*, PHD, Yale University; MPHIL, Yale University; MA, Yale University; AB, Smith College

Melinda Sue Miller, PHD (lls_msm@shsu.edu), *Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Sam Houston State University; BS, Univ of Texas At Austin

Scott T Miller, PHD (stm009@shsu.edu), *Professor of Physics, Department of Physics & Astronomy*, PHD, Univ of Maryland-College Park; MS, Univ of Maryland-College Park; BA, Rutgers University; BS, Rutgers University

Felicia Leila Mirghassemi, PHD (flm002@shsu.edu), *Assistant Professor of Counselor Education, Department of Counselor Education*, PHD, Sam Houston State University; MS, Univ of Texas At Tyler; BS, Univ of Texas At Tyler

Sambit Mohapatra, PHD (smohapatra@shsu.edu), *Professor and Founding Director of Physical Therapy, Department of Kinesiology*, PHD, Univ of Illinois-Chicago; MS, Univ of Illinois-Chicago

Geraldine Isabelle Christ Monjardez, PHD (g.monjardez@shsu.edu), *Assistant Professor of Forensic Science, Department of Forensic Science*, PHD, University of Manchester; MS, Cranfield University; BS, University of Cent Lancashire

Ricardo Montelongo, PHD (rxm059@shsu.edu), *Associate Professor of Educational Leadership, Department of Educational Leadership*, PHD, Indiana University; MS, Texas A&M University; BS, Texas A&M University

Nadav Morag, PHD (nxm040@shsu.edu), *Professor and Chair of Security Studies, Department of Security Studies*, PHD, Tel Aviv University; MA, Univ of Calif-Los Angeles; BA, Univ of Calif-Los Angeles

Edward Michael Morin, MFA (emm026@shsu.edu), *Professor of Art, Department of Art*, MFA, Syracuse University; BFA, Univ of North Texas

Philip W Morris, PHD (aac_pwm@shsu.edu), *Professor and Chair of Accounting, Department of Accounting*, PHD, Texas Tech University; MS, Univ of Houston-Clear Lake; MBA, Sam Houston State University; BBA, Sam Houston State University

Jennifer Dydo Morrison, PHD (jdm214@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Univ of Nevada-Reno; MS, Western Maryland Col; BS, William & Mary College

David Kelton Moss, PHD (dxm112@shsu.edu), *Assistant Professor of Geology, Department of Environmental & Geosciences*, PHD, Syracuse University; MS, Univ of Oklahoma-Norman; BS, Centenary College of Louisiana

Momen Ragab Mousa, PHD (mxm363@shsu.edu), *Assistant Professor of Engineering Technology, Department of Engineering Technology*, PHD, LSU & A&M College; MS, Cairo University; BE, Cairo University

Ashton Michelle Mouton, PHD (amm009@shsu.edu), *Assistant Professor of Business Administration, Department of Business Admin & Entrep*, PHD, Purdue University; MA, Colorado State University; BA, Sam Houston State University

Sachin Dheeraj Mudigonda, MFA (sxm259@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, MFA, Univ of Texas At Austin; MS, Arizona State University

Falguni Shyamal Mukherjee, PHD (fsm002@shsu.edu), *Associate Dean of The Graduate School, Ombuds, and Professor of Geography, Department of Environmental & Geosciences*, PHD, Univ of Wisconsin-Milwaukee; MS, Univ of Texas At Dallas; BE, Birla Institute of Tech & Sci

Sureni Visaka Mullegama, PHD (svm013@shsu.edu), *Assistant Professor of Genetics, Department of Molecular & Cellular Biology*, PHD, Virginia Commonwealth Univ; BS, Univ of Minnesota-Twin Cities

Philip W Mulvey, PHD (pwm010@shsu.edu), *Associate Professor of Victim Studies, Department of Victim Studies*, PHD, Arizona State University; MA, Boston College; BS, Univ of Illinois-Urbana

Mario Alfredo Munoz Rosario, PHD (mam325@shsu.edu), *Assistant Professor of Kinesiology, Department of Kinesiology*, PHD, Boston University; MS, Northern Michigan University; BA, Univ of Puerto Rico-Rio Piedra

Audrey D Murfin, PHD (adm034@shsu.edu), *Associate Professor of English, Department of English*, PHD, Suny At Binghamton; MA, Suny At Binghamton; BA, Reed College

N

Diana Kay Nabors, EDD (lls_dkn@shsu.edu), *Professor of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MED, Sam Houston State University; BS, Univ of Houston-Main

Arun P Narayanasamy, PHD (apn023@shsu.edu), *Assistant Professor of Business Administration, Department of Business Admin & Entrep*, PHD, Univ of Texas-Arlington; MS, Univ of Texas-Arlington; MA, Univ of Texas-Arlington; MS, Univ of Texas-Arlington; CERT, Univ of Texas-Arlington

Carroll F. Nardone, PHD (cfnardone@shsu.edu), *Professor of English and Associate Dean, CHSS, Department of English*, PHD, New Mexico State University; MA, Ohio State University; BA, Univ of Texas-El Paso

Chelsey Samara Narvey, PHD (cxn042@shsu.edu), *Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Texas At Dallas; BA, Concordia University

Hiranya K Nath, PHD (eco_hkn@shsu.edu), *Professor of Economics, Department of Economics & Intl Business*, PHD, Southern Methodist University; MA, Southern Methodist University; MPHIL, Jawaharlal Nehru University; MA, University of Delhi; BA, University of Delhi

Adam P Natoli, PHD (apn017@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Adelphi University; MA, Adelphi University; MS, Eastern Michigan University; BA, Rider University

John Charles Navarro, PHD (jxn044@shsu.edu), *Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Louisville; MS, Illinois State University; BS, Illinois State University

Velvet A Nelson, PHD (van001@shsu.edu), *Professor of Geography, Department of Environmental & Geosciences*, PHD, Kent State University; MA, East Carolina Univ; BSBA, West Liberty State College

Steve A Nenninger, PHD (san009@shsu.edu), *Associate Professor of Finance, Department of Finance & Banking*, PHD, Southern Illinois U-Carbondale; MBA, Southeast Missouri State Univ; BSBA, Southeast Missouri State Univ

Diane L. Neudorf, PHD (bio_dln@shsu.edu), *Professor of Biology, Department of Biological Sciences*, PHD, York University; MSC, University of Manitoba; BSC, University of Manitoba

Adele Nickel, MFA (axn051@shsu.edu), *Assistant Professor of Dance, Department of Dance*, MFA, Univ of Washington; BA, New School/Soc Rsrch

Lautrice Mc Carty Nickson, PHD (lmn005@shsu.edu), *Professor of Education, Department of Teaching & Learning*, PHD, Prairie View A&M University; MED, Sam Houston State University; MED, Loyola University Maryland; BS, Mississippi State University

Andrew M Noble, MFA (amn008@shsu.edu), *Professor of Dance, Department of Dance*, MFA, Florida State University; BA, Univ of South Florida

Dionne L Noble, MFA (dln008@shsu.edu), *Associate Professor of Dance, Department of Dance*, MFA, Univ of Utah; BA, Univ of South Florida

Brooke Elizatbeth Nodeland, PHD (ben012@shsu.edu), *Associate Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Texas At Dallas; MS, Univ of North Texas; BS, Univ of North Texas

Ramona M Noland, PHD (psy_rmn@shsu.edu), *Associate Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Tennessee-Knoxville; BA, Wheeling College

Braden Edward Norris, PHD (benorris9@shsu.edu), *Assistant Professor of Kinesiology, Department of Kinesiology*, PHD, Indiana University; MS, Indiana University; MS, Indiana University; BS, Indiana University

Madeline Jade Norris, MLIS (mjn036@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MLIS, Univ of Denver; MA, Boise State University; BA, Gonzaga University

O

April Lynn OBrien, PHD (aprilobrien@shsu.edu), *Assistant Professor of English, Department of English*, PHD, Clemson University; MA, Suny Coll of Buffalo; BA, Grove City College

Suleiman Mahmoud Obeidat, PHD (smo036@shsu.edu), *Fred Pirkle Endowed Assistant Professor of Engineering Technology, Department of Engineering Technology*, PHD, Univ of Oklahoma-Norman; MSC, University of Jordan; BS, Jordan University of Sci & Tec

Willard M Oliver, PHD (icc_wmo@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, West Virginia University; MA, West Virginia University; MS, Radford University; BS, Radford University

Seth David Olson, PHD (sxo036@shsu.edu), *Professor of Counselor Education, Department of Counselor Education*, PHD, Kent State University; PHD, Kent State University; MA, The University of South Dakota; BA, Univ of Nebraska-Lincoln

Erin Anderson Orrick, PHD (eorrick@shsu.edu), *Associate Professor and Associate Dean of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Texas At Dallas; MA, Univ of Maryland-College Park; BSCJ, Texas Christian University

Pablo Alberto Ortega Poveda, PHD (pao016@shsu.edu), *Assistant Professor of Political Science, Department of Political Science*, PHD, Arizona State University; BA, Universidad Javeriana

Eric Daniel Owen, MA (ericowen@shsu.edu), *Associate Professor and Executive Director, Newton Gresham Library, Department of Non Instructional*, MA, Western Michigan University; MSI, Univ of Michigan; BA, Texas A&M University; BA, Texas A&M University

Erin Elizabeth Owens, MS (eowens@shsu.edu), *Professor, Newton Gresham Library, Department of Library Public Services*, MS, Univ of North Texas; BA, Univ of Houston-Main

P

Lillie Vivian Ka Padilla, PHD (lvp005@shsu.edu), *Assistant Professor of Spanish, Department of World Languages & Cultures*, PHD, Arizona State University; MA, Arizona State University; BA, University of Ghana; BA, University of Ghana

Shyam Bahadur Pandey, PHD (sbp029@shsu.edu), *Assistant Professor of English, Department of English*, PHD, Purdue University; MA, Minnesota State Univ-Mankato; MED, Kathmandu University, Nepal; BED, Tribhuvan University

Timothy R. Pannkuk, PHD (agr_trp@shsu.edu), *Associate Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Texas A&M University; BS, Texas A&M University

Brittany Leigh Paris, MS (blp054@shsu.edu), *Assistant Professor of Animal Science, Department of Agricultural Sciences*, MS, Texas A&M University; BS, Texas A&M University

Benjamin E Park, PHD (bep013@shsu.edu), *Associate Professor of History, Department of History*, PHD, Univ of Cambridge; MPHIL, Univ of Cambridge; MS, Univ of Edinburgh; BA, Brigham Young University; BA, Brigham Young University

John B Pascarella, PHD (jbp014@shsu.edu), *Professor of Biological Sciences, Department of Biological Sciences*, PHD, Univ of Miami; BA, Univ of Kansas; BS, Univ of Kansas; BS, Univ of Kansas

Erica Ann Pasquini, PHD (exp043@shsu.edu), *Associate Professor of Kinesiology, Department of Kinesiology*, PHD, Univ of Southern Mississippi; MS, Ball State University; BS, Univ of New Orleans

Michael W Pass, PHD (mwp006@shsu.edu), *Professor of Marketing, Department of Mgmt, Mktg, & Info Systems*, PHD, Arizona State University; MBA, Georgia State University; ABJ, Univ of Georgia

Emily Ann Peacock, MFA (stdeap16@shsu.edu), *Assistant Professor of Art, Department of Art*, MFA, Univ of Houston-Main; BS, Sam Houston State University

Patrick Neal Pearson, MFA (patrickpearson@shsu.edu), *Assistant Professor of Theatre and Musical Theatre, Department of Theatre & Musical Theatre*, MFA, California St Un-Fullerton; BFA, Sam Houston State University

Recayi Pecen, PHD (regpecen@shsu.edu), *Professor of Engineering Technology, Department of Engineering Technology*, PHD, Univ of Wyoming; MS, Univ of Colorado; MSC, Istanbul Univ; BSC, Istanbul Univ

Ilona Petrikovics, PHD (ixp004@shsu.edu), *Professor of Chemistry, Department of Chemistry*, PHD, Univ Debrecen Med & Health Sci; PHD, Kossuth Laos University; MSC, Univ Debrecen Med & Health Sci

Mary Ann Petron, PHD (map042@shsu.edu), *Professor of Education, Department of Teaching & Learning*, PHD, Univ of Texas At Austin; MA, Northwestern University; BSED, Univ of Wisconsin-Madison

Van Vung Pham, PHD (vung.pham@shsu.edu), *Assistant Professor of Computer Science, Department of Computer Science*, PHD, Texas Tech University; MS, Politecnico Di Milano; BS, President University

Chi Hoang Do Phan, PHD (chp007@shsu.edu), *Assistant Professor of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Univ of South Florida; MA, Univ of South Florida; BA, Univ of South Florida

Deborah Lynne Phelps, PHD (eng_dlp@shsu.edu), *Professor of English, Department of English*, PHD, Univ of Delaware; MA, Univ of Delaware; BS, Towson State University

Javier A Pinell, DM (jap032@shsu.edu), *Professor of Music, School of Music*, DM, Florida State University; MM, Miami University; BM, Wayne State University

Ronald Eric Platt, PHD (eep032@shsu.edu), *Professor and Chair of Educational Leadership, Department of Educational Leadership*, PHD, LSU & A&M College; MED, Univ of Southern Mississippi; BS, Univ of Southern Mississippi

Scott D Plugge, DM (mus_sdp@shsu.edu), *Professor and Chair of Music, School of Music*, DM, Northwestern University; MM, Northwestern University; BM, Baylor University

Jennifer Karen Pontius, MFA (dnc_jkp@shsu.edu), *Associate Professor and Chair of Dance, Department of Dance*, MFA, Florida State University; MA, California St Un-Dominguez Hil; BA, Univ of Alabama-Birmingham

Brett Michael Porter, MS (bpx040@shsu.edu), *Assistant Professor, Library Technical Services, Department of Library Technical Services*, MS, Univ of North Texas; BS, Texas A&M Univ-Central Texas

Jalene Paige Potter, PHD (jpp015@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M-Corpus Christi; MS, Texas A&M-Corpus Christi; BS, Texas A&M-Corpus Christi

George Prada, MD (gxp073@shsu.edu), *Assistant Professor of Anatomical Sciences, Department of Clinical Anatomy*, MD, Autonomous Univ of Guadalajara; BS, Univ of Illinois-Chicago

Todd P Primm, PHD (tprimm@shsu.edu), *Professor of Biology, Department of Biological Sciences*, PHD, Baylor College of Medicine; BS, Texas A&M University

Thomas C Prior, MFA (drm_tcp@shsu.edu), *Professor of Theatre, Department of Theatre & Musical Theatre*, MFA, Univ of Houston-Main; BFA, Carnegie-Mellon Univ

Bernadette Pruitt, PHD (his_bxp@shsu.edu), *Associate Professor of History, Department of History*, PHD, Univ of Houston-Main; MA, Texas Southern University; BA, Texas Southern University

Q

Jailenne Ivette Quinones Rodriguez, PHD (jiq002@shsu.edu), *Assistant Professor of Anatomical Sciences, Department of Clinical Anatomy*, PHD, Universidad Central Del Caribe; MA, Universidad Central Del Caribe; BS, University of Puerto Rico - Po

Uzma Quraishi, PHD (uxq001@shsu.edu), *Associate Professor of History, Department of History*, PHD, Rice University; MA, Rice University; MA, Univ of Houston-Main; BA, Univ of Houston-Main; BA, Univ of Houston-Main

R

Vlad Marius Radoias, PHD (radoias@shsu.edu), *Associate Professor of Economics, Department of Economics & Intl Business*, PHD, Univ of Southern California; MA, Central Michigan Univ; BA, Bucharest Acad of Eco Studies

Javier Ramos, PHD (jxr248@shsu.edu), *Assistant Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Florida State University; MS, Florida State University; BA, Univ of Texas At Austin

Ryan Wayne Randa, PHD (rxr042@shsu.edu), *Associate Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Cincinnati; MS, Univ of Cincinnati; BS, Univ of Wisconsin-Superior

George Kevin Randall, PHD (gkr001@shsu.edu), *Professor of Public Health, Department of Public Health*, PHD, Iowa State University; MS, Iowa State University; BSED, Illinois State University

Christopher P Randle, PHD (cpr003@shsu.edu), *Professor of Biology, Department of Biological Sciences*, PHD, Ohio State University; BA, Hiram College

Stephen H Rapp, PHD (srapp@shsu.edu), *Professor of History, Department of History*, PHD, Univ of Michigan; MA, Univ of Michigan; BA, Indiana University

Christian Werner Raschke, PHD (raschke@shsu.edu), *Associate Professor of Economics, Department of Economics & Intl Business*, PHD, LSU & A&M College; MS, LSU & A&M College; BS, Southeast Missouri State Univ

Amar Adnan Rasheed, PHD (axr249@shsu.edu), *Assistant Professor of Computer Science, Department of Computer Science*, PHD, Texas A&M University; MS, Northeastern Illinois Univ; BS, University of Bagdad

Kathleen Rene Ratajczak, PHD (kxr084@shsu.edu), *Assistant Professor of Victim Studies, Department of Victim Studies*, PHD, Univ of Kentucky; MA, Univ of Cincinnati; BA, John Carroll University

Chelsea Gilts Ratcliff, PHD (chelsea.ratcliff@shsu.edu), *Associate Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Houston-Main; MA, Univ of Houston-Main; BA, Trinity University

Shekhar Rathor, PHD (srathor@shsu.edu), *Assistant Professor of Management Information Systems, Department of Mgmt, Mktg, & Info Systems*, PHD, Florida Int'L Univ; MCA, Panjab University; BS, Himachal Pradesh University

Amy E Ray, PHD (aer066@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Michigan State University; MS, Michigan State University; MED, Texas Christian University; BS, Texas Christian University

Jolene Buxton Reed, PHD (jreed@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Univ of New Mexico; MA, Univ of New Mexico; BS, Brigham Young University

Rebecca Lee Renfro, DMA (rrg012@shsu.edu), *Professor of Music, School of Music*, DMA, Univ of Connecticut; MM, New England Conservatory/Music; BBA, Sam Houston State University; BM, Sam Houston State University

Clare Amparito Resilla, EDD (clr067@shsu.edu), *Assistant Professor of Educational Leadership, Department of Educational Leadership*, EDD, Sam Houston State University; MED, Lamar University; BA, St. Theresa's College

Chad Allen Reynolds, PHD (car020@shsu.edu), *Assistant Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Univ of Missouri-Columbia; MS, Sam Houston State University; BS, Sam Houston State University

Diego Ribeiro Caetano, DMA (dxr105@shsu.edu), *Assistant Professor of Music, School of Music*, DMA, Univ of Colorado; MM, Univ of Wyoming; BM, Federal University of Goias

Kathleen Ann Rice, PHD (kar084@shsu.edu), *Professor of Counselor Education, Department of Counselor Education*, PHD, Univ of N Carolina-Charlotte; MS, South Dakota State University; BS, South Dakota-Mines/Tech

Marilyn Petrus Rice, PHD (edu_mpr@shsu.edu), *Professor of Library Science and Technology, Department of Library Sci & Technology*, PHD, Texas A&M University; MED, Sam Houston State University; BSBA, Univ of Arkansas-Fayetteville

Robert J Richardson, PHD (rjr065@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Univ of Texas At Austin; BA, Baylor University

Shelley Ann Riggs, PHD (srx142@shsu.edu), *Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BA, Univ of Texas At Austin; BA, Univ of Texas At Austin

Jason Matthew Riley, PHD (jmr099@shsu.edu), *Associate Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Clemson University; MBA, Michigan State University; BA, Iowa State University

Tommy J Robertson, JD (joey_robertson@shsu.edu), *Professor of Business Admin; Chair, Business Administration and Entrepreneurship, Department of Business Admin & Entrep*, JD, South Texas College of Law; BS, Texas A&M University

Petra Rocić, PHD (pxr037@shsu.edu), *Associate Professor of Physiology, Department of Physiology & Pharmacology*, PHD, Univ of Alabama-Birmingham; PHD, Univ of Alabama-Birmingham; BA, Oberlin College

Mitchel P Roth, PHD (icc_mpr@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Calif-Santa Barbara; MA, Univ of Calif-Santa Barbara; BA, Univ of Maryland-College Park

Jared Robert Ruchensky, PHD (jrr107@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Texas A&M University; MS, Texas A&M University; BA, Creighton University

Danielle Sheldon Rudes, PHD (drudes@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Calif-Irvine; MA, Univ of Calif-Irvine; MA, Univ of New Orleans; BA, Suny At Plattsburgh

ILonka Livia Rus, DMA (lir001@shsu.edu), *Professor of Music, School of Music*, DMA, Univ of Houston-Main; MM, Univ of Houston-Main; BM, Oberlin College

S

Daniel Saenz, DMA (dxs007@shsu.edu), *Associate Professor of Music, School of Music*, DMA, Univ of Houston-Main; MM, Rice University; BM, Univ of Rochester

Elisa Salem Herrmann, MFA (exh041@shsu.edu), *Associate Professor of Mass Communication, Department of Mass Communication*, MFA, Southern Illinois U-Carbondale; BED, Federal University of Parana

Supun Thamara Samarakoon, PHD (ssamarakoon@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Sam Houston State University; BS, University of Colombo

Jose Alberto Santiago, EDD (jas083@shsu.edu), *Professor of Kinesiology, Department of Kinesiology*, EDD, Texas Southern University; MA, Indiana State University; BA, Univ of Puerto Rico-Rio Piedra

Kiran Sapkota, PHD (kxs133@shsu.edu), *Assistant Professor of Public Health, Department of Public Health*, PHD, University of Iowa; PHD, University of Iowa; MS, University of Iowa; MPH, New Mexico State University; MS, New Mexico State University; MS, Tribhuvan University; BS, Tribhuvan University

Raisa Tasnim Sara, PHD (rts021@shsu.edu), *Assistant Professor of Economics, Department of Economics & Intl Business*, PHD, Texas A&M University; MSC, Univ of London - School Econ; BSC, Queen Mary Univ of London

Kristin Amanda Sarvela, DMA (kas192@shsu.edu), *Assistant Professor of Music, School of Music*, DMA, Univ of Illinois-Urbana; MM, Indiana University-Bloomington; BM, Univ of Illinois-Urbana

Philip Ryan Saucier, MS (ryansaucier@shsu.edu), *Associate Professor of Agricultural Sciences, Department of Agricultural Sciences*, MS, Sam Houston State University; BS, Sam Houston State University

Amanda Walters Scarbrough, PHD (aes060@shsu.edu), *Associate Professor of Public Health, Department of Public Health*, PHD, Univ of Texas Medical Branch; MHSA, George Washington University; BA, De Pauw University

Stephen Mark Scariano, PHD (sms049@shsu.edu), *Professor of Statistics, Department of Mathematics & Statistics*, PHD, Texas Tech University; MS, Texas Tech University; BS, Loyola Univ-New Orleans

Misty Sue Schattle, EDD (msb009@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, EDD, Lamar University; MS, Univ of North Texas; BA, Baylor University; BA, Baylor University

Richard Neal Schaugaard, PHD (rns034@shsu.edu), *Assistant Professor of Chemistry, Department of Chemistry*, PHD, Indiana University; BS, Univ of Washington

Nicholas Leonard Scheel, PHD (nls046@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of South Florida; MA, Univ of South Florida; BS, Univ of Wisconsin-Green Bay

Mary Larue Scherer, PHD (mxs168@shsu.edu), *Assistant Professor of Sociology, Department of Sociology*, PHD, Univ of Massachusetts-Amherst; MA, Univ of Massachusetts-Amherst; BA, Warren Wilson College

Danica Lee Schieber, PHD (dschieber@shsu.edu), *Associate Professor of Business Administration, Department of Business Admin & Entrep*, PHD, Iowa State University; MA, Minnesota State Univ-Mankato; BA, Austin Peay State University

Aric Lewis Schneller, DMA (als043@shsu.edu), *Professor of Music, School of Music, DMA, Univ of North Texas; MM, Boston University; MM, Univ of North Texas; BM, Univ of Montana*

George Herbert Scott, PHD (ghs003@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy, PHD, Ponce Health Sciences Univ; MS, Ponce Health Sciences Univ; BA, Liberty University*

Kyle Anthony Scott, PHD (kas216@shsu.edu), *Assistant Professor of Entrepreneurship, Department of Business Admin & Entrep, PHD, U-Houston Downtown; MBA, Rice University; BA, Univ of Texas At Austin*

La-Toya Lorraine Scott, PHD (lls060@shsu.edu), *Assistant Professor of English, Department of English, PHD, Univ of Florida; MA, Univ of South Florida; BA, Florida State University*

Nazanin Sedaghatkish, PHD (nazanins@shsu.edu), *Assistant Professor of Economics and International Business, Department of Economics & Intl Business, PHD, Virginia Polytechnic&State U; PHD, Virginia Polytechnic&State U; MSC, Sharif Univ of Technology; BS, Shahid Beheshti University*

Abdelilah Salim Sehlaoui, EDD (asehlaoui@shsu.edu), *Professor of Education, Department of Teaching & Learning, EDD, Indiana University of Pennsylv; MA, Indiana University of Pennsylv; BA, Mohamed Ben Abdellah Univ*

Ki Won Seo, PHD (kws014@shsu.edu), *Associate Professor of Mass Communication, Department of Mass Communication, PHD, Penn State Un-Univ Park; MA, Penn State Un-Univ Park; MAC, Korea University; BA, Korea University; BA, Korea University*

Narasimha Karpoor Shashidhar, PHD (nks001@shsu.edu), *Professor of Computer Science, Department of Computer Science, PHD, Univ of Connecticut; MS, Univ of Connecticut; BE, University of Madras*

April A Shemak, PHD (aas004@shsu.edu), *Professor of English, Department of English, PHD, Univ of Maryland-College Park; MA, Univ of Maryland-College Park; BA, Univ of Wisconsin-Madison; BA, Univ of Wisconsin-Madison*

Lisa C Shen, MBA (lcs009@shsu.edu), *Associate Professor, Newton Gresham Library; Director, Public Services, Department of Library Public Services, MBA, Sam Houston State University; MLIS, McGill University; BC, University of Alberta*

William Madsen Shepherd, PHD (shepherd@shsu.edu), *Assistant Professor of Physics, Department of Physics & Astronomy, PHD, Univ of Calif-Irvine; MS, Northwestern University; MS, Northwestern University; BA, Northwestern University; BA, Northwestern University; BA, Northwestern University*

Karen E Sherrill, PHD (kesherrill@shsu.edu), *Associate Professor of Finance, Department of Finance & Banking, PHD, Florida State University; MS, Florida State University; BS, Rochester Inst of Technology*

Ronald E Shields, PHD (rshield@shsu.edu), *Professor of Theatre, Department of Theatre & Musical Theatre, PHD, LSU & A&M College; MA, Bob Jones University; BA, Bob Jones University*

Katie Jean Shinkle, PHD (kjs078@shsu.edu), *Assistant Professor of English, Department of English, PHD, Univ of Denver; MFA, Univ of Alabama-Tuscaloosa; BA, Grand Valley State University*

Tony R. Shipp, MFA (art_trs@shsu.edu), *Associate Professor of Art, Department of Art, MFA, Univ of Florida; BA, Montana State Univ-Billings*

Stephen Trent Shotwell, MS (stdsts11@shsu.edu), *Associate Professor, Newton Gresham Library, Department of Library Technical Services, MS, Univ of North Texas; BS, Sam Houston State University*

Zeinab F Shuker, PHD (zfs003@shsu.edu), *Assistant Professor of Sociology, Department of Sociology, PHD, Univ of Calif-Riverside; MA, Univ of Calif-Riverside; MA, The University of Memphis; BA, The University of Memphis*

Gabriela Judith Silvestre, PHD (gjs020@shsu.edu), *Assistant Professor of Education, Department of Educational Leadership, PHD, University of Pittsburgh; MED, University of Pittsburgh; CERN, Universidad Nacional Del Lit*

Vinu Abraham Simon, DBA (vas048@shsu.edu), *Assistant Professor of Marketing, Department of Mgmt, Mktg, & Info Systems, DBA, University of Manchester; MBA, Cornell University; MS, Southern Methodist University; BTECH, Univ of Kerala*

Jessica Annie Simorte, MFA (jxs117@shsu.edu), *Assistant Professor of Art, Department of Art, MFA, Univ of Cincinnati; BA, University of Saint Mary*

Vinoth Kumar Sittaramane, PHD (vks007@shsu.edu), *Professor of Biological Sciences, Department of Molecular & Cellular Biology, PHD, Univ of Missouri-Columbia; DVM, Pondicherry University; MS, Indian Veterinary Research Institute*

Shyam Sivankutty Nair, PHD (shyam.nair@shsu.edu), *Associate Professor of Agricultural Sciences, Department of Agricultural Sciences, PHD, Texas Tech University; MSC, Kerala Agricultural University; BSC, Kerala Agricultural University*

Susana Troncoso Skidmore, PHD (skidmore@shsu.edu), *Professor of Educational Leadership, Department of Educational Leadership, PHD, Texas A&M University; MED, Texas A&M University; BA, Texas A&M University*

Britni Nicole Skillman, PHD (bns017@shsu.edu), *Assistant Professor of Forensic Science, Department of Forensic Science*, PHD, Sam Houston State University; BS, Sam Houston State University

John R Slate, PHD (jrs051@shsu.edu), *Professor of Educational Leadership, Department of Educational Leadership*, PHD, Univ of Tennessee-Knoxville; MA, Univ of Tennessee-Knoxville; BA, Eastern Illinois University

Andrea Marie Smith, PHD (axs226@shsu.edu), *Associate Professor of Nursing, School of Nursing*, PHD, Univ of Texas-Arlington; MSN, Baylor University; BSN, Univ of Texas Medical Branch; BA, Southern Illinois U-Carbondale

Ashly Lynn Bender Smith, PHD (als121@shsu.edu), *Associate Professor Business Administration, Department of Business Admin & Entrep*, PHD, Univ of Louisville; MA, New Mexico State University; BA, Texas State Univ-San Marcos

Gary W. Smith, PHD (gsmith@shsu.edu), *Associate Professor of Computing Science, Department of Computer Science*, PHD, Texas A&M University; MS, Oklahoma State University; BS, Texas A&M University

Sahar Ahmed Soliman, PHD (sxs187@shsu.edu), *Assistant Professor of Pharmacology, Department of Physiology & Pharmacology*, PHD, Univ of Georgia; BPHARM, Ain Shams University

Micheil Brian Spillane, PHD (mbs056@shsu.edu), *Assistant Professor of Kinesiology, Department of Kinesiology*, PHD, Baylor University; MSED, Baylor University; BS, Univ of Houston-Main

Jennifer Hatchett Stover, PHD (jlh159@shsu.edu), *Assistant Professor of Counselor Education, Department of Counselor Education*, PHD, Sam Houston State University; MA, Prairie View A&M University; MAT, Texas Woman's University; BS, Texas Woman's University

Wayman Jerome Stover, DMA (wjs016@shsu.edu), *Assistant Professor of Music, School of Music*, DMA, Boston University; MM, Depaul University; BM, Indiana University-Bloomington; BM, Indiana University-Bloomington; DIPL, Yale University

John B Strait, PHD (jbs008@shsu.edu), *Professor of Geography, Department of Environmental & Geosciences*, PHD, Univ of Georgia; MA, Georgia State University; BA, Wittenberg University

Jeffery W Strawser, PHD (aac_jws@shsu.edu), *Associate Professor of Accounting, Department of Accounting*, PHD, Texas A&M University; MS, Texas A&M University; BBA, Texas A&M University

William R Strawser, PHD (wxs018@shsu.edu), *Assistant Professor of Accounting, Department of Accounting*, PHD, Texas A&M University; MS, Texas A&M University; BA, Univ of Texas At Austin

Robert H Stretcher, PHD (fin_rhs@shsu.edu), *Professor of Finance, Department of Finance & Banking*, PHD, Univ of Tennessee-Knoxville; MBA, Univ of North Alabama; BA, Univ of Tennessee-Knoxville

Susan Dawn Strickland, MLS (lib_sds@shsu.edu), *Associate Professor, Newton Gresham Library, Department of Library Public Services*, MLS, Texas Woman's University; BA, Texas A&M University

Abbie Ruth Strunc, PHD (abbie.strunc@shsu.edu), *Associate Professor of Education and Associate Dean, College of Education, Department of Teaching & Learning*, PHD, Univ of North Texas; MED, Texas A&M University; BA, Texas A&M University

Kyle J Stutts, PHD (kjs015@shsu.edu), *Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Oklahoma State University; BS, Texas A&M University

James Bartlett Stykes, PHD (jbs048@shsu.edu), *Associate Professor and Acting Chair of Sociology, Department of Sociology*, PHD, Bowling Green State University; MA, Bowling Green State University; BS, Austin Peay State University

Masahito Sugihara, DM (mxs074@shsu.edu), *Associate Professor of Music, School of Music*, DM, Northwestern University; MM, Northwestern University; BM, Temple University

Min Jae Suh, PHD (mjs068@shsu.edu), *Associate Professor of Engineering Technology, Department of Engineering Technology*, PHD, Virginia Polytechnic&State U; MS, Stanford University; BENG, Yeungnam University

Jeffrey M Sullivan, PHD (jms107@shsu.edu), *Associate Professor of Counselor Education, Department of Counselor Education*, PHD, Univ of North Texas; MS, Univ of North Texas; BA, Univ of Texas At Austin

Laura Louise Sullivan, JD (lls003@shsu.edu), *Professor of Business Administration, Department of Business Admin & Entrep*, JD, South Texas College of Law; MBA, Sam Houston State University; BBA, Univ of Houston-Main

Eric P Svensen, PHD (eps007@shsu.edu), *Assistant Professor of Political Science, Department of Political Science*, PHD, Univ of Texas At Austin; MA, Univ of Texas At Austin; BA, San Diego City Coll

Mary B Swarthout, PHD (mbs001@shsu.edu), *Associate Professor of Mathematics Education, Department of Mathematics & Statistics*, PHD, Ohio State University; MA, Miami University; BA, Berea College

Edward W. Swim, PHD (ews007@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas Tech University; MS, Colorado School of Mines; BS, Angelo State University

T

Yingying Tang, PHD (yxt045@shsu.edu), *Assistant Professor of English, Department of English*, PHD, Auburn University; MS, North Carolina State Univ

Kandi A Tayebi, PHD (eng_kat@shsu.edu), *Professor of English, Department of English*, PHD, Univ of Denver; MA, Univ of Northern Colorado; BA, Univ of Northern Colorado

Kayoko Dan Temple, DMA (kayokodan@shsu.edu), *Assistant Professor of Music, School of Music*, DMA, Arizona State University; MM, Arizona State University; BM, Univ of Texas At Austin

Monte L. Thies, PHD (bio_mlt@shsu.edu), *Professor of Biology, Department of Biological Sciences*, PHD, Oklahoma State University; MS, Univ of Central Oklahoma; BS, Univ of Central Oklahoma

Christopher Lee Thompson, JD (clt058@shsu.edu), *Assistant Professor of Business Administration (Business Law), Department of Business Admin & Entrep*, JD, St Mary's University; BA, Stephen F Austin University

David E Thompson, PHD (det002@shsu.edu), *Professor of Chemistry, Department of Chemistry*, PHD, Univ of Wisconsin-Madison; BA, Carleton College

Molly Michelle Thompson, MS (mmt001@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Technical Services*, MS, Univ of North Texas; BS, Texas State Univ-San Marcos

Christopher Michael Toula, PHD (cmt077@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Georgia State University; MA, Penn State Un-Univ Park; BA, Buckinghamshire New University

Tarek Mohsen Trad, PHD (tmt033@shsu.edu), *Professor of Chemistry, Department of Chemistry*, PHD, Oklahoma State University; BS, Beirut Arab Univ

Manuel Triano-Lopez, PHD (mxt017@shsu.edu), *Associate Professor of Spanish, Department of World Languages & Cultures*, PHD, Indiana University; MA, Indiana University; BA, Universidad de Sevilla

Timothy O Trujillo, PHD (txt031@shsu.edu), *Associate Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Denver; MS, New Mexico Inst/Mining/Tech; BS, New Mexico Inst/Mining/Tech

Markland Howard Tuttle, PHD (mht001@shsu.edu), *Professor of Economics and Acting Chair, Economics & International Business, Department of Economics & Intl Business*, PHD, Univ of Tennessee-Knoxville; MBA, Sam Houston State University; BBA, Sam Houston State University

U

Stacy Gwenn Ulbig, PHD (sgu001@shsu.edu), *Professor of Political Science, Department of Political Science*, PHD, Rice University; MA, Rice University; BA, Univ of St Thomas

Francisco Usero Gonzalez, PHD (fug002@shsu.edu), *Assistant Professor of School of Teaching and Learning, Department of Teaching & Learning*, PHD, Univ of Houston-Main

Baburhan Uzum, PHD (uzum@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Michigan State University; MA, Middle East Technical Univ; BA, Middle East Technical Univ

V

Zachary Alfonso Valdes, MSLS (zav001@shsu.edu), *Associate Professor, Newton Gresham Library, Department of Library Technical Services*, MSLS, Univ of North Texas; BA, Sam Houston State University

Rosti Frank Vana, PHD (rosti.vana@shsu.edu), *Assistant Professor of Spanish, Department of World Languages & Cultures*, PHD, Arizona State University; MA, Arizona State University; BA, Univ of Calif-Riverside; BA, Univ of Calif-Riverside

Jorge G Varela, PHD (jgv002@shsu.edu), *Professor of Psychology and Chair, Psychology and Philosophy, Department of Psychology & Philosophy*, PHD, Univ of Alabama-Tuscaloosa; MA, Univ of Alabama-Tuscaloosa; BA, Florida Int'L Univ

Kristina K Vargo, PHD (kkv003@shsu.edu), *Professor of Education and Chair, School of Teaching and Learning, Department of Teaching & Learning*, PHD, Southern Illinois U-Carbondale; MS, Southern Illinois U-Carbondale; BS, Univ of Wisconsin-Eau Claire

Cihan Varol, PHD (cxv007@shsu.edu), *Professor of Computing Science, Department of Computer Science*, PHD, Univ of Arkansas-Little Rock; MS, West Virginia University; BSC, Firat University

Michael Scott Vaughn, PHD (msv002@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Sam Houston State University; MS, University of Central Missouri; BS, University of Central Missouri

Edna Viviana Velasquez, PHD (evv003@shsu.edu), *Assistant Professor of Spanish, Department of World Languages & Cultures*, PHD, Univ of Houston-Main; MA, Univ of Houston-Main

Adrian Villalta-Cerdas, PHD (axv067@shsu.edu), *Associate Professor of Chemistry, Department of Chemistry*, PHD, Univ of South Florida; MA, Univ of South Florida; BS, Univ of Costa Rica

W

Tamara A. Waggener, PHD (pol_taw@shsu.edu), *Associate Professor of Political Science, Department of Political Science*, PHD, Univ of Texas At Austin; BA, Cal Poly St-Pomona

Matthew Charles Wagner, PHD (mcw002@shsu.edu), *Associate Professor of Kinesiology, Department of Kinesiology*, PHD, Texas A&M University; MA, Sam Houston State University; BS, Sam Houston State University

Joel W Walker, PHD (jwalker@shsu.edu), *Professor and Chair of Physics, Department of Physics & Astronomy*, PHD, Texas A&M University; PHD, Texas A&M University; BS, Harding University; BS, Harding University

WenJiun Wang, PHD (wjwang@shsu.edu), *Assistant Professor of Political Science, Department of Political Science*, PHD, University of Pittsburgh; MA, National Taipei University; BA, National Taipei University; BBA, National Taipei University

Xiaobo Wang, PHD (xiaobo.belle.wang@shsu.edu), *Assistant Professor of English, Department of English*, PHD, Georgia State University; BA, Northwest Normal University

Janis A Warner, PHD (jwarner@shsu.edu), *Associate Professor of Management Information Systems, Department of Mgmt, Mktg, & Info Systems*, PHD, Florida-Atlantic U; MBA, Univ of Denver; BA, Saint Mary's

Walton A Watkins, MFA (watkins@shsu.edu), *Professor of Art, Department of Art*, MFA, Univ of Tennessee-Knoxville; MA, Northwestern St Un of Louisiana; BA, Northwestern St Un of Louisiana

Holly Ann Kizer Weimar, EDD (hweimar@shsu.edu), *Professor and Chair of Library Science and Technology, Department of Library Sci & Technology*, EDD, Univ of Houston-Main; EDD, Univ of Houston-Main; MLS, Sam Houston State University; MLS, Sam Houston State University; BSED, Stephen F Austin University; BSED, Stephen F Austin University

Ellen Lorraine Weld, PHD (elw028@shsu.edu), *Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Purdue University; BS, Ball State University

William M Wells, PHD (wmw005@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Nebraska-Omaha; MA, Indiana University-Bloomington; BA, Ohio University

Lu-Chung Weng, PHD (dennis.weng@shsu.edu), *Associate Professor of Political Science, Department of Political Science*, PHD, Univ of Texas At Dallas; MA, Univ of Texas At Dallas; MA, Tamkang College; BBA, Tamkang College

Rebecca Ann Wentworth, PHD (raw034@shsu.edu), *Associate Professor of Education, Department of Teaching & Learning*, PHD, Colorado State University; MED, Oakland University; BSED, Central Michigan Univ

Courtney Ann West, PHD (west@shsu.edu), *Asst Dean of Osteopathic Medicine for Educational Development, Adjunct Faculty, Department of Primary Care & Clinical Medi*, PHD, Texas A&M University; MED, Sam Houston State University; BS, Sam Houston State University

Stephen Walter White, PHD (sww012@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Mississippi; MA, Univ of Mississippi; BA, Univ of Mississippi

Grant Joseph Wiedenfeld, PHD (grant.wiedenfeld@shsu.edu), *Associate Professor of Mass Communication, Department of Mass Communication*, PHD, Yale University; MPHIL, Yale University; MA, Yale University; MFA, Univ of Wisconsin-Milwaukee; BA, Univ of Colorado; BFA, Univ of Colorado

Darren Lee Williams, PHD (williams@shsu.edu), *Professor of Chemistry, Department of Chemistry*, PHD, Oregon State University; BS, Univ of Texas At Austin

Justin K. Williams, PHD (bio_jkw@shsu.edu), *Professor of Biology and Assistant Dean, Honors College, Department of Biological Sciences*, PHD, Univ of Texas At Austin; BA, Univ of Texas At Austin

Mary Lola Williams, EDD (mlw049@shsu.edu), *Associate Professor of Kinesiology, Department of Kinesiology*, EDD, Texas A&M-Corpus Christi; MA, Texas A&M-Corpus Christi; BA, Coe College; BA, Coe College; BA, Coe College

Kamphol Wipawayangkool, PHD (kxw012@shsu.edu), *Associate Professor of Management Information Systems, Department of Mgmt, Mktg, & Info Systems*, PHD, Univ of Texas-Arlington; MS, Univ of Houston-Clear Lake; BS, Prince of Songkla University

Lawrence Arthur Wolfskill, PHD (wolfskill@shsu.edu), *Professor of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MBA, Texas A&M University; BS, Texas A&M University

Mary Elizabeth Wood, PHD (mew095@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Alabama-Tuscaloosa; MA, Univ of Alabama-Tuscaloosa; BS, Kennesaw State University

Dennis C Wooten, PHD (dcw032@shsu.edu), *Assistant Professor of Pathology, Department of Clinical Anatomy*, PHD, Purdue University; MD, Univ of Texas HSC-Houston; BS, Clark Atlanta University

Jeffrey R Wozniak, PHD (jrw034@shsu.edu), *Associate Professor of Biology, Department of Biological Sciences*, PHD, Florida Int'L Univ; BS, Allegheny College

Jiaju Wu, PHD (jxw089@shsu.edu), *Assistant Professor of Psychology, Department of Psychology & Philosophy*, PHD, University of Iowa; EDSP, University of Iowa; MA, East Tennessee State Univ; BS, East Tennessee State Univ

X

Yaping Xu, PHD (yxx013@shsu.edu), *Assistant Professor of Environmental and Geosciences, Department of Environmental & Geosciences*, PHD, Louisiana A&M Coll; PHD, Louisiana A&M Coll; MS, University of Chinese Academy of Sciences; BE, Guizhou University (China)

Y

Euijin Yang, PHD (exy012@shsu.edu), *Assistant Professor of Engineering Technology, Department of Engineering Technology*, PHD, Univ of Texas At Austin; MS, Univ of Texas At Austin; BS, Illinois Inst Tech; BE, Chungnam National University

Liu Yang, PHD (willowyang@shsu.edu), *Assistant Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Univ of Missouri-St Louis; MBA, Queen Mary Univ of London; BENG, Xi'an Jiaotong University

Mary Rebecca Yantis, MLIS (mry008@shsu.edu), *Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MLIS, LSU & A&M College; MA, Univ of Louisiana-Lafayette; BA, Belhaven University; BFA, Belhaven University

Shengjie Yao, MA (sxy027@shsu.edu), *Assistant Professor of Mass Communication, Department of Mass Communication*, MA, Syracuse University; MS, Syracuse University; BA, Fu Jen Catholic Univ

Faruk Yildiz, DIT (fxy001@shsu.edu), *Professor and Chair of Engineering Technology, Department of Engineering Technology*, DIT, Univ of Northern Iowa; MS, Cuy City Coll; BS, MKH Dulati Taraz State Univ

Chase Jonathan Young, PHD (cxy010@shsu.edu), *Professor of Education, Department of Teaching & Learning*, PHD, Univ of North Texas; MS, Walden University; BA, Metropolitan St Univ of Denver

Chi Chung Yu, PHD (jorny@shsu.edu), *Professor of Forensic Science, Department of Forensic Science*, PHD, Carleton University; MS, Central Police University; BS, Central Police University

Z

Samar M Zahrawi, PHD (sxz015@shsu.edu), *Associate Professor of Arabic, Department of World Languages & Cultures*, PHD, University of Leeds; BA, Al-Ba'ath University

Christopher M Zall, PHD (cxz027@shsu.edu), *Associate Professor of Chemistry, Department of Chemistry*, PHD, Univ of Minnesota-Twin Cities; MS, Univ of Minnesota-Twin Cities; BA, Carleton College

Ryan K Zapalac, PHD (rkz001@shsu.edu), *Professor of Kinesiology and Associate Dean, COHS, Department of Kinesiology*, PHD, Univ of Houston-Main; MED, Univ of Houston-Main; BS, Univ of Houston-Main

Pamela J Zelbst, PHD (mgt_pjz@shsu.edu), *Distinguished Professor of Management, Department of Mgmt, Mktg, & Info Systems*, PHD, Univ of Texas-Arlington; MBA, Sam Houston State University; BBA, Sam Houston State University

Shuangyue Zhang, PHD (sxz002@shsu.edu), *Professor of Communication Studies, Department of Communication Studies*, PHD, Ohio State University; MA, Kent State University; MA, Shandong University; BA, Shandong Normal University

Yan Zhang, PHD (icc_yxz@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Michigan State University; MS, Michigan State University; MS, Michigan State University; BS, Wuhan University

Jihong Zhao, PHD (jxz006@shsu.edu), *Professor of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Washington State University; MA, Washington State University; BA, Shanghai Inst of Higher Edu

Yuan Zhao, PHD (yxz028@shsu.edu), *Associate Professor of Microbiology and Immunology; Acting Chair, Molecular/Cell, Department of Molecular & Cellular Biology*, PHD, Univ of Louisville; MS, Univ of Louisville; BS, East China Normal Un

Bing Zhou, PHD (bxz003@shsu.edu), *Associate Professor and Chair of Computer Science, Department of Computer Science*, PHD, University of Regina; MS, University of Regina; BS, Shandong Univ of Technology

Renjie Zhou, PHD (rxz013@shsu.edu), *Assistant Professor of Geology, Department of Environmental & Geosciences*, PHD, Texas A&M University; BS, China University of Petroleum

Linda Reichwein Zientek, PHD (lrz002@shsu.edu), *Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Sam Houston State University; BS, Sam Houston State University

Interim Faculty

Interim Faculty have specified periods of appointment and are not considered to be working toward tenure at Sam Houston State University.

A

Sheri Christi Aajul, MS (sca022@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Univ of Florida; BS, Univ of Florida

Mahasen Belal Saad Abdelhafez, MA (mba028@shsu.edu), *Assistant Professor of Practice of Engineering Technology, Department of Engineering Technology*, MA, Southern Illinois U-Carbondale; BARCH, Cairo University

Carlton G Abernathy, MA (stdcga11@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; MA, Texas State Univ-San Marcos; BA, Sam Houston State University

Olivia Ann Abernethy-Ramsey, MA (oaa026@shsu.edu), *Lecturer of English, Department of English*, MA, Texas Tech University; BA, Texas A&M University

George Matthew Ackerman, PHD (gma017@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Capella University; JD, Nova Southeastern University; MS, Nova Southeastern University; MBA, Nova Southeastern University; BA, Florida-Atlantic U

Jayne Kathleen Adair, EDD (jka007@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Lamar University; MED, Univ of Texas-Arlington; BBA, Univ of North Texas

Emmanuel K Addai, PHD (eka012@shsu.edu), *Lecturer Pool, Department of Engineering Technology*, PHD, Otto Von Guericke University; MBA, Univ of Southern Indiana; MS, Otto Von Guericke University; BS, University of Cape Coast

Upeksha Ayanthi Adikari, MS (uaa004@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Texas Tech University; BS, University of Peradeniya

Lilibeth Claudio Al-Kofahy, PHD (lxa019@shsu.edu), *Clinical Professor of Nursing, School of Nursing*, PHD, University of Queensland (The); MN, Victoria University; MAN, Far Eastern University; BSN, MV Gallego Foundation Colleges

Heather Ann Alaniz, MA (haa034@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MA, Univ of Houston-Clear Lake

Julie Nicholson Albert, MA (jna003@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MA, Sam Houston State University; BS, Appalachian State University

Samantha Mae Aldrich-Wollgast, MA (sma020@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BS, Sam Houston State University

Adannaa Oparanozie Alexander, MPH (aoalexander@shsu.edu), *Clinical Assistant Professor of Public Health, Department of Public Health*, MPH, Emory University; AB, Washington University

Robert Scott Allen, EDD (rsa002@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Sam Houston State University; MED, Sam Houston State University; BFA, Texas State Univ-San Marcos

Bright Tawiah Amofa, MS (bta012@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, University of Cape Coast

Jacob Sheldon Anderson, MA (jxa191@shsu.edu), *Lecturer of Security Studies, Department of Security Studies*, MA, Naval Postgrad Schl; BA, Grove City College

Nathan Douglas Anderson, MFA (nda016@shsu.edu), *Assistant Professor of Practice in Arts, Department of Art*, MFA, Academy of Art University; BFA, Academy of Art University

Michelle Angelo, MSN (mx147@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Univ of Texas HSC-Houston; BSN, McNeese State University; BSBA, McNeese State University

Kay E Angrove, EDD (kxa014@shsu.edu), *Adjunct Faculty, Department of University Wide*, EDD, Sam Houston State University; MED, Univ of Texas-San Antonio; BBA, Univ of Texas-San Antonio

Nadia J Arensdorf, MA (nadiaarendorf@shsu.edu), *Lecturer of English, Department of English*, MA, Sam Houston State University; BA, Univ of La Verne

Mehmet Arican, PHD (mxa146@shsu.edu), *Lecturer of Criminal Justice & Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Leicester; MA, Univ of Leicester; BA, Univ of Istanbul

Dusanka Armstrong, MA (dxa015@shsu.edu), *Adjunct, Department of Counselor Education*, MA, Sam Houston State University; BS, Sam Houston State University

Leah Marie Arrington, PHD (lma070@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, PHD, Texas Woman's University; MS, Utah State University; BS, Brigham Young University

Tamara Sue Arrington, MA (txa041@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, The University of Memphis; BA, Univ of Florida

Michael Arvanitopoulos, PHD (mxa258@shsu.edu), *Lecturer-Pool Faculty of Philosophy, Department of Psychology & Philosophy*, PHD, Univ of South Florida; AM, Univ of South Florida; BA, Suny At Stonybrook

Kyle Schrader Ashton, MPSA (kxa030@shsu.edu), *Adjunct Faculty, Department of University Wide*, MPSA, Texas A&M University; BS, Brigham Young University-Idaho

Sabrin Ahmad Assi, PHD (saa084@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Houston-Main; MS, Univ of Houston-Main; BS, Univ of Houston-Main

Esther Clara Hudson Augustine, AM (ech007@shsu.edu), *Lecturer-Pool Faculty of Philosophy, Department of Psychology & Philosophy*, AM, Catholic University-America; AB, Univ of St Thomas; BS, Univ of St Thomas

B

Misti Michelle Babino, MED (mme003@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Sam Houston State University; BS, Sam Houston State University

Zachary Charles Bachman, PHD (zcb006@shsu.edu), *Lecturer of Philosophy, Department of Psychology & Philosophy*, PHD, Univ of Calif-Riverside; MA, Texas A&M University; BA, Univ of Calif-San Diego

Joshua Robert Backus, MFA (jrb144@shsu.edu), *Visiting Assistant Professor of Art, Department of Art*, MFA, Univ of Chicago; BFA, School of Art Inst of Chicago

Jerrine Green Baker, MBA (jgb021@shsu.edu), *Lecturer of Management and Marketing, Department of Mgmt, Mktg, & Info Systems*, MBA, Virginia Commonwealth Univ; BS, Averett University

Geraldo De Guzman Banaag, MA (gdb018@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MA, Sam Houston State University; BS, Philippine Normal Cl

Diana Villarreal Barfield, EDD (dx072@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, EDD, Abilene Christian University; MA, Abilene Christian University; BS, Mountain State University

Carolyn Kate Baxter, BS (ckb039@shsu.edu), *Lecturer-Pool Faculty of Art, Department of Art*, BS, Texas A&M University

Lindsey Brooke Beatty, MSN (lbp001@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Loyola Univ-New Orleans; BS, Sam Houston State University; BS, Sam Houston State University

Jennifer Martina Bell, MBA (jmb258@shsu.edu), *Lecturer of Engineering Technology, Department of Engineering Technology*, MBA, Colorado Technical University; BS, Texas Tech University

Richard S Bello, PHD (scm_rsb@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, PHD, LSU & A&M College; MA, LSU & A&M College; BA, LSU & A&M College

Tara Anne Benevides, MS (tao008@shsu.edu), *Lecturer of Victim Studies, Department of Victim Studies*, MS, Sam Houston State University

Jamie Heintz Benson, EDD (jlh015@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, EDD, Sam Houston State University; MED, Sam Houston State University; BBA, Sam Houston State University

Jalon Jatrey Berry, MA (jalonberry@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BS, Sam Houston State University

Amy Lynn Bilski-Arredondo, MED (alb160@shsu.edu), *Lecturer of English, Department of English*, MED, Texas Tech University; BS, Texas Tech University; BS, Texas Tech University; BS, Texas Tech University

Janet Horton Bius, PHD (chm_jhb@shsu.edu), *Lecturer of Chemistry, Department of Chemistry*, PHD, Univ of Kansas; MS, Sam Houston State University; BS, Sam Houston State University

Terronica Latreal Blackmon, PHD (tlb137@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Prairie View A&M University; BS, Prairie View A&M University; BS, Prairie View A&M University

Katelyn Jane Blankenburg, MMT (kjb045@shsu.edu), *Clinical Assistant Professor of Music, School of Music*, MMT, Loyola Univ-New Orleans; BM, Sam Houston State University

Susan C Bohan, MED (scb054@shsu.edu), *Lecturer of Teaching and Learning, Department of Teaching & Learning*, MED, Sam Houston State University; BAT, Sam Houston State University

Arlinda Suzanna Boland, MA (asb101@shsu.edu), *Lecturer of American Sign Language, Department of World Languages & Cultures*, MA, Gallaudet University; MS, Gallaudet University; MA, Univ of Bristol; BA, Gallaudet University

Krystal Bolden, MFA (krb112@shsu.edu), *Clinical Assistant Professor of Mass Communication, Department of Mass Communication*, MFA, National University; BA, Bowling Green State University; BA, Bowling Green State University

Breanna Lynne Boppre, PHD (bxb078@shsu.edu), *Lecturer of Victim Studies, Department of Victim Studies*, PHD, Univ of Nevada-Las Vegas; MS, Portland State University; BA, Univ of Nevada-Reno

Rasika Nitin Borse, MFA (rnb020@shsu.edu), *Lecturer of Dance, Department of Dance*, MFA, Sam Houston State University; BA, Univ of Calgary

Craig S Boudreaux, DO (c.boudreaux@shsu.edu), *Assistant Professor of Family Medicine; Assistant Dean, COM, Department of Primary Care & Clinical Medi*, DO, Univ of North TX Hlth Sci Cntr; BBA, Univ of Texas At Austin

Gregory B Bowhuis, EDD (gbb008@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MED, Grand Valley State University; BS, Grand Valley State University

Michael Clyde Boyle, PHD (mcb003@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, PHD, Alliant Int University - Fresno; MS, Utah State University; BS, Brigham Young University; BA, Southern Utah University

Steven Brack, MSM (sxb138@shsu.edu), *Lecturer of Security Studies, Department of Security Studies*, MSM, U-Houston Downtown; BS, Nova Southeastern University

Bahia Braktia, EDD (bxb039@shsu.edu), *Adjunct Faculty, Department of University Wide*, EDD, Sam Houston State University

Tanisha Renea Brazil, MA (tbrazil@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BS, Univ of North Texas

Mary Magdalene Breaux, PHD (mmp019@shsu.edu), *Associate Professor of Practice of Victim Studies, Department of Victim Studies*, PHD, Prairie View A&M University; MA, Webster University; BS, Sam Houston State University

Ashley Lauren Brittain, MED (axb199@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, MED, Univ of Texas-Arlington

Shelby Ann Brock, MS (sab014@shsu.edu), *Lecturer of Engineering Technology, Department of Engineering Technology*, MS, Sam Houston State University; BA, Sam Houston State University

Thomas John Brommage, PHD (tjb039@shsu.edu), *Lecturer of Philosophy, Department of Psychology & Philosophy*, PHD, Univ of South Florida; MA, Univ of South Florida; BA, Manhattanville College

Casey Camille Graham Brown, PHD (ccb068@shsu.edu), *Adjunct Faculty, Associate Dean COE, Department of Educational Leadership*, PHD, Oklahoma State University; MED, Oklahoma State University; BS, Southeastern Oklahoma St Univ

Juanita M Brown, DO (jmb228@shsu.edu), *Associate Professor of Osteopathic Principles and Practice, Department of Osteopath Principles & Pract*, DO, Nova Southeastern University; BS, Florida Southern College

Michael F. Brown, PHD (mfb021@shsu.edu), *Clinical Associate Professor of Nursing, School of Nursing*, PHD, Univ of Texas HSC-Houston; MSN, West Texas A&M State Univ; BSN, West Texas A&M State Univ

Kelsie Dawn Bryand, MS (kds001@shsu.edu), *Adjunct Faculty, Department of Forensic Science*, MS, Sam Houston State University; BA, Texas A&M University

Zachary Franklin Bryant, DMA (zfb001@shsu.edu), *Lecturer of Theatre, Department of Theatre & Musical Theatre*, DMA, Univ of Maryland-College Park; MM, Univ of Colorado; MA, Columbus State University

Rachel Elizabeth Lane Bubela, MA (rel016@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BS, Sam Houston State University

Silke Bugge, MA (sbugge@shsu.edu), *Lecturer of World Languages and Cultures, Department of World Languages & Cultures*, MA, Humboldt University of Berlin; BSED, Humboldt University of Berlin

Mark A Bull, MS (mab028@shsu.edu), *Lecturer of Criminal Justice, Department of Criminal Justice & Criminology*, MS, Sam Houston State University; BS, Sam Houston State University

Alisha N Bullion, MS (anb035@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, MS, Sam Houston State University; BS, Sam Houston State University

Jennifer Ann Bunn, PHD (jab229@shsu.edu), *Professor of Kinesiology and Associate Dean of COHS, Department of Kinesiology*, PHD, Baylor University; MS, Univ of Kentucky; BS, Nicholls State University

Laura Keilers Burleson, PHD (hec_lpb@shsu.edu), *Assistant Professor of Interior Design, Department of Human Sciences*, PHD, Texas Tech University; MS, Oklahoma State University; BS, Oklahoma State University

John Phillip Burnett, PHD (jpb006@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, PHD, Stephen F Austin University; SSP, Sam Houston State University; BS, Sam Houston State University

Kirk A Burns, MS (lib_kab@shsu.edu), *Lecturer of Computer Science, Department of Computer Science*, MS, Sam Houston State University; BS, Sam Houston State University

David S. Burris, PHD (csc_dsb@shsu.edu), *Professor of Computing Science, Department of Computer Science*, PHD, Texas A&M University; MA, Texas State Univ-San Marcos; BS, Texas State Univ-San Marcos; BS, Texas State Univ-San Marcos

Tonya Renae Burton, DMA (trb069@shsu.edu), *Lecturer of Music, School of Music, DMA*, Univ of Maryland-College Park; MM, Rice University; BM, Cleveland Institute of Music

Kari Lee Bush, MA (klb021@shsu.edu), *Lecturer of English, Department of English*, MA, LSU & A&M College; MA, Sam Houston State University; BA, Sam Houston State University

Christine Marie Butler, EDD (cmb013@shsu.edu), *Lecturer of Educational Leadership, Department of Educational Leadership*, EDD, Sam Houston State University; MA, Northwestern St Un of Louisiana; BA, Northwestern St Un of Louisiana

Shanika Shonte Byars, MS (ssb046@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MS, Jackson State University; BS, Alcorn State University

C

Allyzah Allene De Galicia Cabugao, MA (adc080@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; BA, Univ of Houston-Main

Michelle Ellen Camarata, MS (mec068@shsu.edu), *Lecturer of Kinesiology, Department of Kinesiology*, MS, Sam Houston State University; BS, Sam Houston State University

Benjamin Aaron Cantu, MA (bcantu@shsu.edu), *Assoc Dir of Visitors Services, Adjunct, Department of Teaching & Learning*, MA, Sam Houston State University; BS, East Texas Baptist University

Cesar Enoc Cantu, BS (cec074@shsu.edu), *Visiting Assistant Professor of Biological Sciences, Department of Biological Sciences*, BS, Sam Houston State University

Macaela Michelle Carder, PHD (mxw046@shsu.edu), *Lecturer of Theatre, Department of Theatre & Musical Theatre*, PHD, Bowling Green State University; MA, University of Central Missouri; BFA, University of Central Missouri

Nancy Stark Carey, MS (nsc014@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, MS, Texas Woman's University; BS, Southwestern Adventist Univ.

Gloria F Carter, MED (gfc002@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Sam Houston State University; BS, Transfer College; BS, Transfer College

Rebecca J Cary, MS (rcc026@shsu.edu), *Lecturer of Victim Studies, Department of Victim Studies*, MS, Sam Houston State University; BS, Sam Houston State University

Robert T Cashion, PHD (his_rtc@shsu.edu), *Professor of History, Department of History*, PHD, Texas Christian University; MA, Univ of Texas-Arlington; BA, Austin College

Yvonne Casique, MA (yxc106@shsu.edu), *Lecturer of Art, Department of Art*, MA, Azusa Pacific University; BA, U-Houston Downtown

Angel Castelan, MFA (axc515@shsu.edu), *Lecturer-Pool Faculty of Arts, Department of Art*, MFA, Univ of Houston-Main; BFA, Univ of Houston-Main

Caron Charlton Cates, MA (soc_ccc@shsu.edu), *Lecturer of Sociology, Department of Sociology*, MA, Sam Houston State University; BS, Sam Houston State University

Heather Marie Caudle, EDM (hmc015@shsu.edu), *Adjunct Faculty, Department of English*, EDM, Univ of Pennsylvania; BA, Univ of Texas At Austin

Alberto Alejandro Ceballos Delgado, BS (aac088@shsu.edu), *Lecturer of Computer Science, Department of Computer Science*, BS, Sam Houston State University

Bridgette Hajovsky Cerny, MED (blc071@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Lamar University; BS, Univ of Houston-Victoria

Bruce G Chabot, PHD (brucechabot@shsu.edu), *Lecturer of English, Department of English*, PHD, Texas A&M University; MA, Texas A&M University; BA, Univ of Dallas

Amber Vonona Chambers, MS (avc015@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, MS, Texas A&M University; BS, Univ of Idaho

Courtney Dale Chastine, MA (cdc029@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BA, Sam Houston State University

Jacqueline Beth Chetzron, PHD (jbc052@shsu.edu), *Lecturer of Library Public Services, Department of Library Sci & Technology*, PHD, Univ of North Texas; MLS, Texas Woman's University; MS, Univ of Texas At Austin; BA, Univ of Texas At Austin

Jennifer L Child, MA (jlc055@shsu.edu), *Lecturer of English, Department of English*, MA, Sam Houston State University; BA, Texas A&M University

Fanny Ruth Chisum, EDD (ruthcubas@shsu.edu), *Adjunct Faculty, Department of University Wide*, EDD, University of New England; MS, Palm Beach Atlantic; BA, Palm Beach Atlantic; BA, Palm Beach Atlantic

Mary Katherine Chisum, MED (stdmkc13@shsu.edu), *Instructional Designer, Adjunct Faculty, Department of University Wide*, MED, Sam Houston State University; BFA, Sam Houston State University

Laurie L Christensen, MS (llc022@shsu.edu), *Lecturer of Security Studies, Department of Security Studies*, MS, Sam Houston State University; BS, Univ of Houston-Main

Lauren Clay, MFA (lxc039@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Wichita State University; BA, McNeese State University

Tara Diyanne Clover, MA (tclover@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, MA, Sam Houston State University

Alan C Clune, PHD (phl_acc@shsu.edu), *Lecturer of Philosophy, Department of Psychology & Philosophy*, PHD, University at Buffalo, Suny; MS, Rensselaer Poly Inst; BS, Worcester Polytechni

Wanda Renee Coleman, MED (wrc011@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Sam Houston State University; BAT, Sam Houston State University

Jessica R Collier, MED (jessica.collier@shsu.edu), *Adjunct Faculty, Department of University Wide*, MED, Sam Houston State University; BA, Sam Houston State University

Ouida M Collins, MD (omc007@shsu.edu), *Assistant Professor of Family Medicine, Department of Primary Care & Clinical Medi*, MD, Meharry Medical College; MPH, Univ of Texas HSC-Houston; BS, Xavier University of Louisiana

Marilyn Ruth Comer, MFA (mrc052@shsu.edu), *Lecturer of English, Department of English*, MFA, Sam Houston State University; BA, Univ of Texas-Arlington

Meredith Leigh Conrey, EDD (mlc033@shsu.edu), *Adjunct Faculty, Department of University Wide*, EDD, Sam Houston State University; MS, Texas A&M University; BA, Texas A&M University

Jay O Coons, PHD (stdjoc12@shsu.edu), *Assistant Professor of Practice of Criminal Justice, Department of Criminal Justice & Criminology*, PHD, Sam Houston State University; MS, Sam Houston State University; BS, Sam Houston State University

Mark Brandon Cooper, MA (mbc004@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BA, Sam Houston State University

Trent Eugene Cooper, MM (stdtec16@shsu.edu), *Lecturer-Pool Faculty of Music, School of Music*, MM, Sam Houston State University; BM, Univ of Houston-Main

Jennifer Sherry Coppock, MA (jsn019@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; BA, Univ of Houston-Main

Bryan Michael Corbin, EDD (bmc108@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, EDD, Southwestern College; MA, Western New Mexico University; MPW, Chatham College; BA, California St Un-Fullerton

Sarah Leslie Couch, MS (stdslk23@shsu.edu), *Lecturer of Biological Sciences, Department of Biological Sciences*, MS, Sam Houston State University; BS, Sam Houston State University

Tonya L Couch, MS (tlc106@shsu.edu), *Lecturer of Nursing, School of Nursing*, MS, Western Governors University; BSN, Prairie View A&M University

GM Cox, PHD (gmc037@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Univ of Texas-Arlington; MS, Sam Houston State University; BS, Sam Houston State University

John M Crabtree, DMA (jmc001@shsu.edu), *Lecturer of Music, School of Music, DMA, LSU & A&M College; MM, LSU & A&M College; BM, Southeastern Louisiana Univ.*

Kathy Suzette Cramer, MED (kcb005@shsu.edu), *Lecturer of English, Department of English, MED, Sam Houston State University; BA, Brigham Young University*

Abbigayle Mykenzie Creger, MA (amc132@shsu.edu), *Adjunct Faculty, Department of University Wide, MA, Sam Houston State University; BA, Sam Houston State University*

Joshua Curtis Criswell, AM (jcc146@shsu.edu), *Assistant Professor in Practice of Mass Communications, Department of Mass Communication, AM, Depaul University; BS, LSU & A&M College*

Allen Lea Culver, DBA (alc166@shsu.edu), *Lecturer of Security Studies, Department of Security Studies, DBA, Franklin University; MPS, Penn State University; BS, Franklin University; BS, Urbana College*

Melissa Dawn Cummins, PHD (mdc071@shsu.edu), *Lecturer of Music, School of Music, PHD, Univ of Kansas; MM, Univ of South Dakota; MMED, Southeast Missouri State Univ; BSED, Nw Missouri St Univ*

Peter Andrew Curka, DO (pac027@shsu.edu), *Associate Professor of Osteopathic Manipulative Medicine, Department of Osteopath Principles & Pract, DO, University of New England; BS, Boston College*

D

Danielle Kay Dahmann, MA (dkd018@shsu.edu), *Lecturer of English, Department of English, MA, Texas State Univ-San Marcos; BA, Univ of Mary Hardin Baylor*

Darrell Lynn Darnell, MBA (dxd091@shsu.edu), *Lecturer of Security Studies, Department of Security Studies, MBA, George Washington University; MGA, Univ of Maryland-Univ Coll; BS, Univ of Maryland-Univ Coll*

Amy Kathleen Rogers Dean, PHD (amydean13@shsu.edu), *Lecturer of History, Department of History, PHD, Purdue University; MA, Purdue University; BA, Texas Christian University; BA, Texas Christian University; BA, Texas Christian University*

Chuck D Deaton, MED (cdd042@shsu.edu), *Lecturer of Education, Department of Teaching & Learning, MED, Sam Houston State University; BFA, Univ of Houston-Main*

Magdalena A Denham, EDD (mxm002@shsu.edu), *Professor of Practice of Security Studies, Department of Security Studies, EDD, Sam Houston State University; MA, San Diego St Univ; BA, Univ of San Diego*

Elaine Barbara George, MS (ebg020@shsu.edu), *Lecturer of Kinesiology, Department of Kinesiology*, MS, University of Cali, San Fran; BA, Univ of Calif-Santa Cruz; BA, Univ of Calif-Santa Cruz

Arsalan Gharaveis, PHD (axg312@shsu.edu), *Lecturer of Human Sciences, Department of Human Sciences*, PHD, Texas A&M University; MARCH, Iran University of Science and; BARC, Iran University of Science and

Veronica Sierra Danielle Gibson, MFA (vsg014@shsu.edu), *Visiting Assistant Professor of Art, Department of Art*, MFA, Pratt Institute; BS, Western Michigan University

Gloria Trigg Gilbert, MA (icc_gtg@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MA, Sam Houston State University; BSCJ, Sam Houston State University

Kathleen Crowley Gilbert, EDD (kgilbert@shsu.edu), *Adjunct Faculty, Department of Public Health*, EDD, Sam Houston State University; MA, Sam Houston State University; BS, Stephen F Austin University

Heidi Elizabeth Gilroy, PHD (heg023@shsu.edu), *Lecturer of Nursing, School of Nursing*, PHD, Texas Woman's University; MSN, Illinois Benedtn Col; BS, Texas Woman's University

Naomi Kay Gjevne, DM (nkg003@shsu.edu), *Lecturer of Music, School of Music*, DM, Florida State University; MM, Florida State University; BM, Univ of Minnesota-Twin Cities

Sefik T Gokaslan, MD (stg016@shsu.edu), *Professor of Practice in Pathology, Department of Clinical Anatomy*, MD, Univ of Istanbul

Danielle Marie Goodspeed, PHD (dmg048@shsu.edu), *Visiting Assistant Professor of Biological Sciences, Department of Biological Sciences*, PHD, Rice University; MS, Rice University; BS, Roger Williams University; BS, Roger Williams University

Kim H Graham, MED (kxg083@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Texas State Univ-San Marcos; BS, Texas State Univ-San Marcos

Donna June Grannan, MA (djg059@shsu.edu), *Lecturer of Security Studies, Department of Security Studies*, MA, Naval Postgrad Schl; MBA, Wesleyan College; BBA, Texas Christian University

Julian Grant, BFA (jxg390@shsu.edu), *Lecturer of Mass Communication, Department of Mass Communication*, BFA, York University

Tayler Lorraine Gray, MA (tlg016@shsu.edu), *Lecturer of Kinesiology, Department of Kinesiology*, MA, Sam Houston State University; BS, Sam Houston State University

Stephen Michael Green, MA (smg032@shsu.edu), *Lecturer-Pool of Mass Communication, Department of Mass Communication*, MA, Kent State University; BA, Sam Houston State University

Robert J. Greenberg, MS (rjg046@shsu.edu), *Assistant Professor of Practice of Computer Science, Department of Computer Science*, MS, Illinois State University; BS, Illinois State University

Ronnie Bennett Greene, BFA (rbg014@shsu.edu), *Lecturer-Pool Faculty of Mass Communication, Department of Mass Communication*, BFA, Sam Houston State University

Christopher D Greenleaf, PHD (cdg053@shsu.edu), *Clinical Assistant Professor of Kinesiology, Department of Kinesiology*, PHD, Rocky Mountain Univ Health Pro; MS, Middle Tennessee State Univ; BS, Charleston Southern University

Janet Lynn Gregory, DO (jlg160@shsu.edu), *Assistant Professor of Clinical Medicine, Department of Primary Care & Clinical Medi*, DO, Univ of N. Texas Hlth Sci Cnt; BA, Univ of Louisiana-Monroe

Amber Dawn Griffin, PHD (adgriffin@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Sam Houston State University; MS, Arizona State University; BA, Univ of Wisconsin-La Crosse; BA, Univ of Wisconsin-La Crosse

Rebecca Faye Griffin, MA (becca.griffin@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Baylor University; BA, Baylor University

Shaun T Griffiths, MFA (stg008@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Alfred University; MA, University of Sunderland; BFA, San Jose State University

Ericka Judith Guadarrama, MA (ejm019@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BS, Sam Houston State University

Dana Rice Guidroz, DMA (drg059@shsu.edu), *Visiting Assistant Professor of Music, School of Music*, DMA, Univ of Southern Mississippi; MM, Florida State University; BM, Baylor University

Pooja Gupta, EDD (pxg055@shsu.edu), *Clinical Assistant Professor of Special Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MS, Univ of Houston-Clear Lake; BED, Women's University; BC, University of Bombay

Stuart West Gurley, PHD (swg003@shsu.edu), *Lecturer of Philosophy, Department of Psychology & Philosophy*, PHD, Univ of South Florida; MA, Univ of New Mexico; BA, Austin College; BA, Austin College

Vianey Gutierrez, MA (vxg017@shsu.edu), *Lecturer of Spanish, Department of World Languages & Cultures*, MA, Sam Houston State University; BBA, Institute of Tech of Chihuahua

H

Farzana Hafeez, PHD (fxh021@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Oklahoma State University; MS, Univ of Central Oklahoma; MSC, Univ of Karachi; BS, Univ of Karachi

Bruce D. Hall, MLIS (lib_bdh@shsu.edu), *Clinical Assistant Professor, Newton Gresham Library, Department of Library Public Services*, MLIS, Univ of Wisconsin-Milwaukee; BA, Old Dominion University

Christina Marie Hammons, MED (cmh085@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, MED, Univ of Houston-Main; BS, Univ of Houston-Main

Tama Suzanne Hamrick, EDD (thamrick@shsu.edu), *Adjunct Faculty, Department of University Wide*, EDD, Sam Houston State University; MA, Univ of Northern Colorado; BA, Univ of Northern Colorado

Robert G Harmon, MSN (rgh012@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, MSN, Univ of Texas HSC-Houston; BSN, Austin Peay State University

Billie Bob Harrell, MSN (stdbbh11@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Un of Tx-HSC At Houston; BSN, Un of Tx-HSC At Houston

Lisa Ann Harris, BFA (lah087@shsu.edu), *Lecturer of Art, Department of Art*, BFA, Univ of Houston-Main

Susan Renee Harte, EDD (susanharte@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, EDD, Texas A&M - Commerce; MED, Lamar University; MA, Univ of Nebraska-Omaha; BSED, Peru State College

Deborah Rathke Harvey, MM (drh074@shsu.edu), *Assistant Professor of Practice of Music, School of Music*, MM, Rice University; BM, Northwestern University

Madison Brooke Hayman, MED (mbh020@shsu.edu), *Adjunct Faculty, Department of University Wide*, MED, Univ of Texas-Pan American; BS, Sam Houston State University

Marsha Pleshette Heard, EDD (mph030@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MED, Univ of Texas-Arlington; MS, Univ of Houston-Clear Lake; BS, Houston Christian University; BS, Houston Christian University

Courtney Robert Hebert, EDD (crh075@shsu.edu), *Lecturer of Library Science and Technology, Department of Library Sci & Technology*, EDD, Sam Houston State University; MED, Nicholls State University; BA, Nicholls State University

Natalie D Hegwood, PHD (eco_ndh@shsu.edu), *Adjunct Faculty and Assistant Dean, College of Business Administration, Department of Economics & Intl Business*, PHD, Univ of Houston-Main; MA, Univ of Houston-Main; BBA, Univ of Texas At Austin; BBA, Univ of Texas At Austin

Janene Withers Hemmen, EDD (stdjwh22@shsu.edu), *Clinical Assistant Professor of Educational Leadership, Department of Educational Leadership*, EDD, Sam Houston State University; MED, Sam Houston State University; BA, Iowa State University

Michael Henderson, MFA (mhenderson@shsu.edu), *Professor of Art and Associate Dean, CAM; Adjunct Faculty, Department of Art*, MFA, Univ of North Texas; BFA, Univ of North Texas

Nicole Renee Hendricks, PHD (nrh031@shsu.edu), *Visiting Assistant Professor of Mass Communication, Department of Mass Communication*, PHD, Univ of Southern Mississippi; MA, Ball State University; BA, Quincy College

Kenneth E Hendrickson, PHD (his_keh@shsu.edu), *Dean of Graduate Studies, Professor of History, Department of History*, PHD, University of Iowa; MA, Texas A&M University; BA, Texas A&M University

Kevin Samuel Shaw Henning, PHD (henning@shsu.edu), *Clinical Associate Professor of Business Analysis, Department of Economics & Intl Business*, PHD, Texas Tech University; MS, Texas Tech University; BBA, University of The Southwest

Ernesto Molinar Hernandez, PHD (emh060@shsu.edu), *Lecturer of Food Science & Nutrition, Department of Human Sciences*, PHD, Univ of Massachusetts-Amherst; MS, Oregon State University; BS, University of Guanajuato

Jose Ramon Herrera, MED (jrherrera@shsu.edu), *Adjunct Faculty, Department of University Wide*, MED, Texas State Univ-San Marcos; BS, Univ of Oregon; BS, Texas A&M University

Kristen Karnes Hester, MA (kck023@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; BA, Houston Christian University; BA, Houston Christian University

Carly Ann Hoffmann, PHD (cahoffmann@shsu.edu), *Assistant Professor of Practice of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Texas Tech University; BS, Texas A&M University

Lonna Ann Marie Holland, MS (lah045@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, MS, Sam Houston State University; BS, Sam Houston State University

Michael Gene Hollander, MBA (mgh035@shsu.edu), *Assistant Professor of Practice in Finance, Department of Economics & Intl Business*, MBA, Univ of Texas At Austin; BBA, St Edwards University

Maxie Hollingsworth, EDD (mxh209@shsu.edu), *Lecturer-Pool Faculty of Teaching and Learning, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MSW, Howard University

Maria Alexander Holmes, EDD (mah001@shsu.edu), *Lecturer of First-Year Experience, Department of University Wide*, EDD, Sam Houston State University; MA, Sam Houston State University; BA, The University of Memphis

Susan Lee Honeywell, MA, *Lecturer of Communication Studies, Department of Communication Studies*, MA, Univ of Texas At Tyler; BS, Univ of Texas At Tyler

Susan Jeanette Hoppe, PHD (sjh008@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Sam Houston State University; MA, Sam Houston State University; BSCJ, Sam Houston State University

Valerie Christine Hopper, DO (vxh026@shsu.edu), *Assistant Professor of Family Medicine, Department of Primary Care & Clinical Medi*, DO, Univ of N. Texas Hlth Sci Cnt; BS, University of Tulsa

Daniel Taylor Horenstein, MS (dth041@shsu.edu), *Lecturer of Physics and Astronomy, Department of Physics & Astronomy*, MS, Georgia State University; BA, Columbia University

Dena Ruth Horne, MA (drh022@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; BS, Sam Houston State University

Glenda Read Hsiao, MD (grh031@shsu.edu), *Assistant Professor of Primary Care, Department of Primary Care & Clinical Medi*, MD, Un of Tx-HSC At Houston; BS, Baylor University

Victor Kaifu Hsiao, MD (vkh003@shsu.edu), *Assistant Professor of Primary Care, Department of Primary Care & Clinical Medi*, MD, Un of Tx-HSC At Houston; BS, Baylor University

Yewen Huang, PHD (yhuang@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Univ of Houston-Main; BS, Hebei Normal University; BS, Hebei Normal University

Cheri Hudgeons, MS (cxh022@shsu.edu), *Senior Lecturer of Mathematics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Janice Marie Hudson, MED (jmh084@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Sam Houston State University; BS, Lamar University

Joan E.N. Hudson, PHD (bio_jxn@shsu.edu), *Associate Professor of Biology, Department of Biological Sciences*, PHD, Iowa State University; MS, Texas A&M University; BS, Texas A&M University

Billy S Humphrey, MS (icc_bsh@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MS, Sam Houston State University; BS, Sam Houston State University

Monique Chanel Huntley, PHD (mch067@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, PHD, Texas Woman's University; MSN, Prairie View A&M University; BSN, Prairie View A&M University

Lane A Hurst, MS (lah005@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MS, Sam Houston State University; BSCJ, Sam Houston State University

Antionette Antwon Hutchinson, MSN (aah106@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Univ of Texas HSC-Houston; BS, Texas Woman's University

Aaron David Hyams, PHD (adh061@shsu.edu), *Lecturer of History, Department of History*, PHD, Marquette University; MA, Univ of Montana-Missoula; BA, Marquette University

I

Jacqueline M Ingram, EDD (jmi002@shsu.edu), *Clinical Associate Professor of Education, Department of Teaching & Learning*, EDD, Sam Houston State University; MED, Texas A&M University; BS, Texas A&M University

J

Hope Pilar Jackson, PHD (hjp002@shsu.edu), *Visiting Assistant Professor of Nursing, School of Nursing*, PHD, Univ of Nebraska Med Center; MSN, Univ of Nebraska Med Center; BSN, Creighton University

Marcia Lynn Jackson, PHD (mlj064@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, PHD, Walden University; MS, Radford University; BA, Virginia Wesleyan College

Parker Jackson, MS (psj003@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Linda Sue James, MS (lsj007@shsu.edu), *Clinical Associate Professor of Nursing, School of Nursing*, MS, University of Toronto; BSN, University of Western Ontario

Angela Faith Jarrell, PHD (afs014@shsu.edu), *Lecturer of Nursing, School of Nursing*, PHD, Texas Woman's University; MSN, Duquesne University; BSN, Univ of Tx Health Science Cntr

Gretchen L Jefferson, PHD (glj008@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, PHD, Univ of Oregon

Boyce William Jeffries, DMA (bwj009@shsu.edu), *Lecturer of Music, School of Music*, DMA, Univ of Toronto; MM, California St Un-Sacramento; BM, California St Un-Sacramento

Amanda Erin Johnson, MA (aej005@shsu.edu), *Adjunct Faculty, Department of University Wide*, MA, Sam Houston State University; BA, Sam Houston State University

Asheley Lynette Johnson, DNP (alj070@shsu.edu), *Lecturer of Nursing, School of Nursing*, DNP, Un of Tx-HSC At Houston; MSN, Prairie View A&M University; BSN, Univ of Texas-Arlington

Maya E Johnson, PHD (mej030@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, PHD, Texas A&M University; MS, Texas A&M University; BS, Lincoln University

Desha Johnson Makiya, PHD (dxj016@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, PHD, Univ of Texas At Tyler; MBA, University of Phoenix; BS, Alcorn State University

Domenique Elizabeth Jones, PHD (dej016@shsu.edu), *Lecturer of Human Sciences, Department of Human Sciences*, PHD, Univ of Tennessee-Knoxville; MS, Univ of North Texas; BS, Univ of North Texas

Dustin L Jones, PHD (dljones@shsu.edu), *Adjunct Faculty; Associate Dean COSET and Professor of Mathematics Education, Department of Mathematics & Statistics*, PHD, Univ of Missouri-Columbia; MS, Texas A&M University; BS, Southwest Baptist University

Suzanne Smith Jones, MED (ssj027@shsu.edu), *Lecturer of Teaching and Learning, Department of Teaching & Learning*, MED, Univ of St Thomas; BS, Texas A&M University

William D Jones, PHD (wdj005@shsu.edu), *Lecturer of History, Department of History*, PHD, Rice University; MA, Rice University; BA, Tulane University

Kelly Sue Jordan, MA (stdksr13@shsu.edu), *Lecturer of English, Department of English*, MA, Sam Houston State University; BA, Sam Houston State University

Magen Leigh Jordan, MPH (mlj032@shsu.edu), *Lecturer of Public Health, Department of Public Health*, MPH, Sam Houston State University; BS, Sam Houston State University

K

Randi Nicole Kalich, MSN (rnk014@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, MSN, Univ of Texas-Arlington; BSN, Un of Tx-HSC At Houston

Allen W. Kaminski, MS (awk002@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MS, Sam Houston State University; BS, Sam Houston State University

Tudor Mitroi, MFA (tmitroi@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Univ of North Texas; DIPL, Institute of Plastic Art

Charles Darrel Mize, EDD (cdm060@shsu.edu), *Lecturer of Management, Marketing and Information Systems, Department of Mgmt, Mktg, & Info Systems*, EDD, Texas Tech University; MED, Texas Tech University; BA, Lubbock Christian University

Staci Elizabeth Mizell, EDD (sem108@shsu.edu), *Lecturer of Educational Leadership, Department of Educational Leadership*, EDD, Univ of Houston-Clear Lake; MBA, Univ of Houston-Clear Lake; BS, Univ of Houston-Clear Lake

James Arnold Mobley, MD (jam187@shsu.edu), *Lecturer of Public Health, Department of Public Health*, MD, Univ of Texas HSC-San Antonio; MPH, Texas A&M University; BS, Texas A&M University

David Joseph Moeller, MD (djm087@shsu.edu), *Assistant Professor of Practice in Radiology, Department of Clinical Anatomy*, MD, Univ of Texas Medical Branch; MS, Saint Mary's College; BS, St Edwards University

Zachary A Montz, PHD (zmontz@shsu.edu), *Lecturer of History, Department of History*, PHD, Univ of Texas At Austin; BA, Stanford University

Holly Marie Tetreault Moore, EDD (hmm039@shsu.edu), *Assoc Dir of Alt Cert Program; Adjunct Faculty, Department of Teaching & Learning*, EDD, Sam Houston State University; MSED, Univ of Kansas; BS, Oklahoma State University

Michael Copeland Moore, DVM (mcm014@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, DVM, Texas A&M University; BS, Texas A&M University; BS, Univ of Texas Medical Branch

Martin Morales, MCJ (mxm471@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MCJ, Tarleton State University; BAAS, Tarleton State University

Cindy Zuleyma Morataya, MSN (czm002@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Un of Tx-HSC At Houston; BSN, Un of Tx-HSC At Houston

Brandon R Morrison, MBA (brm030@shsu.edu), *System Analyst II, Adjunct Faculty, Department of Mgmt, Mktg, & Info Systems*, MBA, Wayland Baptist University

Stephen Lee Morrison, PHD (sxm130@shsu.edu), *Lecturer of Criminal Justice, Department of Criminal Justice & Criminology*, PHD, Univ of Southern Mississippi; MA, Univ of Houston-Clear Lake; BS, Univ of Houston-Clear Lake

Katie Elaine Moses, EDD (kem144@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, EDD, Lamar University; MED, Stephen F Austin University; BS, Stephen F Austin University

Iason Vasileios Moutzouris (ixm089@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*

Lindsey Elizabeth Mudge, MS (lxm098@shsu.edu), *Lecturer of Accounting, Department of Accounting*, MS, Texas A&M University; BBA, Texas A&M University

Kelly Leean Muns, MFA (klm022@shsu.edu), *Clinical Assistant Professor of Mass Communication, Department of Mass Communication*, MFA, Sam Houston State University; BA, Abilene Christian University

Benjamin Michael Muraida, MS (bmm120@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MS, Kaplan University; BS, Kaplan University

Michael K Murphy, MBA (mkm092@shsu.edu), *Lecturer of Engineering Technology, Department of Engineering Technology*, MBA, Rice University; BA, Saint Mary's-Ca

Divya Murthy, MFA (divyam@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Tufts University; BFA, Univ of Houston-Main

Rebecca Myers, MED (rmp037@shsu.edu), *Lecturer of Spanish, Department of World Languages & Cultures*, MED, Sam Houston State University; BS, Utah State University

Sujey C Myers, MA (scm025@shsu.edu), *Lecturer of Spanish, Department of World Languages & Cultures*, MA, Sam Houston State University; BA, Sam Houston State University

N

Karen Lee Nelson, PHD (kln005@shsu.edu), *Assistant Professor of Clinical Psychology, Department of Primary Care & Clinical Medi*, PHD, Univ of Houston-Main; MED, Univ of Houston-Main; BA, Southwestern University

Erin Jean Neve, MFA (eneve@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Univ of Minnesota; MAE, Texas Tech University; MA, Texas Tech University; BA, Texas Tech University

Ray Gene Newman, PHD (rgn006@shsu.edu), *Lecturer of Public Health, Department of Public Health*, PHD, New York University; MPHIL, New York University; MBA, California St Un-Long Beach; BS, East Central University

Haitrieu Thi Nguyen, MA (htn003@shsu.edu), *Lecturer of Sociology, Department of Sociology*, MA, Sam Houston State University; BA, Southwestern University

Kristin Leigh Nicholson, PHD (kln017@shsu.edu), *Assistant Professor of Practice of Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Texas A&M University; BS, Texas A&M University

Simeon Sreyas Nittala, DO (sxn067@shsu.edu), *Assistant Professor of Osteopathic Principles and Practice, Department of Osteopath Principles & Pract*, DO, Midwestern Univ; BS, Univ of Illinois-Chicago

Kenneth E Noe, PHD (ken026@shsu.edu), *Lecturer of Philosophy, Department of Psychology & Philosophy*, PHD, Southern Illinois U-Carbondale; MA, Loyola Marymount University; BA, Georgia Southern University

Fawzi Mohamed Noman, MBA (fnoman@shsu.edu), *Staff Assistant Dean - COBA; Adjunct Faculty, Department of Mgmt, Mktg, & Info Systems*, MBA, Sam Houston State University; BS, Univ of Houston-Main

Adam Jay Norris, MFA (ajn032@shsu.edu), *Lecturer of English, Department of English*, MFA, Sam Houston State University; BA, Western Illinois University

Ralph Coleman Norris, PHD (rcn006@shsu.edu), *Lecturer of English, Department of English*, PHD, University of Wales; MA, Georgia State University; BA, Kennesaw State University

Rebecca Maria Novotny, EDD (stdrmn11@shsu.edu), *Lecturer of Library Science and Technology, Department of Library Sci & Technology*, EDD, Sam Houston State University; MLS, Sam Houston State University; BA, Marymount College

Jimmy D Nowell, EDD (jdn040@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MED, Univ of Houston-Main; MM, Rice University; BME, Baylor University

Michael Edwin Noyes, PHD (men014@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Indiana University of Pennsylv; MA, Indiana University of Pennsylv; BA, Allegheny College

O

Caitlin O'Connell, PHD (cmo042@shsu.edu), *Lecturer of Kinesiology, Department of Kinesiology*, PHD, Univ of Pittsburg; BS, Univ of Rochester

Ronald B O'Neal, PHD (boneal@shsu.edu), *Assistant Professor of Practice in Mass Communication, Department of Mass Communication*, PHD, Our Lady of Lake University; MBA, University of Phoenix; BA, Howard University

Simmie Mirinda Oden, MA (smo006@shsu.edu), *Senior Lecturer of Kinesiology, Department of Kinesiology*, MA, Sam Houston State University; BS, Texas A&M University

Rebecca A Okungu, MSN (rao019@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, MSN, Prairie View A&M University; BSN, Prairie View A&M University

Tyler Brandon Orcutt, BFA (tbo006@shsu.edu), *Lecturer of Dance, Department of Dance*, BFA, Univ of South Florida

Christopher John Orta, MS (cjo023@shsu.edu), *Lecturer of American Sign Language, Department of World Languages & Cultures*, MS, Lamar University; BA, Univ of Houston-Main

Robert Benjamin Osborne, MM (rbo002@shsu.edu), *Lecturer of Music, School of Music*, MM, Southern Methodist University; BM, Texas Tech University

Lauren Elizabeth Owens, MA (leo017@shsu.edu), *Lauren Owens, Department of English*, MA, Stephen F Austin University; BA, Stephen F Austin University

P

Morgan C Page-Rice, MFA (mcp067@shsu.edu), *Visiting Assistant Professor of Art, Department of Art*, MFA, Rutgers, The St Un of Nj; BFA, Univ of Houston-Main

Jill Sandra Pagels, EDD (jsp018@shsu.edu), *Clinical Assistant Professor of Teaching and Learning, Department of Teaching & Learning*, EDD, Sam Houston State University; MED, Sam Houston State University; BA, Univ of Arizona

Samitha Dilhani Panangala, PHD (sdp021@shsu.edu), *Org Chem Lab Instr & Coord; Adjunct Faculty, Department of Chemistry*, PHD, Univ of Texas At Dallas; MS, Sam Houston State University

Anne Genevieve Papa-Torres, MSN (agp050@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, University of Phoenix

Michelle Renae Parker, EDD (stdmrh14@shsu.edu), *Assistant Professor of Practice of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MED, Sam Houston State University; BS, Sam Houston State University

Katherine Cabaniss Parsley, JD (kcp033@shsu.edu), *Assistant Professor of Practice for Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, JD, Pepperdine Univ; BS, Pepperdine Univ

Christopher Francis Patane, PHD (cfp009@shsu.edu), *Lecturer of Political Science, Department of Political Science*, PHD, Univ of Missouri-Columbia; MA, Univ of Missouri-Columbia; BA, Univ of Missouri-Columbia; BA, Univ of Missouri-Columbia

Nilam Patel, MA (npx019@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; BS, Rice University

Heshan Aravinda Pathirannehelage, PHD (heshap@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Univ of Florida; MS, Univ of Florida

Dwayne Pavelock, EDD (agr_dxp@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Texas Tech University; MED, Sam Houston State University; BS, Sam Houston State University

Gary Lynn Payne, MBA (glp001@shsu.edu), *Lecturer of Marketing, Department of Mgmt, Mktg, & Info Systems*, MBA, Sam Houston State University; BBA, Texas State Univ-San Marcos

Kathryne Dawne Pelton, MS (kdp014@shsu.edu), *Adjunct Faculty, Department of University Wide*, MS, West Virginia University; MBA, West Virginia University; BA, Sam Houston State University

Megan Joseph Penney, MMED (mjp088@shsu.edu), *Lecturer-Pool Faculty of Music, School of Music*, MMED, Univ of Kansas; BA, Texas Christian University; BA, Texas Christian University

Amanda Pepping, DM (ajp028@shsu.edu), *Lecturer of Music, School of Music*, DM, Univ of Texas At Austin; MBA, Sam Houston State University; MM, Arizona State University; BM, Arizona State University

Samuel L Perkins, PHD (slp018@shsu.edu), *Lecturer of Chemistry, Department of Chemistry*, PHD, Texas A&M University; BS, Univ of Texas At Austin

Audrey Flores Petty, MA (afp016@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, MA, Stephen F Austin University; BS, Stephen F Austin University

Michael Carson Pinney, MA (mcp063@shsu.edu), *Lecturer of Psychology, Department of Psychology & Philosophy*, MA, Univ of Houston-Clear Lake; BA, Univ of Texas At Austin; BA, Univ of Texas At Austin

Prasopsuk Yabsantiya Pinto, EDD (pyp001@shsu.edu), *Clinical Associate Professor of Education, Department of Teaching & Learning*, EDD, Sam Houston State University; MS, Texas A&M-Kingsville; BED, Chulalongkorn University

Penny Cryer Pitrucha, MA (ppitrucha@shsu.edu), *Lecturer of English, Department of English*, MA, Sam Houston State University; BA, Sam Houston State University

Charlotte Lindsey Pitts, EDD (cxl094@shsu.edu), *Lecturer of English, Department of English*, EDD, Univ of Houston-Clear Lake; MED, Univ of Nevada-Las Vegas; BS, Univ of Houston-Clear Lake

Erin Nicole Pitts, MA (enp008@shsu.edu), *Clinical Assistant Professor of Counselor Education, Department of Counselor Education*, MA, Sam Houston State University; BS, Sam Houston State University

Jake Alan Portie, MFA (jap098@shsu.edu), *Lecturer of Mass Communication, Department of Mass Communication*, MFA, Sam Houston State University; BFA, Sam Houston State University

Megan Becker Powell, MD (stdmdb26@shsu.edu), *Assistant Professor of Clinical Medicine, Department of Primary Care & Clinical Medi*, MD, Univ. of Texas-Med-Galveston; BS, Sam Houston State University

Debra Patricia Price, PHD (edu_dpp@shsu.edu), *Professor of Education, Department of Teaching & Learning*, PHD, Univ of Texas At Austin; MED, LSU & A&M College; BS, Univ of Colorado

Rebecca Ann Price, MS (stdrap18@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MS, Sam Houston State University; BS, Sam Houston State University

Ashley Elizabeth Pruitt, MS (apruitt@shsu.edu), *Adjunct Faculty, Department of University Wide*, MS, Stephen F Austin University; BS, Stephen F Austin University

Daniel Gerard Puhl, MS (dgp016@shsu.edu), *Lecturer of Accounting, Department of Accounting*, MS, Liberty University; MSST, US Army War College; MBA, Metropolitan State University; BS, Univ of Minnesota

David L Pulling, MA (dlp059@shsu.edu), *Lecturer of English, Department of English*, MA, Univ of Louisiana-Lafayette; BA, Louisiana College

R

Christopher Justin Rabe, MS (cjr067@shsu.edu), *Lecturer of Engineering Technology, Department of Engineering Technology*, MS, Texas A&M-Kingsville; BS, Texas A&M-Kingsville

Lauren Irma Rabe, DPA (lauren.rabe@shsu.edu), *Lecturer of Public Health, Department of Public Health*, DPA, California Baptist University; MPA, Univ of Texas-Pan American; BS, Texas A&M-Kingsville

Patricia Kay Ramsay, MFA (pxr015@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Syracuse University; BFA, The University of the Arts

Debra A Rawlins, MMED (dhr001@shsu.edu), *Lecturer of Music, School of Music*, MMED, Texas Tech University; BMED, Texas Tech University

Jonathan M Read, MFA (jmr138@shsu.edu), *Lecturer of Mass Communication, Department of Mass Communication*, MFA, Sam Houston State University; BA, Univ of Houston-Main

Rosa Martinez Readore, EDD (stdrmv11@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Sam Houston State University; MED, Sam Houston State University; BA, Sam Houston State University

Robert Wesley Reddicks, MS (rwr016@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Hope Althea Reeves, MSN (har029@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Univ of Houston-Main; BSN, Thomas Jefferson Univ

Jennifer Muir Reeves, MSN (jmr179@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, MSN, Univ of Texas HSC-Houston; BSN, Univ of Texas-Arlington

Jacob Daniel Regan, MFA (jacobregan@shsu.edu), *Lecturer-Pool Faculty of Art, Department of Dance*, MFA, Sam Houston State University; BFA, East Carolina Univ

William Francis Reilly Jr., MFA (wfr005@shsu.edu), *Clinical Assistant Professor of Mass Communication, Department of Mass Communication*, MFA, American Film Inst Conservator; BA, Columbia College-Chicago

Robert W. Rice, PHD (rgs_rwr@shsu.edu), *Assistant Professor of Practice in Anatomical Sciences, Department of Clinical Anatomy*, PHD, New York Medical College; MS, New York Medical College; AB, Cornell University

Nathan Joseph Ridings, MFA (njr004@shsu.edu), *Lecturer of English, Department of English*, MFA, Sam Houston State University; BA, Sam Houston State University

Kiana Rios-Mangual, MFA (kxr008@shsu.edu), *Lecturer of Mass Communication, Department of Mass Communication*, MFA, Sam Houston State University; BA, Sam Houston State University

Tracy Ann Robbins, MFA (tar056@shsu.edu), *Lecturer of Art, Department of Art*, MFA, Univ of Cincinnati; BFA, Art Academy of Cincinnati

Tamara Robert, MED (txr054@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MED, Georgia State University; BS, Univ of Alabama-Birmingham

Shani Nicole Robinson, PHD (snr001@shsu.edu), *Senior Associate Dean, COBA; Adjunct Faculty, Department of Accounting*, PHD, Univ of North Texas; MBA, Sam Houston State University; BBA, Sam Houston State University

Diego Antonio Rojas, PHD (dar117@shsu.edu), *Visiting Assistant Professor of Mathematics and Statistics, Department of Mathematics & Statistics*, PHD, Iowa State University; BS, Univ of Florida; BS, Univ of Florida

Pedro Antonio Romero Rojas, PHD (par031@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, PHD, University of Siegen; MSC, University of Siegen

Veronica Diana Tristan, EDD (vdt001@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Downtown; MED, Sam Houston State University; BA, Univ of Houston-Downtown

Frank Troyka, MM (hft001@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MM, Sam Houston State University; BM, Univ of Texas-Arlington

Rawya Ahmad Tubaishat, MS (rat037@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Prairie View A&M University

David Leon Tumlinson, MS (dlt013@shsu.edu), *Lecturer of Criminal Justice & Criminology, Department of Criminal Justice & Criminology*, MS, Sam Houston State University; BA, St Mary's University

U

Oluchi Chimyerem Ujoatu, DNP (ocu004@shsu.edu), *Lecturer of Nursing, School of Nursing*, DNP, Prairie View A&M University; MSN, Walden University

Judy Carol Upshaw, MSN (jcu002@shsu.edu), *Clinical Assistant Professor of Nursing, School of Nursing*, MSN, Univ of Texas-Arlington; BSN, Univ of Texas-Arlington

Jennifer Lin Uzzell, DNP (jlu010@shsu.edu), *Lecturer of Nursing, School of Nursing*, DNP, Texas Woman's University; MS, Texas Woman's University; BS, Texas Woman's University

V

Tina Michelle Valenzuela, EDD (tmv017@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, EDD, Kansas State University; MS, Pittsburg State University; BS, Pittsburg State University

Mayra Danielle Vargas, PHD (mdv026@shsu.edu), *Clinical Assistant Professor of Education, Department of Teaching & Learning*, PHD, Texas A&M University; MED, Sam Houston State University; BS, Sam Houston State University

Mihai Vatca, DMA (mxv029@shsu.edu), *Lecturer of Music, School of Music*, DMA, Univ of Houston-Main; MM, Sam Houston State University; BFA, Gheorghe Dima Music Academy

Jill Sharp Vaughan, BBA (jls227@shsu.edu), *Assistant Professor of Practice and Smith-Hutson Endowed Chair of Banking, Department of Finance & Banking*, BBA, Sam Houston State University

Sergio A Velasquez, MED (sav041@shsu.edu), *Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, MED, Univ of Texas-Brownsville; BS, Univ of Texas-Brownsville; BS, Univ of Texas-Brownsville

Tabitha M Venable, MA (tmv015@shsu.edu), *Lecturer of American Sign Language, Department of World Languages & Cultures*, MA, Gallaudet University; BA, Gallaudet University

Stacey Lynn Victor, EDD (sedmonson@shsu.edu), *Professor of Education and Dean, College of Education, Department of Educational Leadership*, EDD, Texas A&M - Commerce; MED, Texas A&M - Commerce; BA, Texas A&M University

Maureen Victoria, PHD (mxv100@shsu.edu), *Assistant Professor of Practice in Agricultural Sciences, Department of Agricultural Sciences*, PHD, Texas A&M University; MS, Univ of Missouri-Columbia; BS, Texas State Univ-San Marcos

Shelby Alverson Villarreal, MA (sna013@shsu.edu), *Lecturer of Communication Studies, Department of Communication Studies*, MA, Sam Houston State University; BA, Texas A&M University

Tracy Lynn Voelker, MED (tlv013@shsu.edu), *Lecturer of Teaching and Learning, Department of Teaching & Learning*, MED, Univ of Houston-Victoria; BS, Texas State Univ-San Marcos

W

Kimberly M Waaso, DO (kmw135@shsu.edu), Assistant Professor of Clinical Medicine, Department of Primary Care & Clinical Medi, DO, Kansas City Univ of Med&BioSci; BS, Michigan State University

Amanda Norman Waites, MFA (ann034@shsu.edu), Lecturer of Theatre and Musical Theatre, Department of Theatre & Musical Theatre, MFA, Tulane University; BM, Loyola Univ-New Orleans

Heather Ellen Walker, DNP (hew027@shsu.edu), Lecturer of Nursing, School of Nursing, DNP, Univ of Texas At Austin; MSN, Capella University; BSN, Univ of Texas At Austin

Candace Lynn Walkley, MD (clw117@shsu.edu), Assistant Professor of Internal Medicine, Department of Primary Care & Clinical Medi, MD, Univ of Texas SW Medical Cente; BS, Univ of Texas-Arlington

Courtney Nicole Wallace, MA (cnw008@shsu.edu), Clinical Assistant Professor of Public Health, Department of Public Health, MA, Sam Houston State University; BS, Sam Houston State University

Renece Waller-Wise, DNP (rxw029@shsu.edu), Lecturer of Nursing, School of Nursing, DNP, Troy University; BS, Univ of Alabama-Birmingham; BSN, Univ of Alabama-Birmingham

Yu Wang, MS (yxw026@shsu.edu), Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics, MS, Texas A&M University; BS, North Dakota State University

Steve Warkentin, MM (stevewarkentin@shsu.edu), Lecturer of Music, School of Music, MM, Northwestern University; BM, University of Toronto

Rachel Henderson Warren, MED (stdrh11@shsu.edu), Lecturer of Education, Department of Teaching & Learning, MED, Stephen F Austin University

Thomas Ray Warren, MS (trw002@shsu.edu), Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, MS, Sam Houston State University; BS, Sam Houston State University

Michesha Sherrelle Washington, MA (msk017@shsu.edu), Lecturer of Communication Studies, Department of Communication Studies, MA, Texas Southern University; BA, Texas State Univ-San Marcos

Rita J Watkins, EDD (icc_rjw@shsu.edu), Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, EDD, Sam Houston State University; MA, Sam Houston State University; MPA, Texas A&M University; BS, Sam Houston State University

Penny Lea Watson, MA (plw010@shsu.edu), Lecturer of Political Science, Department of Political Science, MA, Sam Houston State University; BA, Sam Houston State University

Cheryl M Watts, MED (cmw022@shsu.edu), Lecturer of Education, Department of Teaching & Learning, MED, Univ of North Texas; BAT, Sam Houston State University

Terrence R Waugh, PHD (trw006@shsu.edu), Lecturer of Engineering Technology, Department of Engineering Technology, PHD, Univ of Nebraska-Lincoln; MS, Univ of Nebraska-Omaha; BA, Creighton University

John Barry WeHunt, ME (jbw037@shsu.edu), Lecturer of Engineering Technology, Department of Engineering Technology, ME, Univ of Texas-Arlington; BS, Purdue University

Melinda Rachelle Weathers, PHD (mweathers@shsu.edu), Lecturer of Communication Studies, Department of Communication Studies, PHD, George Mason University; MA, Univ of Houston-Main; BA, Texas A&M University

Laura Marlise Weaver, MA (lmw083@shsu.edu), Lecturer of Criminal Justice and Criminology, Department of Criminal Justice & Criminology, MA, Univ of Texas-Arlington; BA, Univ of Texas-Arlington

Vanessa Rochelle Weaver, DNP (vrw010@shsu.edu), Clinical Assistant Professor of Nursing, School of Nursing, DNP, Univ of Alabama-Tuscaloosa; MSN, Prairie View A&M University; BSN, Prairie View A&M University

Emily E Weber, MS (eew019@shsu.edu), Lecturer of Kinesiology, Department of Kinesiology, MS, Sam Houston State University; BA, University of Iowa

Kelly Lynn Matheney Weikle, PHD (klw121@shsu.edu), Lecturer of Communication Studies, Department of Communication Studies, PHD, Ohio University; MA, Ohio University; MMC, Univ of S Carolina-Columbia; BSJ, West Virginia University

Susan Keaton Weimer, MS (skw019@shsu.edu), Lecturer of Nursing, School of Nursing, MS, Western Governors University; BS, Western Governors University

Edith Carol Wells, MFA (ediewells@shsu.edu), Assistant Professor of Practice in Art, Department of Art, MFA, Goddard College; MA, Southwest Baptist Theo Seminar; BS, Auburn University

William Christopher Whitmire, MFA (wcw009@shsu.edu), *Lecturer of English, Department of English*, MFA, Sam Houston State University; BA, Sam Houston State University

Amy Saxton Wiggs, MM (axs116@shsu.edu), *Lecturer of Music, School of Music*, MM, Rice University; BM, Rice University

Nelka Chithrani Wijesinghe, PHD (ncw020@shsu.edu), *Lecturer of Physics, Department of Physics & Astronomy*, PHD, Univ of Houston-Main; MS, Univ of Houston-Main; BSC, Univ of Peradeniya

Rachael M Wilcox, EDD (rmw017@shsu.edu), *Senior Lecturer of Kinesiology, Department of Kinesiology*, EDD, Sam Houston State University; MA, Sam Houston State University; BS, Suny At Plattsburgh

Matthew Stephen Williams, MS (mww013@shsu.edu), *Lecturer of Mathematics and Statistics, Department of Mathematics & Statistics*, MS, Sam Houston State University; BS, Sam Houston State University

Trevor C Williams, MA (tcw025@shsu.edu), *Adjunct, Department of Kinesiology*, MA, Sam Houston State University; BS, Univ of Delaware

Willie Royce Williams, MFA (wrw010@shsu.edu), *Professor of Practice of Art, Department of Art*, MFA, Univ of Southern California; BFA, Texas A&M-Kingsville

Susannah Leigh Williamson, PHD (sxw058@shsu.edu), *Lecturer of Kinesiology, Department of Kinesiology*, PHD, Texas A&M University; MA, Teachers College Columbia Univ; BA, Brown University; BA, Brown University

Martha E Willis, MA (mew055@shsu.edu), *Lecturer of Art, Department of Art*, MA, Univ of Houston-Clear Lake; BA, Univ of Houston-Clear Lake

Linda Ransdell Wilmoth, MED (stdlrw11@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MED, Sam Houston State University; BS, Sam Houston State University

Courtney Kay Wilson, PHD (stdckw11@shsu.edu), *Adjunct Faculty, Department of University Wide*, PHD, Texas Tech University; MS, Texas A&M University; BS, Sam Houston State University

Marsha Clark Wilson, MBA (mcw021@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, MBA, Univ of Houston-Main; BS, Univ of Texas At Austin

Mary Catherine Brown Wilson, MS (mcb059@shsu.edu), *Lecturer of Agricultural Sciences, Department of Agricultural Sciences*, MS, Sam Houston State University; BS, Sam Houston State University

Beth Inwood Windisch, MA (biw005@shsu.edu), *Lecturer of Security Studies, Department of Security Studies*, MA, Naval Postgrad Schl; MA, National Defense University; BA, Indiana University

Chelsea Baker Winkelmann, MAOM (cab052@shsu.edu), *Lecturer of Kinesiology, Department of Kinesiology*, MAOM, American College of Acupuncture & Oriental Medicine

Mary K. Wisenbaker, EDD (mkw033@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Univ of Houston-Main; MA, Sam Houston State University; BA, Univ of Houston-Main

Megan Leigh Woolford, MD (mlw090@shsu.edu), *Assistant Professor of Family Medicine, Department of Primary Care & Clinical Medi*, MD, Baylor College of Medicine; BS, Texas A&M University

Paul J Worosello, MM (pjw009@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, MM, West Texas A&M State Univ; BM, West Texas A&M State Univ

Warren Brandon Wright, MED (wbw007@shsu.edu), *Lecturer of Education, Department of Counselor Education*, MED, Georgia Southern University; BS, Georgia Southern University

Brooklynn Joy Wynveen, PHD (bjw028@shsu.edu), *Lecturer of Sociology, Department of Sociology*, PHD, Clemson University; MNRD, Texas A&M University; BA, Univ of Maryland-Univ Coll

X

Yue Xie, PHD (yxx008@shsu.edu), *Associate Professor of Practice in Public Health, Department of Public Health*, PHD, Univ of Tx Health Science Cntr; ME, Massachusetts Inst of Tech; MHA, Tulane University; BBA, Univ of Miami

Y

Emefa Yador, DNP (exy015@shsu.edu), *Lecturer of Nursing, School of Nursing*, DNP, Baylor University; MHA, University of Phoenix; MS, University of Phoenix; BS, Bloomfield College

Richard Michael Yawn, MA (mike.yawn@shsu.edu), *Adjunct Faculty, Department of Political Science*, MA, Sam Houston State University; BS, Sam Houston State University

Jesse Holland Yeager, MS (jho006@shsu.edu), *Lecturer of Accounting, Department of Accounting*, MS, Texas A&M University; BBA, Texas A&M University

Erin Yerby, PHD (exy017@shsu.edu), *Lecturer-Pool Faculty of Arts, Department of Art*, PHD, Columbia University; MFA, Virginia Commonwealth Univ; MPHIL, Columbia University; AM, Columbia University; MA, Univ of Minnesota; MTS, Duke University; BA, Colorado College

Audrey Gwen Young, EDD (agy008@shsu.edu), *Lecturer of Education, Department of Teaching & Learning*, EDD, Stephen F Austin University; MED, National-Loouis Unvers; BA, Univ of Central Florida

Margaret Sucec Young, MED (msyoung@shsu.edu), *Lecturer of Mathematics, Department of Mathematics & Statistics*, MED, Sam Houston State University; BS, Texas A&M University

Marsha Muecke Young, PHD (mmy008@shsu.edu), *Visiting Assistant Professor of Mathematics, Department of Mathematics & Statistics*, PHD, Baylor University; MA, Baylor University; MS, Sam Houston State University; BS, Sam Houston State University

Russell Lee Young, PHD (stdrly@shsu.edu), *Assistant Professor of Practice of Criminal Justice and Criminology, Department of Criminal Justice & Criminology*, PHD, Sam Houston State University; MA, Sam Houston State University; BS, Sam Houston State University

Angelena Richje Yulee-Smith, MED (ary019@shsu.edu), *Lecturer of Psychology and Philosophy, Department of Psychology & Philosophy*, MED, Univ of Oklahoma-Norman; BA, Chapman University

Z

Paul W Zarutskie, MD (pwz001@shsu.edu), *Associate Professor of Clinical Medicine, Department of Primary Care & Clinical Medi*, MD, Drexel University; BS, Duke University; BS, Duke University

Kelly Kristine Zinn, PHD (kkzinn@shsu.edu), *Clinical Associate Professor of Nursing, School of Nursing*, PHD, Loyola Univ-Chicago; MS, Univ of Nebraska Med Center; BSN, Clarkson College

Lance D Zuckero, MSN (ldz002@shsu.edu), *Lecturer of Nursing, School of Nursing*, MSN, Univ of Texas HSC-Houston; BSN, Univ of Texas HSC-Houston

Glossary

Academic Advisor

A professional who helps students with academic and career planning.

Academic Calendar

A calendar indicating key dates and deadlines for important academic requirements and/or activities including, but not limited to, the start and end dates of classes, holidays, exam days, and registration dates.

Academic Year

The time frame from the start of a fall semester until the start of the subsequent fall semester. It typically is divided into the fall, spring, and summer semesters.

Accreditation

An endorsement from an oversight organization indicating that the educational institution and/or academic degree program meets or exceeds specific measures of quality.

Advanced Courses

Courses with content designed to be taken during the junior or senior year. At SHSU, these courses are numbered in the 300s or 400s.

Advanced Credit

Credit earned for advanced courses at universities. Courses transferred from a community college do not earn advanced credit.

Audit, Course

Enrollment in a course as a non-credit seeking student, with no record on the transcript.

Bachelor's Degree

An academic credential from a university earned after completing a specific program of study. Typically, the program of study will include a general education component, a major, degree related requirements, and electives and/or a minor. The minimum number of credits is 120 hours.

CLEP

College Level Examination Program. A series of tests available to students to demonstrate proficiency in various college subjects. CLEP exams may be used to earn college credits for select courses.

Classification

Indication of a student's progress toward degree completion based upon the number of hours completed. The categories of undergraduate classification are Freshman, Sophomore, Junior, and Senior.

Class Day

Any day in the academic semester when university classes are scheduled. The number of class days is used for drop dates, resignation dates, and tuition refund schedules. When determining the number of class days (e.g., 12th class day), start counting with the first day of on-campus daytime courses and increase by one each day the university has scheduled classes.

Closed Classes

Classes that have reached the designated maximum enrollment capacity or are not available for on-line registration.

Commencement

An event during which degrees are awarded to graduating students. SHSU holds commencement ceremonies every May, August, and December.

Concurrent Enrollment

Enrollment in courses at two institutions during the same semester.

Core Curriculum

The curriculum in liberal arts, humanities, sciences, and political, social, and cultural history that all undergraduate students of an institution of higher education are required to complete as part of an undergraduate academic degree program. Also referred to as the general education component.

Course Equivalency Guide

A table listing courses from a specific institution and the corresponding courses at SHSU that are considered to have the same content. The course equivalency guide is used to identify courses that may transfer to SHSU.

Course Numbers

A numeric code signifying the anticipated academic level and the credit hour value of a course. At SHSU, course numbers consist of four digits. The first digit in the sequence indicates the course level and suggests the academic year in which the course is typically taken. Lower-level undergraduate courses have a "1" or "2" in the first digit; upper-level undergraduate courses have a "3" or "4" in the first digit; and graduate courses have a "5" or higher in the first digit. The second digit in the sequence indicates the number of semester credit hours.

Course Prefix

Abbreviation identifying the academic discipline of a course (e.g., ACCT signifies Accounting, CRIJ signifies Criminal Justice, and BIOL signifies Biology).

Course Reference Number (CRN)

A unique six-digit number used to identify a specific course offering within a given term. The CRN is used to select courses when registering.

Credit by Examination

An award of academic credit and placement based on examination scores.

Credit Hour (also called Semester Credit Hour)

A unit of measure attached to academic courses, usually reflecting the number of lecture hours per week a course meets in a fall or spring semester.

Curriculum

A combination of courses that compose a particular area of study.

Dean

The highest ranking academic official in a college (e.g., College of Education).

Declaration of Major/Minor Form

The form submitted by an undergraduate student to officially declare a major and/or minor. The form is submitted to the departmental chair of the department housing the student's declared major.

Degree

An academic credential awarded upon the completion of a specific area of study. Universities offer baccalaureate degrees at the undergraduate level and master's and doctoral degrees at the graduate level.

Degree Plan

A specific list of academic requirements that must be completed to earn a degree.

Departmental Chair

An individual responsible for the administrative functions of an academic department. The functions include, but are not limited to, coordination of curriculum planning, faculty course assignments, and evaluation of faculty performance.

Developmental Courses

Courses designed to help student achieve the minimum standards set by the Texas Success Initiative (TSI). Developmental courses are listed with either a "031" or "032" course number and **do not** count toward the hours needed for graduation.

Double Degree

The concurrent pursuit of two specific majors, each with a different type of degree (e.g., BS with a major in mathematics and a BA with a major in English). The student must be awarded both degrees at the same graduation date.

Double Major

The concurrent pursuit of two specific majors with both resulting in the same type of degree (e.g., BS with majors in Biology and Chemistry). The student must be awarded both majors at the same graduation date.

Drop/Add

A term used to identify the act of deleting/adding courses from/to an established schedule.

Drop Date

The latest date that a student may drop a class without a letter grade being assigned. Dropping a class after this date results in a grade of "F" for the course.

Dual Credit

The receipt of high school and college credit for the same course for qualified high school students enrolled in college-level courses.

Elective

A degree plan requirement, not directed to a specific area of academic content, contributing to the credit hour requirements of a degree.

Faculty

Appropriately credentialed individuals responsible for the delivery of course content and academic research and service.

FAFSA (Free Application for Federal Student Aid)

A federal form required from all students seeking need-based financial aid. The FAFSA collects family income and other financial information and is completed and filed by the student or his/her family.

Fees

Non-tuition charges dedicated to cover the cost of specific academic and/or service functions of the university.

Final Exam

An exam, usually comprehensive, designed to measure a student's retention and understanding of the course material. Final exams are scheduled for the last week of the semester and do not necessarily correspond to the regular class meeting time.

Freshman

The classification of a student who has completed 0 to 29 semester credit hours.

Full-Time Undergraduate Student

Full-time is 12 hours for an undergraduate in fall/spring and in summer. 6 hours is considered half-time for the same semesters. 6 hours is only considered full-time for **graduate** students in the summer.

Grade Point Average (GPA)

Numeric average of academic performance on a 0-to-4 point scale. The GPA is the ratio of grade points earned to credit hours attempted.

Grants

A type of financial assistance not requiring repayment.

International Baccalaureate

The International Baccalaureate (IB) Diploma Program is a comprehensive two-year pre-college curriculum that is offered in high schools across the globe that may lead to college credits.

Junior

The classification of a student who has completed 60 to 89 semester credit hours.

Major

A student's concentrated area of study. Most majors consist of a minimum of 30 credit hours within a specific area of study.

Master's Degree

A graduate degree that usually requires two or more years of study beyond the bachelor's degree.

Minor

A student's secondary area of study. Most minors consist of a minimum of 18 credit hours within a specific area of study.

Overload

A course load in excess of 19 hours in a fall or spring semester or 7 hours in a summer session. Overloads must be approved by the student's academic Dean.

Part-Time Undergraduate Student

Undergraduate students enrolled in less than twelve credit hours during a fall or spring semester or less than six credit hours during a summer session. Correspondence courses do not apply toward the credit hour count in determining status.

Prerequisite

An academic requirement (e.g., completion of an earlier sequenced course) that must be satisfied prior to the enrollment in a specific course.

Probation

An academic standing placed upon undergraduate students who fall below a 2.0 SHSU or overall grade point average at the close of any semester or summer school during which one or more semester hours were attempted.

Q-Drop

A drop made after the last date for tuition refunds but before a drop would result in the grade of "F." Students will be allowed no more than five Q-drops during their academic career at Sam Houston State University.

Resignation

Withdrawing from all classes in which the student is enrolled at the university.

Second Degree

The pursuit of a degree at the same level of a degree previously awarded (e.g., baccalaureate).

Section, Course

A number used to distinguish between multiple offerings of the same course. On a student's schedule, the section is the number after the period following the course number (e.g., ENG164.02 indicates section 2 of ENG 164).

Semester

Period of time during which academic courses are offered. SHSU offers fall, spring and summer semesters.

Semester Credit Hour

See Credit Hour.

Senior

The classification of a student who has completed 90 or more semester credit hours.

Sophomore

The classification of a student who has completed 30 to 59 semester credit hours.

Suspension

An academic standing imposed on undergraduate students with a SHSU or overall GPA less than 2.0 for two or more successive semesters. Students on suspension are not allowed to enroll in classes without the permission of the appropriate academic Dean.

Syllabus

A document containing academic and administrative information about a course. The syllabus is provided by the instructor at the beginning of the semester and typically includes a lesson schedule, dates of exams, and quizzes, assigned books and readings, e-mail/phone number and the best time to reach the instructor, and an explanation of how the final grade will be determined.

Transcript, Official

A university approved document providing information about a student's academic performance, including but not limited to, semester by semester listing and grades of courses attempted, credits earned, academic standing, GPA, TSI status, and admission exams.

TSI (Texas Success Initiative)

A Texas law requiring all entering college students to be assessed for college readiness in mathematics, reading and writing unless the student qualifies for an exemption.

Tuition

A per credit hour charge per course. There is a different rate for Texas residents and non-Texas residents.

Undergraduate

A student pursuing a bachelor's degree.

Withdrew Failing (WF)

A mark indicating a student was not performing at a passing level at the time of resignation. This mark is used only for students resigning after the first nine weeks of a regular semester or after the first two weeks of a summer session.

Withdrew Passing (WP)

A mark indicating a student was performing at a passing level at the time of resignation. This mark is used only for students resigning after the first nine weeks of a regular semester or after the first two weeks of a summer session.

GRADUATE AND PROFESSIONAL CATALOG

Institutional Mission Statement

If you have a question but do not know to whom an inquiry should be directed, you may call the University Information number, and the inquiry will be routed to the appropriate person or department.

University Information: (936) 294-1111

Toll Free: 1-866-BEARKAT (1-866-232-7528)

Mission Statement

In the Graduate School, we commit ourselves to excellence in every facet of graduate education at Sam Houston State University. We maintain constant advocacy for the students, faculty, and staff who rely on our services. Promoting integrity and equity in all graduate programs, we will dedicate our energy to clear communication, to collaborative problem solving, and to building community between all graduate learners and educators at our university.

The Graduate School

Templeton Building-1st Floor

1003 17th Street

Huntsville, TX 77340

(936) 294-2408

The Graduate School (thegraduateschool@shsu.edu)

The purpose of the catalog is to provide general information about the academic programs of Sam Houston State University to prospective students, current students, faculty, and staff of the University. Included is information concerning the academic calendar, admission and registration procedures, tuition and fees, degree requirements, services available to students, and the faculty and administrative officers of the University.

Subject to Change Notice

The policies, regulations, procedures, and fees in this catalog are subject to change without notice, if necessary, to keep University policies in compliance with State and Federal laws and/or with rules and regulations of the Board of Regents of The Texas State University System.

The University reserves the right to change curricula, rules, fees, and other requirements, of whatever kind, affecting students. The provisions of this catalog do not constitute a contract, express or implied, between any applicant, student, or faculty member and Sam Houston State University or its Board of Regents.

Course Prefixes and Abbreviations

List of course abbreviations used throughout this catalog and in many SHSU operations and publications (e.g., transcripts, registration, etc.).

Glossary

Definitions of terms that are frequently used in the academic environment.

Report a Problem (catalogs@shsu.edu)

If you notice a problem with the catalog, such as a broken link or a typographical error, please, report the problem via email to the catalog editor at catalogs@shsu.edu. Be specific and include the exact address of the page if possible.

Accreditations

Sam Houston State University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelors, masters and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call (404) 679-4500 for questions about the accreditation of Sam Houston State University or visit their website (<https://www.sacscoc.org/>).

College of Arts and Media

The Department of Art's degree programs are accredited by the National Association of Schools of Art and Design (NASAD).

The Department of Dance's degree programs are accredited by the National Association of Schools of Dance (NASD).

The School of Music's undergraduate and graduate degree programs are accredited by the National Association of Schools of Music (NASM).

The Department of Theatre and Musical Theatre's programs are accredited by the National Association of Schools of Theatre (NAST).

College of Business Administration

The College of Business Administration's undergraduate and graduate degree programs are accredited by AACSB International, The Association to Advance Collegiate Schools of Business.

College of Criminal Justice

The Master of Science in Forensic Science is accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC).

College of Education

The College of Education's Educator Preparation Program is accredited by the Council for the Accreditation of Educator Preparation (CAEP). As one of only thirteen universities in Texas with CAEP accreditation, the educator preparation program stands out among the top programs in the nation. The college's educator preparation certification programs are also accredited by the Texas Education Agency.

Many of the college's undergraduate programs are recognized by Specialized Professional Accreditors (SPA), which indicates that the program has taken the extra steps necessary to meet rigorous standards set for the program's specific educational field. The following teacher preparation programs have been nationally recognized by their respective SPA: Elementary Education EC-6 (Association for Childhood Education International); Middle School Education 4-8 (Association for Middle Level Education); Biology 8-12 (National Science Teachers Association); Kinesiology EC-12 (National Association of Sport and Physical Education); Mathematics 8-12 (National Council of Teachers of Mathematics); and Special Education (Council for Exceptional Children).

Many of the college's graduate programs are also recognized by their respective Specialized Professional Accreditors. The following professional educator preparation programs have been nationally recognized by their respective SPA: Library Science (American Association for School Librarians); Educational Diagnostician (Council for Exceptional Children); Principal (Educational Leadership Constituents Council); Superintendent (Educational Leadership Constituents Council); Reading Educator (International Literacy Association); and Instructional Technology (International Society for Technology in Education).

The Clinical Mental Health Counseling, M.A.; School Counseling, M.Ed.; and Counselor Education, Ph.D have been accredited by the Council of Accreditation of Counseling and Related Educational Programs (CACREP).

College of Health Sciences

The Didactic Program in Dietetics (DPD) at the undergraduate level and the Dietetic Internship (DI) Program at the graduate level in the Department of Family and Consumer Sciences are currently granted accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND), 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995. (312) 899-0040, ext. 5400. Website (<https://www.eatright.org/>).

The Interior Design Program in the Department of Family and Consumer Sciences is granted accreditation by the Council for Interior Design Accreditation (CIDA) and by the National Association of Schools of Art and Design (NASAD).

The baccalaureate degree program in nursing at Sam Houston State University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

The BS in Kinesiology-all-levels Teacher Certification Program-The Physical Education Teacher Education Program was awarded "National Recognition" status by the Society of Health and Physical Educators America (SHAPE America) through the Council for the Accreditation of Educator Preparation (CAEP).

The Master of Science in Athletic Training program accredited by the Commission on Accreditation of Athletic Training Education (CAATE), 2001 K Street NW, 3rd Floor North, Washington DC 20006.

College of Humanities and Social Sciences

The Doctoral Program degree in Clinical Psychology is accredited by the American Psychological Association (APA).

The Specialists degree in School Psychology is approved by the National Association of School Psychologists to ensure high quality school psychology training and services. Any individual interested in reviewing the official document listing the accreditation, approval or licensing of Sam Houston State University, will have access to such material in the Reference Department of the Newton Gresham Library.

College of Osteopathic Medicine

SHSU-COM has been awarded Accreditation with Exceptional Outcomes by the Commission on Osteopathic College Accreditation (COCA). For more information on COCA accreditation or to file a complaint with the accrediting body, please visit Commission on Osteopathic College Accreditation (<https://osteopathic.org/accreditation/>).

College of Science and Engineering Technology

The American Chemical Society recognizes the Department of Chemistry as having adequate faculty, facilities, library, curriculum, and research for training professional chemists.

Sam Houston State University's Bachelor of Science degree in Computing Science has been accredited by the Computing Accreditation Commission of ABET, the global accreditor of college and university programs in applied and natural science, computing, engineering, and engineering technology.

Sam Houston State University's Bachelor of Science degree in Construction Management has been accredited by the Applied and Natural Science Accreditation Commission of ABET, the global accreditor of college and university programs in applied and natural science, computing, engineering, and engineering technology.

Institutional Mission Statement

Mission Statement

Sam Houston State University is a student-centered, community engaged institution whose mission is to offer accessible, quality higher education. The university offers a variety of innovative and flexible degree programs at the undergraduate, graduate, and professional levels focused on career readiness, personal and professional development, and service. SHSU provides integrated academic and student success services designed to support traditional and non-traditional students from diverse backgrounds.

Values

- Student Success and Support
- Academic Excellence
- Service and Community Engagement
- Inclusive Excellence
- Collaborative Environment
- Honor
- Creativity and Innovation

Vision Statement

Sam Houston State University will provide a transformative environment that enables students from diverse backgrounds to become leaders who serve their families, communities, and professions. We aspire to make SHSU both the best value in higher education and the top regional public university in the state of Texas. We will accomplish this through providing high quality, innovative, and flexible academic programs; a commitment to student success, scholarship and creative works; and engagement that solves the most critical challenges facing the world.

Strategic Priorities

- Prioritize student success and student access.
- Embody a culture of excellence.
- Elevate the reputation and visibility of SHSU.
- Expand and elevate our service to the state and beyond.

Application Process

1. Inquire about your program.
2. Apply at Apply Texas (<https://goapplytexas.org/>) for graduate applicants or TMDAS (<http://tmdsas.com>) for Doctor of Osteopathic Medicine applicants.
3. Upon receipt of the SHSU application received email, create your SHSU Self Service Center account (<https://shsu.edu/checkstatus/>) or COM Admissions Portal (<https://med.shsu.edu>).¹
4. Submit required application materials by the posted deadline for your program, as well as, monitor application status and receipt of materials via your SHSU Self Service Center account (<https://shsu.edu/checkstatus/>) or COM Admissions Portal (<https://med.shsu.edu/Security/Login.aspx?ReturnUrl=%2f>).¹
5. Admission decisions are communicated by email and on your SHSU Self Service Center account (<https://shsu.edu/checkstatus/>) or COM Admissions Portal (<https://med.shsu.edu>).¹
6. If you have questions regarding your graduate application or your Self Service Center account, please, contact graduate@shsu.edu or (936) 294-1971. If you have questions regarding your medical school program application or your COM Admissions Portal¹, please contact COM Admissions (enrollcom@shsu.edu) or (936) 202-5201.

¹ College of Osteopathic Medicine Admissions Portal

Application Materials

Application materials include an application, non-refundable application fee, official transcript(s), and official entrance exam scores if applicable. Additional supporting materials vary by program. For the most current and program-specific information, please, visit the Degrees Offered web page. (<https://www.shsu.edu/academics/degrees.html?degTyp=bach>) Application materials include:

- **Application for Admission and Application Fee**

An application for your desired graduate program must be on file with the Office of Admissions, including a non-refundable application fee for every prospective degree program. To provide adequate time to process application materials, all materials must be received before August 1 for fall admission, December 15 for spring admission, and May 15 for summer admission. Program specific deadlines could be earlier than University deadlines. International students should allow at least 60 days prior to the start of the semester and deadlines are one month earlier. College of Medicine applicants must submit a TMDAS (<https://www.tmdsas.com/PLAN/references/deadlines.html>) application and an SHSU-COM (<https://www.shsu.edu/academics/osteopathic-medicine/prospective-students/admissions.html>) Supplemental Application by the deadlines. Application requirements and deadlines vary by program so, please, reference the listing for your program and contact Admissions (<https://www.shsu.edu/dept/graduate-admissions/prospective-students.html>) if you have questions.

- **Official transcript of the baccalaureate degree-granting institution showing the date of the degree conferral**

The baccalaureate degree-granting institution must be a college and/or university accredited by an agency recognized by the Texas Higher Education Coordinating Board. Some programs require all transcripts showing any college-level work attempted. Students applying prior to completing their baccalaureate degree should submit the most up-to-date transcript during the admissions process. A final transcript MUST be submitted upon completing the baccalaureate program. SHSU students are not required to submit an SHSU transcript for admission purposes. Official transcripts are sent electronically to graduate@shsu.edu or by mail directly to the Office of Admissions - Graduate Programs, SHSU, Box 2478, Huntsville, TX 77341-2478.

- **Official scores of the entrance exam required by the respective college and/or department/school**

The Graduate Record Exam (GRE) general test may be required for some graduate programs or may be requested if your baccalaureate degree GPA is below the minimum threshold. Students seeking the MBA, the MS in Accounting, or the MS in Project Management may be required to submit the Graduate Management Aptitude Test (GMAT). Applicants seeking the Doctor of Osteopathic Medicine will be required to submit the Medical College Admissions Test (MCAT). Some programs do not require an entrance exam.

- **Submit other program-specific admission materials.** Some programs require additional information such as letters of recommendation, essays, and documentation of experience.

Admission Examinations

The following examinations are given at various centers throughout the United States and in other countries.

- **Graduate Record Examination (GRE).** This test may be required for admission to some programs of graduate study at Sam Houston State University. Registration for the examination may be scheduled by calling 1-800-GRE-CALL or by visiting the GRE website (<https://www.ets.org/gre/>). The GRE institution code for SHSU is 6643.
- **Graduate Management Admissions Test (GMAT).** This test may be required for admission to graduate study in the College of Business Administration at Sam Houston State University. Registration for the test may be arranged by calling 1-800-GMAT-NOW (1-800-462-8669) or by visiting the GMAT website (<https://www.mba.com/>). Sam Houston State University is a testing site for the GMAT.
- **Medical College Admissions Test (MCAT).** The MCAT is required for admission to the College of Osteopathic Medicine program at Sam Houston State University. Registration for the examination may be scheduled by visiting the AAMC website (<https://students-residents.aamc.org/applying-medical-school/taking-mcat-exam/register-mcat-exam/>).

- **Miller Analogies Test (MAT).** This test may be accepted as an admission test by some programs of study at Sam Houston State University. The MAT is administered by the Testing Center, and individuals may call for an appointment, (936) 294-1025. There is a fee for administration and scoring services.

English Proficiency

- **Duolingo.** The TOEFL, IELTS, or Duolingo is required of non-native speakers of English. Duolingo is internationally available, and there is a fee for administration and scoring services. Registration for the exam may be scheduled by visiting the Duolingo website (<https://englishtest.duolingo.com/>).
- **International English Language Testing System (IELTS).** The TOEFL, IELTS, or Duolingo is required of non-native speakers of English. The IELTS is internationally available, and there is a fee for administration and scoring services. Registration for the exam may be scheduled by visiting the IELTS website (<https://www.ielts.org/>).
- **Test of English as a Foreign Language (TOEFL).** The TOEFL, IELTS, or Duolingo is required of non-native speakers of English. The TOEFL is administered several times per year, and there is a fee for administration and scoring services. For further information, contact the English Language Institute, Sam Houston State University, Box 2030, Huntsville, Texas 77341; TOEFL, P.O. Box 6155, Princeton, NJ 0845-6155; or visit the TOEFL website (<https://www.toeflgoanywhere.org/>).

International Students

Additional Application Requirements*

- Official evaluation of baccalaureate transcript(s) from a NACES accredited evaluation company or SHSU internal evaluation (if applicable).
- Proof of financial support (Please visit International Students (<https://www.shsu.edu/admissions/international/>) for further details.)
- Prospective international students must demonstrate the ability to speak, write, and understand the English language. Prospective students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). **All** applicants for admission from non-English-speaking countries must present a score of at least 79 on the TOEFL or a score of 6.5 on the IELTS. Test score waivers are considered for those who completed an undergraduate program or previous degree coursework where English was the language of instruction. Upon receipt of these transcripts, the Office of Admissions will determine waiver eligibility.

For additional admission requirements, international students should contact:

Global Engagement Center (<https://www.shsu.edu/dept/international-programs/>)
 Sam Houston State University
 Box 2150
 Huntsville TX 77341-2150

*The College of Osteopathic Medicine will only review and consider for admissions applicants who are U.S. citizens or legal Permanent Residents of the U.S. Additional information can be found on the TMDSAS website under residency (<https://www.tmdsas.com/PLAN/medical/before-you-apply/residency.html>).

Additional VISA Type Considerations

Students in the following VISA categories at the time of application **may** qualify for conditional admissions, probationary admissions, preparatory admissions, non-degree admissions, or graduate transient admissions: A-1, A-2, A-3, B-2, E-1, E-2, F-1, F-2, VWB, VWT, G-1, G-2, G-3, G-4, G-5, H-1A, H-1B, H-2A, H-2B, H-3, H-4, I, J-1, J-2, L-1, L-2, M-1, M-2, NATO 1-7, O-1, O-2, O-3, P-1, P-2, P-3, P-4, Q, R-1, R-2, TN, and TD.

Admission Standards

For Graduate Admission, SHSU requires an undergraduate GPA from the baccalaureate-granting institution of 2.5 (on a 4.0 point scale) or a GPA of at least 2.8 from the last 60 hours of courses taken at the baccalaureate degree-granting institution. Only the hours received at the baccalaureate degree-granting institution may be used to calculate for the 2.8 GPA requirement admission option. The minimum GPA may be waived for programs in certain circumstances, please contact the program department/school for additional information.

Admission to graduate studies at Sam Houston State University and any of its sponsored programs is open to qualified individuals without regard to race, color, national origin, religion, gender, disability, or age.

Admission Types

A student applying for admission to graduate studies at SHSU may be considered for six types of admission. Details of the possible admission types follow. **The final admission decision rests with the respective academic dean.**

Regular Admission

Regular admission may be granted to a degree-seeking student who meets all of the University and program-specific admission requirements. Meeting stated minimum admission requirements does not constitute automatic admission to a graduate program at Sam Houston State University. Any inquiries regarding program-specific admission requirements should be directed to the graduate advisor (access advisors at Degrees Offered (<http://>

www.shsu.edu/academics/degrees.html) or the dean of the appropriate college in which the program is housed. Regular admission, pending degree conferral, may be granted to a degree-seeking student who has not yet graduated with their baccalaureate degree. This will allow an admission decision to be made and the student to enroll in classes pending receipt of successful degree conferral. For students admitted pending degree conferral or lacking official transcripts (i.e., admission decision made with unofficial transcripts), the official transcript of the degree-granting institution(s) showing the date of the degree conferral must be submitted prior to the registration deadline of the semester enrolled. Failure to submit such official transcripts by the registration deadline may result in revocation of admission status.

Conditional Admission

Conditional admission may be granted, at the discretion of the appropriate academic dean, to a degree-seeking student who has not yet submitted ALL of the required admission materials to allow an admission decision to be made and is being allowed to enroll in classes pending receipt of the missing material(s). Conditional admission is valid for **ONE SEMESTER ONLY**. A subsequent admission decision will be made upon receipt of the missing admission material. **Conditional admission does NOT guarantee regular admission upon receipt of the missing material**, regardless of the student's performance in classes taken during the one semester of conditional admission. Some programs do not grant conditional admission. At the discretion of the appropriate academic dean, a conditionally admitted student may be limited to fewer than the normal maximum semester load of 12 graduate credit hours. International students may not qualify for conditional admission, with the exception of international students transferring directly from U.S. institutions. For more information, refer to Additional Visa Type Considerations. Conditional admission does not qualify for federal financial aid.

Probationary Admission

Probationary admission may be granted, at the discretion of the appropriate academic dean, to a degree-seeking student who has submitted all of the required admission materials BUT does not qualify for regular admission. Probationary admission allows a student to enroll in courses to demonstrate the ability to succeed at the graduate level. A student may complete a maximum of 12 graduate semester credit hours with probationary admission. A student with probationary status may be limited to fewer than 12 graduate credit hours by the appropriate academic dean. To petition for regular admission, a student must earn a grade of "B" or better in each course completed under probationary admission. A program may set a higher standard. The final decision rests with the appropriate academic dean. A maximum of 12 credit hours completed in probationary status may be applied to a graduate program, but the department/school concerned may choose not to accept some credit hours taken prior to regular admission. **Probationary admission does NOT guarantee regular admission upon completion of the requisite coursework**. International students may not be eligible for probationary admission. For more information, refer to Additional Visa Type Considerations. Probationary admission does not qualify for federal financial aid.

Preparatory Admission

Preparatory admission may be granted, at the discretion of the appropriate academic dean, to a degree-seeking student who has NOT qualified for regular admission AND needs to complete one or more prerequisite (stem) courses. A student granted preparatory admission may be limited to a specified number of credit hours and be subject to a stringent GPA requirement in the prerequisite (stem) courses. **Preparatory admission does NOT guarantee regular admission upon completion of the stem courses**, regardless of the student's performance in the preparatory (stem) courses taken. International students may not be eligible for preparatory admission. For more information, refer to Additional Visa Type Considerations. Preparatory admission does not qualify for federal financial aid.

Non-Degree Admission

Non-degree admission may be granted to a student who holds a baccalaureate degree or higher and does not intend to pursue a graduate degree at SHSU, but instead wishes to take courses for professional advancement, licensure, graduate certificate, certification, or self-edification purposes. Students may enroll in undergraduate or graduate-level courses. An applicant for non-degree admission must submit the following documents to the Office of Admissions (<https://www.shsu.edu/dept/graduate-admissions/prospective-students.html>): the graduate application for admission, a non-refundable application fee, and a transcript from the school that awarded the baccalaureate degree. A non-degree student who later applies for regular admission to seek a graduate degree may apply a maximum of 12 credit hours of coursework taken in non-degree status toward a graduate program at the discretion of the appropriate academic Dean. Some graduate certificate programs may require additional information such as letters of recommendation, essays, and documentation of experience.

Generally, international students possessing an F-1 student visa are not eligible for non-degree admission. However, an F-1 student may enroll in a graduate-level certificate program. If currently enrolled at a U.S. institution in F-1 status, non-degree admission may be permitted if the student is pursuing a course that is not offered at their current institution. Both Sam Houston State University and the current F-1 institution must be in approval.

Please, contact the Global Engagement Center (<https://www.shsu.edu/dept/international-programs/>) for more details. For more information on additional visa types, refer to Additional Visa Type Considerations.

Non-degree admission does not qualify for federal financial aid.

Graduate Transient Admission

Transient admission may be granted to a student who is accepted in good standing at a college and/or university recognized by the Texas Higher Education Coordinating Board and who wishes to enroll for one semester at Sam Houston State University. An applicant requesting this status must submit the following to the Office of Admissions: the graduate application for admission, a nonrefundable application fee, and certification of graduate standing in a college and/or university recognized by the Texas Higher Education Coordinating Board. Some departments/schools may require additional information for transient admission; therefore, applicants should contact the appropriate academic department/school. A student admitted with this admission type who later wishes to seek a degree at Sam Houston State University must submit an application for graduate studies. A

maximum of 12 credit hours taken as a graduate transient may be applied to a graduate degree program at the discretion of the appropriate academic dean. For more information for international students, refer to Additional Visa Type Considerations.

Admission Classifications

A student admitted into a graduate or post-baccalaureate program at SHSU may be considered for three distinct classifications. Details of the possible classifications follow.

Post-Baccalaureate

Post-baccalaureate classification is assigned to a student possessing a baccalaureate degree who has not been regularly or conditionally admitted to a graduate program (master's or doctoral) at SHSU. A student who is classified as a post-baccalaureate is typically:

- taking undergraduate classes to raise an undergraduate GPA,
- seeking certification or a certificate credential at the graduate level but not seeking a degree,
- taking prerequisite courses for a degree program and does not yet meet the admission requirements for the degree program, or
- taking courses for self-edification.

Master's

Master's classification is assigned to a degree-seeking student possessing a baccalaureate degree and who has been admitted to an approved master's degree program at SHSU. Master's classification is also granted to a degree-seeking student admitted to a doctoral program who has not yet earned the required master's degree or 30 hours toward the doctorate degree.

Doctoral

Doctoral classification is assigned to a degree-seeking student who has been admitted to an approved doctoral degree program at SHSU and has completed a master's degree (recognized as the equivalent of one year's full-time work) toward the doctoral degree the student is seeking or at least 30 graduate hours of work toward the proposed doctorate degree.

Professional

Professional classification is assigned to a degree-seeking student who has been admitted to an approved professional program at SHSU and has completed the pre-requisites for entry into the degree program the student is seeking.

Subsequent Application

A new application for admission must be submitted if the student fails to attend for one calendar year or seeks admission into a different degree program.

For more information, please call the Office of Admissions at (936) 294-1971 or visit Graduate Admissions (<https://www.shsu.edu/dept/graduate-admissions/prospective-students.html>) online.

Subsequent Master's Degree

(Refer to Academic Policy Statement 801215 (<https://www.shsu.edu/dept/academic-affairs/documents/aps/801215%20Subsequent%20Masters%20Degrees.pdf>))

A student can only be enrolled, seeking one graduate degree at a time. If a student wishes to pursue more than one master's degree at Sam Houston State University, he or she must complete one degree before beginning another. A student may seek a second master's degree at Sam Houston State University, provided that the field of study differs from the field of study for the first master's degree.

Upon the written recommendation of the appropriate departmental/school chair(s) and academic dean, the following maximum number of credit hours may be applied to the second master's degree:

Departments	Programs
Hours in Second Master's Degree Program	Maximum Semester Credit Hours Applied
30-35	6
36-44	9
45-59	12
60 or more	15

Personal Standards

The personal standards of conduct expected of students who enroll at Sam Houston State University are provided in the *Student Guidelines*. Additional standards for professional behavior are expected and assessed in some graduate programs. The University reserves the right to refuse acceptance

to prospective or former students who have criminal records, including conviction of a felony, offenses involving moral turpitude, or other serious offenses.

Registration

- Graduate Advisement
- Registration
- Graduate Courses
- Course Load
- Class Schedule Changes
- Correct Addressees
- Name Change

Graduate Advisement

Before the initial registration, the student should consult with the appropriate graduate advisor. Academic advisement is encouraged prior to each registration. All students should confer with graduate advisors on a regular basis, monitor their own academic progress, and review the degree plan on a continuous basis. The graduate advisors can be located by accessing the desired degree program at The Graduate and Professional School (<https://www.shsu.edu/dept/graduate-studies/graduate-programs.html>). (<https://www.shsu.edu/dept/graduate-studies/>)

Registration

Sam Houston State University has approval from the Texas Higher Education Coordinating Board to offer various degree programs at The Woodlands Center in The Woodlands, Texas. (Registration into courses at The Woodlands Center will incur additional fee.) During scheduled periods of registration, students may register online by selecting the My Sam link, under Campus Tools, on the SH homepage (<https://www.shsu.edu/>) and then the Registration tab. Students will need their User ID and password to access My Sam. For further information please visit the Registrar's website (<https://www.shsu.edu/dept/registrar/students/registration/>).

International Students:

Immediately upon arrival on campus, international students should contact the Global Engagement Center (<https://www.shsu.edu/dept/global-engagement/>) to ensure all admission and immigration documents are in order. Visit the Global Engagement Center for check-in requirements. (<https://www.shsu.edu/dept/global-engagement/international-students-and-scholars/check-in/>)

SH International Students must obtain health insurance coverage through either applying for a waiver and presenting proof of other insurance coverage that meets applicable federal or state requirements for minimum coverage and benefits, or accepting the university offered compliant health insurance policy. International student health insurance will be coordinated through the Global Engagement Center (<https://www.shsu.edu/dept/global-engagement/>).

Osteopathic Medical Students:

Students associated with the College of Osteopathic Medicine will (<https://www.shsu.edu/academics/osteopathic-medicine/>) be registered for classes by Registrar staff. Certain tasks may be required of osteopathic medicine students prior to registration. Students will be contacted with those tasks each semester.

Graduate Courses

A graduate course is an advanced course requiring critical analysis and study. Typically, courses with numbers of 5000 or 6000 level are master's level courses and 7000 level or higher are doctoral/medical level courses.

To provide a greater range of academic course offerings, graduate and undergraduate courses with similar content and background requirements may be offered as stacked sections. Stacked sections are defined as course sections at different levels scheduled as combined classes taught simultaneously by the same faculty member with graduate faculty status. Most commonly, it will be a 4000 level section stacked with a 5000 level section. In the course syllabus, the additional effort required for higher level credit must be clearly stated. Please contact the program department for more information.

Some graduate programs allow students to take a limited number of approved 4000 level courses for graduate credit. To receive graduate credit for a 4000 level course, the student must receive prior approval from the department chair and the academic dean and complete additional requirements as outlined by the professor. Please see the specific degree programs within this catalog for more details on taking 4000 level courses for graduate credit.

Course Load

Normal Load - The load for a full-time graduate student is nine to twelve credit hours per fall or spring semester and six credit hours in the summer. Students enrolled in master's and doctoral degree programs should enroll in a minimum of nine graduate credit hours in both the fall and spring semesters and six credit hours in the summer to be considered full-time graduate students. Osteopathic medical students are considered full-time and are enrolled in a standard array of courses each term as designated by the College of Osteopathic Medicine approved curriculum.

Master's students desiring to enroll in more than twelve graduate credit hours and doctoral students desiring to enroll in more than nine graduate credit hours in any one semester must obtain approval from the dean of the college in which they are enrolled.

It is important to note that the University requirements for full-time status and requirements of various financial aid programs may differ. It is recommended that students consult with the University's Financial Aid Office to determine how assistantships and fellowships may impact financial aid.

Course Load for Graduate Assistants

Graduate students employed by the University at least half-time as graduate assistants, research assistants, or teaching assistants should enroll in a minimum of six graduate credit hours per semester to be considered full-time graduate students. The maximum course load for graduate assistants on half-time employment is nine credit hours per fall or spring semester or six credit hours during the summer. Graduate assistants on less than a half-time assistantship may have the maximum course load authorization increased proportionately by the appropriate department/school chair. For more information on the employment of graduate assistants refer to Academic Policy Statement 890303. (<https://www.shsu.edu/sacscoc/Support%20Docs/6.1/5.%20Employment%20of%20Graduate%20Assistants.pdf>)

Class Schedule Changes

What should students consider when adding or dropping courses?

- Adding or dropping courses can impact financial aid. Students receiving financial aid and/or scholarships are encouraged to visit with a financial aid representative prior to adding or dropping courses.
- Adding or dropping courses can impact time to completion. Students should meet with their graduate advisor to discuss potential impacts.
- Beginning with the first class day of each term, added courses will result in tuition and fee charges to be paid by 4:00 pm on the date the course(s) are added.
- International students must make changes through the Global Engagement Center. (<https://www.shsu.edu/dept/global-engagement/>)

When can students change their schedules?

- Students may add courses through the 8th class day for fall or spring terms and the 2nd class day for summer terms. For registration times, please refer to Registration Dates (<https://www.shsu.edu/dept/registrar/students/registration/registration-open-close-dates.html>) and the Academic Calendar (<https://www.shsu.edu/dept/registrar/calendars/academic-calendar.html>).

Osteopathic Medical Students:

Students associated with the College of Osteopathic Medicine will be registered in course blocks required for promotion to the next semester. Osteopathic medical students are not permitted to drop individual courses that are a part of these blocks.

Correct Addresses

It is necessary to have a correct residency address on file with the University. Students who change addresses after completing registration should immediately update their addresses by logging in to My Sam. (Campus Resources -> Banner Self-Service-> Personal Information -> Update Addresses and Phones)

Official University e-mail correspondence will be sent to the assigned SHSU e-mail address. The University assumes no obligation for failure of a student to receive communications.

International students must contact the Global Engagement Center. (<https://www.shsu.edu/dept/global-engagement/>)

Name Change

Appropriate documentation substantiating a legal name change for a student must be submitted to the Registrar's Office. All transcripts are issued under the student's legal name as recorded on the student's academic record. The Request for Change of Name form can be found on the Registrar's website (<https://www.shsu.edu/dept/registrar/forms-and-documents/forms-and-documents.html#faculty>) under Student Resources – Forms and Documents.

Degree Requirements & Academic Guidelines

- Graduate Degree Requirements
- Academic Expectations and Guidelines

Graduate programs are typically regarded as either research or professional oriented programs. Research programs have a major research component. At the master's level, the research component may be included in a series of courses, a research product, and/or a thesis. At the doctoral level, the research product is a dissertation. Professional programs at the master's level may include an internship and/or a practicum, in lieu of a research product.

Graduate studies tend to be more focused, provide greater depth of study within the chosen field, foster independent learning, and promote knowledge of the literature. All of the graduate programs at Sam Houston State University require an assessment of knowledge retention toward the end of the academic program. Further assessment information can be found under Comprehensive Requirements.

Regardless of the type of program, the academic expectations placed on graduate students far exceed those experienced at the undergraduate level. To maintain academic good standing at Sam Houston State University, a graduate student must maintain an overall grade point average of at least 3.0 on all graduate coursework attempted. Students associated with the College of Osteopathic Medicine will adhere to an academic standings policy as outlined in their student handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1). See Scholastic Expectations for further details.

Graduate Degree Requirements

- Academic Procedures
- Degree Plan
- Comprehensive Examination
- Enrollment in Thesis or Dissertation Courses
- Master's Thesis/Doctoral Dissertation
- Graduation

Academic Procedures

SUMMARY OF THE MAJOR STEPS REQUIRED BY THE GRADUATE & PROFESSIONAL SCHOOL IN FULFILLING REQUIREMENTS FOR A GRADUATE DEGREE

Procedure	Time
1. Become familiar with general regulations and appropriate degree section of Graduate and Professional Catalog	Before registration
2. Meet with graduate advisor to plan course of study, including any attempted certificates	Before initial registration
3. Meet candidacy requirements	Per program requirements
4. Conduct annual review with advisor	After each year in program
5. If Thesis or Dissertation is required:	Per program requirements
a. Establish Advisory Committee	See Academic Calendar linked below table
b. Submit thesis/dissertation proposal	
c. Defend thesis/dissertation proposal	
d. Defend final thesis/dissertation	
e. Submit thesis/dissertation to The Graduate & Professional School for review	
6. Apply for degree and/or graduate certificate	See Academic Calendar
7. Meet comprehensive requirements	During semester of anticipated graduation

Academic Calendar (http://www.shsu.edu/~reg_www/academic_calendar/)

Notes:

1. Each student is responsible for contacting their graduate advisor for the specific program requirement deadlines. A student is required to complete masters level graduate work within a six-year period, measured from the date of initial enrollment for graduate credit in a particular degree program and within an eight-year period for doctoral level graduate work.

2. Students must be enrolled in at least one course (one credit hour or more) in both the semester of graduation and the semester in which the comprehensive requirements are met. Completing a course for which a grade of IP was given in a previous semester does not constitute enrollment.
3. Students are responsible for appropriate application to degree for diplomas and/or certificates.

Degree Plan

A degree plan details the curriculum for the specific academic program and is developed for each graduate student. All courses on the approved degree plan must be completed with a satisfactory grade to meet the requirements for the degree. Changes in an approved degree plan may be made by petition to the graduate advisor and approved by the appropriate academic dean.

A student is required to complete masters level graduate work within a six-year period, measured from the date of initial enrollment for graduate credit in a particular degree program and within an eight-year period for doctoral level graduate work. A student associated with the College of Osteopathic Medicine is required to complete the curriculum within a six-year period. The period of time a student is on an approved leave of absence will be counted as time accumulated toward the six-year or eight-year deadline for completion of the degree. Any extension of the six-year or eight-year deadline must be approved in writing by the appropriate academic dean and the Dean of The Graduate & Professional School.

Comprehensive Requirements

Comprehensive requirements are an important measure of skills and knowledge acquired throughout the program of study. All master's degree and doctoral degree candidates must demonstrate the skills and knowledge acquired through their program by passing an integrative comprehensive examination before completing their degree plan. The major department/school will establish the form of the comprehensive examination (e.g. timed exam, research presentation, thesis defense, capstone course, portfolio submission, performance, etc.) and whether it is written, oral, or a combination of the two. Graduate candidates must check with their program's graduate advisor and/or department/school to determine the comprehensive examination procedures for their program.

As appropriate, the major department/school will organize a committee for the administration of exams. A grade of "high pass," "pass," or "fail" for each exam must be filed with the appropriate academic dean. Should a student fail one or more examinations, a re-examination shall be permitted per department/school or college guidelines, as appropriate. A third examination may be permitted only with the approval of the appropriate academic dean and the department/school. Students should consult the major department/school for specific guidelines regarding comprehensive examinations. Students must be enrolled at SHSU in the semester in which the comprehensive exams are administered.

Enrollment in Thesis or Dissertation Courses

(Refer to Academic Policy Statement 930129 (<https://www.shsu.edu/dept/academic-affairs/documents/policies/930129%20Graduate%20Degree%20Enrollment%20and%20Completion%20Requirements.pdf>) - Graduate Degree Enrollment and Completion Requirements)

A graduate student at Sam Houston State University writing a thesis or dissertation must enroll in the appropriate thesis or dissertation courses. Typically, a master's student is required to take at least six hours of thesis courses. Depending on the specific program, a doctoral student is required to take a minimum of either nine or twelve hours of dissertation courses. Once a student enrolls in a thesis or dissertation course, the student must continuously enroll in such a course every fall, spring, and summer semester until the signed thesis/dissertation route sheet is received by the Office of the Registrar. Students must be enrolled in at least one course (one credit hour or more) in the semester of graduation. Completing a course for which a grade of IP was given in a previous semester does not constitute enrollment.

A student who is unable to work on the thesis or dissertation for a period of time may present to the appropriate academic dean a written request for a leave of absence of up to one year. The dean's approval of such a request must be in writing. A student granted a leave of absence may not be enrolled in any coursework during this period. A student on a leave of absence will lose access to University services. Students returning from leave of absence should contact program advisors immediately to seek guidance for enrollment procedures.

Master's Thesis/Doctoral Dissertation

Thesis/Dissertation Committee

A thesis/dissertation committee will be formed prior to enrollment in the first thesis/dissertation course. The committee must be composed of a chair and at least two additional members, all of whom have appropriate graduate faculty status. With the approval of the department/school chair, academic dean, and Dean of The Graduate & Professional School the committee may include one member who is not employed by SHSU, as per Academic Policy Statement 950601 (<https://www.shsu.edu/dept/academic-affairs/documents/aps/950601%20Members%20Not%20Employed%20Thesis%20Dissertation.pdf>). Selection of the chair depends on student preference, faculty availability, and expertise. After a faculty member agrees to serve as chair, the student will select the other committee members with guidance from the chair. The committee must then be approved by the chair of the major department/school and the appropriate academic dean. Any change in the composition of the thesis or dissertation committee will be approved in the same manner.

Prospectus

In consultation with the thesis/dissertation chair, the student will select a subject of investigation and determine the availability of the required sources, facilities, materials, and equipment for the research and the writing of the thesis/dissertation. The student will prepare a prospectus which will specify the topic, detail the purpose of the proposed investigation, describe the proposed method(s) of investigation, indicate the relationship

of study to relevant research and findings of scholars in the student's area of concentration, and provide a commentary on source materials and/or facilities available for the successful completion of the research.

The prospectus shall be submitted to the thesis/dissertation committee following the timelines outlined by the department/school or college policies. Upon committee approval, the signed prospectus is submitted to the appropriate academic dean for final approval and to The Graduate & Professional School for notification purposes by using the Thesis and Dissertation Initiation Sheet (<https://www.shsu.edu/dept/graduate-studies/theses-and-dissertations.html>). Any subsequent changes in topic or the proposed method of investigation must be approved in writing by the committee and submitted for approval to the appropriate academic dean.

Preparation

To facilitate the preparation of the thesis/dissertation, the student should refer to the Thesis and Dissertation Resources (<https://www.shsu.edu/dept/graduate-studies/theses-and-dissertations.html>) provided by The Graduate & Professional School.

Procedure

Candidates should be in regular contact with committee members throughout the thesis/dissertation process. Candidates should allow committee members ample time to review draft versions of the thesis/dissertation. The candidate should submit the completed thesis/dissertation to the thesis/dissertation committee at least two weeks prior to the scheduled defense. The following steps must be completed, most in the graduating semester.

1. The candidate shall submit a draft of the thesis/dissertation to the Thesis/Dissertation Specialist for format and style review. The last day to submit the draft can be found in the Academic Calendar (<http://www.shsu.edu/dept/registrar/calendars/academic-calendar.html>).
2. The chair of the committee or the graduate advisor establishes a time and location for administering a verbal defense of the thesis/dissertation. The defense must be held at least six weeks prior to graduation. Attendance at the defense is open to the entire university community.
3. The thesis/dissertation chair will submit a signed *Report of the Outcome of the Thesis/Dissertation Defense* to the appropriate academic dean.
4. Upon successful completion of the defense, the candidate should begin the routing of the Electronic Route Sheet. (<http://www.shsu.edu/dept/graduate-studies/theses-and-dissertations.html>) This form will be automatically routed to the thesis/dissertation committee chair and the appropriate academic dean; the Thesis/Dissertation Specialist; The Graduate & Professional School; and the Office of the Registrar.
5. Upon approval by the committee, the final (approved) version of the thesis/dissertation should be submitted to the Thesis/Dissertation Specialist by the candidate for final review prior to publication. The last date for submission can be found in the Academic Calendar (<http://www.shsu.edu/dept/registrar/calendars/academic-calendar.html>).
6. SHSU publishes theses and dissertations electronically through Vireo (<https://shsu-etd.tdl.org/>) and ProQuest (<https://about.proquest.com/>). In certain cases, however, SHSU will allow for an Embargo (<https://www.shsu.edu/dept/graduate-studies/theses-and-dissertations.html>) to be placed on a candidate's research. An embargo allows a thesis/dissertation to be withheld from being published for a limited time or permanently in SHSU's Institutional Repository and ProQuest. Printing and binding costs for physical reproductions of the thesis/dissertation are the responsibility of the candidate. The original copy will remain in the library collection.

Graduation

Application for a Degree

For fall and spring graduates, a formal application and payment of the degree/diploma fee must be made in the Office of the Registrar on or before the 12th class day of the semester in which the degree is to be conferred. Summer graduates will be required to file their graduation application and pay the degree/diploma fee by the 4th class day of the first summer session in which the degree is to be conferred. The specific deadline dates to apply to graduate each term can be found in the Academic Calendar (<https://www.shsu.edu/dept/registrar/calendars/academic-calendar.html>). A student filing a degree application after the published deadline will be assessed a late fee. A student who is completing the last term of coursework at an institution other than SHSU must provide The Graduate & Professional School with an official transcript of this coursework no later than one day prior to the graduation date (See Transfer of Credit). Further details regarding the graduation application process and graduation ceremony information may be found through the Registrar's Graduation (<https://www.shsu.edu/dept/registrar/graduation/>) site, including application fees.

Application for a Graduate Certificate

All graduate students who complete a graduate certificate issued by SHSU must submit an application for graduation with the Office of the Registrar (<https://www.shsu.edu/dept/registrar/>). This process should take place on or before the 12th class day during the fall or spring semester. Summer graduates will be required to complete the process on or before the 4th class day. Graduate certificates may be awarded at the completion of the required graduate certificate coursework, except for graduate certificates that require degree completion per the academic program. Here is a complete list of graduate certificates (<https://www.shsu.edu/academics/degrees.html?degTyp=mast>) offered at SHSU.

Please note that certifications issued by the Texas Education Agency (TEA) will be distributed by the TEA not by SHSU.

Academic Expectations and Guidelines

- Grading System
- Academic Honesty
- Scholastic Expectations
- Graduate Certificates
- Academic Probation and Suspension

- Resignations
- Transcripts
- Transfer of Credit
- University Academic Policy Manual and Student Guidelines

Grading System

Four grades are given in graduate courses at the University:

Grade	Denotation
Grade	Denotation
A	Academic Excellence
B	Acceptable Performance
C	Passing, yet Insufficient Performance
F	Failure

- The mark "IP" denotes "in progress" and is given in thesis/dissertation and other courses which cannot be completed within one semester.
- The mark "CR" denotes "credit."
- The mark of "W" denotes "withdrew" and is given for resignations.
- The mark "X" denotes "incomplete." If the student meets the prescribed requirements of the course before the end of the next long academic semester (fall or spring; the summer term is not considered a long semester for X grade submissions) after the "X" is given, the student will receive the grade earned; otherwise, the mark "X" will be automatically changed to an "F."
- The mark of "Q" is assigned to courses dropped from the thirteenth class day for a fall or spring semester, or from the fifth class day for a summer session, through the last class day but prior to any final exams being taken or course completion. Courses with the mark of "Q" will not be counted as courses attempted and will not be included in determining grade point averages.
- Students associated with the College of Osteopathic Medicine are subject to a grading policy found in the College of Osteopathic Medicine Student Handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1).

Academic Honesty

The Graduate Faculty of Sam Houston State University expects students to conduct academic work with integrity and honesty. Acts of academic dishonesty will not be tolerated and can result in the failure of a course and dismissal from the University.

Academic dishonesty includes, but is not limited to, cheating on a test, plagiarism, collusion (the unauthorized collaboration with another person in preparing work offered for credit), the abuse of resource materials, and misrepresentation of credentials or accomplishments.

Sam Houston State University's policy on academic honesty and appeal procedures can be found in the Student Guidelines (<http://www.shsu.edu/students/guide/>), distributed by the Division of Student Affairs. Students should check with their academic colleges and departments/schools for potentially stricter policies than those listed in the Graduate and Professional Catalog. Students associated with the College of Osteopathic Medicine must adhere to additional policies that can be found in the College of Osteopathic Medicine Student Handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1).

Graduate Certificates

Graduate certificates issued by Sam Houston State University must follow all policies for graduate level work, including, but not limited to, admissions, scholastic expectations, degree plan requirements, and graduation. Students may pursue a graduate certificate with or without simultaneous enrollment in a graduate degree program.

Students seeking a graduate certificate with simultaneous enrollment in a graduate degree program.

For information on transfer of credit for graduate courses completed at other accredited colleges and universities, see Academic Policy Statement 801007 (<http://catalog.shsu.edu/graduate-and-professional/academic-policies-procedures/degree-requirements-academic-guidelines/#transfer-credit>).

The maximum number of hours that may count as shared credit between multiple certificates and/or with a graduate degree program taken simultaneously is at the discretion of the academic dean and the Dean of The Graduate & Professional School.

Students seeking a graduate certificate without simultaneous enrollment in a graduate degree program.

For transfer of credit of graduate courses completed at other accredited colleges and universities may be applied as transfer credit toward a graduate certificate at Sam Houston State University at the discretion of each graduate program and the college in which it is housed. Transfer credit is not automatically conferred and must be requested by the graduate advisor. Only courses with an earned grade of "B" or better may be used as transfer

credit. The maximum number of hours that may be transferred into a graduate certificate attained at another accredited college or university are as follows:

- 3 hours of transfer credit toward a certificate of 18 hours or less;
- 6 hours of transfer credit toward a certificate of 19 hours or more.

For a student that is enrolled in multiple graduate certificates simultaneously, the maximum number of hours that may count as shared credit are as follows:

- 3 hours of shared credit toward multiple certificates of 18 hours or less;
- 6 hours of shared credit toward multiple certificates of 19 hours or more.

Scholastic Expectations

A minimum grade point average of 3.0, on a 4.0 scale, is required in all coursework taken for graduate credit. All grades earned in courses taken for graduate credit will be utilized in computing the grade point average. If a course is repeated, the highest earned grade will be used for computing the grade point average. A grade earned at another institution may not be used to remove a grade deficiency earned in residence at Sam Houston State University. Semester hours of credit earned at another institution are not utilized in computing the student's Sam Houston State University overall grade point average. Only those transferred courses from accredited institutions in which a grade of "A" or "B" was earned and which are accepted toward an official degree program may be applied toward a degree (see Transfer of Credit).

Students associated with the College of Osteopathic Medicine will be subject to a different set of scholastic expectations as outlined in their student handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1).

Academic Probation and Suspension

In order to achieve and remain in **academic good standing** at Sam Houston State University, a graduate student must maintain an overall grade point average of at least 3.0 on all graduate coursework attempted.

A 3.0 overall grade point average is the absolute minimum required for graduation. A graduate student who falls below a 3.0 overall grade point average at the close of any semester during which one or more semester credit hours are attempted will be placed on probation. If an enrolled student on probation fails to achieve a minimum 3.0 overall grade point average at the close of the next semester following the start of the probation, the student will be academically terminated.

A student who earns a grade of "C" in any course (repeated or distinct course) within the academic program may have their graduate status reviewed by a committee comprised of the department/school or college's graduate faculty. The committee will recommend an appropriate remediation for the student.

A graduate student who earns a grade of "F" in any graduate course will be terminated from graduate studies.

Those students who earn a grade of "F" during the semester of their anticipated graduation will be terminated from graduate studies and will not be eligible to graduate in that term. The appropriate academic dean may place on probation, retain on probation, or terminate any student deficient in grade points without regard to the regulations previously stated.

Any appeal for a review of the termination of graduate status should be directed in writing through the graduate advisor of the program, then to the chair of the department/school, then to the academic dean of the college, and finally to the Provost and Vice President for Academic Affairs. Refer to Academic Policy Statement 910312 (https://www.shsu.edu/academics/science-and-engineering-technology/documents/910312%20Academic%20Probation%20and%20Suspension_2022.pdf) for further information.

If a student wishes to pursue a different program after being terminated from the original program, the student must complete the admissions process and be accepted into the new program. A student must be in Academic Good Standing to change to a new program or receive a release from the academic program, academic dean of the college, and Dean of The Graduate & Professional School. Once accepted to the new program, the previous program must release the termination block in the Office of the Registrar before the student can register in the new program.

Students associated with the College of Osteopathic Medicine will be subject to a different academic probation and dismissal process as outlined in their student handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1).

Resignations

To resign (officially withdraw) from the University, a student must notify the Office of the Registrar and process a Resignation Request. The Resignation Request must be in writing and becomes effective on the date received by the Office of the Registrar. The effective date of the Resignation Request, as received by the Office of the Registrar, is the date used for determining any refund as authorized in the State Refund Policy (see Tuition and Fees Refund Policy (<http://www.shsu.edu/dept/registrar/students/registration/resignations-refunds-drops.html>)). The student is responsible for clearing all debts owed to the University. A student who wishes to drop all courses must officially resign. **A student who discontinues attending class and fails to officially resign from the University will receive the grade of "F" in each enrolled course.**

A student who resigns after the 12th class day of a regular semester or after the 4th class day of a summer session will receive a mark of "W" for each enrolled course. A student who resigns from the University while enrolled in a course whose duration is less than a normal term will receive a mark of "W" if the resignation occurs after one-half of that course time has been completed.

Transcripts

A Sam Houston State University transcript is the official record of a student's academic college credits (transfer courses reported to SHSU, credits earned by exam – CLEP), including all undergraduate and graduate level courses and degrees earned.

For information about ordering your transcript, see the Office of the Registrar's page (<https://www.shsu.edu/dept/registrar/transcripts-and-student-records/transcripts.html>).

Transfer of Credit

In accordance with Academic Policy Statement 801007 (https://www.shsu.edu/dept/academic-affairs/documents/aps/curriculum/801007%20Courses%20and%20Grades%20Transferred%20from%20Other%20Colleges%20and%20Universities_2017.pdf), graduate courses completed at other accredited colleges and universities may be applied as transfer credit toward a graduate degree at Sam Houston State University at the discretion of each graduate program and the college in which it is housed. Transfer credit is not automatically conferred and must be requested by the graduate advisor. Only courses with an earned grade of "B" or better may be used as transfer credit. Transferred courses must adhere to the six year time frame for master's degrees and the eight year time frame for doctoral degrees. If courses are older than the allowed time frame, written justification must be provided by the graduate advisor with approval by the academic dean and the Dean of The Graduate & Professional School for courses to be transferred.

The maximum number of hours that may be transferred into a graduate program are as follows:

- 6 hours of transfer credit toward a degree of 30 hours;
- 9 hours of transfer credit toward a degree of 31 to 36 hours;
- 12 hours of transfer credit toward a degree of 37 to 48 hours;
- 15 hours of transfer credit toward a degree of 49 or more hours.

Students seeking a graduate certificate without simultaneous enrollment in a graduate degree program should reference the Graduate Certificates section of this catalog for transfer information.

Students are encouraged to contact the appropriate graduate advisor for information concerning transfer credit allowed for a specific degree.

Students seeking to transfer from another institution to the SHSU College of Osteopathic Medicine must apply for transfer via the transfer admissions policy as outlined in the College of Osteopathic Medicine student handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1).

University Academic Policy Manual and Student Guidelines

Sam Houston State University's Academic Policy Manual (<https://www.shsu.edu/dept/academic-affairs/policies.html>) and *Student Guidelines* provide specific information pertaining to the educational mission of the University and student conduct. Copies of these publications may also be viewed at the Reference Desk of the Newton Gresham Library.

Students associated with the College of Osteopathic Medicine must adhere to additional policies that can be found in the College of Osteopathic Medicine student handbook (https://www.shsu.edu/academics/osteopathic-medicine/documents/Student+Handbook_Final_03102020.pdf?language_id=1).

Insurance:	\$2,193.00	\$2,193.00
Books (First Year Only):	\$476.26	\$476.26

All tuition and fees are correct as of the date of print but are subject to change by action of the State Legislature or the Board of Regents of The Texas State University System.

Explanation of Fees

Osteopathic Medical Student

Program Fee: Are assessed at the semester rate of \$9,975.00 for Texas Residents and \$10,975.00 for Nonresidents in academic years 2024-2025 and 2025-2026.

Statutory Tuition: Resident students pay \$3,275.00 in tuition per semester during academic year 2024-25 and 2025-26 Nonresident students (out-of-state and international) pay \$9,825.00 in tuition per semester during academic year 2024-25 and 2025-26. Osteopathic Medicine students are registered into block sections per semester resulting in flat rates. The Texas Higher Education Coordinating Board calculates each year the nonresident tuition.

Insurance and Books: Additional charges for books and health insurance may be assessed at the time of registration.

The above information is not intended to be comprehensive and is subject to change. Program fees, tuition, fees, and charges are subject to change by action of the State Legislature or by action of the Board of Regents of The Texas State University System. The above program fee, tuition, fees, and charge information should only be used as a guideline for estimating costs. For more information, review SHSU's Cost of Attendance (<https://www.shsu.edu/dept/financial-aid/cost/>). For clarification of any matter relating to payment or refund of program fees, tuition, fees, charges, and deposits, contact the office or administrative unit from which the charge or refund originated.

The following Explanation of Fees section does not pertain to Osteopathic Medical Students unless otherwise stated.

The following information is not intended to be comprehensive and is subject to change. Tuition, fees, and charges are subject to change by action of the State Legislature or by action of the Board of Regents of The Texas State University System. The following tuition, fees, and charge information should only be used as a guideline for estimating costs. For clarification of any matter relating to payment or refund of tuition, fees, charges, and deposits, contact the office or administrative unit from which the charge or refund originated.

Statutory Tuition: Resident students pay \$50 tuition per semester credit hour during academic year 2024-25 and 2025-26. Nonresident students (out-of-state and international) pay \$460 in tuition per semester credit hour during academic year 2024-25 and 2025-26. The Texas Higher Education Coordinating Board calculates each year the nonresident tuition. Students enrolled in the same course for the third or more time will be charged a rate up to the non-resident tuition rate for the hours associated with the course even if the student normally qualifies for in-state tuition. Resident students who reach the “excessive hour limit” will be charged a set rate per hour (see Tuition for Excessive Undergraduate Hours within this chapter for further details).

Designated Tuition is charged at the rate of \$194.00 per semester credit hour during academic year 2024-25 and 2025-26. In addition, graduate designated tuition differential will be charged at the rate of \$26.25 per credit hour for academic years 2024-25 and 2025-26.

Graduate Tuition Increment: Graduate tuition is charged at the rate of \$50.00 per semester credit hour for academic year 2024-25 and 2025-26.

Institutional Services Fee: The institutional services fee is charged at a rate of \$109 per semester credit hour for academic year 2024-25 and at a rate of \$109 per semester credit hour for academic year 2025-26. The fee funds critical support services and infrastructure which allow for continued support of existing services and operations and allows for expansion of programs and services.

Student Service Fee: The student service fee per semester credit hour is \$17.60 for academic year 2024-25 and 2025-26 (\$8.80 per summer semester) (not exceeding \$250 per semester and \$125 per summer session). The fee supports the Intramural Program, the Student Life Support Programs, and the Extramural Programs. The fee provides admission to athletic events at Sam Houston State under the auspices of the Department of Athletics.

Student Center Fee: The student center fee is required at the rate of \$100 per semester (\$100 per summer session) for academic year 2024-25 and academic year 2025-26 and is used to fund the Lowman Student Center programs and activities.

Recreational Sports Fee: Legislative action authorizes a recreational sports fee not to exceed \$100 per semester for academic year 2024-25 and academic year 2025-26. It may be used to purchase equipment for and/or construct, operate, maintain recreational sports facilities and programs.

Medical Fee: A fee of \$75 per semester is charged for academic year 2024-25 and academic year 2025-26. This fee covers services at the Student Health Center.

Intercollegiate Athletic Fee: A fee of \$20 per semester credit hour (\$ 10 per summer semester credit hour) is charged for academic year 2024-25 and academic year 2025-26. This fee will be used to support Intercollegiate Athletic programs.

Other Fees

Audit Fee: A \$50 fee per course that is audited.

Distance Learning Fee: A fee of \$101 per credit hour is charged in addition to tuition and mandatory fees when a course is designated as an electronically delivered (internet) distance learning course.

Lab Fee: Lab fees are charged at the rate of \$8 each course with a lab component.

College of Science & Engineering Technology Lab Fee (per lab): charged at rate of \$16 per lab

Music Fee: Music fees are charged for music courses that require individual instruction. (charged per course)

Semester credits	Fee
1 semester credit hour:	\$30
2 semester credit hours:	\$60
3 semester credit hours:	\$75
4 semester credit hours:	\$75

International Study Fee: A fee of \$75 per semester charged to international students for services provided through the Office of International Programs.

"Three Peat" Tuition: In order to provide for loss of state funding, students attempting a course for the third or more time will be charged a statutory tuition rate up to the non-resident rate. The rate is currently \$168 per semester credit hour.

Payment Plan Enrollment Fee: (Pertains to all students enrolled in payment plan including Osteopathic Medical Students) A non-refundable fee of \$30 is assessed to students who enroll or opt-in for enrollment into an installment payment plan.

Late Installment Payment Penalty: (Pertains to all students enrolled in a payment plan including Osteopathic Medical Students) A \$25 late fee is charged for each installment payment received after the installment due date.

The Woodlands Center Fee (passed through the Board as the University Center Fee): A fee of \$75 / SCH for courses taught at The Woodlands Center.

Program Fees:

College of Business Administration: This fee is charged at a rate of \$8 per semester credit hour for all enrolled credit hour for academic year 2024-25 and at a rate of \$8 per semester credit hour for academic year 2025-26. This fee is charged to students who are majoring in programs within the College of Business Administration.

Engineering Technology Fee: This fee is charged at a rate of \$8 per semester credit hour for all enrolled credit hour for academic year 2024-25 and at a rate of \$8 per semester credit hour for academic year 2025-26. This fee is charged to students who are majoring in programs within the Department of Engineering Technology.

Master of Science in Athletic Training: This fee is charged at a rate of \$555 per semester for academic year 2024-25 and at a rate of \$555 per semester for academic year 2025-26. This fee is charged to students who are enrolled in the Master of Science in Athletic Training program.

Master of Education in School Leadership: This fee is charged at a rate of \$413.25 per semester credit hour for academic year 2024-25 and at a rate of \$413.25 per semester credit hour for academic year 2025-26. This fee is charged to students enrolled in the Master of Educational Leadership program.

Alternative Teacher Certification Program: This fee is charged a one-time program fee of \$5,860 and a one-time administrative fee of \$135 per academic year 2024-25 and a one-time program fee of \$5,860 and a one-time administrative fee of \$135 per academic year 2025-26. This fee is charged to students enrolled in the Alternative Teaching Certification Program.

Residence Classification for Tuition Purposes

The Texas Legislature and the Texas Higher Education Coordinating Board (<https://www.highered.texas.gov/>) establish the rules and regulations for determining residence classification. These rules are subject to revision by the legislature and the Texas Higher Education Coordinating Board. Rules for Texas residency classification for University tuition are different from residency rules for voting, obtaining a Texas driver's license, or tax purposes. The deadline to update a residency status is the census date (Academic Calendar Q-drop day (<https://www.shsu.edu/dept/registrar/calendars/academic-calendar.html>)) of each semester.

An individual's initial residency classification is determined based on information from his or her admission application. Texas law classifies each person who applies for admission to a Texas public college or university as:

- A resident of Texas;
- A nonresident; or
- A foreign (international) student.

A nonresident student may qualify to pay in-state tuition by meeting the requirements of a tuition waiver. Current tuition waiver options include but are not limited to

1. the student or his/her spouse or parent is a member of the U.S. Armed Forces and their home of record is Texas;
2. the student or his/her spouse or parent is employed at least half-time by an institution of higher education in Texas as a teacher or professor;
3. the student or his/her spouse or parent has a teaching or research assistantship at any Texas institution of higher education on at least a half-time basis;
4. the student holds a competitive scholarship (<https://www.shsu.edu/dept/academic-affairs/documents/aps/850822%20Competitive%20Academic%20Scholarships.pdf>) awarded by Sam Houston State University of at least \$1,000; or
5. the student or student's family has been transferred to Texas by a company in keeping with the state's Economic Development and Diversification Program.

By state law, the student has the responsibility of registering under the proper residence classification. For more information concerning the rules and regulations for determining Texas residence classification, visit residency (<https://www.shsu.edu/admissions/residency/>) or contact:

Residency Classification Officer
Sam Houston State University
Box 2418
Huntsville, Texas 77341-2418
(936) 294-1059

Payment Information

- Financial Responsibility
- Payments
- Installment Payment Plan
- Nonpayment of Tuition and Fees
- Collections for Nonpayment
- Returned Payment Policy

Financial Responsibility

Tuition and Fees: Students must pay all tuition and fee balances in full by the applicable semester deadline established by the University. Failure to timely pay balances owed or make arrangements for installment payments may result in the student being unenrolled and dropped from course registrations. Payment dates will be published on the Cashier's Office website at <https://www.shsu.edu/dept/cashiers/due-dates> (<https://www.shsu.edu/dept/cashiers/due-dates/>).

Payments

Payments made for registration purposes may be made by cash, cashier's check, personal check, or money order in the Student Account Services/ Cashier's Office in Estill Classroom building, room 103. All checks and money orders accepted are subject to final payment. Online payments may be made by E-Check, International Wire, MasterCard, Visa, American Express, JCB, China Union, Diner's Club, or Discover.

Installment Payment Plan

Sam Houston State University may offer students the option to pay tuition and fees in full or by installment for the fall and spring semesters of each academic year in accordance with applicable statutes and regulations, including Tex. Educ. Code §§ 54.007 and 54.0071 and The Texas State University System Rules & Regulations. Installment payment plan terms will be published on the Cashier's Office website at <https://www.shsu.edu/dept/cashiers/payment-plan> (<https://www.shsu.edu/dept/cashiers/payment-plan/>).

It should not be assumed by the Student that the University will disenroll (drop their class schedule) them from their courses due to not meeting payment requirements. A student who discontinues going to class without officially resigning from the University will be subject to the grade of "F" in each course and will be financially responsible any university charges.

STATUTORY WARNING: A STUDENT WHO FAILS TO MAKE FULL PAYMENT OF TUITION AND MANDATORY FEES, INCLUDING ANY INCIDENTAL FEES, BY THE DUE DATE MAY BE PROHIBITED FROM REGISTERING FOR CLASSES UNTIL FULL PAYMENT IS MADE. A STUDENT WHO FAILS TO MAKE PAYMENT PRIOR TO THE END OF THE SEMESTER OR TERM MAY BE DENIED CREDIT FOR WORK DONE THAT SEMESTER OR TERM.

Nonpayment of Tuition and Fees

All Balances: If a student fails to meet end-of-term payment requirements, the University may prohibit the student from enrolling in future semesters and withhold the student's official university transcript until the student's balance is paid in full. In addition, the University may pursue internal or external debt collection as described on our Past Due Balances web page at <https://www.shsu.edu/dept/sfs/pastdue.html>.

Students who pay fees with a returned item may suffer the above sanctions as well as those detailed in the following section.

Collections for Nonpayment

Nonpayment by the end of the semester may result in transfer of the student's account to a contracted collection agency and assessment of a collection fee of up to 30 percent of the outstanding balance. The University may also choose to litigate an account on advice of university legal counsel. Should an account be litigated, the student will be responsible for all litigation expenses including attorney's fees and court costs. Accounts that are referred to a contracted collection agency may also be reported to credit bureaus.

Returned Payment Policy

A returned payment is defined as an item returned to the University rightfully unpaid due to no fault of the bank or the University.

- The University accepts payment by personal check, which includes E-Check (ACH) payments online, and reserves the right to withdraw that privilege at any time to anyone.
- The University accepts payment by credit card online and reserves the right to withdraw that privilege at any time to anyone.
- The person receiving the benefit from the returned check, ACH, or credit card payment is responsible for repayment if the item is returned to the University unpaid or disputed.
- A twenty-five dollar returned item charge and the amount of the returned item will be posted to the account of the person who received benefit of the check, ACH, or credit card payment.

- Students, who fail to clear their account of returned checks, ACH, or credit card payments within ten days, MAY BE resigned from school and will have to pay a fifty dollar reinstatement fee, the returned item, and returned item charge.
- It should not be assumed the University will resign the student. A student who discontinues going to class without officially resigning from the University will be subject to the grade of "F" in each course.
- Students who have been resigned are eligible for reinstatement upon repayment of the fifty dollar reinstatement fee, the returned item, and the returned item charge.
- Stop payments are considered returned items and are subject to all penalties.
- A student who fails to make payment prior to the first day of final exams may not receive credit for the work done that semester and will not be allowed to register for future semesters until the delinquent amount is paid. In addition, unpaid returned items may be turned over to other agencies for prosecution and collection.
- Any questions concerning this matter may be addressed to the Student Financial Services Office at (936) 294-1087 or email at sfs@shsu.edu.

Refund Information

- Tuition and Fees Refund Policy
- Dropping Courses
- Resignations/Withdrawals
- Tuition and Fee Refund Schedule

Tuition and Fees Refund Policy

A student enrolled at Sam Houston State University may receive a refund of tuition and fees as a result of dropping courses or resigning from the University as indicated in the following schedules.

Refunds and credits from one department will be applied to any other outstanding balances in other departments. Any remaining refund will be sent to the selected refund preference with BankMobile Disbursements, a technology solution, powered by BMTX, Inc. The University may refund tuition and fees paid by a sponsor, donor or scholarship to the source rather than directly to the student who has withdrawn if the funds were made available to the University.

Refund policies were established by Senate Bill No. 604 of the 65th Legislature and adopted by the Board of Regents, Texas State University System, in August of 1977 and by the applicable federal regulations dealing with first semester financial aid students.

Dropping Courses

A student who drops one or more courses for any given term, but remains enrolled in at least one course for the remainder of the semester as a student at this University, may be eligible for refunds. There is a 100% refund (does not apply to students dropping to "0" hours) for dropping courses for the first 12 class days for Fall / Spring terms. Drops must be processed by 11:59 p.m. on the day of the deadline to receive a refund if courses have been paid in full. Students cannot drop their last course. A resignation must be submitted if dropping their only course for the term.

Students may drop courses online without the grade of "F" until the deadline. See Add, Drop and Resignation Deadlines (<https://www.shsu.edu/dept/registrar/students/registration/add-drop-resignation-deadlines.html>).

Osteopathic Medical Students:

Students associated with the College of Osteopathic Medicine will be registered in course blocks required for promotion to the next semester. Osteopathic medical students are not permitted to drop individual courses that are a part of these blocks.

Fall and Spring Terms

Date	Refund %
First 12 class days	100%
After 12th class day	None

Summer Sessions

Date	Refund %
First 4 class days	100%
After 4th class day	None

NOTE: Class days are university class days, not the number of days an individual class meets. Class days are to be counted from the first class meeting of on-campus daytime courses as indicated in the Academic Calendar.

Resignations/Withdrawals

Deadlines and dates may be found on the Add, Drop, and Resignation Deadlines webpage (<https://www.shsu.edu/dept/registrar/students/registration/add-drop-resignation-deadlines.html>).

A resignation is a withdrawal from all courses and becomes effective on the date it is received by the Registrar's Office. This is the date that is used for determining any refund. The student is responsible for clearing all debts owed to the university before any potential refund is issued.

Students who fail to officially resign from the university will receive a grade of "F" for each course in which they are enrolled. If a student is enrolled in only one course they must resign. To learn more about the University's policy on student resignations, view the Student Resignation Policy (<https://www.shsu.edu/dept/registrar/students/registration/documents/990407%20Student%20Resignations.pdf>). (<https://www.shsu.edu/dept/registrar/students/registration/documents/990407+Student+Resignations+academic+affairs+policy.pdf>)

Students receiving financial aid who resign, may be responsible for the repayment of certain types of financial aid received during the term. For more information, view the Return of Title IV Funds Policy (https://www.shsu.edu/~fao_/documents/ReturnofTitleIVFundsPolicy12-11-12.pdf). Also,

review the Satisfactory Academic Progress Policy (<https://www.shsu.edu/dept/financial-aid/policies-disclosures/SAP.pdf>) to better understand how this could impact future aid eligibility.

NOTE:

- A resignation will withdraw a student from all registered courses in the entire term. A student cannot resign from a part of term if a grade has been earned in another part of term. Ex. If a student completes Summer I and is registered for Summer II, they will not be permitted to resign from Summer II.
- If this is your first-semester attending SHSU and you are resigning prior to the Census Day (12th Class day for Fall or Spring/4th Class day for Summer I & II), a new admissions application and non-refundable application fee through ApplyTexas.org are required. If you have any questions, please contact the Office of Admissions at 936-294-1828 or email Admissions (admissions@shsu.edu). (admissions@shsu.edu)
- If a year or more has passed from the term of resignation a new admissions application will be required. If you have any questions, please, contact the Office of Admissions at 936-294-1828 or email Admissions (admissions@shsu.edu).

A student who is considering resigning from their current semester should visit the Resignation Information (<https://www.shsu.edu/dept/registrar/students/registration/resignation-information.html>) page.

Tuition and Fees Refund Schedule

Refund Schedule For Terms Greater Than 10 Weeks

Date	Refund
Before the 1st class day	100% (Less \$15 Matriculation Fee)
1st class day through 5th class day	80%
6th class day through 10th class day	70%
11th class day through 15th class day	50%
16th class day through 20th class day	25%
Thereafter	No refund

Refund Schedule For Terms Less Than 10 Weeks But Greater Than 5 Weeks

Date	Refund
Before the 1st class day	100% (Less \$15 Matriculation Fee)
1st class day through 3rd class day	80%
4th class day through 6th class day	50%
Thereafter	No refund

Refund Schedule For Terms Up To 5 Weeks

Date	Refund
Before the 1st class day	100% (Less \$15 Matriculation Fee)
1st class day	80%
2nd class day	50%
3rd class day and thereafter	No refund

NOTE: Class days are University class days, not the number of days an individual class meets. Class days are to be counted from the first class meeting of on-campus daytime courses as indicated in the Academic Calendar.

The above refund schedules assume all fees have been paid in full. A different schedule applies to installment payment plan participants, the primary difference in the schedule being the requirement for the University to calculate the refund based on the assumption the full amount of tuition and fees has been collected. Therefore, it is possible and probable, that a student enrolled in an installment payment plan could owe **more** in tuition and fees than already collected by the University.

Students who receive Title IV aid and resign on or before completing 60% of the semester will be required to repay the percentage of unearned financial aid according to the federal "Return to Title IV Aid" formula derived from the 1998 Reauthorization of the Higher Education Act. Students who receive Title IV aid should contact the Financial Aid Office (<https://www.shsu.edu/dept/financial-aid/>) for specifics.

Repayments are to be returned to lenders and/or program accounts in the following statutorily specified order provided the student has received funds through the program:

1. Unsubsidized Federal Stafford Loan
2. Subsidized Federal Stafford Loan
3. Federal Perkins Loans
4. Federal PLUS Loans

5. Other federal, state, private or institutional sources of aid
6. The student

More details regarding the "Return to Title IV Aid" policy may be obtained through the Financial Aid (<https://www.shsu.edu/dept/financial-aid/>) website or by visiting the Financial Aid Office located on the 2nd floor of the Estill Building.

Financial Aid & Scholarships Office

- Grants
- Employment
- Loans
- Semester Loan
- Scholarships
- Resignations/Withdrawals
- Satisfactory Academic Progress (SAP)
- Veteran's Benefits Assistance
- CPOS Policy

The Financial Aid and Scholarships Office at Sam Houston State University is available to assist students in achieving educational goals even when their personal or family finances are limited. While the student and/or his or her immediate family are primarily responsible for financing an education, the University recognizes its role in making a maximum effort to acquire additional funds for qualified students through a variety of aid programs. Specific financial aid programs the University administers are listed below.

Grants

- Texas Public Educational Grant (TPEG)*
- Teacher Education Assistance for College and Higher Education Grant (TEACH)

Employment

- Federal College Work-Study Program*
- Texas College Work-Study Program*

Loans

- Federal Direct Student Loan (Unsubsidized)
- Federal Direct PLUS Loan for Graduate Students
- College Access Loan Program

Information on programs, eligibility requirements, student budgets, deadlines and the method of aid processing is available online at Financial Aid & Scholarships (<https://www.shsu.edu/dept/financial-aid/>). Students first must submit a FAFSA by going to Student Aid (<https://studentaid.gov/>) to be considered for any financial aid programs.

Semester Loans

- Bearkat Payment Extension Loan*
- Short-term Loan for Books*

Applications for Semester Loans may be completed online through Sam Web. Semester Loan instructions are available online by visiting Financial Aid & Scholarships (<https://www.shsu.edu/dept/financial-aid/>).

Scholarships

Sam Houston State University offers scholarships for students who excel in academic achievement and leadership. Using a competitive process, awards are based on either merit or financial need. Some awards are competitively selected on the basis of both merit and financial need.

Most academic scholarships offered by SHSU can be applied for using a single application, which can be found on MySam under the Scholarships4Kats (<http://www.shsu.edu/dept/financial-aid/scholarships/>) page. The application period begins early September for each upcoming academic year. Students must be admitted to Sam Houston State University and have an active computer services account.

Resignations/Withdrawals

Students who receive Title IV financial aid and withdraw or drop all courses during the semester must be aware of the impact on their financial aid. Federal Title IV aid includes Pell Grant, Supplemental Educational Opportunity Grant, and Subsidized/Unsubsidized Stafford Loans. It is recommended that students visit with their Financial Aid Counselor prior to withdrawing or dropping courses.

Title IV aid recipients must be continuously enrolled for at least 60% of the semester for which aid is disbursed to retain all of the financial assistance issued for that semester. After the 60% point, students are considered to have earned 100% of the Title IV funds disbursed. Any student who resigns prior to completing 60% of a semester must repay any unearned portion of their federal financial aid.

The amount of repayment depends on the number of days attended during the semester, the type and amount of financial aid received and the total amount of institutional charges.

Earned federal financial aid is prorated according to the percentage of the semester completed. The earned aid is determined by the amount of total aid received minus the amount of unearned aid.

Unearned aid is allocated and/or returned in the following order:

- Direct Unsubsidized Loan
- Direct Subsidized Loan
- Perkins Loan
- Direct PLUS Loan (Graduate Student)
- Direct PLUS Loan (Parent)
- Pell Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Teach Grant
- Other State Aid
- Scholarships will be returned at the discretion of the individual donors/departments.

Satisfactory Academic Progress (SAP)

Different requirements apply to maintain Satisfactory Academic Progress (SAP) (<https://www.shsu.edu/dept/financial-aid/sap/>).

Minimum requirements for **post-graduate students** seeking a second bachelor's degree or taking preparatory course work are:

- A minimum SHSU grade point average (GPA) of 2.0.
- 67% completion rate of all hours attempted for the program.
- Completion of second bachelor's degree within 150% of the degree requirements **or** completion of preparatory course work within twelve consecutive months.

Minimum requirements for **graduate and professional students** are:

- A minimum SHSU grade point average (GPA) of 3.0.
- 67% completion rate of all attempted graduate hours.
- Completion of program within 150% of the degree requirements.

Minimum requirements for **Osteopathic medical students** are:

- Remain in good academic standing and meet the minimum criteria set by the College of Osteopathic Medicine.
- 67% completion rate of all attempted hours.
- Completion of program within 150% of the degree requirements.

For more information, view the complete SAP Policy.

* This type of aid is not available to Osteopathic Medical Students.

Veteran's Benefits Assistance

For information relating to Veteran's Benefits Assistance, visit with the VA representative in the Veteran's Resource Center, located in the Academic Building III, Suite 110. Assistance is available for those seeking to use the following:

- Chapter 35 - Dependent
- Chapter 1606 – Reservist
- Hazlewood Act

CPOS Policy

Per Title IV regulations, a student cannot receive federal aid for coursework that does not lead to the completion of their degree. This is stated in CFR 34 668.32 (a)(1)(iii). (https://www.ecfr.gov/cgi-bin/retrieveECFR?gp=&SID=c232fd4b9443a527ebce515fe59692af&mc=true&n=pt34.3.668&r=PART&ty=HTML#se34.3.668_132)

While the burden for this regulation is shared between the Registrar's and Financial Aid Offices, it is the responsibility of the advisor and the student to be knowledgeable and register for courses counting towards their degree.

For Sam Houston State University, all eligible aid is paid ten calendar days prior to the first class day based on the Federal Hours listed in the Banner system. Federal Hours are those hours that are on the student's degree plan and counting towards their degree. Should a student receive scholarships and/or state aid, he or she can receive those funds based on the Standard Hours (actual enrolled hours) which may be greater than the Federal Hours.

Budgets are based on the Federal Hours and are reviewed with the Cost of Attendance adjustments prior to disbursement and at census date. Prior to disbursement, any funds that the student is not eligible for are held until the final evaluation after census date and released if eligibility is confirmed or reduced/cancelled if the student is deemed ineligible.

Ineligibility could be due to one of the following circumstances:

- Change in enrollment between disbursement prior to first class day and census
- Change in course registration, thus change in courses counting for their program of study
- Change in degree program

Should a student drop a course between the first and twelfth class days, his or her budget and aid package must reflect his or her new enrollment level. If a student adds a class and that changes his or her enrollment level to half time, three-quarter-time or full-time, his or her budget will be adjusted. However, the student must request the increase (if eligible) in awards from the Financial Aid Office. If the student is Pell eligible, that adjustment will automatically be made as it is an entitlement.

Students who are enrolled in courses that do not count towards their current degree are not eligible for federal aid for those hours. For example, if a student is enrolled in 12 hours and only 9 of those hours count towards his or her degree program; his or her budget and awards must be adjusted accordingly. This would change the student's enrollment status for federal aid purposes from full-time to three-quarter-time. Adjustments to the student's awards would result in a balance being owed to the university.

Changes in degree programs must be completed by the advisor and processed by the Registrar's Office by the end of day on the twelfth class day.

The same is true for substitution/exemption forms. Any forms not processed and completed by the twelfth class day are not effective for that term's disbursement. It is strongly suggested, but not required, that advisors utilize the notes in Degree Works and Campus Connect to document advisement sessions with students and also review prior advisement sessions with students to ensure the appropriate paperwork is being filed.

Should the advisor fail to submit the required paperwork for that semester, they will have to appeal to the Registrar and Financial Aid Office for consideration. If the appeal is not granted, the student will have a balance on their account as a result of incomplete or late paperwork submitted.

Academic Success Center

The Academic Success Center offers a variety of academic support programs for SHSU students. These services include CRLA-certified peer tutoring programs for writing, math, core science, business, world languages, and more.

The ASC offers study groups in math and chemistry. In addition, the ASC has embedded tutors that support students within their courses and by providing feedback on learning challenges students face to instructors.

The ASC offers Learning Coaches to help students balance the demands of college by guiding students through areas such as accountability, time management, study skills, note taking, test preparation, and goal setting. Our Recovery Coaches work with students on first-time academic probation or students on first-time academic suspension. Students on probation will learn academic recovery strategies and methods related to university policies, resources, communication techniques, wellness, and setting. Students on academic suspension are guided to get back to good academic standing by constructing a recovery plan that includes forming connections with instructors, reaching goals, and identifying and utilizing campus resources.

The ASC also offers workshops and seminars for academic success or academic recovery facilitated by learning coaches, recovery coaches, and professional staff.

ASC services are available for all undergraduate and graduate students currently enrolled in SHSU. Services are available in-person and virtually on main campus and at The Woodlands Center. On the main campus, the Academic Success Center (<http://www.shsu.edu/centers/academic-success-center/>) is located in the Newton Gresham Library. The ASC can be contacted by calling (936) 294-3680.

Advising (Student Advising and Mentoring Center)

At the Student Advising and Mentoring Center (SAM Center), we value each student as an individual and believe that advising is a shared responsibility with the student.

Our professional advisors are highly skilled experts in student development and degree planning, and we strive to provide students with personalized, holistic, success-based academic advising and support. We strongly believe in the importance of academic advising in student achievement, retention, and degree completion.

Whether you are an entering freshman, returning student, transfer student, prospective student, or a current undergraduate student, you can expect to learn about campus processes, be directed to beneficial resources for your success, and work with advisors on major exploration along with course planning to build the best university experience possible for you.

The SAM Center is located on the Huntsville campus on the first floor, Suites 170 and 190, of the College of Humanities and Social Sciences Building (CHSS). You can reach the SAM Center (samcenter@shsu.edu) by e-mailing or calling (936) 294-4444 or toll free at (866) 364-5211.

Not sure who your advisor is or how to make your appointment? Visit the SAM Center Website (<https://www.shsu.edu/centers/sam-center/>) to view Who is My Advisor (<https://www.shsu.edu/centers/sam-center/whos-my-advisor/>) and How to Get Advised (<https://www.shsu.edu/centers/sam-center/how-do-i-get-advised/>).

Data Analytics and Decision Support (DADS)

Data Analytics and Decision Support (DADS) is a Sam Houston State University administrative service and support unit aligned under Strategic Enrollment & Innovation (SEI). The unit is comprised of three areas: Institutional Research (IR), Data Analytics, and Data Literacy/Data Governance.

It is the mission of the **Data Analytics and Decision Support** function to collect, analyze, appraise, report and disseminate data on behalf of the University, its executive administration and its educational leaders for the purpose of promoting evidence-based reflection, planning, and action. The DADS team provides information and conducts research studies to comply with federal, state and other reporting mandates, and to assess policy, programs and special initiatives. DADS is also responsible for certifying SHSU's official student data to the Texas Higher Education Coordinating Board (THECB).

To request assistance with obtaining data, access to existing reports, and information about external data resources, SHSU employees with network access may submit a work order request/request a report (https://cherwell.shsu.edu/CherwellPortal/Employee/?_28a7b9fa#0). A data dictionary,

Data Cookbook (<https://shsu.datacookbook.com/>), is available to individuals with SHSU network log in credentials to review descriptions of existing reports (specifications) and data terms (definitions). SHSU uses Cognos as the reporting tool, and links to the Cognos reports are included in Data Cookbook. Various reports require prior training and/or approval, and SHSU Cognos users are encouraged to read about these details in Data Cookbook. A Data Cookbook introductory tutorial (<https://www.youtube.com/watch?v=n8VowQurkWo>) is available for additional assistance. Questions about Cognos and Data Cookbook can be directed to our staff (<https://www.shsu.edu/dept/institutional-research/aboutus.html>) or to SHSU Information Technology Service Desk (<https://www.shsu.edu/dept/client-services/service-desk.html>) personnel.

Newton Gresham Library

The Newton Gresham Library (NGL) contains more than 1.2 million print books, periodicals, audio and visual materials, and microforms. Students have access to over 800,000 eBooks, online journals and newspapers, as well as streaming media resources through the Library website. The Library also acts as a Federal and State government documents depository, providing access to almost 200,000 print and online documents. The library maintains licenses to over 400 online databases (<https://shsulibraryguides.org/az.php>). Books, articles, documents, and other items which are not available locally may be requested via the Library's Interlibrary Loan service.

SHSU Special Collections in the Thomason Room on the Library's 4th floor holds over 22,000 rare books and research collections on Texas, the Southwest, American authors, the Civil War, Criminal Justice, and other topics. University Archives, also located on the 4th floor of the Library, preserves the history of the campus. The Newton Gresham Library's general collection includes popular and recreational reading materials, tabletop games, a children's literature collection, a music and scores collection, and materials to help teachers create lesson plans. Creative, research and study spaces at the Library include: a music listening room, 35 individual study carrels, eight technology equipped group study and seminar spaces, a video recording studio, a copy center (including faxing, poster printing, and more), as well as a lactation room, vending machines, outdoor seating, and a Starbucks—all provided for the convenience of students and faculty.

Twenty-one librarians, twenty-nine support staff, and scores of student assistants provide reference, interlibrary loan, circulation, acquisitions, and other library services to the faculty, staff, and students of the University as well as to visiting scholars and off-campus users. Distance Learners will find librarians embedded in their online classes. A full-time librarian provides assistance to students at The Woodlands Center, and at the College of Osteopathic Medicine. A computer lab with over 75 networked workstations is available during regular library hours, and staffed by IT@Sam. To assist library users in utilizing library materials and services, librarians developed online guides available on the Library's website. Librarians also provide access to information and help in using the library's resources and services to students on- and off-campus with online chat (see Ask A Librarian (<https://library.shsu.edu/>) on the Library's homepage), e-mail, and by phone. Two active-learning spaces have been recently completed for use in library instructional sessions, and in support of other campus teaching and training activities. Finally, the Academic Success Center (ASC) and the First-Generation Center (<https://www.shsu.edu/dept/firstgen/>) are located 2nd floor of the Library, providing academic coaching, First-Year experience, peer mentoring, and tutoring services for all students.

SHSU Online

Mission Statement

SHSU Online enables citizens in Texas and beyond to further their education, find meaningful employment, earn higher wages, and improve their quality of life. We support faculty, students, and staff throughout the online teaching and learning journey.

Strategic Initiatives

- Goal 1: To provide a single point of presence for online education through SHSU Online and TSUS Institutions participating in the Shared Services Initiative.
- Goal 2: To fund critical tools for online teaching and learning.
- Goal 3: To provide high-quality course development and instructional design services for faculty teaching via distance and professional education.
- Goal 4: To provide high-quality video production and lecture capture for face-to-face, hybrid, and online courses.
- Goal 5: To market online education to new student populations.
- Goal 6: To promote instructor and learner success by providing an inclusive and accessible environment.

Support of Teaching/Learning Environments

SHSU Online provides a wide-range of services for SHSU faculty, students, and staff. With a knowledgeable and experienced staff, the following services are offered:

- 24/7 Technical Support Call Center for Blackboard courses
- Faculty Certification and Development
- Instructional Design
- Graphic Design
- Multimedia Design
- Content Development
- Educational Video Production

- Guest Lecture Recordings
- Video Hosting
- Marketing and field video production
- Video transcriptions
- Ally® for Accessibility
- Digitizing Media
- SHSU Online Monthly Newsletter
- SHSU Online Annual Conference- Digital Education Summit
- SHSU Online actively promotes success beyond the classroom by providing SHSU students with opportunities to develop marketable skills. SHSU Online hires, trains, and prepares student workers with on-the-job training and market experience in various creative and technical fields.

Contact Information

- **Phone:** 936.294.2780
- **Email:** Blackboard@shsu.edu
- **Web:** online.shsu.edu (<https://online.shsu.edu/>)
- 24 hours a day / 7 days a week

Technology Solutions and Support

Technology Solutions and Support maintains instructional environments, including computer labs and classrooms to support faculty and students in our Bearkat learning environments. These spaces are equipped with Windows and iMac computers, up-to-date software, webcams, printers, and scanners. Additionally, a few labs have course specific software available for students to complete work outside of the classroom. For a complete list of labs and their technology equipment, view the Computer Lab website (<https://www.shsu.edu/computerlabs/>).

Additionally, we provide Microsoft 365 for your personal devices and wireless internet through eduroam. Simply use your SHSU credentials to access either option!

For additional questions regarding the technology available to you at SHSU, contact the Service Desk (<mailto:servicedesk@shsu.edu>).

Testing Center

The Sam Houston State University (SHSU) Testing Center provides institutional and national testing opportunities to students and community members in an atmosphere that enables examinees to perform to the best of their abilities. This atmosphere relies on test administration practices that (1) adhere to nationally recognized professional testing standards and government regulations, (2) maintain the integrity of the testing process by incorporating ethical standards and security measures, and (3) treat all examinees in a professional, yet personable manner. The Sam Houston State University Testing Center adheres to the National College Testing Association (NCTA) Professional Standards and Guidelines.

Entrance Exams

ACT: The ACT test is a standardized college entrance exam that is accepted by Sam Houston State University for admittance. A student may receive college credit for a high score received on the English section of the ACT exam (see Credit by Exam section). Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or ACT (<http://www.act.org/>).

SAT: The SAT test is a standardized college entrance exam that is accepted by Sam Houston State University for admittance. A student may receive college credit for a high score received on the Evidence-Based Reading and Writing section of the SAT exam (see Credit By Exam section). Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or SAT (<https://www.collegeboard.org/>).

TOEFL: The Test of English as a Foreign Language (TOEFL) may be required of international students for admittance into the university. The TOEFL exam measures the ability of non-native English speakers to communicate in an academic setting. For more information, visit the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or TOEFL (<http://www.ets.org/toefl/>). Additional information may also be obtained by contacting Admissions (<http://www.shsu.edu/admissions/>).

ATI TEAS: The Test of Essential and Academic Skills (TEAS) is used as part of the admissions process by Nursing and Allied Health schools nationwide. Additional information may be obtained by visiting the Testing Center (<http://www.shsu.edu/centers/testing-center/>) or TEAS (<http://www.atitesting.com/>).

LSAT: The Law School Admission Test (LSAT) is an integral part of the law school admission process in the United States, Canada, and a growing number of other countries. It provides a standard measure of acquired reading and verbal reasoning skills that law schools can use as one of several factors in assessing applicants. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or LSAT (<http://www.lsac.org/>).

Placement Exams

ACCUPLACER: The ACCUPLACER test is a placement exam offered at SHSU for evaluating a student's performance in reading, writing, and mathematics. It is an internet-based test with results available immediately upon completion. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or ACCUPLACER (<https://accuplacer.collegeboard.org/students/>).

ACCUPLACER-ESL: The ACCUPLACER-ESL test is a placement exam used by the English Language Training Office to assess a student's performance in the English language. It is an internet-based test with results available immediately upon completion. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or ACCUPLACER (<https://accuplacer.collegeboard.org/students/>).

TSI ASSESSMENT 2.0: The Texas Success Initiative Assessment (TSIA2) is a placement exam offered at SHSU to assess test takers' readiness for college-level coursework in the general areas of English language arts and reading (ELAR) and mathematics. It is an internet-based test with results available immediately upon completion. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or TSI Assessment (<https://accuplacer.collegeboard.org/students/prepare-for-accuplacer/tsia-texas-success-initiative-assessment/>).

Credit by Exam

ACT/SAT English Credit: Sam Houston State University may award credit for freshmen English courses based on high ACT or SAT test scores on the English section (ACT) or the Evidence-Based Reading and Writing section (SAT). Sam Houston State University has a policy of accepting up to a maximum of thirty (30) hours of credit through a combination of national standardized examinations and/or locally designed and administered departmental tests. More than thirty (30) hours of credit by examination will be considered on an individual appeal basis. For more information, visit the Testing Center (<http://www.shsu.edu/testing/>).

Advanced Placement Program (AP): Sam Houston State University may award college credit for the Advanced Placement Examinations based on the score(s) received. Advanced Placement exams are given at the high school level. Sam Houston State University has a policy of accepting up to a maximum of thirty (30) hours of credit through a combination of national standardized examinations and/or locally designed and administered departmental tests. More than thirty (30) hours of credit by examination will be considered on an individual appeal basis. For more information, visit the Testing Center (<http://www.shsu.edu/testing/>) or AP Program (<https://apstudent.collegeboard.org/home/>).

College Level Examination Program (CLEP): Sam Houston State University is an open national testing center for the College Level Examination Program (CLEP). All CLEP exams may be taken at SHSU, but only the CLEP Subject Exams listed on the Testing Center website will be accepted for credit at SHSU. Sam Houston State University has a policy of accepting up to a maximum of thirty (30) hours of credit through a combination of national standardized examinations and/or locally designed and administered departmental tests. More than thirty (30) hours of credit by examination will be considered on an individual appeal basis. For more information, visit the Testing Center (<http://www.shsu.edu/testing/>) or CLEP (<https://clep.collegeboard.org/>).

DSST: Sam Houston State University is an open national testing center for the DSST exams. All DSST exams may be taken at SHSU, but only the DSST exams listed on the Testing Center website will be accepted for credit at Sam Houston State University. Sam Houston State University has a policy of accepting up to a maximum of thirty (30) hours of credit through a combination of national standardized examinations and/or locally designed and administered departmental tests. More than thirty (30) hours of credit by examination will be considered on an individual appeal basis. For more information, visit the Testing Center (<http://www.shsu.edu/testing/>) or DSST (<http://getcollegecredit.com/>).

International Baccalaureate Program (IB): Sam Houston State University recognizes the International Baccalaureate program for those students who earn the IB diploma. Although Sam Houston State University typically accepts a maximum of thirty (30) hours of credit through a combination of national standardized examinations and/or locally designed and administered departmental tests, students earning the IB diploma are capable of earning in excess of 30 hours. Information on the International Baccalaureate Program may be obtained from high school counselors or by visiting the Testing Center (<http://www.shsu.edu/testing/>) or International Baccalaureate (<http://www.ibo.org/>).

Departmental Exams

ACTFL OPic: The OPic exam is an internet-delivered test that provides valid and reliable oral proficiency testing. The exam helps determine the level of proficiency in a certain language. This exam is given for the World Languages and Cultures Department. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or ACTFL (<https://www.actfl.org/center-assessment-research-and-development/actfl-assessments/actfl-postsecondary-assessments/oral-proficiency-interview-computer-opic/>).

Representative TExES: The Representative TExES are paper-pencil practice exams administered for the College of Education. Approval from the College of Education must be received before registering for a test. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or by emailing edu_edprep@shsu.edu.

Graduate Exams

Graduate Management Admission Test (GMAT): The GMAT exam is designed to test skills that are highly important to business and management programs. It assesses analytical writing, along with quantitative, verbal, and integrated reasoning skills that are vital to real-world business and management success. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or GMAT (<http://www.mba.com/us/>).

Graduate Record Examinations (GRE): The GRE is used by graduate schools as one assessment indicator for comparing the qualifications of applicants who come from a variety of colleges and universities. The GRE measures verbal reasoning, quantitative reasoning, and analytical writing skills. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or GRE (<https://www.ets.org/gre/>).

Certification Exams

ACSM: American College of Sports Medicine offers several health fitness certification programs, each with unique programming and/or population focus. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or the American College of Sports Medicine (<https://www.acsm.org/certification/get-certified/>).

CERTIPORT: Certiport is dedicated to helping people succeed through certification. Certiport's globally recognized credentials are aimed at enhancing individual productivity, marketability, and value. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or Certiport. (<http://www.certiport.com/>)

CCE: The Center for Credentialing and Education offers a dynamic portfolio of services including credentials, assessments, and examination services to promote excellence in and expand equitable access to mental health and human development professions. The CCE offers the CPCE (Counselor Preparation Comprehensive Exam) and the NCE (National Counselor Exam). Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or CCE. (<https://www.cce-global.org/home/>)

CompTIA: CompTIA certifications are industry-leading credentials to start and grow an IT career. Entry-level IT certifications and advanced IT certifications – such as cybersecurity – are offered. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or CompTIA (<https://www.comptia.org/certifications/4-steps-to-certification/>).

Meazure Learning: Meazure Learning offers exams for the certification or licensure of professionals to assess the knowledge and skills of employees for training purposes or as a pre-employment check for potential hires. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or Meazure Learning (<http://www.meazurelearning.com>).

NSCA: Elevate your career in strength and conditioning and related sports science professions to new heights with a National Strength and Conditioning Association certification. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or NSCA (<https://www.nsca.com/certification-overview/>).

TCEQ: The SHSU Testing Center is a CBT testing site for the Texas Commission on Environmental Quality (TCEQ) Occupational Licensing examinations. Additional information about TCEQ exams can be obtained by visiting the Testing Center (<http://www.shsu.edu/centers/testing-center/>) or TCEQ. (<https://www.tceq.texas.gov/>)

TCFP: The Texas Commission on Fire Protection offers certifications for those interested in becoming certified fire protection professionals. The commission encourages certified fire protection personnel to continue to develop their skills throughout their careers by offering higher-level certificates. Additional information may be obtained by visiting the Testing Center (<https://www.shsu.edu/centers/testing-center/>) or TCFP. (<https://www.tcfp.texas.gov/services/certifications/>)

TEXES: The Texas Examinations of Educator Standards (TEXES) are criterion-referenced examinations designed to measure a candidate's knowledge in relation to an established criterion. Additional information may be obtained by visiting the Testing Center (<http://www.shsu.edu/testing/>) or TEXES. (<http://tx.nesinc.com/>)

Distance Education Exams

Sam Houston State University Testing Center offers proctoring services to administer distance education exams for other institutions and agencies. Additional information may be obtained by visiting the Testing Center (<http://www.shsu.edu/testing/>).

Alumni Relations and Development

The **SHSU Alumni Association** exists to support and promote the University and represent the interest of over 140,000 alumni and friends. The alumni association is an important part of an integrated advancement effort to communicate with graduates and former students and engage them with the university.

Located in the John R. Ragsdale Alumni Center, the role of the Alumni Association has expanded significantly, becoming an integral part of the University campus community while serving as a bridge to both local and national communities. The Alumni Association's programs and activities are developed and planned in consultation with an alumni association board of directors.

The Association sponsors the annual Distinguished Alumni Gala for Distinguished Alumni, Outstanding Young Alumni and Service Award recipients, the annual Life Member Celebration, Homecoming activities, tailgate parties, regional alumni clubs and gatherings, newsletters, scholarships, student programs, and the official university class ring program. It provides opportunities for alumni to participate in community service projects, raising scholarship funds, legislative advocacy, and joining with other graduates in alumni activities across the country.

Alumni Association membership is open to all graduates, former students, parents, faculty, staff, and friends of Sam Houston State. For additional information, please call (936) 294-1841 or visit Alumni Association (<http://www.shsu.edu/dept/university-advancement/>).

SHSU has honored its historical roots by providing students with an excellent education. We continue to be able to do this thanks to the financial support of alumni, friends, faculty and staff, parents, corporations, and foundations who are part of SHSU's powerful giving community. Gifts help bridge the gap between education costs and tuition income so that we can meet critical needs such as student scholarships, equipment, technology, and academic program enrichment.

Donors may make a gift online at SHSU Giving (<https://www.shsu.edu/dept/university-advancement/donate.html>). For information about providing support for the University through an annual, major, or planned gift, please contact:

University Advancement
Box 2537
Huntsville, TX 77341-2537

Athletics

Competing at a high level in 17 NCAA Division I sports, Sam Houston State University brings the fun and excitement of intercollegiate athletics to the Huntsville campus.

The Bearkats have become a fixture on national television sports networks including ESPN, ESPN2, ESPN3, CBS Fox Sports and Comcast.

Sam Houston competes as a member of the Southland Conference. The Bearkats have won 46 league championships since joining the league in 1988. The Kats have represented the league in NCAA Division I post-season play 28 times. Recent successes have included five consecutive appearances in the NCAA Division I Football Championship semifinals. Sam Houston played in the football championship finals in 2011 and 2012.

The Bearkat women's bowling team brought Sam Houston its first NCAA Division I national championship with a victory over Nebraska in 2014. The baseball team has earned NCAA regional playoff berths three of the last four years.

With 32 Southland Conference championships since 2000, Sam Houston stands as the only team in league history to win SLC Commissioner's Cup trophies three years in a row and is the only current member to earn the league's all-sports title five times. The trophy is awarded annually to the overall athletic program ranked as the best in the league.

The Bearkats play a nationally competitive schedule in all sports with games against top teams from the Big 12 and SEC including Texas A&M, Baylor, Texas, LSU and Arkansas.

Each of the past six seasons, Sam Houston and Stephen F. Austin have played their annual "Battle of the Piney Woods" rivalry game at NRG Stadium in Houston, putting more than 25,000 fans in the seats at the NFL Texans' venue annually.

Men's intercollegiate sports at Sam Houston include baseball, basketball, cross country, football, golf, indoor track and field and outdoor track and field. Women's sports are basketball, bowling, cross country, golf, indoor track and field, outdoor track and field, soccer, softball, tennis and volleyball.

Sam Houston student-athletes are just as successful in the class room as on the playing field. The overall grade point average for the more than 400 Bearkat student-athletes annually is a mark higher than the general student population at the university. Seven of the last eight semesters, the department's GPA has been 3.0 or higher including a record 3.22 GPA in the fall semester of 2015.

Bearkats have been recognized as the outstanding student-athlete in their individual sports by receiving the Southland "Student-Athlete of the Year" award 23 times in the past nine years.

Sam Houston boasts one of the finest athletic complexes in the Southwest. Home athletic events are held at Elliott T. Bowers Stadium (football), Bernard G. Johnson Coliseum (basketball, volleyball), Don Sanders Stadium (baseball), Bearkat Softball Complex (softball), Meredith and Miriam York Track and Field Center (track and field), McAdams Tennis Center (tennis), Joseph Pritchett Field (soccer) and the Ron Randleman Strength and Fitness Center.

Recent additions to the athletic facilities include state-of-the-art video/scoreboards at football, basketball, volleyball, baseball and softball games. Each of the athletic venues is located on campus within walking distance of any of the residence halls.

Sam Houston students are admitted to all home regular season athletic events on presentation of a current and valid Bearkat OneCard. Simply swipe your Bearkat OneCard at the designated student gates the day of the event for admission. Bearkat OneCards must be active and you must be currently enrolled.

News, schedules, ticket information and opportunities to watch live video of Bearkat sports events are available at SHSU Athletic (<https://gobearkats.com/>).

Bearkat OneCard Services

The Bearkat OneCard is the official ID card of Sam Houston State University. The OneCard is an all-in-one student ID which has been designed to be an efficient, multi-purpose card. It provides students easy access to University facilities and services. To ensure campus security, it is required that all students obtain and activate a Bearkat OneCard for campus identification.

The Bearkat OneCard is required for:

- Meal Plans
- Bearkat Bucks (on-campus dining dollars)
- Assigned Residence Hall
- Entrance to Athletic Events
- University Sponsored Functions
- Recreational Sports Facility
- Kat Klub
- Newton Gresham Library Services
- Managing Refund Preferences
- Managing Student Payroll Preferences
- Bearkat Course
- Student Health Center
- Student Account Services (Bearkat OneCard and Cashiering Services)
- Financial Aid Office
- SAM Center (Student Advising)
- Career Services
- Campus Departmental Identification

To obtain a Bearkat OneCard students MUST:

- Have a photo taken in the Bearkat OneCard Office or request your OneCard (<https://www.shsu.edu/dept/bearkatone/>) online. It is mandatory to present a valid state or government issued photo ID in order to request a Bearkat OneCard.
- Have a valid and current domestic address on file with the University.
- Be currently registered for classes.

Once these steps have been completed, the Bearkat OneCard will be mailed to the current address on file with the University. Upon receipt, the OneCard must be activated at Bearkat OneCard (<https://bearkatone.vibeaccount.com/>) for on-campus usage. Students will also select a refund and payroll preference when activating their OneCard online. Students have the following options for receiving refunds and payroll:

- Electronic deposit to an existing checking or savings account
- Electronic deposit to the VibeAccount

Note – Refund and Payroll preferences may be different.

The VibeAccount is an optional, internet-only, FDIC-insured checking account linked to the Bearkat OneCard. The Bearkat OneCard can be used as a DEBIT Mastercard if the VibeAccount is opened and funds are deposited into the account. Students may choose to open the VibeAccount when activating their OneCard; however, students are not required to open this optional account. Please, visit Account Fee Schedule (<https://bearkatone.vibeaccount.com/studentaccount/feeschedules.do>) for more information related to the terms and conditions of this account.

Student Account Services (SAS) provides assistance taking ID photos, activating cards, and providing information related to student refund and payroll disbursements. SAS also provides passport photos, specialty badges/credentials as well as assists with event tracking for campus events. Passport photos are provided to faculty, staff and students free of charge. For more information, please visit our office in the Estill Building, Suite 103, contact us by phone at (936) 294-2273, or visit Bearkat OneCard Services (<https://www.shsu.edu/dept/bearkatone/>).

Career Services

The Career Success Center Mission: *Preparing students for the career of their choice.*

The Career Success Center Vision: *Collaborating for Career Readiness & Connecting Students to Careers.*

The Career Success Center assists students, graduates, and alumni in their search for employment based on their interests, skills, academic preparation, and personal aspirations. Opportunities and resources are provided to assist students in learning about and developing career readiness and ultimately obtaining a rewarding career.

Specific services and resources include:

- BEARKATS GET HIRED (<https://www.shsu.edu/dept/career-success-center/bearkatsgethired.html>) for Student Employment, Internships, Part-time and Full-time Job Postings
- Career Exploration & Planning
- Career Readiness Roadmap
- Career/Internship Fairs
- Résumé & Cover Letter Writing Assistance
- Mock Job & Internship Interviews
- Networking/Employer Information Resources
- LinkedIn Profile Assistance
- Professional Headshots
- Career-Related Workshops/Panels
- Campus Interviews with Company Recruiters
- Reba Bock Career Closet

The Career Success Center is located in the Academic Building IV, Suite 210. You can contact the Career Success Center by calling (936) 294-1713, emailing (careersuccesscenter@shsu.edu) us or by visiting our website: Career S (<https://www.shsu.edu/dept/career-success-center/>)uccess Center (<https://www.shsu.edu/dept/career-success-center/>).

Counseling Center

Counseling Services

The SHSU Counseling Center provides individual, couples, and group therapy to students who are currently enrolled. Our mission is to provide service within the university environment that contributes to the academic success, personal growth, and positive social contribution of Sam Houston State University students. We embrace a student-oriented philosophy and we are committed to the development of the student as a whole person.

To participate in Counseling Center services you must be a currently registered student. A registered student can initiate services via phone anytime between 8:30am-11am and 1pm-2:30pm. No appointment is needed for this initial appointment. During this initial 20 minute screening students will have an opportunity to discuss their presenting concerns and the clinician will match them to an appropriate counseling center service.

The SHSU Counseling Center offers a number of different options to help students enhance their well-being. Your clinician believes that some of these options may be especially helpful in meeting your own goals.

Your clinician may recommend one or more of the following service modalities:

Workshops (<https://www.shsu.edu/dept/counseling/c-o-p-e-workshops.html>) – Workshops are tailored to address common concern of college students. Workshops are conducted year round on stress management, anxiety, mood management, relationship success, better sleep, mindfulness and general adjustment. Workshops are offered at various times throughout the semester and require no advance registration.

Group (<https://www.shsu.edu/dept/counseling/group-counseling.html>) - Group therapy offers a unique opportunity to build community, explore your needs, share your experiences, offer support to others, and develop strategies to combat many different problems.

After Hours Helpline - Students can seek after hours support by speaking to one of our trained volunteers on our after hours Helpline at 936-294-4111, M-Th, 4-9pm during fall and spring semesters.

Brief One on One Counseling

Single Session – Single sessions are designed to address specific concerns in one single session. These sessions are designed to be goal oriented and solution focused.

Individual Counseling (<https://www.shsu.edu/dept/counseling/individual-therapy.html>) & Couples Counseling (<https://www.shsu.edu/dept/counseling/couples-counseling.html>) – Brief counseling sessions (45-50 minutes) provides an opportunity to work collaboratively with a clinician toward resolving matters that are systemic in nature. Counseling sessions are scheduled at various intervals (weekly, bi-weekly, monthly) based on treatment goals.

Consultation – Consultation provides an opportunity to address unique concerns related to treatment, referral, and access to resources. Consultation is a useful way to gather information and formulate next steps toward reaching one's goals. Consultation may also be used to explore ways one might be supportive to a friend or member of the university community in need of mental health services.

Case Management & Referral – Case management services can assist students who need assistance connecting with outside providers and students who need help navigating community resources.

Virtual Health Services - SHSU Counseling Center is now partnered with Timely Care to deliver a new virtual health and well-being platform for students. Through either a mobile app or your desktop, Timely Care provides 24/7 access to virtual care at no cost! Visit [timelycare.com/SHSU](https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Ft.e2ma.net%2Fclick%2Fxbbisj%2Fxfurfol%2Fpgdoy&data=05%7C01%7Csys003%40shsu.edu%7C35f37c34f8e344a2632e08dbe14abd96%7Cb153cbd8b39247449b39e3cdb8677f00%7C0%7C0%7C638351483351532652%7CUnknown%7CTWFPbGZsb3d8eyJWljoicMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTEi6Ik1haWwiLCJXVCi6Mn0%3D%7C3000%7C%7C%7C&sdata=cvxz7p3Xfb5yek5WdPUX2dPjoWHegy%2B98vJG2owwniw%3D&reserved=0) (<https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Ft.e2ma.net%2Fclick%2Fxbbisj%2Fxfurfol%2Fpgdoy&data=05%7C01%7Csys003%40shsu.edu%7C35f37c34f8e344a2632e08dbe14abd96%7Cb153cbd8b39247449b39e3cdb8677f00%7C0%7C0%7C638351483351532652%7CUnknown%7CTWFPbGZsb3d8eyJWljoicMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTEi6Ik1haWwiLCJXVCi6Mn0%3D%7C3000%7C%7C%7C&sdata=cvxz7p3Xfb5yek5WdPUX2dPjoWHegy%2B98vJG2owwniw%3D&reserved=0>) or download the TimelyCare app from your app store and register with your school email address. You can then start visits from any web-enabled device – smartphone, tablet, laptop, or desktop.

The Counseling Center is located on the second floor of the Powell Student Health and Counseling Center, conveniently located next to Old Main Market. Visit or call (936) 294-1720. The Counseling Center is open Monday through Friday between 8:00 a.m. and 5:00 p.m., with additional evening hours during the Fall and Spring semesters. For more information, visit the Counseling Center's website (<http://www.shsu.edu/dept/counseling/>).

Dean of Students' Office

The Dean of Students' Office provides premier student and family support services and programs with a focus on student success, access, engagement, and retention. Through restorative practices, our department provides holistic student support, as well as opportunities for leadership, development, and community engagement. Our parent programs support parents, families, and supporters of students by building community, parent connection and engagement, and scholarship opportunities. To provide a safe community experience each student is responsible for compliance with the Student Code of Conduct (<https://www.shsu.edu/dept/dean-of-students/student-code-of-conduct.html>).

Contact Information:

Location: Lowman Student Center, Suite 210

Phone: 936-294-1785

Email: doso@shsu.edu

Web: [shsu.edu/doso](https://www.shsu.edu/dept/dean-of-students/) (<https://www.shsu.edu/dept/dean-of-students/>)

Health Center

Student Health Services at SHSU are comprised of the Student Health Center and the Student Wellness Office.

The Student Health Center, located at the corner of Avenue J and Bearkat Boulevard, provides comprehensive medical services, health education, and health related events to currently enrolled students. The Health Center is open from 8:00 a.m. to 5:00 p.m., Monday through Friday for the full Fall, Spring, and Summer semesters. We are closed on official University holidays.

The Health Center is a primary care medical office for SHSU students that provides office visits for routine illness and minor injuries, gender specific care, sexual health services, allergy injections and immunizations. The center also has laboratory services, and a pharmacy (offering both prescription and over the counter items).

The cost of office visits is covered by the Medical Service Fee paid each semester as part of the tuition and fees. This fee allows a student to schedule as often as needed throughout that semester for medical services. Any additional fees for laboratory tests, prescription drugs, and certain procedures and supplies will be charged to the student's cashiers office account and are expected to be paid once posted. These charges are at greatly discounted rates. The Student Health Center does not bill any medical insurance policies except the policy provided for purchase through SHSU, Academic Health Plans.

Medical staff at the Health Center is comprised of Medical Doctors, Nurse Practitioners, Physician Assistants, Licensed Vocational Nurses and Registered Nurses, Medical Assistants, Medical Technologists, Pharmacist and Pharmacy Techs and a dedicated front office staff.

The Health Center prides itself in its continued accreditation by the Accreditation Association for Ambulatory Health Care (AAAHC). Accreditation means that the clinics operations meet or exceed rigorous standards of quality compared to other primary care offices across the nation.

In the case of on-campus medical emergencies, Emergency Medical Services (EMS) 911 should be called.

Please visit the Health Center (<https://www.shsu.edu/dept/student-health-center/>) website for more information on our services. You can also find the link to your Patient Portal on our webpage that allows you to schedule appointments online, receive testing results and messages from your medical providers and submit forms to the Student Health Center. If you would like to learn more about our student wellness office and health education services, please visit our Student Wellness (<https://www.shsu.edu/dept/student-health-center/health-promotion/>) page or follow us on social media pages: @shsuwellness and @shsushc

Please call (936) 294-1805 for any additional information about Student Health Center services. Our team looks forward to serving you as we carry out our mission to keep you healthy and support your academic success!

International Programs

The Global Engagement Center (GEC) promotes and coordinates international activities at Sam Houston State University, including the recruitment and retention of international students and study and travel abroad of SHSU students, faculty and staff. GEC is the primary contact for F-1 international students at the SHSU, and the staff provides assistance and information to international visitors.

GEC staff assists with immigration rules and regulations for international students, faculty and staff. GEC also provides various support services for international students and visitors such as initial airport pick-up, cultural events, and activities-both on campus and off campus. SHSU has an active International Student Organization with both international and domestic student members.

Sam Houston State University offers opportunities for study on exchange programs and faculty-led programs in numerous countries across the globe. In addition, the university is affiliated with 5 of the country's top Study Abroad providers, allowing students to participate in a wide variety of study abroad programs while utilizing their financial aid. Scholarships are available for those who qualify.

SHSU is also a member of the the National Student Exchange (NSE). NSE provides accessible collegiate study away to undergraduate students at over 170 member institutions in the United States, Canada, Guam, Puerto Rico, and the U.S. Virgin Islands. GFO staff work with SHSU students applying for competitive honors and awards from around the globe. We offer information sessions for many scholarships and provide one-on-one help throughout the application process.

Visit or call the GEC (<https://www.shsu.edu/dept/global-engagement/>) in Farrington Building, Room 116, telephone (936) 294-4737.

James and Nancy Gaertner Performing Arts Center

Opened in fall 2010, the Gaertner Performing Arts Center is a showcase for artistic talent and creative works, serving the community and the region. It serves as a world-class academic facility for students in the College of Arts & Media.

James and Nancy Gaertner Performing Arts Center Features

- 800-seat concert hall
- 175-seat recital hall
- 150-seat dance theatre
- Outdoor performance space
- Dance studios
- Practice rooms
- Dressing rooms
- Audition areas
- Scene shop for set construction
- Costume shop
- More than 90,000 square feet of total space

Public Art in the James and Nancy Gaertner Performing Arts Center

The central lobby of the Gaertner Performing Arts Center showcases original public art by internationally known artists and sculptors. Seven installations were commissioned for the building by Joe Akers, Kathleen Ash, Rebecca Finley, Jason Lawson, Jesús Morales, and Tim Prentice and Charles Pebworth.

Events in the James and Nancy Gaertner Performing Arts Center

The extensive events calendar for this spectacular performance space and for the College of Arts and Media in general can be accessed at College of Arts & Media. (<https://www.shsu.edu/academics/arts-and-media/news-and-events/events-and-ticket-information/>)

Lowman Student Center

Lowman Student Center

The Lowman Student Center (LSC) proudly serves as your "Living Room on Campus" by providing a safe, welcoming, and engaging environment. With recently expanded and renovated spaces, over 1 million students, faculty, staff, administrators, alumni, and guests frequent the LSC annually. The LSC is committed to providing the university with services, conveniences, and amenities in an engaging and innovative environment.

Contact Information

LSC Office Main Number: 936.294.1759

LSC Information Center: 936.294.4902

LSC Kat Klub (game room): 936.294.3462

LSC Twitter, Facebook, Instagram, Snapchat: @SHSULSC

LSC Office email: lsc@shsu.edu

LSC operational hours may be found on the Lowman Student Center (<https://www.shsu.edu/dept/lowman-student-center/>) website.

Services

The LSC is home to the Kat Klub (game room with bowling alley), University Bookstore, and Paw Print Food Court. Current LSC information can be found by visiting the Information Center.

Spaces

The LSC is a 225,000 sq. ft. facility, supported by state-of-the-art theatrical lighting and audio/video systems, that hosts over 8,000 events annually in the following spaces:

- **Orange Ballroom** (10,000 sq. ft.) and **White Ballroom** (8,000 sq. ft.) suitable for banquets, dances, concerts, conferences, and other large event gatherings.
- **Theater** space providing seating for 360 (plus 6 ADA) is ideal for lectures, video presentations, seminars, educational, and entertainment programs.
- **Conference Rooms** of varying sizes that can accommodate groups ranging from 12 to 200 people.
- **Kat Klub (game room)** offers bowling, billiards, table tennis, video games, a tavern, and several TV screens in a fun, friendly environment where students, faculty, staff, and guests can gather. Join us in the Kat Klub for relaxing, lounging, and gaming with friends!
- **Mother's Room** which features lockers for individual use, comfortable seating, hot and cold water, a baby changing station, cleaning supplies, dimmable lights, electrical outlets, a mini refrigerator for milk storage, and a secure, lockable door. See Information Center for access.

Museum, Sam Houston Memorial

The Sam Houston Memorial Museum, established in 1936 as a Texas centennial project, is an integral part of Sam Houston State University and is dedicated to preserving the memory of General Sam Houston (1793-1863). A soldier, statesman and politician, the only man to serve as governor of two states and president of an independent republic, Sam Houston led the fight for Texas' independence and then served Texas as President, U.S. Senator, and Governor. Located on fifteen acres, the museum complex preserves three fully furnished original Houston buildings - Woodland Home, Steamboat House, and Law Office - as well as a kitchen, blacksmith shop, and Guarrant, Roberts-Farris and Bear Bend log cabins.

The Memorial Museum Building houses the major collection of Houston memorabilia and exhibits. The Katy & E. Don Walker, Sr. Education Center is named for a distinguished alumnus of Sam Houston State University and his wife, and provides auditorium, classroom, and meeting spaces, including the W. S. Gibbs Conference Hall, as well as a gallery for traveling exhibits. The 'Wigwam Neosho,' the museum store and gift shop, is housed in a large log building on the Museum grounds. The museum offers many educational opportunities for Sam Houston State University students. These include semester- and year-long internships, with both undergraduate and graduate exploring a variety of museum study options. We also provide several part-time student jobs, tours, and research and writing programs using archives, manuscripts, and artifacts. Programs and lectures are held throughout the year. Classes as diverse as history, biology, political science, and art use the Museum and grounds as a laboratory, studio, and classroom.

In 2017, the 85th Legislature of the State of Texas approved a resolution for the creation of the Sam Houston Republic of Texas Presidential Library at Sam Houston State University. This resolution honors Sam Houston's contributions in shaping the state as well as his serving as the first and third

president of the Republic of Texas. In August of 2022, the Texas State University System Board of Regents approved the Sam Houston Memorial Museum to change its name to the Sam Houston Memorial Museum and Republic of Texas Presidential Library.

The museum complex is located at the corner of Sam Houston Avenue and 19th Street and can be reached by calling (936) 294-1832 or by visiting Sam Houston Memorial Museum (<http://samhoustonmemorialmuseum.com/>).

Print Services

Sam Houston Print Services is the University's in-house printing and copying facility. Copying, binding, faxing, and printing services are offered to students, student organizations, faculty, and departments at Sam Houston State University.

Sam Houston Print Services (<https://www.shsu.edu/dept/marketing/press.html>) is located at 1831 University Ave, on the first floor of the Thomason Building, Suite 101. The facility is open from 8:00 a.m. to 5:00 p.m., Monday through Friday. For information or to arrange an appointment for placing an order, please, call (936) 294-1856 or (936) 294-1768.

Public Safety Services, University Police, and Parking & Transportation Office

University Police Officers

University Police Officers are licensed peace officers as defined under the laws of the State of Texas and thereby have the authority of peace officers. Their primary jurisdiction, under H.B. 391, includes all counties in which property is owned, leased, rented, or otherwise under the control of Sam Houston State University.

The University Police Officers subscribe to the Law Enforcement Code of Ethics, a portion of which reads, "As a law enforcement officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all citizens to liberty, equality, and justice." In this endeavor, the University Police earnestly solicit the support of the faculty/staff and students. Many officers are students thus providing a balance within Public Safety Services from a student's perspective.

In addition to University regulations, all the general and criminal laws of the State and the United States are declared to be in full force and effect within the properties of Sam Houston State University. All persons are responsible for compliance with these laws.

All thefts, vehicle accidents, or other criminal offenses that occur on campus should be reported immediately to the University Police. The Charles W. Tackett University Police Building is located at 2424 Sam Houston Avenue (Sam South Complex) —Telephone Number (936) 294-1800. Police Officers are on duty 24 hours every day. The business office hours are 7:30 a.m. until 4:30 p.m., Monday - Friday.

Campus Safety. Sam Houston State University offers a variety of services to promote a safe campus environment. The campus is equipped with emergency call boxes stationed at strategic locations throughout the campus to include parking lots, walkways, and residence halls. Additionally, the University Police provide staff to escort students not wishing to walk alone at night to and from campus buildings and parking lots. Students wishing to learn more about personal safety and self defense may take advantage of programs offered by the University Police Department. For more information, call (936) 294-1800 (Emergency 936-294-1000).

Emergency Management

The campus Emergency Management disseminates critical emergency response information that includes text messages, voice calls, emails, desktop alerts, social media messaging, and loudspeaker announcements. For preparedness, the campus maintains an emergency preparedness website and a cell phone/tablet application with essential training information in checklist form and situational videos for the campus community to include access for visitors on campus. This information is available at KatSafe. (<https://www.shsu.edu/katsafe/event-preparation/katsafe-communications-instructions/>)

Parking & Transportation

Parking. Students, full - or part-time, who operate or expect to operate a motor vehicle, motor cycle, or motor-assisted cycle on University property, regularly or occasionally, are REQUIRED to register the vehicle with the Department of Public Safety Services and obtain an electronic parking permission assigning a designated area of parking. The University reserves the right to require proof of ownership of the vehicle being registered. Parking and Traffic Regulations and Information governing the operation of motor vehicles is issued via internet hyperlink at the time of the electronic parking permission purchase and is available for download or view from Parking and Transportation (<https://www.shsu.edu/dept/public-safety/parktrans/>). Failure to read the regulations is not an excuse for failure to comply with the university parking rules and regulations. Vehicles found in violation are subject to applicable fines as well as tow and impound.

Campus Recreation

The Mission of the Department of Campus Recreation is to advance and enrich the collegiate experience. The community, leadership, and wellbeing skills established through involvement in recreation are some of the most valuable parts of the college experience. Studies have shown that students participating in campus recreation stay in school and do better academically.

To see more about the Campus Recreation programs and services, view our orientation video here (<https://youtu.be/RpkxCJuMakM/>). You can also find more information by downloading the SHSU Rec Sports App through the Apple App Store (<https://apps.apple.com/nz/app/shsu-recreational-sports/id1440068155/>) or Google Play (https://play.google.com/store/apps/details/?id=com.innosoftfusiongo.samhouston&hl=en_US&gl=US).

Facilities

Facilities managed by the Department of Recreational Sports include:

- Campus Recreation (<http://www.shsu.edu/dept/recreational-sports/facilities/facilities.html>) Center
- McAdams Tennis Complex (<http://www.shsu.edu/dept/recreational-sports/facilities/facilities.html>)
- Pritchett Field Sports Complex (<http://www.shsu.edu/dept/recreational-sports/facilities/facilities.html>)
- Holleman Field Sports Complex (<http://www.shsu.edu/dept/recreational-sports/facilities/facilities.html>)
- Intramural Sports Fields (<http://www.shsu.edu/dept/recreational-sports/facilities/facilities.html>)
- Sand Volleyball Courts (<http://www.shsu.edu/dept/recreational-sports/facilities/facilities.html>)
- University Camp. (<http://www.shsu.edu/dept/recreational-sports/facilities/university-camp/camp-facilities.html>)

The Rec Center houses a 34' climbing wall, a 10,000 ft² weight room with a cardio area, several multipurpose rooms and fitness studios, and an outdoor heated swimming pool. New additions in 2023 include two multipurpose rooms, a functional training area, expanded cardio space, and a full-size competition gym. This expands upon the original four basketball courts, two multi-purpose rooms, a 1/8-mile indoor running track, nine racquetball courts, functional training area, and a supplemental weight room. Next to the Rec Center, there are three Intramural Sports Fields and two Sand Volleyball courts. Campus Recreation uses these facilities for Intramural Sports, Informal Recreation, and Special Events. Just up the hill is the McAdams Tennis Complex, an outdoor tennis venue with eight tennis courts. The Pritchett Field Sports Complex and Holleman Field, home to our Club Sports program, include two athletic fields (one grass and two turf) and an outdoor running track.

The University Camp (<http://www.shsu.edu/dept/recreational-sports/facilities/university-camp/camp-facilities.html>) is a one-of-a-kind recreation and retreat facility located 15 minutes northeast of campus. Booked through group reservations, members of the SHSU community can spend a day canoeing on the water, fishing, hiking, biking, challenging themselves on the low or high-ropes challenge courses, hosting a gathering in the dining hall and lodge, or just enjoying a picnic by the lake. Groups may also reserve cabins for overnight retreats.

Programming

As a student, you will enjoy the Informal Recreation (<http://www.shsu.edu/dept/recreational-sports/>) program by participating in self-directed activities such as drop-in basketball, weight-lifting, cardio, racquetball, or swimming. The Aquatics & Safety (<http://www.shsu.edu/dept/recreational-sports/programs/aquatics-and-safety/aquatics-and-safety.html>) program offers lifeguard and CPR classes, swimming lessons, and open swimming. The seasonally heated pool has four 25-yard lap lanes and a leisure area for water sports or merely relaxing in the sun. The Fitness Program (<http://www.shsu.edu/dept/recreational-sports/programs/fitness/fitness.html>) offers comprehensive wellness programming for the Bearkat community. Programs include group fitness classes, yoga, personal training, nutrition consultations, and instructor training. The Intramural and eSports (<http://www.shsu.edu/dept/recreational-sports/programs/intramural-sports/intramural-sports.html>) programs offer a variety of team, dual, and individual activities with both competitive and recreational divisions. The Club Sports (<http://www.shsu.edu/dept/recreational-sports/programs/club-sports/club-sports.html>) program comprises recognized student organizations established to promote and develop common sport- and/or recreation-related interests. Volunteer student leaders organize, administer, and compete in our active clubs. Outdoor Recreation (<http://www.shsu.edu/dept/recreational-sports/programs/outdoor-recreation/outdoor-recreation.html>) is a multifaceted program comprising six primary areas; Trips, Workshops, the Climbing Center and bouldering area, equipment rental (tents, sleeping bags, kayaks, etc.), Bearkat Camp (<http://www.shsu.edu/dept/recreational-sports/programs/bearkat-camp/bearkat-camp.html>) (a four day, three-night experience for incoming freshmen and transfer students), and the 345-acre University Camp and retreat center. The department also provides many employment opportunities for students who are interested in part-time work. Rec Sports employs over 300 students (https://shsu.co1.qualtrics.com/jfe/form/SV_0052Qm8ghroUmQR/) annually in the areas of intramural officiating, facility supervision, aquatics, marketing, outdoor recreation, and fitness. For more information about any of these Campus Recreation activities, please, stop by the administrative offices on the second floor of the Campus Recreation Center, call (936) 294-1985, download the SHSU Rec Sports App, or visit the C (<https://www.shsu.edu/dept/recreational-sports/>)ampus Recreation website.

Residence Life

The Department of Residence Life operates a variety of residence halls, including apartments for upperclassmen. Upon acceptance to the University, all students who are required to live on-campus their first year will be mailed a housing brochure. This brochure provides many details of the residence life program at Sam Houston State University, including information regarding specific residence halls, applicable rates, and some policies. Students can also visit Residence Life (http://www.shsu.edu/%7Ehou_www/) or call (936) 294-1812.

A person may not live in University housing unless enrolled in classes at SHSU for each particular semester.

Application for housing may be made via the website once the student has been accepted to SHSU. A deposit of \$200 is required with the application for housing. Assignments are made on a space-available basis according to the date of deposit. The housing contract will be in effect and must be adhered to for the full academic year.

Should a student become unable to fulfill a reservation, a refund may be made under certain conditions. Please refer to the Housing Application/Contract Terms and Conditions for specific details regarding refunds which are determined by the date the cancellation is received. Students may pay for housing in full at registration or in an installment arrangement, in accordance with the policies set forth by the University Bursar.

University residence halls are closed during the academic breaks between semesters. Students who have a future reservation with SHSU may stay in the residence hall during these periods for an additional fee.

Bearkat Village Apartments

The University maintains two-bedroom, fully furnished apartments for upperclassmen. The apartments are located on Montgomery Road across from Bowers Stadium. All residents must be enrolled in the University.

Copper Village Apartments

The University maintains one-bedroom and two-bedroom, fully furnished apartments for upperclassmen. The apartments are located on Sycamore Avenue across from The Don Sanders Baseball Stadium. All residents must be enrolled in the University.

First-year Students Required Housing And Meal Plan Policy

All students who have graduated from high school within the current or previous calendar year are required to reside in University housing and to purchase a meal plan for their first year, which will normally include the fall and spring semesters. For example, a May or June 2024 graduate will be required to reside on-campus Fall 2024 and Spring 2025 semesters. Anyone signing an academic year housing/meal plan contract will be required to fulfill the terms of that contract. Exceptions to the First-Year Required Housing and Meal Plan Policy may be made by the Department of Residence Life if:

1. residence in University housing will impose a significant hardship, financial or otherwise; or
2. the student is married and living with his/her spouse; or
3. the student commutes from the home of his/her parents, grandparents, or a brother or sister within a 60 mile radius from the SHSU campus; or
4. the student is a veteran of military service.

The student must provide documented evidence to warrant consideration for a waiver of this requirement. A denial of this request may be appealed to the Director for Residence Life Business Operations. Charges for both services will be added to the student's account until approval for the waiver is obtained. Any student who does not comply with the above policy will be subject to disciplinary action as specified by the Code of Student Conduct as published in *Student Guidelines*.

Default housing (\$3,000 placeholder for rent charges) and Dining (All Access Plan) will be added to all students required to live on-campus for both Fall and Spring semesters. These charges will be removed with approved waiver or assignment to an on-campus booking. Waivers must be received by the 8th class day of the semester. Any waivers received after the 8th class day will only be reviewed in extenuating circumstances, and no request will be reviewed after the close of the requested semester.

Students may apply for an on-campus housing/dining waiver by accessing the Housing Portal in MySam Students tab. In the Housing Portal, students will locate Forms tab and choose "Request for Waiver of First-Year Housing Policy," complete all requested information and supply additional documentation as requested. Any student denied a waiver will have 10 business days to request an appeal.

Dining Service for Residential Students

All students (regardless of classification) who reside in the residence halls will be required to purchase a University Resident Meal Plan (All Access, 15 Meals per Week, 10 Meals per Week (*Sophomore status and above only). All of these meal plans include "Bearkat Bucks," which can be used in lieu of cash at any food related establishment on campus. Meal plan contracts are valid for the entire academic year. Rates and additional information are available from the Department of Residence Life. Students who reside in Bearkat Village Apartments or Copper Village Apartments will not be required to purchase a Resident meal plan.

Dining Service for Non-Residential Students

Students who do not reside on campus have the option to purchase any meal plan available (All Access, 15 Meals per Week, 10 Meals per Week (*Sophomore status and above only), 72 Meals per Semester (Bearkat Value Plan), 32 Meals per Semester (Bearkat Lite), or Bearkat Flex Plan. All of these meal plans include "Bearkat Bucks," which can be used in lieu of cash at any food related establishment on campus. Meal plan contracts are valid for the entire academic year. Rates and additional information are available from the Department of Residence Life.

Bearkat Bucks

Bearkat Bucks, welcome at any ARAMARK managed campus dining facility, is a declining balance account in which a minimum of \$25 is deposited, and the cash price of food purchases are deducted from the balance. Money deposited in a students' Bearkat Bucks can be used in lieu of cash at any food related establishment on campus. All purchases are non-refundable and any unused Bearkat Bucks will be lost at the completion of the 2nd summer session.

Summer Housing

The buildings that are open for summer school housing vary from year to year because of renovation and maintenance schedules. Assignments are made according to date of deposit.

Services for Students with Disabilities

Services for Students with Disabilities (SSD) provides academic adjustments and auxiliary aids and services for students with documented mental or physical impairments that substantially limit one or more major life activities. To apply for services, students must register with SSD, participate in a disability intake, and submit current documentation from a qualified professional indicating the presence of a substantially limiting impairment.

Accommodation decisions are made on a case-by-case basis, as supported by the student's documentation and educational needs. For additional information on the SSD documentation guidelines, procedures for requesting services, and adaptive technologies available on the SHSU campuses, students are encouraged to visit Services for Students with Disabilities (<http://www.shsu.edu/dept/disability/>) or to contact the SSD Office at telephone (936) 294-3512, TDD (936) 294-3786, or email Disabilities (disability@shsu.edu).

Student Money Management Center

Student Money Management (SMM) is a financial outreach and educational program administered by the Sam Houston State University Division for Strategic Enrollment & Innovation.

The mission of Student Money Management is to help Bearkats achieve financial independence.

The goals of Student Money Management are for students to:

- Learn how to identify and track expenses during and after college;
- Create a financial survival plan for college;
- Graduate with a plan for repaying student loans and personal debt;
- Locate external financial education resources;
- Talk to trained professionals about personal financial decisions and issues in a confidential and comfortable environment;
- Create a personalized budget for the upcoming semester or year at SHSU;
- Learn how to obtain, interpret and understand a personal credit report; and
- Understand employee benefit packages and retirement plans prior to accepting a career opportunity.

Student Money Management offers financial literacy outreach to students in the form of presentations and workshops on a number of financial literacy topics, including but not limited to:

- Budgeting & Saving
- Setting Financial Goals
- Credit
- Student Loan Repayment

Personal Coaching

Student Money Management also offers private, individualized, and **free** financial coaching sessions from certified professionals. Through this financial literacy resource, SHSU students can learn how to gain and maintain financial independence. Coaching sessions with full-time staff members are available by walk-in and appointments through Campus Connect.

For more information, visit Student Money Management (<http://www.shsu.edu/dept/smmc/>) or call 936-294-2600.

Students' Legal & Mediation Services

Mission

We serve currently-enrolled SHSU students by providing them with high-quality legal advice and equipping them with techniques to resolve disputes so they can focus on their educational goals.

Legal Services

Our attorneys (<https://www.shsu.edu/dept/student-affairs/legal/slms-staff/>) advise and counsel students on legal issues that they face. Meetings between a student and an attorney are confidential, as allowed by law. While our attorneys do not represent students in court, they help students better understand their legal issues, rights, and responsibilities, guide students through the legal procedures that they may face, and assist students in productively and proactively dealing with their legal situation.

Types of Legal Issues

Student Legal & Mediation Services can assist students with many types of legal issues, including, but not limited to:

- Rental Agreements and Issues with Landlords
- Contract Drafting and Review
- Background Reports
- Identity Theft
- Business Formation
- Traffic Tickets
- Wills and Powers of Attorney
- Divorces
- Name Changes
- Real Estate
- Demand Letters
- Consumer Protection
- Expunctions and Orders of Nondisclosure
- Copyright and Intellectual Property
- Debt Collection Practices
- Employment-related Issues
- Notary Services

Mediation & Conflict Resolution Training

Student Legal & Mediation Services also provides mediation services and conflict resolution training. When people are in a dispute, a neutral person—the mediator—can help the parties understand the cause of the dispute and help them develop creative solutions to resolve the dispute. Student Legal & Mediation Services has a trained mediator who helps students resolve their conflicts constructively, timely, and confidentially. We've helped students in roommate disputes, family conflicts, and disputes between groups.

Cost

Because Student Legal & Mediation Services is supported by Student Service Fees, there is no cost for a consultation with the attorney or the mediator for currently-enrolled SHSU students who have paid the Student Service Fee.

Location & Making Appointments

Student Legal & Mediation Services is located in the Lowman Student Center (<http://www.shsu.edu/dept/lowman-student-center/>), Suite 327. Consultations are by appointment, either in-person, phone, or by video. Students may make an appointment by calling (936) 294-1717, online at Student Legal & Mediation Services (<http://www.shsu.edu/dept/student-affairs/legal/>), or through Campus Connect (<https://www.shsu.edu/dept/student-success-technologies/campus-connect/>).

Speaker for Student Groups

Student Legal & Mediation Services is also available to speak to SHSU student groups and organizations on legal and conflict resolution topics. Please call (936) 294-1717 to learn more about having us speak to your group.

Conflicts of Interest

Student Legal & Mediation Services is unable to offer legal advice in disputes between Sam Houston State University students or disputes between a student and the university, but our office can refer you to a private attorney.

Student Services, Division of

The role of the Division of Student Affairs is to complement the total educational mission of the University by providing opportunities for students to develop and grow in an academic environment. This is accomplished by offering quality programs and emphasizing the holistic approach in co-curriculum involvement. Studies indicate that learning occurs in an environment conducive to social, recreational, educational, and intellectual interaction. A variety of student service programs are designed to foster such interaction with students, faculty, staff, and the University community. The goal of the division is to contribute to the learning experiences of SHSU students, helping them to become educated, enlightened, and empowered in ways that they can achieve and contribute as productive citizens in their college, community, and country.

The Office of the Vice President for Student Affairs provides administrative leadership, supervision, and coordination for the Division of Student Affairs. The division includes the following departments: Counseling Center, Dean of Students' Office, Student Involvement: Leadership and Service, Lowman Student Center, Campus Recreation, Residence Life, Services for Students with Disabilities (SSD), Campus Activities and Traditions,

Student Health Center, and Student Legal and Mediation Services. For more information, visit the website at www.shsu.edu/student-affairs (<https://www.shsu.edu/dept/student-affairs/contact.html>).

Veterans Resource Center

The Veterans Resource Center (VRC) is available to assist students with Veterans Affairs (VA) educational and the Hazlewood Act Waiver. Our office is located in Academic Building III, Suite 110.

Types of VA Educational Benefits:

- Chapter 30 - Montgomery
- Chapter 31 - Veteran Readiness & Employment
- Chapter 33 - Post 9/11
- Chapter 35 - Dependents' Educational Assistance
- Chapter 1606 – Selected Reserve
- Marine Gunnery Sergeant John David Fry Scholarship
- Edith Nourse Rogers STEM Scholarship

Hazlewood Act

The Hazlewood Act is a State of Texas benefit that provides qualified Veterans, spouses, and dependent children with an education benefit of up to 150 hours of tuition exemption, including most fee charges, at public institutions of higher education in Texas. This does not include living expenses, books, meal plan, intercollegiate athletic fee, and the student service fee.

If you would like to apply for one of the VA benefits or Hazlewood Act please contact us at (936) 294-1046, or by email at [Veterans \(veterans@shsu.edu\)](mailto:veterans@shsu.edu).

VetSuccess Counselor

SHSU houses one VA VetSuccess Counselor on its campus. If you are a veteran, active duty military or an eligible family member who attends or plans to attend SHSU, please call or come by to meet with our VetSuccess on Campus Counselor.

SHSU VetSuccess on Campus counselor can help you:

- Manage your education benefits
- Explore vocations and select a suitable major/career
- Elect your healthcare benefits with Veterans Healthcare Administration
- Access, understand and apply for VA benefits (e.g., Disability Compensation, Life Insurance, Education, Home Loan Guaranty, and Veteran Readiness & Employment)
- Get referrals for medical and mental health care
- Get referrals for readjustment counseling services for eligible veterans and their families
- Coordinate with school faculty/staff to provide veteran-specific services (e.g., VA Certifying Official, Career Center, Student Disabilities Services, Counseling Center)
- Find job placement assistance and coordinate with Local Veterans' Employment Representatives (LVER) and Disabled Veterans' Outreach Programs (DVOP)
- Locate community and other resources

Your VetSuccess on Campus Counselor

Roberta Ardoin (roberta.ardoin@va.gov), MHS, CRC
936-294-2263
AB III Suite 110

Visitor Services

Located in the Visitor Center, the Sam Houston State University Visitor Services Department is the front door of the University. Visitors are encouraged to stop into Visitor Services upon arrival to campus to get information to maximize their campus visit, including directions, parking registration, and contact information. Please contact Visitor Services to:

- Schedule (<https://www.shsu.edu/dept/visitors/>) a tour of the campus
- Obtain departmental brochures to assist in educational planning
- Register (<http://www.shsu.edu/saturday/>) for a Saturday@Sam Campus Preview Day

Visitor Services is located at the Bowers Boulevard entrance to campus. Visitors can speak with a SAMbassador, enjoy showcased SHSU memorabilia, and view the university's "story" on video in the state-of-the-art theater.

Saturday@Sam is our bi-annual campus preview day, held in the fall and spring of each year for prospective students and guests. For more information, please visit Visitor Services (<http://www.shsu.edu/visit/>) or contact us at (936) 294-1844.

About the College

The college is comprised of the Departments of Art, Dance, Mass Communication, Theatre & Musical Theatre, and the School of Music—five outstanding divisions in one dynamic college that seeks to inspire, educate, and graduate creative artists and media professionals.

The College of Arts and Media enjoys state-of-the-art facilities in which to present unique and cutting-edge programming. Ranging from the traditional to the experimental, students can explore new frontiers in all their creative endeavors. From digital media to film to animation, multiplatform journalism to public relations to graphic design, choreography to composition to conducting, and from stage management to scene design to acting, students in the arts and mass communication can find themselves at Sam Houston.

Contact Information: (936) 294-1314

Mission

The mission of the Sam Houston State University Department of Art is to teach skills, techniques, aesthetic principles, and concepts that develop students personally and help to prepare them for professional careers in art and design as well as postgraduate study. We foster a vibrant environment for creative research and collaboration between faculty, students, and the community.

Highlights

- The curriculum consists of courses that provide a strong theoretical framework and the development of the graduate student's creative work. It is designed to provide support for the development of a professional creative practice of art making that engages audiences in community-based projects.
- Graduate students are provided with individual studio space located off-campus and have opportunities to work with local organizations on art projects that are meaningful to the communities that they engage.
- Students from diverse artistic disciplines are given support to sustain an artistic studio practice in media of their choice. Simultaneously, graduate students will develop expertise in university teaching methods as well as integration methods for community engagement. Exhibitions and publications are included in curricular requirements and supported in university galleries and off-campus sites.

Career Opportunities

- University and community college professors
- Independent artists
- Community art organization directors
- Museum and gallery staff
- Master of Fine Arts in Art and Social Practice

Master of Fine Arts in Art and Social Practice

The Master of Fine Arts in Art and Social Practice is a 60-hour terminal degree. The program consists of graduate courses in the Department of Art that provide strong theoretical framework as well as courses that develop the students' creative work. The program is designed to provide support for the development of a professional creative practice of art making that engages audiences in community-based projects.

Students wishing to pursue an MFA in Art and Social Practice must meet the following requirements and submit all documents to the Office of Graduate Admissions (<https://www.shsu.edu/dept/graduate-admissions/prospective-students.html>).

1. Graduate Admissions Application (submitted online through ApplyTexas (<http://www.shsu.edu/admissions/apply-texas.html>))
2. Application Fee
3. A bachelor's degree in art with a 3.0 GPA* in undergraduate art coursework
4. An official transcript from your baccalaureate degree-granting institution
5. A digital portfolio of the applicant's artwork
6. A statement of intent
7. Three letters of reference
8. A resume

***Note:** Exceptions to the 3.0 GPA requirement may be made in instances of outstanding portfolios and letters of recommendation that provide evidence that the student can be successful in a graduate program.

Requirements include public exhibitions and community-engaged art projects. An exhibition is required at the conclusion of the first year, and a review of the student's work by the graduate faculty occurs at the conclusion of the second year. The thesis/exhibition project includes a publication collaboratively designed and written by students in their third year.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The MFA in Art and Social Practice is designed to provide graduates with the following marketable skills:

1. Advanced oral and written communication.

2. Critical thinking.
3. Teamwork and collaboration.
4. Communicating visually.
5. Developing and managing budgets.
6. Organizing and motivating others.

Department of Dance

About

Chair: Jennifer Pontius (dnc_jkp@shsu.edu)

Graduate Advisor: Dionne Noble (dln008@shsu.edu)

Contact Information: (936) 294-1875 or Dance (dance@shsu.edu)

Website: Department of Dance (<http://www.shsu.edu/academics/dance/>)

Mission

The Department of Dance at Sam Houston State University delivers a dynamic, holistic, challenging experience that integrates creativity, performance, and scholarly pursuits designed to prepare each student for a 21st-century career in dance.

Highlights

All MFA candidates participate in a thorough and broad-based curriculum that prepares them across a wide range of skills and sensibilities. The curriculum has four major components:

1. Theory and analysis
2. Production
3. Studio practices
4. Creative process

Further, the curriculum is constructed to encourage the student to explore areas of interest beyond the specific discipline of dance that will inform and facilitate future artistic and scholarly investigations. The capstone thesis project requires the candidate to draw on all of his or her talents and education to produce a substantial and meaningful work of creative imagination.

Career Opportunities

Graduates of the Department of Dance are successfully employed around the nation and the state as:

- Dance educators at all levels
- University and community college professors
- Public high school teachers
- Studio owners and teachers
- Performing artists in dance
- Artistic directors of dance companies
- Performing arts presenters and administrators
- Master of Fine Arts in Dance

Scholarships

The Department of Dance awards scholarships ranging from \$500 to \$3,000 per academic year. For scholarship consideration, all students must apply through Scholarships4Kats (<http://www.shsu.edu/scholarships/>). For other funding opportunities, please visit the Graduate Studies website (<http://www.shsu.edu/dept/graduate-studies/paying-for-school.html>).

Graduate Assistantships

The Department of Dance awards competitive graduate assistantships each year to students based on qualifications and academic standing. The graduate assistantships are usually awarded to second and/or third year students. Assistantship responsibilities include fulfilling six credit hours of assignments in support of the department's activities, equivalent to .50 FTE. Assignments are determined based on departmental needs. Once graduate assistants have completed eighteen hours of coursework, they may be listed as instructors of record for courses and assigned classes to teach as part of their responsibilities.

Assistantship criteria:

- Remain enrolled as a graduate student in the Department of Dance at Sam Houston State University throughout the academic year.
- Fulfill academic requirements as specified by the graduate course of study and graduate faculty.
- Maintain a grade point average of 3.0 or higher.

- As a recipient of a graduate assistantship, understand that one is representing the Department of Dance. The award may be reevaluated or revoked at any time based upon the review and discretion of dance faculty.

To apply for an assistantship from the Department of Dance, a Graduate Assistantship Application (<http://www.shsu.edu/academics/dance/documents/Dance%20Graduate%20Assistantship%20Application.pdf>) must be submitted along with a teaching resume, two letters of recommendation (at least one from a non-SHSU employee), and unofficial transcripts. Click here (<http://www.shsu.edu/academics/dance/current-students/mfa.html>) for more information.

Director/Chair: **Jennifer Karen Pontius**

Rasika Nitin Borse, MFA (rnb020@shsu.edu), *Lecturer of Dance, Department of Dance*, MFA, Sam Houston State University; BA, Univ of Calgary

Travis Dale Lake, MFA (tlake@shsu.edu), *Lecturer of Dance, Department of Dance*, MFA, Sam Houston State University; BFA, Univ of Utah

Adele Nickel, MFA (axn051@shsu.edu), *Assistant Professor of Dance, Department of Dance*, MFA, Univ of Washington; BA, New School/Soc Rsrch

Andrew M Noble, MFA (amn008@shsu.edu), *Professor of Dance, Department of Dance*, MFA, Florida State University; BA, Univ of South Florida

Dionne L Noble, MFA (dln008@shsu.edu), *Associate Professor of Dance, Department of Dance*, MFA, Univ of Utah; BA, Univ of South Florida

Jennifer Karen Pontius, MFA (dnc_jkp@shsu.edu), *Associate Professor and Chair of Dance, Department of Dance*, MFA, Florida State University; MA, California St Un-Dominguez Hil; BA, Univ of Alabama-Birmingham

Jacob Daniel Regan, MFA (jacobregan@shsu.edu), *Lecturer-Pool Faculty of Art, Department of Dance*, MFA, Sam Houston State University; BFA, East Carolina Univ

Lauren Rose Serrano, MFA (lrs054@shsu.edu), *Lecturer of Dance, Department of Dance*, MFA, Sam Houston State University; MA, Cuny Hunter College; BFA, Univ of Calif-Santa Barbara

Master of Fine Arts in Dance

The Department of Dance at Sam Houston State University offers a 60-hour program of study leading to the Master of Fine Arts degree in Dance, the terminal degree in studio arts. The degree normally takes three years to complete. The program is designed to provide intensive studio experience with substantive choreographic and performance opportunities, underscored by a broad exposure to the philosophical, theoretical, and creative process context of dance as an art form. A creative or performance thesis is required for graduation. Competitive Graduate Assistantships are awarded each year to students based on qualifications and academic standing. A returning professional track is available for qualified candidates.

The curriculum emphasizes choreography and performance, including a significant number of dance technique classes, particularly for candidates coming directly from undergraduate study. Dance professionals in career transitions will find that the program allows considerable latitude to formulate plans of study that meet their needs. The curriculum also includes courses in:

- Composition
- Production
- Dance theory
- Pedagogy
- Somatics
- Research methods
- Integrated technology
- Professional issues in dance

Elective hours may be used outside the Department of Dance for coursework that may apply to the candidate's thesis production or other research interests.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/graduate/dance/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

The application process for the MFA in Dance is two-fold. Candidates must apply for acceptance to Sam Houston State University through the Office of Graduate Admission (<https://www.shsu.edu/dept/graduate-admissions/prospective-students.html>). They must also audition for acceptance into the Department of Dance MFA program.

To apply for graduate study at SHSU, submit the following materials:

1. Graduate Studies Online Application submitted online through ApplyTexas (<https://www.shsu.edu/admissions/apply-texas.html>) with the application fee.
2. Transcripts of all previous college work.
3. Confirmation of undergraduate degree conferral.

Once the Graduate Studies Online Application is received, prospective students may upload the following supplemental materials online at SHSU Self Service Center (<http://www.shsu.edu/checkstatus/>):

1. Resume/curriculum vitae.
2. Three letters of recommendation.
3. Letter of inquiry.

In addition to the online application for admission to SHSU graduate studies, prospective MFA students must also demonstrate preparation for graduate study in dance to the dance faculty.

1. Submit links to your video portfolio of choreography and performance to Dionne Noble (dln008@shsu.edu). **Do not upload this to the self service portal.**
2. Audition and interview with the dance faculty. Auditions are scheduled on-site. Arrangements can be made for a long-distance audition including a Skype interview if the applicant is not able to come to scheduled auditions. The audition includes:
 - Submission of a writing sample.
 - Interview with the dance faculty.
 - Technique audition in both ballet and modern dance.
 - Performance of a self-choreographed solo.

Admission is based upon an aggregated evaluation of all application components.

Successful completion of a comprehensive oral examination is required for graduation. This exam, which is administered by a committee of three dance faculty, is administered during the final semester. Oral examination committees are appointed by the Graduate Advisor in consultation with the Graduate Committee and the student. Additional comprehensive examination information is located in the Graduate Degree Requirements section of the SHSU Graduate Catalog.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's **60x30TX plan** and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The MFA in Dance is designed to provide graduates with the following marketable skills:

- Substantive choreographic and performance skills to support artistic exploration.
- Ability to communicate clearly in writing and speech.
- Qualification to teach dance techniques and related dance coursework in higher education.
- Effective leadership, management, team-building, and independent work strategies.
- Strengthened creative thinking and problem-solving skills that include the ability to innovate, inquire, analyze, evaluate and synthesize information.

Website: Department of Mass Communication (<http://www.shsu.edu/academics/mass-communication/>)

Mission

The mission of the Department of Mass Communication at Sam Houston State University is to prepare professionals to work in the fields of Mass Communication, including Journalism, Broadcasting, Advertising, Public Relations, and Film. The Department promotes clear and effective communication, intellectual curiosity, strategic thinking, and independent learning skills through a focus on critical thinking, writing, technology, and the ethical and legal aspects of mass communication.

The department strives to maintain a work, learning, and social environment that is aware and supportive of diversity in human differences and beliefs.

Highlights

Digital Media Production, MFA

The MFA program in Digital Media Production is a terminal degree program that equips media practitioners and media education professionals with sophisticated knowledge of emerging media technologies and digital media content. This program also empowers students to create professional digital media content across different platforms, media, and distribution methods.

The curriculum covers a variety of issues in Digital Media Production, including mobile application development, digital streaming techniques, mobile content creation and editing software, motion graphics and effects, and comprehensive analysis of social media. These skills are not only essential for employment in traditional media industries, but also of growing importance to educational institutions, government entities, global conglomerates, and local corporations.

Emerging and Social Media, MA

The Master of Arts in Emerging and Social Media program at Sam Houston State University focuses on two interrelated, important areas of digital communication: emerging and social media. The current media landscape requires communication specialists to possess not only advanced skills for creative media content production, but also holistic understanding of strategic media planning, audience analysis, and critical assessment of communication processes. The MA in Emerging and Social Media program allows students to acquire both comprehensive skills and knowledge for effective media communication, helping students achieve their professional and/or academic goals. This fully online MA degree in Emerging and Social Media offers multiple admission dates throughout the year to support the 7-week course offering schedule. Applicants are accepted throughout the calendar year and can start the program at anytime.

- Master of Arts in Emerging and Social Media
- Master of Fine Arts in Digital Media Production

Graduate Assistantships

The Department of Mass Communication offers competitive graduate assistantships each year for students who are accepted into both the MA in Emerging and Social Media and the MFA in Digital Media Production. Teaching assistantships are also available for students who have completed 18 credit hours of graduate coursework. Graduate students who have demonstrated distinguished academic performance may apply for a graduate assistantship. All assistantships require students to work 20 hours per week. To apply, please fill out the Application Form and submit the required materials described therein by March 23rd for the Fall semester. For information about the stipend and the application process, contact Dr. Kiwon Seo, Graduate Studies Coordinator, by email at Dr. Kiwon Seo (kws014@shsu.edu) or by phone at 936-294-4036.

Master of Arts in Emerging and Social Media

The Master of Arts in Emerging and Social Media program at Sam Houston State University focuses on two interrelated, important areas of digital communication: emerging and social media. The current media landscape requires communication specialists to possess not only advanced skills for creative media content production, but also holistic understanding of strategic media planning, audience analysis, and critical assessment of communication processes. The MA in Emerging and Social Media program allows students to acquire both comprehensive skills and knowledge for effective media communication, helping students achieve their professional and/or academic goals.

Courses in emerging media teach advanced skills of up-to-date technologies in creative media production, including virtual reality, augmented reality, mobile applications, and video/audio. Social media courses cover extensive knowledge and theories of how to engage the target audience, design strategic plans, build meaningful relationships, and analyze and present results. This MA program aims to educate well-rounded media specialists.

Successful completion of an emerging or social media project is required for graduation. This project, which is evaluated by a committee of three mass communication faculty, is given during the final semester. The media project evaluation committees are appointed by the Graduate Advisor in consultation with the Graduate Committee and student. Students must be enrolled the semester that they submit their project for evaluation.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/graduate/emerging-and-social-media/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Students seeking admission to the Master of Arts in Emerging and Social Media program must meet the following requirements and submit all documents to the Office of Graduate Admissions (<https://www.shsu.edu/dept/graduate-admissions/prospective-students.html>):

1. Graduate Application (<http://www.shsu.edu/admissions/apply-texas.html>)
2. Application fee (<http://www.shsu.edu/dept/graduate-studies/application-fee.html>)
3. An official transcript from the baccalaureate degree-granting institution
4. A 500-word personal statement outlining the student's (a) educational or professional experience with emerging media, social media, or digital media, (b) areas of interest in emerging or social media, and (c) goals and objectives in this program
5. Contact information for two references
6. A current resume
7. For international students only: Required TOEFL score of 550 (paper-based), 213 (computer-based), or 79 (internet-based)

Enrollment Calendar:

This fully online MA degree in Emerging and Social Media offers multiple admission dates throughout the year to support the 7-week course offering schedule. Applicants are accepted throughout the calendar year and can start the program at anytime.

Assistantship Deadline:

Students seeking graduate assistantships should complete their application by March 23rd for best consideration.

Notes:

A holistic review of each student's application file will be completed on a competitive basis.

The Texas Higher Education Coordinating Board (THECB) marketable skills initiative is part of the state's 60x30TX plan and was designed to help students articulate their skills to employers. Marketable skills are those skills valued by employers and/or graduate programs that can be applied in a variety of work or education settings and may include interpersonal, cognitive, and applied skill areas.

The MA in Emerging and Social Media is designed to provide graduates with the following marketable skills:

- Strong oral and written communication skills.
- Social media planning and assessment.
- Media content production skills.
- Media management skills.
- Evidence-based social media research.

Master of Fine Arts in Digital Media Production

The MFA program in Digital Media Production at Sam Houston State University is a terminal degree program that equips media practitioners and media education professionals with sophisticated knowledge of emerging media technologies and digital media content. The degree program also empowers students to create professional digital media content across different platforms, media, and distribution methods.

The program covers a variety of issues in Digital Media Production, including mobile application development, digital streaming techniques, mobile content creation and editing software, motion graphics and effects, and the comprehensive analysis of social media. These skills are not only essential for employment in traditional media industries, but also of growing importance to educational institutions, government entities, global conglomerates, and local corporations.

To earn the MFA degree, students are required to take 54 course credits and to submit a digital media portfolio. The portfolio is evaluated during the final semester by a committee of three mass communication faculty. Digital media portfolio evaluation committees are appointed by the Graduate Advisor in consultation with the Graduate Committee and student. Students must be enrolled the semester in which they submit their portfolio for evaluation.

Additional information: Reference the Program Landing Page (<https://www.shsu.edu/programs/graduate/digital-media-production/>) for additional information, such as cost, delivery format, contact information, or to schedule a visit.

Students wishing to pursue an MFA in Digital Media Production must meet the following requirements and submit all documents to the Office of Graduate Admissions.

1. Graduate Admissions Application (submitted online through ApplyTexas (<http://www.shsu.edu/admissions/apply-texas.html>))
2. Application Fee
3. An official transcript from a baccalaureate degree-granting institution
4. A 500-word personal statement outlining personal goals and objectives for the program
5. A digital media portfolio or a link to an online digital media portfolio
6. Contact information for three references
7. A current resume
8. **For International Students Only:** Required TOEFL score of 550 (paper-based), 2/3 (computer-based), or 79 (internet-based)

Assistantship Deadline:

Students seeking graduate assistantships should complete their application by **March 23rd** for best consideration.

Department of Theatre and Musical Theatre

Interim Chair: Nicholas Graves (nag023@shsu.edu), MFA

Contact Information:

(936) 294-1329

theatre@shsu.edu

Website: Department of Theatre & Musical Theatre (<http://www.shsu.edu/academics/theatre/>)

Mission

The Department of Theatre and Musical Theatre at SHSU is committed to providing excellent performance, choreographic design, and technical curricula of artistic and scholarly pursuits. Individual programs are sufficiently balanced and integrated to allow students to choose from a wide variety of careers in theatre or musical theatre and prepare them to compete successfully in the chosen area of artistic, commercial, or educational specialization. The programs within the Department of Theatre and Musical Theatre are accredited by the National Association of Schools of Theatre (NAST).

Academic Programs

The Department of Theatre and Musical Theatre currently offers only undergraduate degree programs. See the current undergraduate catalog for more details.

Courses

The Department of Theatre and Musical Theatre does not currently offer graduate courses. Please consult the current undergraduate catalog for course offerings.

School of Music

Accredited by National Association of Schools of Music

About

Chair: Dr. Scott D. Plugge (mus_sdp@shsu.edu)

Contact Information: (936) 294-1360

Website: School of Music (<http://www.shsu.edu/academics/music/>)

Mission

The Sam Houston State University School of Music exists as a community of musician-educators whose mission is:

- To educate and train students for lives of service and contribution — as teachers, performers, composers, therapists, and scholars;
- To provide and nurture a nucleus of musical life for the larger community;
- To educate the university student population regarding music's intrinsic value as a part of the human experience and its central role in human culture; and
- To mutually encourage one another in professional growth and attainment.

Our mission encompasses a variety of programs and curricula, traditional and innovative, which are regularly examined for effectiveness, quality and relevance. It includes our commitment to a combination of:

- Classroom studies in music; and
- The live performance of music both individually and collectively, as central to music study, development, and knowledge.

As an integral part of our mission, we commit ourselves to continuing steps toward realizing the full potential of community, both as teachers and as colleagues; further, we commit to interaction with our students that emphasizes personal attention and interest in their total musical/intellectual development.

Highlights

The School of Music is part of the College of Arts and Media. The college brings together a faculty of artists and educators in a collaboratively creative environment to enrich the lives of students and the community. Graduate degree programs are offered in many areas as preparatory courses for entrance into the professions.

The School of Music is accredited by the National Association of Schools of Music (NASM). We currently offer graduate degrees in performance, composition, conducting, musicology, and an MA in band studies. In addition, we offer two certificate programs (Performers Certificate and Artist Diploma) to accommodate non-degree seeking students' needs in the performance areas. Students have excellent performing opportunities in outstanding choral and instrumental ensembles, as well as jazz, opera, and chamber groups.

The Music faculty includes a community of internationally recognized performers, scholars, and educators. With an outstanding student-to-teacher ratio, students receive close, personal attention and many opportunities to interact with dedicated professionals.
