Mission

The Math Center at the Academic Success Center provides a safe, encouraging environment for all students that promotes the learning and development necessary for achieving academic success and a lifetime of self-sufficient learning.

Why Math?

Mathematics is a powerful tool for solving practical problems, combining logic and precision with intuition and imagination. The basic goal of mathematics is to reveal and explain patterns. - whether the pattern appears as electrical impulses in an animals nervous system, as fluctuations in stock market prices, or as fine detail of an abstract geometric figure.

Who We Are...

Tutors: Math tutors consist primarily of Mathematics, Statistics, and Math Education majors. Most of our tutors have completed Calculus II and many advanced mathematics courses.
