A Report of the Assessment of Written Communication (AWC)
College of Business Administration and College of Criminal Justice
Spring 2016

Description of Assessment of Written Communication (AWC)

Each academic year, approximately 500 student writing artifacts are collected and assessed using a locally-developed writing rubric. This rubric was developed by faculty with expertise in teaching and assessing student writing and is assumed to have content related validity (Banta & Palomba, 2015). Over a three-year period, each academic college at SHSU will participate in the Assessment of Written Communication (AWC) and submit artifacts for scoring. These student artifacts either come directly from courses within those colleges or from required capstone projects; therefore, the artifacts represent authentic student work (Banta & Palomba, 2015; Kuh et al. 2015).

The Student data presented within this report reflect student performance regarding the Texas Higher Education Coordinating Board's Core Learning Objective of Communication Skills (THECB, 2016). The THECB (2016) defines Communication Skills as "effective development, interpretation, and expression of ideas through written, oral and visual communication." Data from this assessment may therefore be used to address the written communication element of the broader concept of Communication Skills. These data should therefore be used in conjunction with other data to fully understand student knowledge and ability with regards to this Core Learning Objective.

Methodology

A total of 587 artifacts were submitted from upper division courses in the College of Business Administration (331) and the College of Criminal Justice (256); although, some were not scored. Of the artifacts not scored, 9 were anchor papers used for norming, and 31 were not used as part of this assessment because they were extra artifacts or were illegible. Therefore, a total of 547 artifacts from both colleges for 2015-2016 were scored as part of this writing assessment.

Student writing artifacts were scored by faculty and staff volunteers during a two-day scoring session using a locally-developed writing rubric. This rubric was divided into four separate domains: (1) Ideas/Critical Thinking/Synthesis; (2) Style; (3) Organization; and (4) Conventions. A copy of this rubric is provided in the Appendix. Each domain is scored individually from 1 to 4, with 1 being the lowest and 4 being the highest. Each artifact was reviewed by two raters, with a third rater introduced when the scores were too far out of agreement (i.e., a score of 1 and 4 for the same domain). The third rater would only score those domains that were not in agreement and the two closest scores would be kept. The individual domain scores for each student writing artifact were then averaged together to provide a total average score for the artifact.

Score Reliability

Intra-class correlational coefficients (ICCs) were calculated to determine the level of inter-rater agreement for each domain of student writing, as well as the overall average scores (Fleiss, 2003; Shrout & Fleiss, 1979). According to Cicchetti (1994), ICC agreement values below .40 are to be interpreted as demonstrating poor agreement, from .40 to .59 as demonstrating fair agreement, .60 to .74 as demonstrating good agreement, and above .75 as demonstrating excellent agreement. The agreement values for two of the four domains were .60 (i.e., Organization, Conventions) indicating good agreement, while two of the four domains (i.e., Ideas/Critical Thinking/Synthesis, Style) were below .60 indicating fair agreement. The

agreement value for the overall average score was .68 indicating fair agreement. A complete breakdown of the ICC agreement values may be found in Table 1.

Table 1.

Breakdown of ICC Agreement by Domain Area

Domain Area	Intraclass Correlation for Average Measures
Ideas/Critical Thinking/Synthesis	.59
Style	.46
Organization	.60
Conventions	.60
Overall Average	.68

Results

Descriptive statistics are provided of the average student score for each domain, as well as the overall average, for each College and Department participating within this assessment. A full break down of College-level data can be found in Table 2. A breakdown of Department-level data for the College of Business Administration can be found in Table 3.

Table 2.

Descriptive Statistics for Student Writing Performance by College

College	n	<i>M</i>	<i>SD</i>
College of Business Administration			
Ideas/Critical Thinking/Synthesis	320	2.46	0.62
Style	320	2.37	0.55
Organization	320	2.63	0.62
Conventions	320	2.34	0.61
Overall Average	320	2.45	0.50
College of Criminal Justice			
Ideas/Critical Thinking/Synthesis	227	2.32	0.78
Style	227	2.19	0.71
Organization	227	2.45	0.76
Conventions	227	1.98	0.74
Overall Average	227	2.23	0.64

Table 3.

Descriptive Statistics for Student Writing Performance by Department

Department	n	<i>M</i>	<i>SD</i>
Accounting			
Ideas/Critical Thinking/Synthesis	56	2.56	0.49
Style	56	2.45	0.48
Organization	56	2.62	0.56
Conventions	56	2.52	0.61
Overall Average	56	2.54	0.40
General Business and Finance			
Ideas/Critical Thinking/Synthesis	158	2.37	0.64
Style	158	2.27	0.55
Organization	158	2.62	0.60
Conventions	158	2.32	0.60
Overall Average	158	2.39	0.51
Management and Marketing			
Ideas/Critical Thinking/Synthesis	106	2.54	0.63
Style	106	2.47	0.57
Organization	106	2.67	0.68
Conventions	106	2.30	0.61
Overall Average	106	2.50	0.51

Appendix
Writing Assessment Rubric

Writing Assessment Rubric

This rubric asks you to identify features of the writing present in the sample. You should *apply the numerical score based on degree of presence* of the characteristic features. The writing features selected for the rubric are those most likely present in any disciplinary writing sample and represent a writing level expected of a senior-level college student.

Legend: N/A = Not Applicable
 1 = few features are present
 2 = features are not often present
 3 = features are often present
 4 = features are most always present

CATEGORY	CHARACTERISTIC FEATURES
<p>Ideas/Critical Thinking/Synthesis <i>The depth of sophistication of thoughts and ideas.</i> Features may include research, reasoning, evidence, detail, and development (appropriate to the field and genre)</p>	<ul style="list-style-type: none"> • Central subject or argument of the assignment is easily identified, clearly emphasized, consistent with the evidence, and intriguing • Reasoning is fully developed throughout the assignment with logical examples, details, and evidence where and as appropriate • Assignment contains information that addresses counterarguments, biases, or reader's expectations as appropriate
<p>Style <i>The choices the writer makes for specific audiences.</i> Features may include word choice, tone, and sentence length and structure</p>	<ul style="list-style-type: none"> • Sustained awareness of audience throughout the assignment • Writing tone suits the audience and enhances the assignment's purpose • Sentence structure varies according to the content, purpose, and audience • Sentences are consistently clear and logical • Word choice is appropriate to the writing task
<p>Organization <i>The coherence of the writing.</i> Features may include balance and ordering of ideas, flow, transition, and appropriate format (as defined in assignment)</p>	<ul style="list-style-type: none"> • Text is purposefully organized and substantially developed in a way that clarifies the argument and enhances style • Arrangement of ideas (overall structure) is clear, logical, and compelling as appropriate to the assignment; the reader moves through the text easily • Internal structure is cohesive and coherent; text flows and ideas are clearly and logically connected • Transitions used appropriately
<p>Conventions <i>Adherence to standard American edited English.</i> Features include grammar, punctuation, capitalization, spelling, and documentation.</p>	<ul style="list-style-type: none"> • Grammar and mechanics support the reader's understanding of the writer's purpose without distracting errors • Documentation style is consistent, if appropriate to assignment • Sources, when appropriate, are effectively integrated into the body of the assignment • Minor errors do not interfere with readability or damage the writer's credibility (as appropriate to the assignment parameters)
